"In *fenny* Holland and in fruitful Tweed."
Dryden: Hind & Panther, i. 209.

* 3. Inhabiting or growing in fens or marshes; bred in bogs.

"Fillet of a *fenny* snake
In the cauldron boil and bake."
Shakesp.: Macbeth, iv. 1.

*** fĕn′-nȳ-stōnęs,** *s.* [Eng. *fenny,* and *stones.*]

Bot.: An unidentified plant. (*Bailey.*)

*** fen-euil-let,** *s.* [Fr. *fenouillette.*] Fennel-water.

"Went home to take some *fenouillet,* I was so sick of him."—*Swift: Real Diary,* p. 5.

*** fĕn′-ōwed,** *a.* [Vinnewed.] Mouldy, decayed, out of date, obsolete.

"The foisty and *fenowed* festival."—*Dr. Favour: Antiquities Triumphing over Novelty* (1619), p. 334.

*** fĕn′-sĭve,** *a.* [Eng. *fens* = defence; *-ive.*] Defensive.

"His hand that *fensive* service had reuded."
Stanyhurst: Virgil: Æneid, ii. 301.

fĕnt, *s.* [Fr. *fente* = a slit.] The opening left in an article of dress (as in the sleeve of a shirt, the skirt of a gowu), for convenience in putting it on; a placket.

"*Fente* of a clothe *Fibulatorium ámbria.*"—*Prompt. Parv.*

fĕn′-ų-greēk, *s.* [Lat. *fœnum Græcum* = Greek hay.]

Botany:

1. *Trigonella fœnum Græcum,* a plant, the seeds of which are bitter and mucilaginous, and are used in veterinary practice.

2. The genus Trigonella (q.v.). (*Hooker & Arnott; Sir Joseph Hooker, &c.*)

*** feod (eo** as **ū),** *s.* [Feud, (2).]

*** feod′-al (eo** as **ū),** *a.* [Fr.] The same as Feudal (q.v.).

"The grand and fundamental maxim of all *feodal* tenure is this, that all lands were originally granted out by the sovereign, and are therefore holden, either mediately or immediately, of the crown."—*Blackstone: Comment.,* bk. ii., ch. 4.

*** feo-dăl′-ĭ-tў (eo** as **ū),** *s.* [Fr. *féodalité.*] The feudal system; feudal tenure; feudality.

*** feod′-ar-ў (eo** as **ū),** *s.* [Feudary.]

I. *Ordinary Language:*

1. One who holds lands of a superior by feudal tenure.

2. A confederate.

"Senseless bauble,
Art thou a *feodary* for this act, and look'st
So virgin like without?"
Shakesp.: Cymbeline, iii. 2.

II. *Old Law:* An officer of the court of wards who was present with the escheator in every county at the finding of offices of lands, and who gave evidence for the king both as to the value and tenure of the land.

feo′-dą-tŏr-ў (eo as **ū),** *s.* [Feudatory.]

*** fēeff, * feffe, * fefe,** *v.t.* [O. Fr. *feoffer, fiefer,* from *fief* = a fief; Low Lat. *feoffo.*]

1. To invest with a fief; to enfeoff; to give or grant a corporeal hereditament to.

"Men of relygyon of Normaudye also
He *feffede* here inld londes."
Robert of Gloucester, p. 368.

2. To make a present to; to present.

"*Feffe* false witnesses with floryns ynowe."
P. Plowman, 1,170.

3. To endow.

"May God forbid to *feffe* yon so with grace."
Chaucer: Court of Love.

*** fēoff,** *s.* [Feoff, *v.*] A fief (q.v.).

fēof′-fēe, *s.* [O. Fr. *feoffé,* pa. par. of *feoffer* = to enfeoff.]

Law: One who is enfeoffed or invested with a fief.

"The late earl of Desmond, before his breaking forth into rebellion, conveyed secretly all his lands to *feoffees* in trust."—*Spenser: State of Ireland.*

fēof′-fĕr, fēof′-fòr, *s.* [O. Fr. *feoffor;* Low Lat. *feoffator.*]

Lat.: One who enfeoffs or invests another with a fief; one who grants a fee.

"Feoffment may be defined the gift of any corporeal hereditament to another; he that so gives being called the *feoffor;* and the person enfeoffed the *feoffee.*"—*Blackstone: Comment.,* bk. ii., ch. 17.

*** fēeff′-mĕnt, * feffe-ment,** *s.* [O. Fr. *feofment;* Low Lat. *feoffamentum.*]

Law:

1. The act of granting a feud or fee.

"Any gift or grant of any honours, castles, lands, or other immoveable things, to another in fee-simple, that is, to him and his heirs for ever, by the delivery of seisin of the thing given: when it is in writing, it is called a deed of *feoffment;* and in every *feoffment* the giver is called the feoffer, feoffator, and he that receiveth by virtue thereof the feoffee, feoffatus. The proper difference between a feoffer and a donor is, that the feoffer gives in fee-simple, the donor in fee-tail."—*Cowel.*

2. The conveyance or gift of any corporeal hereditament to another, accompanied by actual delivery of possession, as by handing over a twig, or a turf. Without such delivery, called livery of seisin, the feoffee had at common law but a mere estate at will.

"For many years *feoffments* have been little used in practice. This kind of conveyance had the effect of passing a fee, if purporting to do so, even though the feoffer had a less estate. It was sometimes used because it also destroyed contingent remainders and powers appendant; but there was this risk, that it might create a forfeiture of the grantor's estate. Hence it was called a tortious conveyance, while other assurances, such as bargain and sale, lease and release, were styled innocent conveyances, having no operation beyond passing such estate as the grantor had to convey. The statute 8 & 9 Vic., c. 106, however, abolished the tortious operation of *feoffments;* and enacting, at the same time, that corporeal hereditaments should be in grant as well as in livery, practically did away with livery of seisin; and removed altogether the grounds upon which *feoffments* were occasionally resorted to."—*Blackstone: Comment.,* bk. ii., ch. 17.

3. The instrument or deed by which corporeal hereditaments are conveyed.

*** feoh,** *s.* [Fee.]

*** feend,** *s.* [Fiend.]

*** fe-or,** *s.* [O. Fr., Ital., & Port, *feno,* from Lat. *forum* = a market.] Price, value.

"Sete *feor* of thine lnue."—*Ancren Riwle,* p. 398.

*** fe-or,** *a. & adv.* [Far.]

*** feorthe,** *a.* [Fourth.]

*** feower,** *a. & s.* [Four.]

*** fer,** *a. & adv.* [Far.]

*** feerm, * feerme,** *s.* [A.S. *feorm, fearme* = food, goods, use, advantage.] [Farm.]

Law: A certain portion of the produce of land, due by a grantee to the lord according to the terms of the charter. (*Wharton.*)

*** fē-rā′-cious,** *a.* [Lat. *ferax* (genit. *feracis*) from *fero* = to bear.] Bearing, fruitful, productive.

"Like an oak
Nursed on *feracious* Algidum."
Thomson: Liberty, iii. 363.

*** fē-răç′-ĭ-tў,** *s.* [Lat. *feracitas,* from *ferax* (genit. *feracis*) = fruitful.] Fruitfulness, fertility, productiveness.

"Such writers instead of brittle would say fragile, instead of fruitfulness *feracity.*"—*Beattie: Elements of Moral Science,* pt. iv., ch. i., § 3.

fēr′-æ, *s. pl.* [Lat.]

Zool.: The name given by Linnæus to one of his orders of Mammalia. He included under it the genera Phoca, Canis, Felis, Viverra, Mustela, Ursus, Didelphis, Talpa, Sorex, and Erinaceus. These are now divided among the orders Carnivora, Marsupialia, and Insectivora.

feræ naturæ, *phrase.* Of a wild nature or state. (Applied, in law, to animals living in a wild state, as deer, hares, pheasants, &c., as distinguished from animals which are domesticated, as the cow, fowls, &c.) Property in animals *ferœ naturœ,* is only qualified, not absolute.

fēr′-al (1), *a.* [Lat. *fer(a)* (sc. *bestia*) = a wild beast; *-al.*] Relating to or in any manner connected with the genera enumerated under Feræ (q.v.).

"Like *feral* carnivora, primitive man made use of caves, as do certain savage races of the present day."—*Lindsay: Mind in the Lower Animals,* i. 40.

*** fēr′-al** (2), *a.* [Lat. *feralis;* Fr. *féral;* Ital. *feralo.*]

1. Pertaining to funerals; funereal.

2. Fatal, deadly.

"*Feral* plagues, devourers, common executioners of human kind."—*Burton: Democritus To the Reader,* p. 33.

fēr′-bĕr-īte, *s.* [Named after R. Ferber, of Gera, and Eng. suff. *-ite* (*Min.*) (q.v.).]

Min.: A massive granular mineral of a black colour, found in Southern Spain, in argillaceous schist with quartz. Hardness, 4–4·50; sp. gr. 6·8–7·1.

*** fĕrd, * fered,** *pa. par.* [Fear, *v.*]

*** fĕrd, * fērde,** *pret. & pa. par.* [Fare.

*** fĕrd,** *a.* [Icel. *fiorda.*] Fourth.

"Skars on the *ferd* day at morne did I aspie
Hie from the wallis croppis Italie."
Douglas: Virgil, 175, 48.

*** fĕrd** (1), *** fērde** (1), *s.* [M. H. Ger. *gevœrde.*]

1. Fear, terror.

"Thenne such a *ferde* on hem fel."
E. Eng. Allit. Poems: Patience, 218.

2. Force, ardour.

"It was our great desire to have at once been at handy-strokes, well understanding that the *ferd* of our hot spirits could not long abide in edge."—*Baillie: Letters,* i. 170.

*** fĕrd** (2), *** færd, * ferde** (2), *s.* [A.S. *ferd, fyrd;* O. Fris. *ferd;* O. S. *fard;* O. H. Ger. *fart;* Icel. *ferdh;* Sw. *färd;* Dan. *færd.*] A company, a body of men.

"Robert that was of al the *ferd* mayster."
Havelok, 2,384.

fēr′-dę-lănçe, *s.* [Fr. = iron of a lance—*i.e.,* lance-head.]

Zool.: The Yellow Viper of Martinique, *Bothrops lanceolatus.* It belongs to the Crotalidæ or Rattlesnake family. It is found in the sugar plantations of Brazil and the West Indian Islands, and is exceedingly poisonous. It attains a length of five to seven feet. The tail ends in a horny spike. When in pursuit of its prey it can spring to a great distance.

*** fērd′-fŭl, * feerd-ful,** *a.* [Eng. *ferd* (1) *s.*; *-ful*(*l*).]

1. Full of fear or terror; afraid, timid; fearful.

"Who is a *ferdful* man and of gastful herte?"—*Wycliffe: Deut.* xx. 8.

2. Causing fear or terror; to be feared or dreaded.

"Who is thee like, worschipful in holynes, *feerdful* and preisable?"—*Wycliffe: Select Works*, iii. 21.

***fērd'-fūl-nēss,** ***ferd-ful-nesse,** *s.* [Eng. *ferdful*; *-ness.*] Frightfulness, dreadfulness.

fĕr'-gŭs-ŏn-ite, *s.* [Named after Robert Ferguson, of Raith, and Eng. suff. *-ite* (*Min.*) (q.v.).]

Min.: A brownish-black, subtranslucent or opaque mineral, found near Cape Farewell in Greenland, disseminated in quartz, and also at Ytterby in Sweden. Hardness, 5·5–6; sp. gr. 5·8.

***fer-hede,** *s.* [Mid. Eng. *fere* (2), a., and auff. *-hede, -hood.*] Company.

"As he wende in his *ferhede*
Toward the batail." *Robert of Gloucester*, p. 188.

***fer-i,** *s.* [FERRY, *s.*]

***fēr'-ĭ-æ,** *s. pl.* [Lat.]

Roman Antiq.: Public holidays, during which all labour ceased, and all judicial and political proceedings were suspended. The *feriæ* were divided into two classes, *feriæ publicæ*, or general holidays, and *feriæ privatæ*, or private holidays, observed by certain families or individuals only in commemoration of some particular occurrence to them or their ancestors. On these days the temples were visited, and prayers and sacrifices offered, and as public games formed an important feature in the worship of the gods, the terms *ludi* (games) and *feriæ* were frequently employed as synonymous.

***fēr'-ĭ-al, *fer-i-ale, *fer-i-all, *fer-i-ell, *fer-y-ale,** *a.* [Lat. *ferialis*, from *feriæ* = holidays; Fr. *férial*; Sp. & Port. *ferial*; Ital. *feriale.*]

I. *Ord. Lang.:* Pertaining to holidays; of the nature of a holiday.

"They did learn to dance and to sing, and to play on instruments on the *ferial* days."—*Dugdale: Orig. Judic.*, ch. lv.

2. *Scots Law:* Applied to those days during which it was not lawful for courts to be held or any judicial steps taken.

"Within *feryale* tyme on gude Wednisday in Passione woulk."—*Act. Audit* (an. 1471), p. 16.

***fēr-ĭ-ā'-tion,** *s.* [Lat. *feriatus* = keeping holiday; *feriæ* = holidays.] A keeping holiday; a cessation from labour.

"Brown has words still more extraordinary as *feriation* for keeping holiday, dedentition for falling the teeth, &c."—*Beattie: Moral Science*, pt. iv., ch. i., § 3.

***fēr'-ie, *fer-ye,** *s.* [O. Fr. *ferie, foirie*; Lat. *feriæ.*] A holiday, a feast.

"These ben the *feries* of the Lord, whiche ye schulen clepe hooli."—*Wycliffe: Levit.* xxiii. 2. (*Purvey.*)

***fēr'-ĭ-ent,** *a.* [Lat. *feriens*, pr. par. of *ferio* = to strike.] Striking, beating. (*Ash.*)

***fēr'-īne,** *a.* & *s.* [Lat. *ferinus*, from *fera* = a wild beast.]

A. *As adj.:* Wild, savage, untamed.

"The only difficulty is touching those *ferine*, noxious, and untameable beasts; as lions, tigers, wolves, bears."—*Hale: Origin of Mankind*, p. 202.

B. *As subst.:* A wild beast.

***fēr'-īne-lў,** *adv.* [Eng. *ferine*; *-ly.*] In the manner of wild beasts; like a wild beast.

fēr'-īne-nĕss, *s.* [Eng. *ferine*; *-ness.*] Savageness, wildness.

"A ferine and necessitous kind of life, . . . would assimilate the next generation to barbarism and *ferineness*."—*Hale: Origin of Mankind*, p. 197.

Fēr-ĭn'-ghee, Fēr-ĭn'-gee, *s.* [A corrupt. of *Frank* (q.v.).] The name given by the Hindus to the English and other Europeans. It appears to have arisen at the period when the French seemed more likely than the British to obtain empire in India, and were more talked of by the natives. Now the word is used chiefly of the English, and is intended to be disrespectful rather than complimentary.

fēr'-ĭ-ō, *s.* [A word of no etymology.]

Logic: A mode in the first figure of syllogisms, in which the Middle Term is made the subject of the Major and the predicate of the Minor premiss. It is composed of a Universal Negative, a Particular Affirmative, and a Particular Negative, *e.g.*,

(fEr) No A is B.
(I) Some C is A.
(O) Some C is not B.

fēr'-ĭ-sō, fer-i-son, *s.* [A word of no etymology.

Logic: A mode in the third figure of syllogisms, in which the Middle Term is the subject both of the Major and the Minor Premises. Ferison differs from Felapton in that that the Minor Premiss is a Particular instead of a Universal Affirmative.

***fēr'-ĭ-tў,** *s.* [Lat. *feritas*, from *ferus* = wild, fierce.] Fierceness, wildness, savageness.

"Those who use to eat or drink blood are apt to degenerate into *ferity* and cruelty."—*Taylor: Rule of Conscience*, bk. ii., ch. ii.

fēr'-mĕnt, *s.* & *a.* [Lat. *fermentum*, or *fervimentum*, from *ferveo* = to boil, to be agitated; Fr. *ferment*; Sp., Port., & Ital. *fermento.*]

A. *As substantive:*

I. *Ordinary Language:*

1. *Literally:*

(1) In the same sense as II.

(2) A gentle internal motion or boiling of the constituent parts of a fluid.

"Down to the lowest lees the *ferment* ran."
Thomson; Castle of Indolence, ii. 30.

2. *Fig.:* A state of commotion, agitation, or disturbance.

"He had no sooner entered on his functions than all Paternoster Row and Little Britain were in a *ferment*."—*Macaulay: Hist. Eng.*, ch. xix.

II. *Chem.:* Ferments are substances which cause fermentation (q.v.). They are of two kinds: (1) Chemical, or unorganized, as diastase, emulsin, myrosin, the ferment of the pancreas, &c.; (2) Physiological, or organized, such as yeast, mycoderms, microzymes, bacteria, &c. A mode of distinguishing between the two is afforded by the action of chloroform, which kills the latter, but does not produce any alteration in the former. Thus chloroform arrests the fermentation of sugar, but does not interfere with the action of emulsin or amygdalin. Unorganized ferments may be extracted from the vegetable and animal organs in which they occur by means of glycerine. Thus diastase may be extracted from germinating wheat and barley, emulsin from sweet almonds, and animal sugar, forming ferment, from the glands which produce it. The ferment may be precipitated from the

glycerine solution by alcohol, and purified by repeated solution and precipitation. The ferment of the pancreas acts on fibrine at 90°. It is said that organized ferments have been produced by spontaneous generation in organic liquids (*Bastian*, in *Proc. Roy. Soc.*, xxv. 149), but careful experiments have shown that the germs of these ferments are floating in the air. Borax appears to prevent fermentation, and has been recommended for preserving meat from putrefaction (*Watts: Dict. Chem.*, supp. iii.

B. *As adj.:* (See the compound).

ferment-oils, *s. pl.*

Chem.: Volatile oils produced by the fermentation of various plants, not originally contained therein, and different from the oils which are extracted from the unfermented plants by distillation with water. They were known to the alchemists, and by them designated quintessences. Ferment-oils are for the most part more soluble in water than ordinary volatile oils. They are generally formed by allowing the flowering-plant to ferment in water; the liquid is distilled when the fermentation is ended, and the oil extracted from the distillate by shaking it with ether, which dissolves the oil; the ether is then allowed to evaporate off. (*Watts: Dict. Chem.*)

fĕr-mĕnt', *v.t. & i.* [Lat. *fermento*, from *fermentum*, from *ferveo* = to boil, to be agitated; Fr. *fermenter*; Sp. *fermentar*; Ital. *fermentare.*]

A. *Transitive:*

1. To cause or excite fermentation in.

"A moist and well *fermented* earth."—*Bp. Hall: Sermon* (Jan. 29, 1625).

2. *Fig.:* To excite, to agitate, to heat, to warm, to excite.

"Ye vigorous swains! while youth *ferments* your blood,
And purer spirits swell the sprightly flood,
Now range the hills." *Pope: Windsor Forest*, 193.

B. *Intransitive:*

1. *Lit.* To be in a state of fermentation; to effervesce; to undergo sensible internal motion, as the constituent parts of a fluid.

2. *Fig.:* To be in a state of ferment; to be agitated, heated, warmed, or excited, as by violent emotions.

"We take the skull up, and muse over the frolic and dancing, with which that empty bowl once *fermented*."—*Thackeray: English Humourists*, lect. ii.

* **fĕr-mĕnt-a-bĭl'-ĭ-tў,** *s.* [Eng. *ferment*; *-ability*.] The quality or state of being fermentable; capability of fermentation.

* **fĕr-mĕnt'-a-ble,** *a.* [Eng. *ferment*; *-able.*] That may or can be fermented; capable of fermentation.

* **fĕr-mĕn'-tal,** *a.* [Eng *ferment*; *-al.*] Having the power or property of causing fermentation.

"Cucumbers, being waterish, fill the veins with crude and windy serosities, that contain little salt or spirit, and debilitate the vital acidity and *fermental* faculty of the stomach."—*Browne: Vulgar Errours*, bk. iii., ch. vii.

* **Fĕr-mĕnt-ăr'-ĭ-ans,** *s. pl.* [Eng. *ferment*; *-arian.*] The Christians of the Greek Church, so called by the Latins on account of their using fermented bread in the Eucharist. (*Ash.*)

* **fĕr-mĕnt-ăr'-i-ous,** *a.* [Eng. *ferment*; *-arious.*] Belonging to fermentation. (*Cole.*)

* **fĕr'-mĕn-tāte,** *v.t.* [Lat. *fermentatus*, pa. par. of *fermento.*] To leaven.

"The largest part of the Lords were *fermentated* with an anti-episcopal sourness."—*Hacket: Life of Williams*, ii. 179.

fĕr-mĕn-tā'-tion, *s.* [Fr., from Lat. *fermentatus*, pa. par. of *fermento* = to ferment; Sp. *fermentacion*; Ital. *fermentazione.*]

I. *Ordinary Language:*

1. *Lit.:* In the same sense as II.

2. *Fig.:* A state of excitement, agitation, or commotion of spirit; a ferment.

II. *Chem.:* Alcoholic fermentation was known to the ancients, and is the change which sugar undergoes under the influence of yeast. Before fermentation takes place, cane sugar is transformed into glucose, thus, $C_{12}H_{22}O_{11}+H_2O = 2C_6H_{12}O_6$. About 95 per cent. of the glucose is converted into alcohol, $C_6H_{12}O_6 = 2CO_2 + 2C_2H_5{\cdot}OH$. Of the other 5 per cent., about 1 part is used by the growth of yeast, the other 4 parts are converted into succinic acid, glycerine, carbonic acid, and free hydrogen: a larger quantity of these secondary products is formed if the fermentation is slower, or is made with more exhausted and impure yeast. Fermentation takes place most readily at about 24° to 30°. The saccharine liquid becomes turbid, gives off CO_2, and becomes warmer than the air; when the evolution of CO_2 ceases, the yeast or ferment, *Torvula cerevisiæ*, separates from the liquid which now contains alcohol, glycerine, and succinic acid in the place of the sugar. A small quantity of acetic acid is always formed, probably from the decomposition of the yeast. Most of the natural saccharine juices, as beet-root, potato, and grape juice, when fermented, yield small quantities of alcohols, homologous with ethylic alcohol, forming Fusel oil (q.v.), which contains propyl, butyl, and amyl alcohols, also a small quantity of caprioic, œnanthyl, and caprylic alcohols. These may be produced probably not from glucose, but from some other substances present in the juice, or from glucose by the action of special ferments; an increase of yeast takes place when the liquid contains a nitrogenous substance; the action of yeast on sugar is prevented by too great concentration of the liquid. The presence of chemical compounds, as silver nitrate, soluble salts of lead, iron, copper, tannin, creosote, phenol, alcohol when its strength is above 20 per cent., and oxalic acid, hinders fermentation.

¶ (1) *Butyric fermentation:*

Chem.: The conversion of lactic acid, &c., into butyric acid, due to the presence of Vibrio, according to Pasteur.

(2) *Lactic fermentation:*

Chem.: The conversion of sugar into lactic acid, said to be due to the presence of *Penicillium glaucum*. It takes place when 2 gallons of milk are mixed with six pounds of raw sugar, 12 pints of water, 8 ounces of putrid cheese, and 4 lbs. of zinc white; the mixture is kept at a temperature of 30° for some weeks. If the fermentation is allowed to go further, the lactic acid, $CH_3{\cdot}CH{\cdot}OH{\cdot}CO{\cdot}OH$, is converted into butyric acid, $CH_3{\cdot}CH_2{\cdot}CH_2{\cdot}CO{\cdot}OH$.

(3) *Mucous fermentation:*

Chem.: The conversion of sugar into mannite, $C_6H_{12}O_6$, gum, $C_{12}H_{20}O_{10}$, and carbonic acid, CO_2, under the influence of a peculiar ferment.

(4) *Tannous fermentation:*

Chem.: The conversion of tannin, in a solution of galls, into gallic acid, $C_{27}H_{22}O_{17} + O_{12} = 3C_7H_6O_5 + 6CO_2 + 2H_2O$. The conversion of alcohol into acetic acid is due to slow oxidation, as the presence of a ferment is not required, but it takes place rapidly in the presence of *Mycoderma aceti*, in a solution containing 10 per cent. of alcohol, at a temperature between 20° and 30°.

1. *Botany:*

(1) *Gen.:* The Filical Alliance, consisting of vascular Acrogens, with marginal or dorsal one-celled spore-cases, usually surrounded by an elastic ring; spores of only one kind. (*Lindley.*) Ferns are leafy plants, springing from a rhizome, which creeps below or on the surface of the ground, or rises into the air like the trunk of a tree. This trunk does not taper, but is of equal diameter at both ends. It is covered by a hard, cellular, fibrous rind; its wood, when any is present, consists of large, acalariform or dotted ducts; the

vernation of the leaves is circinate, their venation often dichotomous. Reproductive organs, consisting of spore-cases, arising from the veins on the lower surface of the leaves or from their margins. The collection of seeds are called sori. Most ferns are comparatively small, whilst some tree-ferns reach seventy-five feet high. The closest affinities of ferns is with Lycopodiaceæ. Seventy-five genera and about 2,500 species are known. Lindley divided them into three orders: Ophioglossaceæ, Polypodiaceæ, and Danæaceæ (q.v.). The last-named order is now generally called Marattiaceæ (q.v.). The three are thus distinguished: Ophioglossaceæ have the fructifications marginal, on racemiform fronds; Marattiaceæ have the fructifications dorsal on flat leafy fronds; Polypodiaceæ have the spore-cases not valvate, rarely somewhat two-valved vertically. The last has jointed spore-cases, the first two have none.

(2) *Spec.:* The order Polypodiaceæ. It contains all the Filical Alliance, with the exception of a few abnormal genera.

2. *Palæo-bot.:* The fronds of ferns or their impressions are frequently met with, and in a beautiful state of preservation. In some cases even the form of the sori has been preserved. Ferns are known from about the middle of the Silurian period. They became more numerous during the Devonian period; tree-ferns (Psaronius and Cyclopteris) appearing amongst the rest. Ferns are quite a notable feature of Carboniferous vegetation. There are both herbaceous and tree-ferns. The genera of the former are numerous. The most important are Sphenopteris, Pecopteris, Neuropteris, Cyclopteris, &c. The ferns of the Permian system are less numerous; they generally resemble those of the Carboniferous. Ferns abound again in the Oolitic rocks, after which they lose their relative importance as plants of higher organization multiply.

3. *Pharm.: Filix mas*, Male Fern, the dried rhizome of *Aspidium Filix mas*. It should be collected in summer. It is of a greenish-brown color externally, yel[illegible] within; the taste is at first sweet, then bitter; the powder

is yellowish-green. It is used to form *Extractum Filicis Liquidum*, fern in fine powder two pounds extracted with eighty fluid ounces of ether. It is anthelmintic, and is employed to expel tapeworms.

"No kindness will tame the sullen *ferocity* of a priesthood."—*Macaulay: Hist. Eng.*, ch. xvi.

¶ Crabb thus discriminates between *ferocious*, *fierce*, and *savage*: "*Ferocity* marks the untamed character of a cruel disposition: *fierceness* has a greater mixture of pride and anger in it, the word *fiers* in French being taken for haughtiness: *savageness* marks a more permanent, but not so violent a sentiment of either cruelty or anger as the two former. *Ferocity* and *fierceness* are in common applied to the brutes, to designate their natural tempers: *savage* is mostly employed to designate the natural temper of man, when uncontrolled by the force of reason and a sense of religion. In an extended application of these terms, they bear the same relation to each other: the countenance may be either *ferocious*, *fierce*, or *savage*, according to circumstances. A robber who spends his life in the act of unlawfully shedding blood acquires a *ferocity* of countenance: a soldier who follows a predatory and desultory mode of warfare betrays the licentiousness of his calling and his undisciplined temper in the *fierceness* of his countenance: the tyrant whose enjoyment consists in inflicting misery on his dependants or subjects evinces the *savageness* of his temper by the *savage* joy with which he witnesses their groans and tortures." (*Crabb: Eng. Synon.*)

fē-rō'-nĭ-a, *s.* [See def. 1.]

1. *Roman Myth.:* A goddess, commonly ranked among the rural divinities, and worshipped with great solemnity both by the Sabines and the Latins, but more especially by the former.

2. *Astron.:* An asteroid, the 72nd found. It was discovered by Peters, on Jan. 9, 1862.

3. *Bot.:* A genus of Aurantiaceæ (Citronworts), the order to which the orange belongs. The only known species is the Wood-apple or Elephant-apple (*Feronia elephantum*). It is a large and handsome tree, with pinnate leaves, and a large grey fruit with a very hard rind. It grows in India, where the native practitioners consider the young leaves, which when bruised have a smell like anise, stomachic and carminative.

4. *Entom.:* A genus of Coleoptera, belonging to the section Pentamera, and family Carabidæ.

fĕr-rār'-ĭ-a, *s.* [Named after J. B. Ferrari, an Italian botanist.]

Bot.: A genus of bulbous plants from the Cape of Good Hope. They belong to the natural order Iridaceæ.

***fĕr'-ra-rў,** *s.* [Eng. *ferrum* = iron.] [Farriery.] The art of working in iron. (*Chapman: Homer; Iliad* xvi.)

fĕr'-rāte, *s.* [Eng. *ferr(um)*; suff. *-ate* (*Chem.*).]

Chem.: A salt of ferric acid, H_2FeO_4. The free acid has not been obtained. When a mixture of four parts of dry potassium nitrate and one part of pure ferric oxide, Fe_2O_3, is heated to full redness for an hour in a covered crucible, and the resulting brown mass treated with ice-cold water, a deep violet-red coloured solution of potassium ferrate, K_2FeO_4, is obtained. Potassium ferrate is also prepared by passing chlorine gas through a strong solution of potassium hydrate in which recently precipitated ferric oxide is suspended. The potassium ferrate is precipitated as a black powder, which may be drained on a porous tile. A solution of potassium ferrate decomposes, oxygen being liberated, and hydrated ferric oxide is precipitated. Ferrate of barium, $BaFeO_4$, is obtained by adding $BaCl_2$, barium chloride, to a solution of the potassium salt. It is a deep crimson-coloured powder, and is a stable compound. Organic matter decomposes a solution of potassium ferrate.

fĕr'-rĕt (1), *s.* [Fr. *furet*, from Low Lat. *furetus*, *furectus*, the origin of which is doubtful, being derived by some from Lat. *fur* = a thief, by others from Bret. *fur* = wise; Wel. *fur* = wise, crafty; *furred* = a crafty one, a ferret; Gael. & Ir. *fèred.*]

1. *Zool.: Putorius furo*, a domesticated variety of the genus Putorius. It is of African origin, and is unable to endure great cold, even an English winter being sufficient to kill it if not properly housed. It is about fourteen inches in length, the fur of a pale yellow colour, and the eyes pink. Ferrets are much used, both in this country and America, for killing rats and driving rabbits out of their holes.

"Coneys are taken either by *ferrets* or purse-nets."—*Mortimer: Husbandry.*

2. *Glass-manuf.:* An iron used to make the rings at the mouths of bottles, or to try the melted matter.

fĕr'-rĕt (2), *s.* [Fr. *fleuret.*] A kind of narrow tape made of cotton, wool, or silk.

"Red wax and green *ferret*
Are fixed at the foot of the deeds."

fĕr'-rĕt, *v.t.* & *i.* [Ferret (1), *s.*]

A. *Transitive:*

I. *Lit.:* To drive out of a hole or retreat, as a ferret does a rabbit.

"The archbishop had *ferreted* him out of all his holds."—*Heylin: Hist. Presb.*

II. *Figuratively:*

1. To drive out of any retreat or lurking-place.

"Let's in and *ferret* out these cheating rake-hells."
Cartwright: Ordinary, v. 4.

2. To find out, to discover, to search out by secret or cunning means; followed by *out*: as, To *ferret out* a secret.

"The War Office here is slowly but surely *ferreting out* the ramifications of the recent military conspiracy."—*Daily Telegraph*, Sept. 7, 1883.

B. *Intrans.:* To hunt after rabbits, &c., with a ferret.

fĕr'-ret-ĕr, *s.* [Eng. *ferret* (v.); *-er.*] One who ferrets or hunts out a person or thing which is hidden or secret.

fĕr-rĕt'-tō, *s.* [Ital., dimin. of *ferro* = Lat. *ferrum* = iron.]

Glass-manuf.: A preparation of copper employed in glass-colouring. It is made by placing thin sheets of copper, interstratified with powdered brimstone, in a crucible which is luted tight and exposed to the heat of a blast-furnace for about two hours; when cool, the copper is found to be calcined so as to be readily crumbled between the fingers; it is then pulverized and sifted for use. A superior article to the foregoing is prepared by using vitriol instead of brimstone, and exposing the crucible to the heat of the glass furnace for three days. The old vitriol is then replaced by fresh, and the heating operation repeated six times.

"Physic, journeying, *feriage*, carriage, &c."—*Strype: Life of Parker*, bk. iv., ch. 25.

fĕr'-rĭc, *a.* [Lat. *ferrum* = iron; suff. *-ic.*]

1. *Ord. Lang.:* Of or pertaining to iron; extracted from iron.

2. *Chem.:* Having iron in its composition. Each molecule contains 2 atoms of iron, united to each other by one bond, if iron is regarded as a tetrad in ferric compounds, $\gtrless Fe—Fe \lessgtr$, as ferric chloride, $Cl_3 \gtrless Fe—Fe \lessgtr Cl_3$ or Fe_2Cl_6.

ferric acetate, *s.*

Chem.: A dark-red, uncrystallizable liquid; when boiled, a basic acetate is precipitated.

ferric arsenate, *s.*

Pharm.: $Fe_3As_2O_8$. *Ferri arsenias.* A green, amorphous, insoluble powder, obtained by precipitating a mixed solution of four parts of arseniate of sodium with three parts of sodium acetate, by a solution of nine parts ferrous sulphate. It has the same medicinal properties as arsenic.

ferric chloride, *s.*

1. *Chem.:* Fe_2Cl_6, sesquichloride of iron. It is obtained in brilliant red-brown scales when

chlorine gas is passed over red-hot iron. It is very deliquescent, and soluble in alcohol and in ether. It forms double salts with potassium chloride, and with ammonium chloride. It is obtained in a hydrated condition by dissolving ferric oxide in hydrochloric acid. A solution of ferric chloride dissolves a large quantity of freshly precipitated ferric hydrate, the solution becoming darker in colour. The dilute solution is decomposed by heat into hydrochloric acid and colloidal ferric oxide, which remains in solution. Ferric chloride is reduced to ferrous chloride by sulphur dioxide, stannous chloride, metallic zinc, and by sulphuretted hydrogen gas. Ferric chloride is a disinfectant. Ferric chloride gives a red colour with acetates, sulphocyanates, meconates, also with diamidophenol. A blue colour with ferrocyanide of potassium, and characteristic reactions with phenol, &c.

2. *Phar.:* Ferric chloride, *Ferri perchloridi liquor fortior*, strong solution of perchloride of iron. Prepared by dissolving iron wire in hydrochloric acid, and then evaporating the solution with nitric acid; it should contain 15·62 grains of Fe_2O_3 in a fluid drachm. It is used in the form of *Liquor ferri perchloridi*, solution of perchloride of iron, and *Tinctura ferri perchloridi*. These contain one part of the strong solution to three parts of water, or alcohol. They are powerful astringents, and blood restorers. A piece of blotting paper, moistened with strong solution of ferric chloride, is very useful to stop bleeding from a slight cut.

ferric nitrate, *s.*

Chem.: $Fe_2(NO_3)_6$, pernitrate of iron. Obtained by dissolving iron wire in nitric acid, sp. gr. 1·3, and then adding to the solution a quart of stronger acid, sp. gr. 1·43., when the salt separates out in colourless prismatic crystals, containing either six or nine molecules of water. Ferric nitrate is soluble in alcohol, and in water. The solution of ferric nitrate is red-brown in colour, and dissolves hydrated ferric oxide, forming a basic nitrate. Ferric nitrate is used in dyeing and in pharmacy under the name of *Ferri pernitratis liquor*, as a powerful astringent tonic in cases of diarrhœa. Nitric acid will not attack iron, when the iron wire is oxidized at the end by holding it in the flame of a spirit lamp, and when cold gradually dipping it into the acid, the oxidized end first; also, when the iron is dipped into strong nitric acid and then washed with water; or, by first introducing a platinum wire into the acid, and then the iron wire in contact with it, the contact may, however, afterwards be broken. The iron is said, under these conditions, to be passive in respect to the action of nitric acid.

ferric oxide, *s.*

1. *Chem.:* Fe_2O_3, peroxide of iron, sesquioxide of iron, red oxide of iron, rouge, colcothar. It occurs in nature, as red hæmatite, specular iron ore, and is obtained by heating, $FeSO_4$, ferrous sulphate in the preparation of sulphuric acid. It is a red powder, nearly insoluble in acids; it is used as a pigment, and to give an orange or purple colour to glass and porcelain, according to temperature. Ferric oxide is not magnetic, and is unaltered by heat. It is used to polish glass, and then finely divided by jewellers under the name of rouge. The hydrated sesquioxide is obtained in a bulky brown precipitate by precipitating ferric chloride by ammonia; soda or potash must not be used, as the oxide retains a large quantity of these substances. The hydrate occurs native, as brown hæmatite. Hydrated ferric oxide is soluble in acids forming ferric salts; these solutions dissolve excess of the oxide, which is afterwards precipitated as a basic salt. The hydrated oxide is used to remove H_2S from coal gas, and as a mordant in dyeing. It is reduced by organic matter, but is reoxidized in the air. Ferric oxide unites with ferrous oxide to form magnetic oxide of iron, $Fe_2O_3{\cdot}FeO$, or Fe_3O_4. [MAGNETIC IRON OXIDE.]

2. *Phar.: Ferri peroxidum hydratum*, hydrated peroxide of iron. Obtained by drying the moist peroxide of iron at 212° F., and then reducing it to powder. It is used in the preparation of *Emplastrum ferri*, chalybeate plaster. Ferric oxide is a non-irritating preparation of iron: it is given internally in cases of neuralgia. *Ferri peroxidum humidum*, moist peroxide of iron. Obtained by precipitating persulphates of iron with soda, collecting on a calico filter, and keeping in a covered vessel; it contains about 86 per cent. of uncombined water. It is used as an antidote in cases of arsenical poisoning: it converts the arsenious acid into insoluble arsenate of iron

ferric-sulphate, *s.*

Chem.: $Fe_2(SO_4)_3$, persulphate of iron, sesquisulphate of iron. Obtained as a yellowish-brown deliquescent mass readily soluble in water. It forms basic salts, with excess of the ferric hydrate. Obtained by oxidizing ferrous sulphate with nitric acid, and adding sulphuric acid. Or by dissolving ferric hydrate in sulphuric acid. It forms alums, in which aluminium is replaced by iron. $Fe_2(SO_4)_3{\cdot}(NH_4)_2SO_4{\cdot}24H_2O$. This salt is used in dyeing. It is insoluble in alcohol.

¶ *Ferric salts* are not precipitated by H_2S from acid solutions, but are reduced to ferrous salts with separation of sulphur. Ferric salts give a red precipitate with caustic alkalies and ammonia; ammonium sulphide gives a black precipitate of ferrous sulphide and sulphur. Potassium ferrocyanide gives a deep blue precipitate; potassium ferricyanide gives no precipitate; and sulphocyanate of potassium (KCNS) gives a blood-red colour with ferric salts, which is not destroyed by HCl, but is decolourised by the addition of $HgCl_2$.

fĕr-rĭ-căl'-çīte, *s.* [FERROCALCITE.]

fĕr-rĭ-çȳ-ăn'-ĭc, *s.* [Eng. *ferri*(c), and *cyanic* (q.v.).] Pertaining to or derived from iron and cyanogen.

ferricyanic acid, *s.*

Chem.: [FERRICYANIDE OF HYDROGEN].

fĕr-rĭ-çȳ-an-īde, *s.* [Eng. *ferri*(c), and *cyanide* (q.v.).]

Chem.: A salt of hydro-ferricyanic acid. Ferricyanides are formed by the action of oxidizing agents on ferrocyanides. The ferricyanides of ammonia, sodium, potassium, and of the alkaline earth-metals are soluble, the other ferricyanides are mostly insoluble, and have characteristic colours, so that ferricyanide of potassium is used as a test for metals, giving a deep blue colour with ferrous salts, an orange colour with zinc salts, a yellowish-green with cupric salts. The most important salt is ferricyanide of potassium (q.v.).

ferricyanide of hydrogen:

Chem.: Hydroferricyanic acid, ferricyanic acid, hydrogen ferricyanide, $H_6(Fe_2)^{vi}(CN)_{12}$. It is obtained as a reddish-brown liquid by decomposing lead ferricyanide with dilute sulphuric acid. The solution is acid, and is decomposed by boiling.

ferricyanide of potassium, *s.*

Chem.: $K_6(Fe_2)^{vi}(CN)_{12}$. Red prussiate of potash. It is prepared by slowly passing chlorine gas, with agitation, into a cold solution of ferrocyanide of potassium, till a drop of the solution no longer gives a precipitate with ferric chloride. The solution is then concentrated and allowed to crystallize; the salt is purified by recrystallization. It forms ruby-red anhydrous prismatic crystals, which are soluble in four parts of cold water; they are very slightly soluble in alcohol. The crystals burn and give off sparks in the flame of a candle: they detonate when heated with potassium nitrate. Excess of chlorine decomposes the salt, chloride of cyanogen and hydrocyanic acid being formed, and the solution deposits Prussian green, $Fe_3(CN)_8{\cdot}4H_2O$. With solutions of ferrous salts it gives a deep blue precipitate of ferrous ferricyanide, $Fe''_3(Fe_2)^{vi}(CN)_{12}$, which is used as a pigment under the name of Turnbull's blue. Ferricyanide of potassium is reduced to ferrocyanide of potassium by the action of sulphurous acid and by sulphites, and by boiling a solution of it, rendered alkaline by potash, with the hydrates of lead, protoxides, manganous oxide, the oxides being converted into higher oxides; it is also reduced by stannous chloride, and by many organic substances. Ferricyanide of potassium in an alkaline solution oxidizes sugar, gum, starch, and cellulose into carbonic acid and water. Ferricyanide of potassium is used as a chemical reagent and in dyeing.

fĕr-rĭ-çȳ-ăn'-ō-ğĕn, *s.* [Eng. *ferri*(c), and *cyanogen* (q.v.).]

Chem.: A hexatomic radical contained in ferricyanides, having the formula $(Fe_2(CN)_{12})^{vi}$, also written $(Fe_2{}^{vi}Cy_{12})^{vi}$; but this formula is often for convenience divided by two; hence, ferricyanide of potassium is written $K_3Fe(CN)_6$, instead of $K_6Fe_2(CN)_{12}$. This radical is also expressed by the sign (Cfdy).

ferriferous rocks, *s. pl.*

Geol.: Rocks which contain iron ore, if they do not even mainly consist of it. The bands of clay ironstone of the Carboniferous age are of this character; very thick beds of ferriferous rocks also occur in the Lias of Yorkshire and Lincolnshire, in the inferior Oolite of Yorkshire and Northamptonshire, and in the Neocomian beds of Lincolnshire.

ferrocyanic acid, *s.*

Chem.: $H_4Fe(CN)_6$, or H_4Cfy. Hydroferrocyanic acid, ferrocyanide of hydrogen, ferroprussic acid. It is obtained by adding to a cold saturated aqueous solution of ferrocyanide of potassium, an equal volume of concentrated hydrochloric acid, washing the precipitate with hydrochloric acid, drying on a porous brick, and then dissolving in alcohol and precipitating with ether; or by decomposing ferrocyanide of barium with sulphuric acid, or ferrocyanides of lead or copper with sulphuretted hydrogen. Ferrocyanic acid is a colourless crystalline mass easily soluble in water and in alcohol; insoluble in ether. It is tetratomic; it has an acid reaction, reddens litmus, and decomposes many metallic salts, yielding ferrocyanides. When an aqueous solution of ferrocyanic acid is heated, it gives off hydrocyanic acid, and deposits Prussian blue.

fĕr-rō-çȳ-ăn-īde, *s.* [Pref. *ferro-*, and Eng. *cyanide* (q.v.).]

Chem.: A salt of hydroferrocyanic acid, ferro-prussiate. The ferrocyanides of ammonium, sodium, potassium, barium, strontium, calcium, and magnesium are soluble. Cupric ferrocyanide is a reddish-brown powder; ferric ferrocyanide is blue, Prussian blue; nickel and cobalt ferrocyanides are green; the ferrocyanides of silver, lead, zinc, and manganese are white insoluble powders. By the action of oxidizing agents ferrocyanides are converted into ferricyanides; by the action of nitric acid into nitro-prussides. When heated ferrocyanides are decomposed into cyanide of iron and cyanide of the other metal, the cyanide of iron being further converted into iron and carbon, and nitrogen is given off; the other cyanide

remains either unaltered, as cyanide of potassium, or the metal is reduced and nitrogen given off. The presence of iron in ferrocyanides cannot be detected by the addition of caustic alkalies, nor by ammonium sulphide. The following are the chief ferrocyanides :—

ferrocyanide of barium, *s.*

Chem.: $Ba_2Fe(CN)_6$. Obtained by the action of ferrous sulphate on cyanide of barium, which can be obtained by passing a current of air over an ignited mixture of charcoal and barium carbonate. Barium ferrocyanide can also be obtained by boiling Prussian blue with baryta water. It forms small, yellow, anhydrous, monoclinic prisms, which dissolve in 584 parts of cold and 116 parts of boiling water.

ferrocyanide of hydrogen, *s.*

Chem.: [FERROCYANIC ACID].

ferrocyanide of iron, *s.*

Chem.: Prussian blue, $Fe_7(CN)_{18}{\cdot}9H_2O$, or $2Fe_2^{vi}(Fe(CN)_6)_3 + 9H_2O$. Obtained by adding potassium ferrocyanide to ferric chloride, $3K_4Fe(CN)_6 + 2Fe_2Cl_6 = 12KCl + Fe_7(CN)_{18}$. Also by adding potassium cyanide to a mixture of ferrous and ferric salts, $18KCN + 3FeCl_2 + 2Fe_2Cl_6 = 18KCl + Fe_7(CN)_{18}$. This last reaction is Scheele's test for hydrocyanic acid. But Prussian blue is made on a large scale by adding ferrous sulphate to ferrocyanide of potassium, and allowing the white precipitate of $K_2Fe_2(CN)_6$ to oxidize by contact with the air, or by treatment with chlorine. Ferric ferrocyanide dries into a hard brittle mass with a copper-red lustre like indigo. It is very hygroscopic. It is insoluble in water and in acids, but soluble in oxalic acid, forming a deep blue liquid, which, when thickened with gum, can be used for blue ink. Boiled with water and mercuric oxide, it yields mercuric cyanide and ferric oxide. Heated in contact with the air, it burns like tinder and leaves oxide of iron. Soluble Prussian blue is prepared by adding excess of ferrocyanide of potassium to ferric chloride. Pure Prussian blue is called Paris blue; impure, containing alumina, is called Mineral blue. Prussian blue is often adulterated with alumina, chalk, gypsum, and starch. It is used as a pigment, and also to dye wool, cotton, and silk.

ferrocyanide of potassium, *s.*

Chem.: $K_4Fe(CN)_6 + 3H_2O$, yellow prussiate of potash. Ferroprussiate of potash. Obtained by boiling Prussian blue with an aqueous solution of caustic potash. By digesting precipitated ferrous cyanide with an aqueous solution of potassium cyanide, or any soluble ferrous salt, with aqueous cyanide of potassium. On a large scale it is prepared by melting animal matter containing nitrogen with carbonate of potassium and iron filings. The carbonate of potash is first fused in large covered iron pots heated to bright redness, and then the iron and animal matter are added gradually, large quantities of gases being evolved. The mixture is then heated till the reaction is finished. The fused mass, when cold, is broken into small pieces, thrown into water, well stirred, and heated quickly to 80° or 90°. The impure cyanide of potassium is thus converted into ferrocyanide of potassium, and the solution evaporated; the salt is purified by recrystallization. The ferrocyanide has been shown by Liebig to be formed by the lixiviation, and not during the fusion. Ferrocyanide of potassium crystallizes in large, transparent, yellow, tetragonal crystals, containing three molecules of water. Soluble in four parts of cold and in two parts of boiling water; it is insoluble in alcohol. Heated with carbonate of potassium, it is converted into cyanide and cyanate of potassium, and metallic iron separates out. Ferrocyanide of potassium is used as a chemical reagent, and for the preparation of Prussian blue. By the action of oxidizing agents, it is converted into ferricyanide of potassium. Heated with strong sulphuric acid, it gives off carbon monoxide, and is converted into ammonium, ferrous, and potassium sulphates, $K_4Fe(CN)_6{\cdot}3H_2O + 6H_2SO_4 + 3H_2O = 6CO + 3(NH_4)_2SO_4 + FeSO_4 + 2K_2SO_4$. Heated with dilute sulphuric acid, it gives off hydrocyanic acid; heated with ammonium chloride, it gives off ammonium cyanide.

fĕr-rō-sō-fĕr'-rĭc, *a.* [As if from a Lat. *ferrosus*, from *ferrum* = iron, and Eng. *ferric* (q.v.).]

Chem.: Ferrosoferric oxide, $Fe_3O_3{\cdot}FeO$, or Fe_3O_4, occurs naturally as black magnetic oxide of iron, and can be obtained by burning iron in oxygen, or by passing steam over iron filings, or heating iron in carbonic acid gas, or by heating ferrous sulphate with calcium chloride in a crucible. Ferrosoferric oxide crystallizes in regular octohedra or tetrahedra, and is magnetic. When heated in a stream of hydrogen it is reduced to metallic iron; it is also reduced by heating it with coke, or with carbon monoxide. It is soluble in acids, forming a mixture of ferrous and ferric salts. Ferrosoferric hydrate can be formed when ferric sulphate and ferrous sulphate are dissolved in water, precipitated by ammonia, and then boiled till the precipitate becomes granular and black. It is also magnetic.

1. A process, so named by Hunt, which derives its name from the material of the plate (iron) on which it is taken. Plates of sheet-iron are covered with a surface of black Japan varnish. This is immersed in collodion, and after a time in the silver solution. It is then placed in the holder and exposed in the camera.

2. A photograph taken by the process described under 1.

fĕr'-roŭs, *a.* [Lat. *ferr(um)* = iron; Eng. suff. *-ous.*]

Chem.: Having a considerable quantity of iron in its composition. Each molecule of a ferrous compound probably contains two atoms of iron united to each other by two bonds = Fe = Fe =, if iron be regarded as tetrad in ferrous compounds, but the formulæ are generally written so as to contain only one atom of iron, as ferrous oxide FeO, instead of Fe_2O_2, and ferrous chloride $FeCl_2$, instead of Fe_2Cl_4.

ferrous carbonate, *s.*

1. *Chem.:* $FeCO_3$. Protocarbonate of iron. It occurs native as spatose iron ore, and in an impure state of clay ironstone in the carboniferous series. When heated in a closed vessel $3FeCO_3 = 2CO_2 + CO$ and Fe_3O_4, black magnetic oxide of iron is formed. Hydrated ferrous carbonate is obtained as a whitish-green precipitate. When a solution of a ferrous salt is mixed with an alkaline carbonate, it absorbs oxygen from the air and loses carbonic acid, and is converted into hydrated ferric oxide. Ferrous carbonate occurs in chalybeate springs, being held in solution by the excess of carbonic acid present.

2. *Pharm.:* Carbonate of iron obtained by decomposing a solution of sulphate of iron by carbonate of ammonia, and rubbing the precipitate with sugar, and drying at 212° Fahr. It is called *Ferri carbonas saccharata*. It is used in *Mistura ferri composita* and in *Pilula ferri carbonatis*. It is not astringent, and restores the blood.

ferrous chloride, *s.*

Chem.: $FeCl_2$ or Fe_2Cl_4. Protochloride of iron. Obtained anhydrous in white crystalline, deliquescent scales by passing chlorine over excess of red-hot metallic iron, or by reducing ferric chloride by heating it in a current of hydrogen. It absorbs ammonia gas. Hydrated ferrous chloride, $FeCl_2{\cdot}4H_2O$, is obtained in bluish-green monoclinic crystals by dissolving iron in hydrochloric acid, and concentrating the solution. Ferrous chloride is very soluble in water. It also dissolves in alcohol. Ferrous chloride unites with ammonium chloride, forming a double salt, $FeCl_2{\cdot}2NH_4Cl\ 2H_2O$. Ferrous chloride oxidizes in the air.

ferrous iodide, *s.*

1. *Chem.:* FeI_2. Proto-iodide of iron. Obtained by digesting iodine with water and iron wire. It forms a pale green solution which, when evaporated, deposits green deliquescent crystals of $FeI_2{\cdot}4H_2O$. Its solution decomposes into free iodine and peroxide of iron, but, if iron wire be kept in the solution, the strength remains the same, as the iodine set free again dissolves iron.

2. *Pharm.:* Ferrous iodide. *Ferri iodidum* is used to prepare *Syrupus ferri iodidi*, syrup of iodide of iron, which does not so readily decompose as the solution of ferrous iodide, and in *Pilulæ ferri iodidi*. Iodide of iron possesses the properties of iron and of iodine. It is used in scrofulous diseases.

ferrous nitrate, *s.*

Chem.: $Fe(NO_3)_2$. Can be obtained by mixing barium nitrate with ferrous sulphate $Ba(NO_3)_2 + FeSO_4 = BaSO_4 + Fe(NO_3)_2$, or by dissolving iron monosulphide in cold dilute nitric acid. When evaporated in vacuo over sulphuric acid it crystallizes in pale green deliquescent crystals, which, when heated, evolve nitric oxide and yield a basic ferric nitrate. Ferrous nitrate is used in dyeing.

ferrous oxide, *s.*

Chem.: FeO. Protoxide of iron, obtained as a black powder by heating iron in carbon dioxide $Fe + CO_2 = FeO + CO$. It takes fire when heated in the air, forming ferric oxide. The hydrate of ferrous oxide, $Fe(OH)_2$, ferrous hydrate, is obtained as a white precipitate when a solution of a ferrous salt is mixed with a solution of caustic potash, both perfectly free from air. If boiled in a vessel free from oxygen it loses its water of hydration, becoming black. Ferrous hydrate rapidly absorbs oxygen from the air, the colour changing from white to green and then to red brown, owing to the formation of ferric hydrate. Ferrous hydrate is slightly soluble in a solution of ammonia.

ferrous sulphate, *s.*

I. *Chem.:* $FeSO_4{\cdot}7H_2O$. Protosulphate of iron, green vitriol, iron vitriol, copperas, sulphate of iron. Ferrous sulphate is obtained pure by dissolving iron wire in pure dilute sulphuric acid, also when ferrous sulphide is acted upon with dilute sulphuric acid in the preparation of sulphide of hydrogen, H_2S. On evaporating the ferrous sulphate separates out in transparent and bluish green rhomboidal crystals, which effloresce in dry air; in moist air they become coated with a brown crust of ferric sulphate. Ferrous sulphate is insoluble in alcohol, and soluble in twice its weight of cold water. The salt loses six molecules of water at 100° and retains the other molecule till it is heated to 300° At red heat it is decomposed, yielding Nordhausen sulphuric acid and ferric oxide. A solution of ferrous sulphate gradually absorbs oxygen when exposed to the air, but can be kept by placing iron wire in the solution. It absorbs dioxide and trioxide of nitrogen, forming a dark brown liquid which rapidly absorbs oxygen. Ferrous sulphate forms double salts with the alkaline sulphates, as $FeSO_4{\cdot}K_2SO_4{\cdot}6H_2O$. These salts are used to determine the strength of permanganate and bichromate solutions employed in volume-

trical analysis. Ferrous sulphate is used as a black dye in combination with vegetable astringent matters. Large quantities of ferrous sulphate are obtained by exposing to the action of air and moisture iron pyrites, FeS_2, which is decomposed into $FeSO_4$ and H_2SO_4, the latter acting on the clay forma aluminium sulphate.

2. *Pharm.:* Ferrous sulphate, *Ferri sulphas*, used in the preparation of *Mist. ferri comp.* Ferrous sulphate is a powerful astringent. Granulated sulphate of iron, *Ferri sulphas granulata* is prepared by pouring a hot solution of ferrous sulphate into rectified spirit, and stirring the mixture, so that the salt shall separate in minute granular crystals.

ferrous sulphide, *s.*

Chem.: FeS. Sulphide of iron. Obtained by projecting into a red-hot crucible a mixture of five parts of sulphur with eight parts of iron filings. Also by rubbing a red-hot bar of iron with roll sulphur. Ferrous sulphide is a black brittle substance, and is used in the laboratory as a source of sulphuretted hydrogen, H_2S, that gas being liberated by the action of dilute sulphuric or hydrochloric acid on FeS. Hydrated ferrous sulphide is precipitated when ammonium sulphide is added to a solution of a ferrous salt. This precipitate absorbs oxygen rapidly from the air, and is converted into sulphur and hydrated ferric oxide.

¶ *Ferrous salts* are not precipitated by H_2S from acid solutions. They give a white precipitate of ferrous hydrate with caustic alkalies and ammonia, which quickly oxidizes. Carbonates of potassium, sodium, and ammonium precipitate white ferrous carbonate, which quickly becomes red-brown. Ammonium sulphide gives a black precipitate of ferrous sulphide. Potassium ferrocyanide gives a pale bluish-white precipitate, which darkens in colour on exposure to the air. Potassium ferricyanide gives a deep blue precipitate.

ferruginous springs, *s. pl.*

Geol.: Springs with much more than the normal amount of iron in their composition. They have a partly milky partly ochreous hue where the water stagnates, and cement the loose stones to which they have access. For instance, a ferruginous spring which rises on the northern shore of the Firth of Forth, between Pittenweem and St. Monance, cements the pebbles of the beach into a conglomerate as hard as that of the Old Red Sandstone.

fĕr'-tĭle, fĕr'-tile, *a.* [Fr., from Lat. *fertilis*, from *fero* = to bear, produce; Sp. & Port. *fertil*; Ital. *fertile.*]

I. *Ordinary Language* (Either absolutely or followed by *of* or *in*):

1. Productive, fruitful, rich; producing food in abundance; prolific.

"Three tribes distinct possess her *fertile* lands."
Pitt: Virgil; Æneid x.

2. Having abundant resources; quick, ready, well-supplied or endowed.

"He becomes quick of observation and *fertile* of resource."—*Macaulay: Hist. Eng.*, ch. ii.

* 3. Abundant, ample.

"Good store of *fertile* sherris."—*Shakesp.*: 2 *Henry IV.*, iv. 3.

* 4. Bountiful, liberal. (*Shakesp.: Winter's Tale*, i. 2.)

II. *Bot.:* Fruit-bearing; capable of producing fruit.

¶ Crabb thus discriminates between *fertile, fruitful*, and *prolific*: "*Fertile* expresses in its proper sense the faculty of sending forth from itself that which is not of its own nature, and is peculiarly applicable to the ground which causes everything within itself to grow up. *Fruitful* expresses a state containing or possessing abundantly that which is of the same nature; it is, therefore, peculiarly applicable to trees, plants, vegetables, and whatever is said to bear fruit. *Prolific* expresses the faculty of generating; it conveys, therefore, the idea of what is creative, and is peculiarly applicable to animals. We may say that the ground is either *fertile* or *fruitful*, but not *prolific*: we may speak of a female of any species being *fruitful* and *prolific*, but not *fertile*; we may speak of nature as being *fruitful*, but neither *fertile* nor *prolific*. A country is *fertile* as it respects the quality of the soil; it is *fruitful* as it respects the abundance of its produce; it is possible, therefore, for a country to be *fruitful* by the industry of its inhabitants, which was not *fertile* by nature. . . . The lands in Egypt are rendered *fertile* by means of mud which they receive from the overflowing of the Nile: they consequently produce harvests more *fruitful* than in almost any other country. Among the Easterns, barrenness was reckoned a disgrace, and every woman was ambitious to be *fruitful*; there are some insects, particularly amongst the noxious tribes, which are so *prolific*, that they are not many hours in being before they begin to breed. In the figurative application they admit of a similar distinction. A man is *fertile* in expedients who readily contrives upon the spur of the occasion; he is *fruitful* in resources who has them ready at hand; his brain is *prolific* if it generates an abundance of new conceptions." (*Crabb: Eng. Synon.*)

* **fĕr'-tĭle,** *v.t.* [Fertile, *a.*] To make fertile; to fertile; to fertilize.

1. The quality or state of being fertile, fruitful, or prolific; fruitfulness, fecundity, productiveness.

"Thy very weeds are beautiful, thy waste
More rich than other lands' *fertility*."
Byron: Childe Harold, iv. 26.

2. Richness of invention; abundance of resources; readiness; quickness.

"The quickness of the imagination is seen in the invention: the *fertility* in the fancy; and the accuracy in the expression."—*Dryden: Letter to Sir R. Howard.*

fĕr-tĭl-ĭz-ā'-tion, *s.* [Eng. *fertiliz(e); -ation.*]

I. *Ordinary Language:*

1. The act or process of making fertile, fruitful, or productive.

2. The act of fecundating or impregnating; fecundation.

II. *Bot.:* The fecundation of a plant by the application of the pollen to the stigma. In some cases the pollen simply drops upon the stigma, which is called self-fertilization. In most instances, however, it is blown by the wind, or carried by bees, or moths, or such-like insects, from other flowers of the same species. This is what is termed cross-fertilization. Mr. Darwin found that twenty heads of Dutch Clover (*Trifolium repens*) left open to the visits of bees produced 2290 seeds; the same number defended from the visit of bees did not yield even one seed.

"In many trees in which the organs of reproduction are in separate flowers (as hazel and willow) the leaves are not produced until *fertilization* has been effected."—*Balfour: Botany*, § 496.

fĕr'-tĭl-īze, *v.t.* [Fr. *fertiliser*; Sp. *fertilizar*; Ital. *fertilizzare*, from Lat. *fertilis* = fertile.]

1. To make fertile, fruitful, or productive; to supply with the proper nourishment for plants; to make rich.

"Round the shady stones
A *fertilizing* moisture . . . gathers."
Wordsworth: Excursion, bk. v.

2. To impregnate; to fecundate.

fĕr'-tĭl-īz-ĕr, *s.* [Eng. *fertiliz(e); -er.*] One who, or that which fertilizes; specif., a manure applied to land.

"When more is taken from the land than is given back, the purchase of extraneous *fertilizers* is the only resource."—*Loudon. Encycl. of Agriculture.*

fertilizer-mill, *s.* One in which the materials are ground to powder so as to be sown from a machine.

fertilizer-sower, *s.* A form of seeding-machine adapted to sow granulated manures, such as dry poudrette, the phosphates, bone-dust, lime, guano, &c. It sometimes forms a machine by itself, and sometimes is an attachment to a wheat-drill or a turnip-drill.

*** fer-tre, * feer-tyr,** *s.* [O. Fr. *fertere, fiertre*, from Lat. *feretrum.*] A feretory (q.v.).

"Seynt Cuthbertes bones of *fertre* toke thei out."
Robert de Brunne, p. 76.

*** fer-tre,** *v.t.* [Fertre, *s.*] To place in a feretory or shrine.

"Bar thir bannes menshelye
And *fertered* thaim at a munrye."
Metrical Homilies, p. 143.

fĕr'-ų-la, *s.* [Lat., = (1) an umbelliferous herb or shrub, having a stalk filled with a soft pith, in which fire was easily harboured; fennel-giant; (2) a rod or whip, because made of the stalks of (1); from *ferio* = to strike, from the stalks being used as rods.] [Ferule.]

*** I.** *Ord. Lang.:* A ferule; a rod.

II. *Technically:*

* 1. *Antiq.:* The sceptre of the emperors of the Eastern Empire.

2. *Bot.:* A genus of umbelliferous plants, natives of the shores of the Mediterranean and Persia. They have tall stalks filled with soft pith, and deeply-divided leaves, the segments being frequently linear. They yield a kind of gum-resin, which is employed as a stimulant in medicine. *F. communis*, giant-fennel, is a tall perennial, a native of Southern Europe, the atem of which often attains a height of eight to ten feet, and a diameter of two to three inches, having finely-divided compound leaves and umbels of yellow flowers. The stems are full of white pith, which, when dry, ignites like tinder, and is used in Sicily and other parts as anch. When once ignited, it burns very slowly, and without injury to the tube of the atem. It is used for preserving and carrying fire from place to place. *F. dulce* is a variety of *F. communis*, differing in having the radical leaf-stalk swollen, thick, and becoming united, thus forming a kind of tube, which is used extensively in France and Italy as a culinary vegetable, under the name of Firrocchio or Firricho. It may sometimes be met with in the vegetable markets of London. *F. persica* yields asafetida, and from *F. orientalis* and *F. tingitana* a gum resin is procured, which very closely resembles, but is less powerful than, asafetida.

*** fēr-ų-lā'-çē-oŭs,** *a.* [Lat. *ferulaceus*, from *ferula*; Fr. *férulacé.*] Of or pertaining to canes or reeds; resembling ferula; having a atem like a reed or cane.

*** fĕr'-ų-lar, fĕr'-ų-lĕr,** *s.* [Lat. *ferula.*] A ferule, a rod.

"If we have only escaped the *ferular*."—*Milton: Areopagitica.*

*** fĕr'-ų-lar-ў,** *a.* [Eng. *ferule; -ary.*] Pertaining to a rod.

"Bound with a *ferularie* superstition."—*Trans. of Persius: Satires* (1635), Pref.

fĕr'-ūle (1), *** fĕr'-ų-la,** *s.* [Lat. *ferula* = a rod; Fr. *férule*; Ital. & Sp. *ferula.*] [Ferula.] A rod or cane used by a master to punish children in school; a piece of wood used for the same purpose.

"The eye of the parent and the *ferule* of the master."
—*Bp. Hall: A Censure of Travel.*

fĕr'-ūle (2), *s.* The same as Ferrule, *s.* 1 (q.v.).

"'Will you have some of this?' said the fat boy, plunging into the pie up to the very *ferules* of the knife and fork."—*Dickens: Pickwick*, ch. liv.

*** fĕr'-ūle,** *v.t.* [Ferule (1), *s.*] To beat or punish with a ferrule; to cane.

"I shoulde bee *feruled* for my faults."—*Gosson: Schoole of Abuse*, p. 24.

fĕr'-ūled, *a.* [Eng. *ferul(e)* (2), a.; *-ed.*] Fitted or furnished with a ferrule.

"He has his volunteer bodyguard of . . . fierce patriots, with *ferruled* sticks."—*Carlyle French Revolution*, vol. iii., bk. vi., ch. iv.

fę-rûl'-ĭo, *a.* [Lat. *ferula* (q.v.), and Eng., suff. *-ic.*] Derived from plants of the genus Ferula.

ferulic acid, *s.*

Chem.: $C_{10}H_{10}O_4$ or $C_6H_3\begin{cases}CH=CH\cdot CO.OH\\O\cdot CH_3\\OH.\end{cases}$

An acid existing in assafetida, extracted by precipitating the alcoholic solution with lead acetate, and decomposing the precipitate with dilute sulphuric acid. It can be obtained synthetically by digesting sodium vanillin with sodium acetate and excess of acetic anhydride in an oil bath at 160° for four hours with an inverted condenser, treating the product with water, and dissolving the residue with ether; the ether solution is agitated with acid sodium sulphite to precipitate aceto-vanillin, and the residue left on evaporating the ether is boiled with alcoholic potash. Ferulic acid is soluble in alcohol, ether, and in hot water; it crystallizes in needles, which melt at 169°. Its aqueous solution is coloured yellow-brown by ferric chloride. When fused with caustic potash, it yields salts of acetic and proto-catechuic acids.

fĕr'-vęn-çў, *** fer-venee,** *s.* [Lat. *fervens*, pr. par. of *ferveo* = to boil.] [Fervent.] The quality or state of being fervent; heat of mind, ardour, earnestness, eagerness, zeal, fervour.

"He desired the prayers of the Church, wherein he joined with great *fervency* and devotion."—*Dr. Bridcock: Lett. in Parl.; Hist. Charles II.* (an. 12).

fĕr'-vent, *a.* [Fr., from Lat. *fervens*, pr. par. of *fervco* = to boil; Ital. & Port. *fervente*; Sp. *ferviente.*]

* 1. Hot, boiling, heated, glowing, very warm.

"For the *feruent* brennynge of the soune."—*Maundeville*, p. 156.

* 2. Hot in temper; vehement, excitable, excited.

"And thus the son the *fervent* sire addressed."
Pope: Homer; Odyssey xix. 4.

3. Ardent, earnest, eager, zealous, very warm, animated; full of ardour, zeal or fervour.

"Then, all at once, his thoughts turned round,
And *fervent* words a passage found."
Wordsworth: White Doe of Rylstone, ii.

fĕr'-vent-lў, *** fer-vent-liche,** *adv.* [Eng. *fervent; -ly.*]

* 1. With great heat; hotly, so as to burn.

"It continued so *fervently* hot that men roasted eggs in the sand."—*Hakewill.*

2. Eagerly, vehemently, hotly.

3. With ardour, zeal, or fervour; ardently, zealously, eagerly, warmly.

"Yet did I love thee to the last
As *fervently* as thou."
Byron: Stanzas, iii.

fĕr'-vent-nĕss, *s.* [Eng. *fervent; -ness.*] Fervency, fervour, ardour, zeal.

"While she seemed to hang upon a cross by the *ferventness* of her prayer."—*Fox: Martyrs*, p. 43.

*** fĕr-vĕs'-çent,** *a.* [Lat. *fervescens*, pr. par. of *fervesco*, incept. of *ferveo* = to boil.] Growing or becoming hot.

fĕr'-vĭd, *a.* [Lat. *fervidus*, from *ferveo* = to boil; Sp. & Ital. *fervido.*]

1. Burning; very hot, boiling.

"The mounted sun
Shot down direct his *fervid* rays."
Milton: P. L., v. 301.

2. Heated, made hot.

"Then staid the *fervid* wheels."
Milton: P. L., vii. 224.

3. Fervent, earnest, ardent, zealous.

"The *fervid* wishes, holy fires."
Parnell: Happy Man.

*** fĕr-vĭd'-ĭ-tў,** *s.* [Eng. *fervid; -ity.*] Heat, fervency, fervour, fervidness.

fĕr'-vĭd-lў, *adv.* [Eng. *fervid; -ly.*] In a fervid or fervent manner; fervently, eagerly, ardently, zealously.

fĕr-vĭd'-nĕss, *s.* [Eng. *fervid; -ness.*] Fervency, fervour, ardour, eagerness, zeal, warmth.

"As to the healing of Malchus's ear, in the account of the meek Lamb of God, it was a kind of injury done to him by the *fervidness* of St. Peter, who knew not yet what spirit he was of."—*Bentley: Sermon* vi.

fĕr'-vōr, * fĕr'-voŭr, * fer-voure, *s.* [O. Fr. *fervor, fervour*; Fr. *ferveur*, from Lat. *fervor*, from *ferveo* = to boil; Sp. & Port. *fervor*; Ital. *fervore.*]

* 1. Heat, warmth.

"The *fervor* and the force of Indian skies."
Cowper: Expostulation, 12

2. Fervency of mind; ardor, zeal, earnestness; intensity of feeling.

"The pure *fervor* of eternal love."
Beattie: Judgment of Paris.

¶ Crabb thus discriminates between *fervor* and *ardor*: "*Fervour* is not so violent a heat as *ardour*. The affections are properly *fervent*; the passions are *ardent*: we are *fervent* in feeling, and *ardent* in acting: the *fervour* of devotion may be rational; but the *ardour* of zeal is mostly intemperate. The first martyr, Stephen, was filled with a holy *fervour*; St. Peter, in the *ardour* of his zeal, promised his master to do more than he was able to perform." (*Crabb: Eng. Synon.*)

*** fes-and, * fes-ant,** *s.* [Pheasant.]

fē-sā'-pō, *s.* [A word of no etymology.]

Logic: The fourth form of the fourth figure of syllogisms, in which the Middle Term is the predicate of the Major premiss, and the subject of the Minor. It consists of a universal negative, a universal affirmative, and a particular negative—*e.g.*,

(fE) No A is B.
(sA) All B is C.

fĕs-tĭ'-nō, *s.* [A word of no etymology.]

Logic: The third form of the second figure in which the Middle Term is the predicate of both premisses. It consists of a Universal Negative, a Particular Affirmative, and a Particular Negative:

(fEs) No A is S
(tI) Some C is B
(nO) Some C is not A.

fĕs'-tĭ-val, *a.* & *s.* [O. Fr., from Low Lat. *festivalis*, from Lat. *festivus* = festive, festal; *festum* = a feast; Sp. & Port. *festival.*]

A. *As adj.:* Pertaining to or becoming a feast or time of rejoicing; festive, featal, joyous, mirthful.

"The merry voice of *festival* delight."
West: Education.

B. *As subst.:* A time of feasting or rejoicing; a feast; a festive celebration or anniversary, civil or religious.

"On some high *festival* of once a year."
Goldsmith: Traveller.

¶ If the term be used generally it may be held to include both feasts and fasts (q.v.). The observant Anglo-Indian has an opportunity of studying the Hindoo and Mohammedan feasts and fasts, and reasoning out from them the tendency and working of festivals in general. He sees three elements enter into their composition. They were designed at first to be purely religious, and a multitude of those who come together on such occasions do so from pious motives. They, however, require to make purchases, and thus the commercial element finds its way into the gathering. Finally, the young people present, with not a few adults of similar proclivities, look out for opportunities of pleasure at the fast no less than the feast, and, unless severely repressed, convert the holy day into a holiday. There may be places in various lands where a day having been fixed to commemorate by an annual gathering an alleged manifestation of Divinity, the religious festival thus instituted has degenerated first into a commercial and ultimately into a pleasure fair.

¶ For the difference between *festival* and *feast*, see Feast.

* **fĕs'-tĭ-val-lў,** * **fes-tĭ-val-y,** *adv.* [Eng. *festival*; *-ly.*] In a festive manner; festively.

"How a man scornede *festivaly* and myrily swiche vanite."—*Chaucer: Boethius*, p. 59.

fĕs'-tĭve, *a.* [Lat. *festivus*, from *festum* = a feast.]

1. Joyous, gay, mirthful, becoming a feast or festival.

"All *festive* jollities forbear."
Sherburne: Martial; Epig., bk. ii., No. 41.

2. Pertaining to or used for a feast, or festival, or festivities.

"He had looked down upon the *festive* hall."
Byron: Lara, i. 28.

fĕs'-tĭve-lў, *adv.* [Eng. *festive*; *-ly.*] In a festive, joyous, or mirthful manner; with festivity.

fĕs-tĭv-ĭ-tў, *s.* [Fr. *festivité*, from Lat. *festivitas*, from *festivus* = festive; Sp. *festividad*; Ital. *festività.*]

* 1. A feast, a festival; an anniversary, civil or religious.

"The king also ordered the office for his *festivity* to be dashed out of all breviaries."—*Burnet: Hist. Reformation* (an. 1538).

2. A festival, feast, or festive entertainment.

3. Mirth, jollity, joyfulness.

"The Roman drama had its rise in the unrestrained *festivity* of the rustic youth."—*Hurd: Notes on Art of Poetry.*

¶ Crabb thus discriminates between *festivity* and *mirth*: "There is commonly *mirth* with *festivity*, but there may be frequently *mirth* without *festivity*. The *festivity* lies in the outward circumstances; *mirth* in the temper of the mind. *Festivity* is rather the produce of *mirth* than the *mirth* itself. *Festivity* includes the social enjoyments of eating, drinking, dancing, cards, and other pleasures; *mirth* includes in it the buoyancy of spirits which is engendered by a participation in such pleasures: but *festivity* may be accompanied with intemperance." (*Crabb: Eng. Synon.*)

* **fĕs'-tĭv-oŭs,** *a.* [Lat *festivus*, from *festum* = a feast.] Pertaining or suited to a feast; festive, merry, mirthful: as, Gayton's "*Festivous* Notes upon Don Quixote."

* **fĕs'-tĭv-oŭs-nĕss,** *s.* [Eng. *festivous*; *-ness.*] Festivity, joyfulness. (*Ash.*)

* **fĕst'-lĭch,** *a.* [Mid. Eng. *fest* = feast; *-lich* = like.] Used to feasts; festive.

fĕs-toon', *s.* [Fr. *feston*, from Low Lat. *festo* = a garland; Ital. *festone*; Sp. *feston*; usually derived from Lat. *festum* = a feast, but a connection with Low Lat. *festis*; O. Fr. *fest*, *faist*, *faiste*; Fr. *faîte* = a top, a ridge (from the base of the Lat. *fastigium*) is almost as likely (*Skeat.*)]

1. *Ord. Lang.:* A chain or string of any materials suspended between two points: specif. a chain or garland of flowers, foliage, drapery, &c., suspended by the ends so as to form a depending curve.

"The vines, climbing to the summit of the trees, reach in *festoons* and fruitages from one tree to another, planted at exact distances."—*Evelyn: Memoirs*, Jan., 1645.

2. *Arch.:* A carved ornament in wood, stone, &c., usually in the form of a garland or wreath, composed of flowers, fruits, leaves,

FESTOON.

&c., bound together and suspended by the ends. This method of ornamentation was employed by the architects of the middle ages, frequently with much success, in their friezes of the Composite order. Festoons are still usefully and aptly employed in decoration.

"The *festoons*, friezes, and the astragals."
Dryden: Art of Poetry.

fĕs-toon', *v.t.* [Festoon, *s.*]

1. To form any material in depending curves or festoons.

2. To ornament or adorn with festoons.

fē'-tich, fē'-tish, *s.* [Fr. *fétiche*, from Port. *feitiço* = (1) sorcery, (2) a wooden idol, from *feitiço* = artificial, from Lat. *factitius*, from *facio* = to make. Of the two spellings given Sir John Lubbock uses the former and Mr Tylor the latter form.]

1. *Lit.:* Any material object whatsoever, supposed to be the vessel, vehicle, or instrument of a supernatural being, and the possession of which gives to the possessor or joint possessors power over that being. Thus, a fetish differs from a taliaman in that personal consciousness or power is attributed to it, from an idol because a fetich is not necessarily worshipped, and from a totem inasmuch as the power attributed or honor paid to an individual does not extend to the species.

"An idol is indeed an object of worship, while, on the contrary, a *fetich* is intended to bring the deity within the control of man."—*Lubbock: Origin of Civilization* (1882), p. 329.

2. *Fig.:* An object of devotion; an idol.

fē'-tich-ĭsm, fē'-tĭ-çĭsm, fē'-tĭsh-ĭsm, *s.* [Eng. *fetich*; *-ism.*]

1. *Lit.:* Since the introduction of this word by De Brosses in the last century, various meanings have been affixed to it. It was first employed to denote the African worship of terrestrial objects; Comte used it in the sense of a general theory of primitive religion, in which external objects are animated by a life analogous to that of man; Tylor defines fetichism as the doctrine of spirits embodied in, attached to, or conveyed through certain material objects; and Sir John Lubbock ranks it as the second stage in the evolution of religious thought, but objects to class it as a religion, since it does not necessarily involve the idea of worship, for the negro believes that by means of his fetich he can force his deities to comply with his desires. It is in reality only a form of witchcraft: an extension of the belief that the possession of any part of an enemy—the parings of the nails, a lock of the hair, or even a portion of his clothing—will give the possessor power over him. So the negro believes that the possession of a fetich representing a spirit makes that spirit his servant; he beats it if the requests he prefers are not attended to, and seriously believes he is thus inflicting suffering on the actual deity. A somewhat similar custom obtains among the Roman Catholics of the lower orders in the South of Europe, showing how widely popular practice differs from the teaching of that church; though the motive which inspires such conduct is the same in the European and in the negro. Fetichism is more general in Africa than elsewhere; but, wherever a belief in witchcraft exists, there some form of fetichism is sure to be found.

"The savage does not abandon his belief in *Fetichism*, from which no race of men has yet entirely freed itself."—*Lubbock: Origin of Civilization* (1882), p. 334.

2. *Fig.:* Devotion to any object, pursuit, or idea.

B. *As subst.:* A fief, a fee, or feud.

feudal system, *s.* A system of social polity, of which lordship and vassalage were the essential features, and of land tenure in which real ownership inhered solely in the lord, only use, possession, or tenancy belonging to the grantee. Some traces of feudalism

may be found in nearly all lands, but the rise of the feudal system distinctively so called was in those parts of Europe in which the Teutonic conquerors of the Roman empire acquired paramount power. As early as the ninth century the term vassals, or *vassi*, was used of noblemen who attached themselves to the court of their sovereign, moved by natural, and as yet unpurchased loyalty. When in those unsettled times soldiers of fortune gained by the sword territories which they were afraid to lose, they parcelled them out among their superior officers, who again transferred all the land for which they had no immediate use to their soldiers on similar conditions. The regular sovereigns were necessitated in self-defence to adopt a similar policy. Four distinct forms have been traced in the development of the feudal system. First the land granted, if not resumable at pleasure, was so on the expiry of the grantee's life. Then it tended to become to a certain limited extent hereditary. Next it became completely hereditary, and was called a feud. Finally the order of descent was settled, collateral relations admitted to inheritance, and the reciprocal obligations of lord and tenant settled by fixed regulations known and published.

In England certain traces of feudality in its milder form are traceable among the Anglo-Saxons. The feudal system itself came in with all its rigour under William the Conqueror. He would not admit the existence of any "allodial" land, that is, land held in absolute possession, in England, though some exists in Shetland, once Danish isles. All belonged to him as lord paramount, to be parcelled out among his Norman vassal knights. They were called tenants *in capite—i.e.*, in chief. These knights were allowed again to allot it to others. When they did so they were themselves called mesne (middle) lords, and their vassals tenants paravail (lowest tenants). The appropriation of lands by conquerors, with the destruction, expulsion, or bondage of the original inhabitants, was an act of great wrong. When, without this initial blot, land was obtainable to be portioned out in the feudal way, an organized society in many ways adapted to mediæval times was the result. Every one had his place and his duties defined. He was taught loyalty, good faith, and self-respect. [CHIVALRY.] But feudality had serious defects, and with the progress of society it was sure sooner or later to decline.

When Henry II. dispensed with the inefficient service of the military vassals, and accepted in lieu a tax called escuage, wherewith to hire proper soldiers, one great prop of the feudal system was overthrown. Feudalism fell during the Commonwealth, and had lost some of its worst excrescences before it rose again.

When towns and cities began to gain importance through industry and commerce, the inhabitants were restive under the domination of the feudal lord. But to the present day in Britain feudality retains part of its old power, drawing distinction between "real" property in law and personal property, that is, money, &c., and giving greater political and social importance to the individual who has the former than to one who possesses only the latter. The system of conveyancing also is almost wholly feudal.

feū'-dal-izm, *s.* [Eng. *feudal; -ism.*] The feudal system; the principles and constitution of feuds or fiefs.

feū'-dal-ist, *s.* [Eng. *feudal; -ist.*]

feū-il'-lē-a, feū-il'-læ-a, *s.* [Named after Louis Feuillée, a traveller in Chili, and botanical writer.]

Bot.: A genus of Cucurbitaceæ, tribe Nhandirobeæ. It consists of plants with spirally twisted tendrils, and fruits about as large as an apple, which have been called Shaving box. The species are found in the hotter parts of America. The oily seeds of *Feuillea cordata,* a West Indian shrub, are violent emetics and purgatives. Its oil is used in America for lamps, as is that of *F. trilobata.* The latter is used in place of ointment to lubricate joints affected by pain.

feuil-lan, feuil-lant (pron. **fę'-yânş), feuil-lian,** *s.* [For etym. see def.]

Ch. Hist.: One of a religious congregation founded in 1577 by Jean de la Barrière. They were a branch or offshoot of the Bernardines, and were settled at the convent of Feuillant in Languedoc.

feuillant-club, *s.*

Hist.: A club formed in Paris by Lafayette, &c., in 1789, to oppose the Jacobins. The latter attacked the club in 1791, which was dissolved in 1792.

feuille-mort (pron. **fę-ĭ'-mor),** * **feuille-morte, phille-mot,** *s.* [Fr. = a dead leaf.] The colour of a dead or faded leaf.

"To make a countryman understand what *feuille-morte* colour signifies, it may suffice to tell him, 'tis the colour of withered leaves falling in autumn."—*Locke: Human Understanding,* bk. iii., ch. xi., § 14.

feuil-lēts (feuil as **fwīl)',** *s. pl.* [Fr. = a leaf.]

Diamond-cutting: The projecting points of the triangular facets in a rose-cut diamond, whose bases join those of the triangles of the central pyramid.

feuille-ton (pron. **fę-ĭ-tŏn),** *s.* [Fr. = a little leaf; dimin. of *feuille* = a leaf.] That part of a newspaper which is devoted to light literature, criticism, or fiction; the story printed in a newspaper.

feull-lian, *s.* [FEUILLAN.]

* **feū'-tĕr,** * **feu-tre,** *v.t.* [FEUTER, *s.*] To place in the rest, so as to be ready for action; as a spear.

"His spear he *feutred,* and at him it bore."
Spenser. F. Q., IV. iv. 45.

* **feū'-tĕr,** * **few-tyro,** *s.* [O. Fr. *feltre, feutre, fautre;* Port. & Ital. *feltro;* Sp. *fieltro;* Low Lat. *filtrum, feltrum* = felt, from its being stuffed with felt or cowa' hair.] A rest for a spear.

"To William he priked with spere festened in *feuter.*"
William of Palerne, 3,436.

* **feū'-tĕr-ĕr,** * **few-ter-er,** * **few-trer,** *s.* [O. Fr. *vautrier, vaultrier,* from *vautre, viaultre* = a hound; Ital. *veltro;* Low Lat. *veltrus;* Lat. *vertragus* = a greyhound.] A dog-keeper.

"A *fewterer*
To such a nasty fellow, a robbed thing
Of all delights youth looks for."
Beaum. & Flet.: Woman's Prize, ii. 1.

fē'-vĕr, * **fe-fre,** * **fe-vere,** * **fe-wer,** * **fy-ver,** *s.* [O. Fr. *fevre, fievre,* from Lat. *febris;* Ger. *fieber;* Fr. *fièvre;* Ital. *febbre.*]

I. *Lit. & Path.:* A disease or rather a whole group of diseases, one general, though not universal symptom of which is increased heat of the skin, besides which the pulse is frequent and various functions are disturbed. Fevers may be divided into Continued, Periodic, and Eruptive or Exanthematous. Under the first are ranked typhus, typhoid, and relapsing fevers; under the second intermittents and remittents; and under the third variola, rubeola, and scarlatina. Yellow fever belongs to the remittent rather than the continued type; so also does hectic fever. Puerperal fever should be removed to the class of inflammations. Jail, prison, hospital, or camp fevers are different names for typhus. (For bilious, inflammatory, nervous, petechial, putrid, and malignant fevers, see those words.)

2. *Fig.:* A state of nervous excitement: as, I am all in a *fever* about him. (*Colloquial.*)

fever-bush, *s.*

Bot.: A common name in the United States for *Laurus Benzoin,* a shrub with a fragrance resembling benzoin.

fever-cooling, *a.* Imparting coolness amid the heat of fever.

"The spreading tamarind that shakes,
Fanned by the breeze, its *fever-cooling* fruit."
Thomson: Summer, 667, 668.

* **fever-lurden,** *s.* Laziness.

"There is nothing so good for the *fever-lurden* as *unguentum hac linum.*"—*Andrew Boorde: Breviary of Health* (1573), ch. cli.

fever-root, *s.*

Bot.: (1) *Triosteum perfoliatum.* It is used as a cathartic and emetic. (2) *Pterospora Andromeda,* a herb belonging to the heath tribe. It has a long raceme of white flowers, and scattered lanceolate leaves.

fever-sick, *a.* Sick with fever.

fever-sore, *s.* A popular name for a carious ulcer or necrosis.

fever-tree, *s.*

Bot.: The blue gum-tree, *Eucalyptus globulus.*

fever-weakened, *a.* Weakened by fever. (*Shakesp.:* 2 *Henry IV.,* i. 1.)

fever-weed, *s.*

Bot.: A plant of the genus Eryngium.

fever-wort, *s.*

Bot.: (1) *Erythræa centaurium,* feverfew. (2) *Triosteum perfoliatum.*

* **fēv'-ĕr,** *v.t.* & *i.* [FEVER, *s.*]

A. *Trans.:* To put or throw into a fever.

"The white hand of a lady *fever* thee;
Shake to look on't."
Shakesp.: Antony & Cleopatra, iii. 13.

B. *Intrans.:* To fall into a fever; to become feverish.

* **fē'-vĕred,** * **fea-voured,** *a.* [Eng. *fever; -ed.*] Suffering from or affected with fever; feverish.

"A drumming ear, a *feavoured* body, a boyling stomach."—*Feltham; Resolves,* pt. i., res. 84.

* **fē'-vĕr-ĕt,** *s.* [A dimin. from *fever* (q.v.).] A slight fever.

"A light *feveret,* or an old quartan ague, is not a sufficient excuse for non-appearance."—*Ayliffe: Parergon.*

fē'-vĕr-few (ew as **ū),** *s.* [A corrupt. of A.S. *feferfuge*, from Lat. *febrifuga*, from *febris* = a fever, and *fugo* = to put to flight, to dispel.]

Botany:

1. *Pyrethrum Parthenium*, a common British plant. It is aromatic and stimulant, and was supposed to act as a febrifuge, whence the popular name. Its smell is said to be particularly offensive to bees. [FEATHERFEW.]

2. *Erythræa Centaurium.* (*Britten & Holland.*)

fē'-vĕr-ĭsh, *a.* [Eng. *fever*; *-ish.*]

I. *Literally:*

1. Suffering from or affected with fever; hot, as one in a fever.

"Noiselessly moved about the assiduous, careful attendants,
Moistening the *feverish* lip."
Longfellow: Evangeline, ii. 5.

2. Indicating or characteristic of a fever: as, *feverish* symptoms.

3. Tending towards a fever; resembling a fever.

"A *feverish* disorder disabled me."—*Swift: To Pope.*

II. *Figuratively:*

1. Uncertain, inconstant; now hot, now cold.

"We toss and turn about our *feverish* will."
Dryden: Indian Emperor, iv. 2.

2. Hot, burning.

"To ply the sweet carouse, remote from noise,
Secured of *feverish* heats." *J. Philips: Cider*, ii.

fē'-vĕr-ĭsh-lȳ, *adv.* [Eng. *feverish*; *-ly.*] In a feverish manner.

fē'-vĕr-ĭsh-nĕss, *s.* [Eng. *feverish*; *-ness.*]

1. *Lit.:* The quality or state of being feverish; a suffering from a slight fever.

2. *Fig.:* Heat, excitement.

"Satiety, perpetual disgust, and *feverishness* of desire."—*Shaftesbury: Enquiry conc. Virtue.*

* **fē'-vĕr-lȳ,** * **fē'-vĕr-lĭke,** *a.* [Eng. *fever*; *-ly*, *-like.*] Like a fever; like one suffering from fever.

"And *feuerlike* I leede my fancie still."
Gascoigne: The Passion of a Louer.

* **fē'-vĕr-ŏŭs,** *a.* [Eng. *fever*; *-ous.*]

I. *Literally:*

1. Suffering from or affected with a fever.

"Thou mad'st thine enemies shake, as if the world
Were *feverous*." *Shakesp.: Coriolanus*, i. 4.

2. Having the nature of a fever; feverish.

"My old Lady Phelips is a constant water-drinker, and it hath preserved her (as she conceives) from a resort of *feverous* heats in her stomach."—*Boyle. Works*, vol. vi., p. 386.

3. Having a tendency to produce a fever.

"It hath been noted by the ancients, that southern winds, blowing much, without rain, do cause a *feverous* disposition of the year, but with rain not."—*Bacon: Natural History*, § 786.

4. Indicating or characterized by feverishness.

"A babling fellow, being never without an inflammation and *feverous* pulse."—*P. Holland. Plutarch*, p. 160.

II. *Fig.:* Heated, excited, feverish, inconstant.

"And now of late came tributary kings,
Bringing him nothing but new fears from the east,
With which his *fev'rous* cares their cold increased."
Crashaw: Steps to the Temple.

* **fē'-vĕr-ŏŭs-lȳ,** *adv.* [Eng. *fever*; *-ously.*] In a feverous or feverish manner; feverishly.

"Nor [couldst thou] by the eye's water know a malady
Desperately hot, or raging *feverously*."
Donne, Elegy 7.

* **fē'-vĕr-ў,** *a.* [Eng. *fever*; *-y.*] Afflicted with or suffering from fever; feverish.

"O Rome, thy head
Is drowned in sleep, and all thy body *fevery*."
Ben Jonson: Catiline, iii. 2.

few (ew as **ū),** * **feawe,** * **feu,** * **feuwe,** * **fewe,** * **fo,** * **fone,** * **foe,** * **fowe,** * **veawe,** * **vewe,** *a.* [A.S. *feá*, *feawe* (pl.); Icel. *fár*; Dan. *faa*; Sw. *få*; Goth. *fawis*; Lat. *paucus* = few; Gr. παῦρος (*pauros*) = small.] Not many; small, limited, or restricted in number. It is frequently used, by ellipsis of the noun, for not many persons or things.

"And did great liking shew:
Great liking unto many, but true love to *few*."
Spenser: F. Q., III. xii. 13.

¶ (1) *A few:*

(*a*) A small number of. It expresses rather more in number than *few* alone.

"A *fewe* termes coude he, two or three."
Chaucer: C. T., Prol. 641.

* (*b*) It is also used for a small quantity of.

"They had sold their birthright to the Pope for *a few* pottage."—*Adams: Works*, i. 6.

* (*c*) It is also used adverbially: a little.

"I trembled *a few*."—*Madame D'Arblay: Diary*, i. 28.

(2) *In few:* In a few words; shortly; briefly.

"*In few*, Ophelia,
Do not believe his vows." *Shakesp.: Hamlet*, i. 3

(3) *A good few:* A considerable number.

few-aered, *a.* Owning or farming but a few acres.

* **few'-ęl (ew** as **ū),** *s.* [FUEL.]

* **few'-ęl (ew** as **ū),** *v.t.* [FUEL, *v.*]

* **few-met,** *s.* [FUMET.]

few' nĕss (ew as **ū),** * **feu nesse,** * **fewenesse,** * **few-nesse,** *s.* [A.S. *féanes.*]

1. Smallness in number; paucity.

"These, by reason of their *fewness*, I could not distinguish from the numbers with whom they are embodied."—*Dryden: Hind & Panther.* (Pref.)

* 2. Brevity; shortness of language; conciseness.

"*Fewness* and truth, 'tis thus."
Shakesp.: Measure for Measure, i. 4.

* **few-sty,** *a.* [FUSTY.]

* **few-te,** *s.* [FEALTY.]

* **few'-tĕr ẽr (ew** as **ū),** * **few-trer,** *s.* [FEUTERER.]

fȳ, *v.t.* [Dan. *feye*, *feie* = to clean out; Ger. *fegen*; Dut. *vegen.*] To cleanse or clear a ditch of mud.

"By *feying* and casting that mud upon heaps,
Commodities many the husbandman reaps."
Tusser: June's Husbandry.

fȳ, * **fay,** * **faie,** * **fæighe,** * **feye,** *a.* [A.S. *fæge*; Icel. *feigr*; O. H. Ger. *feigi*; M. H. Ger. *veige*; Sw. *fägen*; Dan. *feig.*]

1. Killed, dead.

"The freike hadde ben *fay* but for his fyn armour."
Destruction of Troy, 6,590.

2. Predestined; on the verge of death; implying both the proximity of this event and the impossibility of avoiding it.

"The folk was *fey* that he befor him fand."
Wallace, iv. 616.

3. Unfortunate, unlucky.

"Myrioneus son also, Corebus yyng,
Quhilk in thay dais for *fey* luf hate burnyng
Of Cassandra, to Troy was cummyng that yere."
Douglas: Virgil, 50, 53.

4. It is used in reference to corn in the sense of decayed.

* **fȳ** (1), *s.* [FAITH.]

fey (2), *s.* [FEE.] A fee or fief.

fȳ (3), *s.* [FEY, *v.*] Croft or infield land.

"There was a bear *fey*, or a piece of land allotted for bear, upon which the dung collected in the farm was annually laid, and laboured from time immemorial."—*Stat. Acc. P. Old Luce*, xiv 491.

fȳ'-dŏm, *s.* [Eng. *fey*, a.; *-dom.*] The state of being *fey*, or that conduct which is supposed to indicate the near approach of death.

* **fey-er,** *s.* [Eng. *fey*, **v.**; *-er.*] One who cleans out ditches.

* **feyre,** *a.* [FAIR, *a.*]

* **feyre,** *s.* [FAIR, *s.*]

fēz, *s.* [From Fez, the chief town of Morocco, where they are manufactured.] A red cap without a brim, fitting close to the head, and with a tassel of silk, wool, &c.; much worn by Turks, Egyptians, &c.

* **fī,** *interj.* [FY.]

fī-a'-ere, *s.* [Fr.] A French hackney-coach, invented by Sauvage in 1640.

FIACRE.

"The office for these cabs or coaches was in a wine-seller's shop patronised by gardeners, and dedicated to St. Fiacre. This is, therefore, the reason the name of *fiacre* was given to hired vehicles."—*Daily News*, Sept. 6, 1875.

* **fī'-ançe,** * **fi-aunce,** *s.* [O. Fr. *fiance*; Sp. *fianza*; Port. *fiança*; Ital *fidanza*, from Lat. *fidentia*, from *fides* = faith.] Trust, faith, confidence.

* **fī'-ançe,** * **fy-aunce,** * **fy-anse,** *v.t.* [Fr. *fiancer.*] To betroth, to affiance. [FIANCE, *s.*]

fī-ăn'-çé (*m.*), **fi-ăn'-çée** (*f.*), *s.* [Fr., pa. par. of *fiancer* = to betroth.] One who is affianced, betrothed, or engaged.

fī'-ants, *s.* [Fr. *fiente* = dung.] The dung of the fox or badger.

fī'-ar, *s.* [FEUAR.]

Scots Law:

1. One who has the reversion of property; a feuar.

2. (*Pl.*): The prices of grain legally fixed, in a county, for the current year.

fi-as'-cō, *s.* [In Italy, "*Ola, ola, fiasco!*" is cried when a singer makes a false note, or fails to please. *Fiasco* means literally a bottle or flask, and the allusion may be to the bursting of a bottle. The phrase is used also in French and German.] A failure in a musical performance; generally, a ridiculous failure or breakdown.

fī'-at, *s.* [Lat., 3rd pers. sing. pr. subj. of *fio* = to be done.]

1. *Ord. Lang.:* An order or command for anything to be done.

"And hear at once, in thought extensive, hear
The Almighty *fiat* and the trumpet sound."
Young: Night Thoughts, vi., 464, 465.

2. *Law:* An order or warrant of a judge or of the Attorney-General, authorising, or allowing certain processes, and signified by his subscribing the words *fiat ut petitur*, that is, let it be done as is asked.

fiat money, *s.* Any currency, whether of paper or metal, that is placed in circulation and maintained as legal-tender (q.v.) by the command [fiat] of a government or other competent power. This term is loosely applied to a paper currency of which the substance is valueless and for which redemption to a specified commodity is not promised; as distinguished from legal-tender coins composed of metal supposedly equal in value to the face of same, or a paper currency bearing a credible promise of redemption on demand in so-called precious metal.

* **fi-aunce,** *s.* [FIANCE.]

* **fi-aunt,** *s.* [FIAT.] A command; an order; a fiat.

fib, *s.* [A weakened and abbreviated form of *fable* (q.v.) (*Skeat*).] A soft or mild term for a lie or falsehood.

"From holy lips is dropped the specious *fib*."
Criticisms on the Rolliad: The Lyars, pt. ii.

fĭb (1), *v.i.* [Etym. doubtful.] To deliver a succession of short, rapid blows. (*Slang.*)

fĭb (2), *v.i.* [FIB, *s.*] To tell lies; to lie.

fĭb'-bĕr, *s.* [Eng. *fib* (2), v.; *-er.*] One who tells fibs or lies; a liar.

"Trust me, I'm no *fibber*." *Wolcott: P. Pindar*, p. 137.

fī'-bĕr, *s.* [Lat. = the beaver.]

Zool.: A genus of Muridæ. *Fiber zibethicus* is the Musquash or Ondatra of N. America, which has the hind feet partly webbed, the tail compressed, and is half aquatic. Many hundred thousands of their skins are annually exported to Europe.

fī'-bre (bre as **bĕr),** *s.* [Fr., from Lat. *fibra* = a fibre,]

I. *Ordinary Language:*

1. *Lit.:* A small thread, string, or filament, of which the tissues of animals and plants are constituted.

"The *fibres* divide on approaching the peripheral termination of the nerve."—*Quain: Anatomy*, ii. 131.

2. *Fig.:* Strength, power, sinew.

II. *Technically:*

1. *Anat. & Zool.:* The same as FIBROUS TISSUE.

2. *Botany:*

(1) Any long cell attenuated to a point at both ends, and with the walls thickened with ligneous secondary deposits.

(2) (*Pl.*): Secondary deposits on the walls of cells or ducts, which, instead of forming

continuous pilled layers, take a spiral or other similar form, and in many cases ultimately become real fibres. (*Griffith & Henfrey.*)

¶ (1) *Elementary fibre:*

Bot.: A thread turned round the interior of spiral vessels or any similar tissue.

(2) *Liber fibre:*

Bot.: The very elongated wood tubes which form the elements of the liber in exogenous plants.

(3) *Woody fibre:*

Bot.: The short cells which make up the substance of most solid woods.

fī'-bred (bred as bĕrd), *a.* [Eng. *fibr(e); -ed.*] Having fibres; composed of fibres.

fī'-brē-lĕss (bre as bĕr), *a.* [Eng. *fibre; -less.*] Destitute of or without fibres.

* **fī'-brĭl,** *s.* [Fr. *fibrille;* Low Lat. *fibrilla,* dimin. of Lat. *fibra* = a fibre.]

1. *Anat.:* A little fibre. [FIBRILLA.]

"Fine laminæ formed of a close interlacement of the finest *fibrils.*"—*Quain: Anatomy,* ii. 136.

2. *Bot.:* One of the minute subdivisions in which a branching root terminates. Its tip is called the spongiole or spongiolet.

fī-brĭl'-la (pl. **fī-brĭl'-læ),** *s.* [Low Lat. *fibrilla,* dimin. of *fibra* = a fibre.]

Botany:

1. *Gen.:* A fibril (q.v.).

2. *Spec.* (*Pl.*)*:* The roots of lichens.

fī-brĭl'-lar, *a.* [Lat. *fibrilla* (q.v.); Eng. &c. suff. *-ar.*]

Physiol.: Consisting of, or in any way connected with fibrillæ.

"Cells which have undergone a granular rather than a *fibrillar* metamorphosis."—*Quain: Anatomy,* ii. 136.

fī-brĭl'-lāt-ĕd, *a.* [FIBRILLA.] Furnished with fibrils or fibrillæ; fringed.

fī-brĭl'-lā'-tion, *s.* [FIBRILLA.] The state of being fibrillated, or reduced to fibrila or fibrillæ.

fī-brĭl'-lōsc, *a.* [Low Lat. *fibrill(a),* and Eng. adj. suff. *-ose.*]

Bot.: Covered with loose fibres; composed of fibres.

fī-brĭl'-loŭs, *a.* [Eng. *fibril; -ous;* Fr. *fibrilleux.*] Of or pertaining to fibres.

fī'-brĭn, fī'-brīne, *s.* [Eng., &c. *fibr(e); -in* (*Chem.*) (q.v.).]

Chem.: Fibrin is an albuminoid or proteid substance which is contained in the blood, and causes it to clot. It is obtained by stirring blood with a bundle of twigs. The fibrin adheres in amorphous fibrous layers. It is then washed with water, to remove the colouring matter, &c. Fibrin is insoluble in water and in dilute hydrochloric acid, but dissolves in an aqueous solution of nitrate of potassium when heated to 40° [ALBUMINOIDS]. Albumin heated to 98° F. in a current of oxygen gas is gradually converted into fibrin—carbon, 52·4; hydrogen, 18·07; nitrogen, 7·03; oxygen, 21·29; sulphur, 1·22 per cent. Normal human blood contains about 2·55 per cent. of fibrin. Vegetable fibrin is the residue left when gluten is boiled with alcohol; it is a greyish-white elastic mass.

fī-brĭn-ā'-tion, *s.* [Eng. *fibrin; -ation.*]

Med.: The state of becoming fibrinous or having an excess of fibrin, as in inflammatory diseases.

fī'-brīne, *s.* [FIBRIN.]

fī'-brĭn-ō-ġĕn, *s.* [Eng., &c. *fibrin,* and Gr. γεννάω (*gennao*) = to engender, to produce.]

Anat.: Fibrinogenous substance; the name given, in 1861, by A. Schmidt, of Dorpat, to one of the two constituents which go to make fibrin, the latter, when it appears as a coagulum or a fluid, being produced at the moment, and not previously existing in a liquid state. The other constituent is called fibrinoplastin, or fibrinoplastic substance. (*Quain.*)

fī-brĭn-ŏġ'-ĕn-oŭs, *a.* [Eng. *fibrinogen; -ous.*]

Anat.: Pertaining to fibrinogen (q.v.); forming or aiding the formation of fibres.

fibrogenous substance, *s.*

Anat.: The same as FIBRINOGEN (q.v.)

fī-brĭn-ō-plăs'-tic, *a.* [Eng. *fibrin;* o connective, and *plastic.*]

Anat.: Pertaining to fibrinoplastin; forming or aiding in the formation of fibrin.

"But the most important and distinctive character of paraglobulin is its *fibrinoplastic* property . . . by which it co-operates with fibrinogen in producing solid fibrin."—*Quain: Anat.,* &c. (ed. 11).

fibrinoplastic substance, *s.*

Anat.: The same as FIBRINOPLASTIN (q.v.).

fī-brĭn-ō-plăs'-tĭn, *s.* [Eng. *fibrin;* o connective; Gr. πλάσσω (*plassō*) = to form, mould, or shape; & suff. *in* (*Chem.*) (q.v.).]

Anat.: Fibrinoplastic substance; the name given, in 1861, by A. Schmidt, of Dorpat, to one of the two substances, the union of which generates fibrin. The other of the two is FIBRINOGEN (q.v.). (*Quain.*)

fī'-brĭn-oŭs, *a.* [Eng. *fibrin; -ous.*] Composed of or partaking of the nature of fibrin.

fī-bro-, *in compos.* [Lat. *fibra* = a fibre.]

Anat., Nat. Science, &c.: Fibrous.

fī-brō-căr'-tĭl-age (age as ĭġ), *s.* [Pref. *fibro-,* and Eng., &c. *cartilage.*]

Physiol.: A compound of white fibrous tissue and cartilage in varying proportions. To the strength and density of fibroin it adds the elasticity of cartilage. It is of two kinds: (1) the Articular, occurring (*a*) as discs, (*b*) as laminæ or meniscæ, and (*c*) of a circumferential type; (2) the Non-articular, deposited on the surface of the grooves in bones which lodge tendons. (*Todd & Bowman: Physiol. Anat.,* vol. i., ch. iv.)

fī-brō-căr-tĭ-lăġ'-ĭn-oŭs, *a.* [Pref. *fibro-,* and Eng., &c. *cartilaginous.*] Pertaining to, or composed of fibrocartilage.

fī-brō-çĕl'-lu-lar, *a.* [Pref. *fibro-,* and Eng., &c. *cellular.*] Partaking of the natures or characters of fibrous and cellular tissues.

fī'-brō-fĕr'-rīte, *s.* [Lat. *fibra* = a fibre; *ferrum* = iron; Eng. suff. *-ite* (*Min.*).]

Min.: A delicate fibrous, pale-yellow mineral, from Copiapo, in Chili.

fī'-brō-ĭn, fī'-brō-īne, *s.* [Pref. *fibro-; -in, -ine* (*Chem.*) (q.v.).]

Chem.: $C_{71}H_{107}N_{24}O_{25}$, or $C_{15}H_{23}N_5O_6$. Both these formulæ have been given to fibroin, which constitutes the chief part of the fibre of silk. It is extracted by digesting the silk with water, under a pressure of three atmospheres, and then removing the fat with ether; it is a white mass. Boiled with dilute sulphuric acid, it yields leucine, tyrosine, and glycocine. It is the principal constituent of cobwebs and the horny skeletons of sponges.

fī'-brō-līte, *s.* [Lat. *fibra* = a fibre, and suff. *-lite* (*Min.*) = Gr. λίθος (*lithos*) = a stone.]

Min.: A monoclinic, transparent or translucent mineral, occurring in gneiss, mica schist, and related metamorphic rocks in Bohemia, Bavaria, and parts of the United States. It has commonly long slender crystals, sometimes fibrous or columnar massive. Colour, brown or olive-green. Fibrolite was much used for stone implements in Western Europe in the Stone Age.

fī-brō-mū'-coŭs, *a.* [Pref. *fibro-,* and Eng., &c. *mucous.*]

Anat.: Partaking of the natures or characters of fibrous and mucous membranes; applied to membranes of a fibrous character which are intimately connected with others of a mucous nature: as, the pituitary membrane, the membrane of the urethra, &c.

fī-brō-plăs'-tic, *a.* [Fr. *fibroplastique.*]

Anat.: A term applied to a morbid formation constituted of the elements of cellular tissue, transformed in part into fibre. (*Dunglison.*) Fibroplastic tissue or its elements are met with in inflammatory effusions upon the serous and synovial membranes (but rarely), in the interstitial effusions of pneumonia, especially when chronic, in cirrhosis of the liver, in the products of suppurating surfaces, in certain tumours, &c. [TISSUE.]

fī-brō-sĕr'-oŭs, [Pref. *fibro-,* and Eng. *serous.*] Partaking of the nature or character of fibrous and serous membranes; consisting of fibrous and serous membranes intimately united.

fibroserous membrane, *s.*

Anat.: A serous membrane lining a fibrous one; as the arachnoid lining the dura-mater. (*Quain.*)

fī'-broŭs, *a.* [Fr. *fibreux,* from *fibre* = a fibre.]

Nat. Science, &c.: Consisting of fibres, containing a great proportion of loose fibre, as the rind of a cocoanut.

fibrous-bundles, *s. pl.*

Bot.: One of the two componenta of fibrovascular tissue, the other being fibrovascular bundlea (q.v.). Fibrous bundles occur in liber, in the stems of endogens, and in the fibrous cone-stalks of mosses.

fibrous-coal, *s.* A variety of coal found in Great Britain, and distinguished by its fibrous structure, and silky lustre.

fibrous-conc, *s.*

Anat.: The name given by Mayo to assemblages of radiating fibres, shaped like a hollow cone, in each hemisphere of the cerebrum.

fibrous-quartz, *s.*

Min.: A variety of quartz.

fibrous-root, *s.*

Bot.: A root divided into a multitude of branches and fibres.

fibrous-shells, *s.*

Zool.: Shells of fibrous structure like the recent Pinna and the fossil Inoceramus. They consist of successive layers of prismatic cells, containing translucent carbonate of lime. When very thick, they break up into fragments with edges resembling those of aragonite or satin-spar. (*S. P. Woodward.*)

fibrous-tissue, *s.*

Anat.: A white, yellowish-white tissue, with a shiniug silvery or nacreous lustre. It is very strong, and is wanting in extensibility; yet it is perfectly pliant, and is used to connect or support other parts, which it does admirably. It is of two kinds, fascicular and membranous. It forms the tendons of muscles, ligaments, &c.

fī'-broŭs-nĕss, *s.* [Eng. *fibrous; -ness.*] The quality or state of being fibrous.

fī-brō-văs'-cu-lar, *a.* [Pref. *fibro-,* and Eng. *vascular.*]

Bot.: Consisting of small vessels and of fibres.

fibrovascular-bundle, *s.*

Bot. (*Generally Pl.*)*:* Bundles of vessels and ducts, together with prosenchyma, forming the woody fibres of all plants above the rank of Mosses. The permanent tissues of a fibrovascular bundle can be divided into two groups, called by Naegeli, Xylem and Phloem (q.v.).

fibrovascular-tissue, *s.*

Bot.: A tissue composed of vessels, ducts, and prosenchymatous cells or fibres associated in various ways, forming fibrous or fibrovascular bundles, which either remain distinct or cohere to form masses of wood.

* **fĭbs'-tĕr,** *s.* [Eng. *fib; -ster.*] One who tells fibs; a fibber.

"You silly little *fibster,* I heard you in the room over head."—*Thackeray: Vanity Fair* (ed. 1856), ii. 141.

fĭb'-u-la, *s.* [Lat., = a buckle or clasp.]

I. *Ord. Lang.:* A buckle, clasp, or brooch.

"There is also a large collection of *fibulæ* or garment-fastenings."—*Nichols: Handy Book of the Brit. Museum,* 349.

II. *Technically:*

1. *Anat.:* The outer and lesser bone of the leg, much smaller than the tibia. Its upper end, which does not reach so high as the knee, receives the lateral knob of the upper end of the tibia into a small sinus which it has in its inner side. Its lower end is received into the small sinus of the tibia, and then it extends into a large process, which form the outer ankle.

2. *Mason.:* An iron cramp by which stones are fastened together.

3. *Surg.:* A needle for sewing up wounds.

fĭb'-u-lar, *a.* [As if from a Lat. *fibularis,* from *fibula* = a clasp or buckle.]

Anat.: Of or pertaining to the fibula.

fī-eār'-ĭ-a, *s.* [Lat. *ficaria* = a fig plantation; *ficarius* = pertaining to figs; so called because the fasciculated knobs of the roots have been fancifully compared to little figs.]

Bot.: A section or sub-genus of Ranunculus, differing from the more typical buttercups in having three to five sepals and eight to twelve petals. It contains only one British species, *Ranunculus Ficaria*, the Pilewort or Lesser Celandine. It has cordate, petiolate, angular, or crenate leaves, three sepals, and nine petals. Its glossy yellow flowers, which commence in March and continue till May, are heralds of the spring. Sometimes Ficaria is elevated into a genus, in which case *R. Ficaria* becomes *Ficaria ranunculoides.*

***ficche, *ficchen, *fitche, *ficchyn, *fyche,** *v.t.* [O. Fr. *ficher, fichier, ficier*; Fr. *ficher*; Ital. *ficcare*; Lat. *figo* = to fix.]

1. *Lit.:* To fix, to fasten, to set up.

"There Ysrael *fichid* tentis."—*Wycliffe: Exod.* xix. 2.

2. *Fig.:* To strike.

"Thei ben scaterid and not *fichid* with sorewe."—*Wycliffe: Psalm* xxxiv. 16.

fī-çĭl'-lier (lior as yā), *s.* [Fr., from *ficelle* = pack-thread.] A reel on which pack-thread is wound.

***fĭçhe,** *v.t.* [Fiche.]

fĭçhed, *a.* [Fr. *fiché*, pa. par. of *ficher* = to drive or thrust in.]

Her.: The same as Fitched (q.v.).

fĭçh-ĕr, *v.i.* [A frequentative of Scotch *fike* (?).] (*Scotch.*)

1. To work slowly and awkwardly at any little or insignificant job; to be engaged in any petty, trifling employment.

2. To go awkwardly about work.

3. Used to denote the act of toying, in a somewhat indelicate manner, with a woman.

fĭçh'-tĕl-īte, *s.* [From Fichtelgebirge in North Bavaria, where it is found.]

Min.: A monoclinic, translucent, and brittle mineral, of a white colour, occurring in the form of shining scales, flat crystals, and thin layers between the rings of growth, and throughout the texture of pine wood from the peat beds in the vicinity of Redwitz in the Fichtelgebirge. It is easily soluble in ether; less so in alcohol. Hardness 1.

¶ *Fichtelite group of minerals:*

Min.: A group of minerals belonging to the Camphene series of hydrocarbons. Dana includes under it Fichtelite, Hartite, Dinite, and Ixolite.

fī-çhû', *s.* [Fr.] A light article of dress worn by ladies over the neck, throat, and shoulders.

fī-çĭ'-nīte, *s.* [From Ficinus, who analysed it.]

Min.: A monoclinic, black, subtranslucent mineral, of waxy or pearly lustre. Its hardness, 5 to 5·5; sp. gr. 3·4 to 3·5. Compos.: Phosphoric acid, 12·82; sulphuric acid, 4·07: protoxide of iron, 58·85; protoxide of manganese, 6·82; water, 16·87, &c. Found near Bodenmais. (*Dana.*)

fĭc'-kle, *fe-kylle, *fi-kel, *fi-kele, *fy-kel, *fy-kelle, *fy-kyl, *a.* [A.S. *ficol*, from *fic, gefic* = fraud, deceit.]

* 1. Treacherous, deceitful.

"Thagh I be fol and *fykel* and falce of my hert."
E. Eng. Allit. Poems; Patience, 288.

2. Changeable, inconstant, irresolute or wavering in mind; without firmness of mind or purpose; capricious.

"The most shallow, *fickle*, passionate presumptuous, and garrulous of men."—*Macaulay: Hist. Eng.*, ch. v.

3. Not firmly established or fixed; liable to change or vicissitude.

"*Fickle* their state, whom God
Most favours: who can please him long?"
Milton P. L., ix. 948, 949.

4. Feeble, weak.

"His darkness doth transcend our *fickle* light."
Wordsworth: Excursion, bk. vi.

***fĭc'-kle** (1), ***fi-kele,** ***vi-kelc,** *v.i.* [Ger. *fickeln, ficheln.*] To flatter. [Fickle, *a.*]

"Heo nolde *fikele*, as hire sustren hadde ydo."
Robert of Gloucester, p. 31.

fĭc'-kle (2), *v.t.* [A freq. from *fike* (q.v.).] To puzzle.

"An she win to her English, as I hae heard her do at an erra time, she may come to *fickle* us a'."—*Scott: Antiquary*, ch. xxxix.

fĭckle-pins, *s. pl.* A game in which a number of rings are taken off a double wire united at both ends. (*Scotch.*)

***fĭc'-kle-lў, *fik-el-y,** *a.* [Eng. *fickle*; *-ly.*] Deceitfully, treacherously.

"With thar tunges *fikely* thai dide."

fĭc'-kle-nĕss, *s.* [Eng. *fickle*; *-ness.*] The quality or state of being fickle; inconstancy, wavering, unsteadiness, irresolution; changeableness in mind or purpose; instability.

"The one was fire and *fickleness*, a child,
Most mutable in wishes."
Byron: Childe Harold, iii. 106.

***fĭc'-klў,** *adv.* [Eng. *fickl(e)*; *-ly.*] In a fickle manner; without firmness or steadiness.

"To raise a present power that's *fickly* held
By the frail tenure of the people's will."
Southerne: Spartan Dame, i. 1.

***fī'-cō,** *s.* [Ital. = a fig.]

1. A fig; an act of contempt shown with the fingers.

"A *fico* for the phrase."—*Shakesp.: Merry Wives*, i. 3.

2. Contempt, scorn.

"Having once recovered his fortress, he then gives the *fico* to his adversaries."—*Carew: Surv. of Cornwall.*

fī'-cōid, *s.* [Lat. *ficus* = a fig-tree, to the flower or fruit of which the ficoids, with their numerous narrow petals, many stamens, &c., bear some fanciful resemblance, but no affinity or even analogy; Gr. εἶδος (*eidos*), form.]

Bot. (*Pl.*): The English name given by Lindley to the order Mesembryaceæ.

fī-cōi'-dal, *a.* & *s.* [Eng. *ficoid*; *-al.*]

Botany:

A. *As adj.:* Pertaining or relating to the ficoids (q.v.).

B. *As subst.:* A plant belonging to the ficoidal alliance.

"Natural order of *ficoidals*."—*Lindley: Veg. King.* (ed. 1853), p. 523.

ficoidal alliance, *s.*

Bot.: The English name of the alliance Ficoidales (q.v.).

fī-cōi-dā'-lēs, *s. pl.* [Lat. *ficus* (q.v.); Gr. εἶδος (*eidos*) = form, and Lat. fem. pl. adj. suff. *-ales.*]

Bot.: An alliance of Perigynous Exogens, consisting of orders with monodichlamydeous flowers, central or axile placentæ; the corolla, if present, polypetalous, and an external embryo curved round a small quantity of mealy albumen. Lindley includes under it the four orders, Basellaceæ, Mesembryaceæ, Tetragoniaceæ, and Scleranthaceæ (q.v.).

fī-cōi'-dē-æ, *s. pl.* [Lat. *ficus* = a fig; Gr. εἶδος (*eidos*) = form, appearance, and Lat. fem. pl. adj. suff. *-eæ.*]

Bot.: The name given by Jussieu and others to the order called by Lindley Mesembryaceæ (q.v.).

***fict,** *a.* [Lat. *fictus*, pa. par. of *fingo* = to feign.] Fictitious. [Fiction.]

fĭc'-ta, *a.* [Lat. fem. sing. of *fictus*, pa. par. of *fingo.*] False, fictitious.

ficta musica. [Falsa musica.]

fĭc'-tile, *a.* & *s.* [Lat. *fictilis*, from *fictus*, pa. par. of *fingo.*]

A. *As adj.:* Moulded into form by art; manufactured by or suitable for the potter.

"The originals are made of coarse, black-brown clay, and are classed among the earliest specimens of Italian *fictile* art."—*C. Wordsworth: Greece.* (Introd.).

* **B.** *As subst.:* An earthen vessel or other article moulded and baked.

fĭc'-tile-nĕss, *s.* [Eng. *fictile*; *-ness.*] The state or quality of being fictile; fictility.

fĭc-tĭl'-ĭ-tў, *s.* [Eng. *fictil(e)*; *-ity.*] The quality or state of being fictile.

fĭc'-tion, *s.* [Fr., from Lat. *fictio* = a feigning, from *fictus*, pa. par. of *fingo* = to feign.]

I. *Ordinary Language:*

1. The act of feigning or inventing.

* 2. Fashioning, contriving, establishing.

"To force a currency of their own *fiction*."—*Burke: French Revolution*, p. 124.

3. That which is feigned, imagined, or invented; a feigned, fictitious, or invented story or account; a fabrication, a fable.

"When it could no longer be denied that her flight had been voluntary, numerous *fictions* were invented to account for it."—*Macaulay: Hist. Eng.*, ch. ix.

4. Romance.

"For us the stream of *fiction* ceased to flow."
Wordsworth: White Doe of Rylstone (Introd.)

5. Fictitious literature; the literary productions of the imagination, whether prose or verse, narrative or dramatic; more specifically applied to prose romances or novels.

"Such anecdotes are apt to be looked upon not as genuine illustrations . . . just because they do occur in poetry or *fiction*."—*Lindsay Mind in the Lower Animals*, i. 27.

II. *Law:* Any point or thing assumed for the purposes of justice or convenience, even though it cannot be proved, and may even be absolutely opposed to the fact. Such fictions were first brought into legal procedure in the time of Edward I. Many of them have been abolished.

¶ Crabb thus discriminates between *fiction, fabrication*, and *falsehood*: "*Fiction* and *fabrication* both require invention: *falsehood* consists of simple contradiction. The fables of Æsop are *fictions* of the simplest kind, but yet such as required a peculiarly lively fancy and inventive genius to produce. The *fabrication* of a play, as the production of Shakespeare's pen, was once executed with sufficient skill to impose for a time upon the public credulity. . . . In an extended sense of the word *fiction*, it approaches still nearer to the sense of *fabricate*, when said of the *fictions* of the ancients, which were delivered as truth, although admitted now to be false: the motive of the narrator is what here constitutes the difference—namely, that in the former case he believes what he relates to be true, in the latter he knows it to be false. The heathen mythology consists principally of the *fictions* of the poets; newspapers commonly abound in *fabrications.*" (*Crabb: Eng. Synon.*)

***fĭc'-tion-al,** *a.* [Eng. *fiction*; *-al.*] Of or pertaining to fiction; characterized by fiction; fictitious, feigned.

***fĭc'-tion-ist,** *s.* [Eng. *fiction*; *-ist.*] A writer of fiction.

"He will come out in time an elegant *fictionist*."—*Lamb: Letter to Wordsworth.*

fĭc'-tious, *a.* [Lat. *fictus*, pa. par. of *fingo* = to feign.] Fictitious.

"With fancy'd rules and arbitrary laws
Matter and motion he [man] restrains,
And study'd lines and *fictious* circles draws."
Prior: An Ode, 1688.

fĭc-tĭ'-tious, *a.* [Lat. *fictitius, ficticius*, from *fictus*, pa. par. of *fingo.*]

1. Feigned, imaginary, not real, fabulous.

"They hold the ten Sibylls to be *fictitious* and fabulous."—*Howell: Letters*, bk. iv., lett. 43.

2. Counterfeit, false; not genuine or real.

"Duty, love, and honour, fail to sway
Fictitious bonds." *Goldsmith: Traveller.*

3. Not real or true; allegorical.

"Milton, sensible of this defect in the subject of his poem, brought into it two characters of a shadowy and *fictitious* nature in the persons of Sin and Death."—*Addison: Spectator*, No. 273.

fĭc-tĭ'-tious-lў, *adv.* [Eng. *fictitious*; *-ly.*] In a fictitious, feigned, or counterfeit manner; by fiction; not really or truly.

"Pieces are *fictitiously* set down, and having no copy in nature."—*Browne: Vulgar Errours*, bk. v., ch. xx.

fĭc-tĭ'-tious-nĕss, *s.* [Eng. *fictitious*; *-ness.*] The quality or state of being fictitious, feigned, or counterfeit.

"Some think that its essence consists in the unimportance, others in the *fictitiousness* of the transaction."—*Rambler*, No. 125.

***fĭc'-tĭve,** *a.* [Lat. *fict(us)*, pa. par. of *fingo* = to feign, and Eng. adj. suff. *-ive.*]

1. Feigned, fictitious, imaginary.

2. Of or pertaining to fiction; sham, counterfeit.

"Dabbling in the fount of *fictive* tears."
Tennyson: Brook, 93.

fĭc'-tŏr, *s.* [Lat., from *fictus*, pa. par. of *fingo.*] An artist in wax, clay, or other plastic material, as distinguished from one who works in bronze, marble, or other solid material.

fī'-cŭs, *s.* [Lat. = a fig-tree.]

1. *Bot.:* A genus of Moraceæ. Flowers unisexual, the males and females mixed indiscriminately on the inner side of a concave fleshy receptacle, the upper margin of which constitutes a narrow aperture. Flowers separated from each other by soft, colourless, bristle-like bracts or scales. Calyx with three, seven, or eight segments; corolla, none; stamens, one, three, or five; ovary one; style

awl-shaped; stigma two-lobed; pericarps with a single seed; juice generally milky. The genus is a very large one, about 160 species being already known. They occur in all the hotter parts of the world. Many are large umbrageous trees; some again are ivy-like creepers. *Ficus Carica* is the cultivated fig. [Fig.] *F. indica* is the Banyan tree (q.v.); *F. religiosa*, the Pippal or Sacred Fig, planted around temples in India. *F. religiosa, Benjamina, pumila, auriculata, Rumphii, benghalensis, aspera, Granatum,* and *Sycomorus,* have an eatable fruit, but much inferior to that of the cultivated Fig. The milky juice of *Ficus* furnishes caoutchouc. That of India is derived from *F. elastica;* that of America from *F. Radula, elliptica,* and *prinoides.* Other species yield the same substance in Java. *F. Saussureana* is one of the Cow-trees. [Cow-tree.] A kind of gum lac comes from *F. indica, benghalensis,* and *Tsjela.* The juice of *F. septica* is emetic; that of *F. toxicaria* and *F. Daemona* virulent poisons; *F. anthelmintica,* a native of Brazil, is used against intestinal worms; the bark of *F. racemosa* is slightly astringent, and is of use in hæmaturia and menorrhagia, whilst the juice of its root is a powerful tonic. Egyptian mummy cases are said to have been made from the wood of *F. Sycamorus,* which is all but imperishable. It is the sycomore of scripture (Ps. lxxviii. 47, Amos vii. 14, &c.), spelled also sycamore (Isaiah ix. 10, Luke xix. 4), but must not be confounded with the True Sycamore (*Acer Pseudo-platanus*) to which it is in no way akin.

2. *Palæobotany:* It is believed that ficus has been found fossil in sands of Cretaceous age near Aix-la-Chapelle.

3. *Surg.:* A fleshy excrescence, soft and reddish, or hard and scirrhous, formed like a fig, and occurring on the anus, eyelids, chin, or reproductive organs.

4. *Pharm.:* Ficus, the prepared fruit of *Ficus Carica,* a native of Asia, and used in the preparation of *Confectio senna.* Figs, being demulcent, nutritive, and laxative, are used as mild purgatives; when heated and split open they are used as cataplasms.

fĭd, *v.t.* [Icel. *fetta* = to bend back.] To move up and down or from side to side, as an animal moves its tail; to wag.

Hood: Miss Kilmansegg.

* **fiddle-lipped,** *a.*

Bot.: Having a fiddle-shaped lip.

fiddle-ma-fyke, *s.* A silly, punctilious person, who is chiefly concerned about mere trifles.

fiddle-pattern, *s.* A plain pattern formerly much in vogue in the manufacture of plate for table use, but which has of late years given way to others of more ornate character.

fiddle-shaped, *a.*

Bot.: An epithet applied to leaves which have deep indentations in the sides, so as to resemble a fiddle.

fiddle-stick, *s.* & *interj.*

A. *As subst.:* A fiddle-bow.

"His grisly beard was long and thick,
With which he strung his *fiddle-stick.*"
Butler: Hudibras, pt. i., c. iii.

B. *As interj.:* An exclamation equivalent to nonsense; fiddle-de-dee. Used also in the plural.

fiddle-string, *s.* The catgut string or cord stretched along a fiddle, and raised in the centre by a bridge.

fiddle-wood, *s.*

Bot.: Scrophularia aquatica, so called because the stems are by children stripped of their leaves and scraped across each other fiddler-fashion, when they produce a squeaking sound. (*Britten & Holland.*)

fĭd'-dle (2), *s.* [A corruption of Fr. *fidèle* = a plant of the Vervain order, *Citharexylum melanocaridium.*]

Bot.: A term used only as part of the subjoined compound.

fiddle-wood, *s.* The genus Citharexylum. From the fact that Fr. *fidèle* has become corrupted into Eng. *fiddle,* has arisen the erroneous notion that the wood of this genus is suitable for making violins. The error has been perpetuated also in the Latin name, which means harp-wood.

fĭd'-dle, ***fyd-el-in,** ***fith-el-en,** *v.i.* & *t.* [A.S. *fidhelian.*] [Fiddle, *s.*]

Fr. Hist.: The rendering of the appellation Chambre Ardente given to a French tribunal instituted by Francis I., in A.D. 1535, for the punishment of heresy. It continued about a century and a half.

fiery-cress, *s.* (See extract.)

"When a chieftain designed to summon his clan upon any sudden or important emergency, he slew a goat, and, making a cross of any light wood, seared its extremities in the fire, and extinguished them in the blood of the animal. This was called the *Fiery-cross*, also *Creau Tarigh*, or the Cross of Shame, because disobedience to what the symbol implied inferred infamy. It was delivered to a swift and trusty messenger, who ran full speed with it to the next hamlet, where he presented it to the principal person, with a single word, implying the place of rendezvous. He who received the symbol was bound to send it forwards, with equal despatch, to the next village; and thus it passed with incredible celerity through all the district which owed allegiance to the chief, and also among his allies and neighbours, if the danger was common to them. At sight of the *Fiery-cross*, every man, from sixteen years old to sixty, capable of bearing arms, was obliged instantly to repair, in his best arms and accoutrements, to the place of rendezvous. He who failed to appear, suffered the extremities of fire and sword, which were emblematically denounced to the disobedient by the bloody and burnt marks upon the warlike signal."—*Scott: Lady of the Lake*, iii. 1. (Note.)

fig-shell, *s.*

Conchol.: A popular name for Pyrula, a genus of sub-tropical shells, which have a fig- or pear-shaped form, with a short spire. The surface is, in many species, ornamented with raised reticulated lines; the outer lip thin and the inner smooth; canal long and open. They have a wide, sub-tropical range. Forty species have been described, living at from seventeen to thirty-five fathoms deep. (*Cassell's Nat. Hist.*, v. 200.)

fig-tree, *fic-tre, *fige-tre, *fyge-tre, *fyg-tre,** *s.*

Bot.: Ficus Carica, a tree of the Mulberry family (Moraceæ). It is a native of Western Asia, and was early introduced into the islands and countries on both sides of the Mediterranean and Southern Europe, where it has become indigenous, and at times attains the height of a tree. It is cultivated in this country generally in the Southern States, but is rarely seen north of Philadelphia. There are many varieties cultivated. *F.* (*Arostigma*) *religiosa* is the Pippal-tree, or Sacred Fig of India. The Fig-tree is said to have been first brought into England by Cardinal Pole, in 1525. The leaves are rough, low, and deciduous. The receptacle is common, turbinated or hollow, fleshy and connivent. The flowers are apetalous, and inclosed in the receptacle; the staminate flowers being nearest the opening, the pistillate nearest the pedduncle. The fertilization of the fig is peculiar, being by the process termed caprification (q.v.). It is promoted by a winged insect, which enters the young fruit by the pore at the apex, and by its movements loosens the pollen from the anthers: the pollen thus comes in contact with the stigmas as effected by insects in the flowers of other plants.

"A land of vines and *fig-trees*."—*Deut.* viii. 8.

fig-wort, *s.*

Botany:

1. *Singular:*

Music: The same as FIGURED-COUNTERPOINT (q.v.).

* **figurate-descant,** *s.*

Music: (See extract).

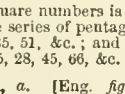
"*Figurate-descant* is that wherein discords are concerned, as well, though not so much, as concords; and may well be termed the ornament or rhetorical part of music, in regard that in this are introduced all the varieties of points, figures, syncopes, diversities of measures, and whatever else is capable of adorning the composition."—*Harris.*

figurate-numbers, *s. pl.*, **figurate-series,** *s.*

Math.: A series of numbers which may or do represent some geometrical figure, in relation to which they are always considered, as triangular, pyramidal, hexagonal, &c., numbers. The general term of each series is

$$\frac{n(n+1)(n+2)\ldots(n+m)}{1.2.3.4.\ldots.(m+1)}$$

in which, m determines the nature of the series, and n is dependent upon the place of the required term of the series. Figurate series are divided into orders, when $m = 0$, the series is of the 1st order; when $m = 1$, the series is of the 2nd order; when $m = 2$, the series is of the 3rd order, and so on. The figurate series of the first order is the series of the natural numbers, 1, 2, 3, 4, 5 . . . n. The figurate series of the second order has for its general term $\frac{n(n+1)}{1.2}$, and the several terms are deduced from this by making in succession $n = 1, 2, 3, 4$, &c. The resulting series is 1, 3, 6, 10, 15, 21 . . . . $\frac{n(n+1)}{1.2}$, &c. The number of this series are called triangular numbers, because they express the number of points which may be arranged in triangles,



thus . . . . . &c.

The series of square numbers is 1, 4, 9, 16, 25, 36, 49, &c. The series of pentagonal numbers is 1, 5, 12, 22, 35, 51, &c.; and of hexagonal numbers 1, 6, 15, 28, 45, 66, &c.

* **fĭg'-ū-rāt-ĕd,** *a.* [Eng. *figurat(e)*; *-ed.*] Having a certain, fixed, or determinate form.

"The number 30 is a *figurated* number, because three times ten, or five times six, make this number."—*Potter: On the Number* 666, p. 195.

* **fĭg'-ū-rate-lў,** *adv.* [Eng. *figurate*; *-ly.*] In a figurate or figurative manner; figuratively.

"Hee dare not understand this thyng as *figurately* spoken."—*Frith: Works*, p. 35.

* **fĭg-ū-rā'-tion,** *s.* [Lat. *figuratio*, from *figuratus*, pa. par. of *figuro* = to shape, to figure; Ital. *figurazione.*]

I. *Ordinary Language:*

1. The act of giving a certain determinate form to.

"If motion be in a certain order, there followeth vivification and *figuration* in living creatures perfect."—*Bacon: Natural History*, § 521.

2. Determination to a certain form; configuration.

"I will first consider the general *figuration*, and then the several members."—*Wotton: Remains*, p. 14.

4. A figure, type, or symbol.

"Considered as symbols, images, *figurations* of our Lord's passion and sacrifice."—*Waterland: Works*, viii. 333.

II. *Technically:*

1. *Music:* A mixture of concords and discords.

2. *Phil.:* A change in the form of words without a change in the meaning.

fĭg'-ū-rą-tive, * **fyg-u-ra-tive,** *a.* [Fr. *figuratif*; Ital. & Sp. *figurativo*, from Lat. *figuratus*, pa. par. of *figuro* = to shape, to figure. Puttenham, in 1589, ranked this word among those quite recently introduced into the language.]

I. *Ordinary Language:*

* 1. Representing something of a figure or type; typical.

* **fil,** *s.* [FILLY.]

fil´-ā-ceous (ceous as shŭs), *a.* [Lat. *filum* = a thread.] Consisting of threads; composed of threads or thread-like fibres.

"They make cables of the bark of lime trees; it is be stalk that maketh the *filaceous* matter commonly, and sometimes the down that groweth above."—*Bacon: Natural History*, § 614.

* **fil´-ăç-ĕr,** *s.* [Norman Fr. *filace* = a file or thread on which the records of courts were filed; Fr. *filasse* = flax ready to be spun; Lat. *filum* = a thread.]

Old Law: An officer in the Common Pleas, so called because he filed those writs on which he made process. There were fourteen of them in their several divisions and counties, and by them all original processes, real, personal, and mixed, were made out.

fī-lā´-gō, *s.* [Lat. *filum* = a thread; from the delicate threads or *fila* which cover the plant.]

Bot.: Cudwort, a genus of Composite plants, chiefly annuals. Three species are known in Britain; occurring in dry banks, pastures, &c.

fil´-ą-mĕnt, *s.* [Fr., from Lat. *filamentum*, from *filo* = to wind thread; *filum* = a thread.]

1. *Ord. Lang.:* A slender, thread-like process; a fibre or fine thread of which flesh, nerves, skin, roots, &c., are composed.

"They divided or slived it longwise into small *filaments* with the point of a needle or bodkin."—*P. Holland Plinie*, bk. xxv., ch. v.

2. *Bot.:* That part of the stamen which supports the anther. The filament, when structurally considered, is found to consist of a thin epidermis, on which occasionally stomata and hairs occur, and of a layer of cellular tissue enclosing a bundle of spiral vessels, which traverses its whole length, and terminates at the union between the filament and the anther. The filaments of *Callitriche verna* are said to have no vessels. The filament is usually, as its name imports, filiform or thread-like, cylindrical, or slightly tapering towards its summit. It is often, however, thickened, compressed, and flattened in various ways. It sometimes assumes the appearance of a petal, or becomes petaloid: occasionally it is subulate or slightly broadened at the base, and drawn out into a point like an awl, and at other times it is clavate, or narrow below and broad above.

The filament varies much in length and in fineness. The length bears a relation to that of the pistil, and to the position of the flower, whether erect or drooping; the object being to bring the anther into more or less immediate contact with the upper part of the pistil, so as to allow the pollen to be scattered on it. The filament is usually of sufficient solidity to support the anther in an erect position; but sometimes, as in Grasses, Littorella, and Plantago, it is very delicate and capillary or hair-like, so that the anther is pendulous. The filament is usually continuous from one end to the other, but in some cases it is bent or jointed. (*Balfour.*)

fĭl-a-mĕn'-tar-ў, *a.* [Eng. *filament; -ary.*] Having the nature or character of a filament; formed by a filament. (*Owen.*)

fĭl-a-mĕn'-tôid, *a.* [Eng. *filament;* Gr. εἶδος (*eidos*) = appearance.] Having the appearance of a filament; like a filament.

fĭl-a-mĕn'-tôse, fĭl-a-mĕn'-toŭs, *a.* [Fr. *filamenteux*, from Lat. *filamentum* = a slender thread.]

"In a day or two the exposed *filings* had gained a fine bluish-green colour."—*Boyle: Works*, i. 615.

filing-block, *s.* A block of apple, pear, or box-wood, gripped in the jaws of a vice, and having grooves of varying depth in which small rods, bars, or wires may be laid to be filed.

filing-machine, *s.*

1. A machine used in the mint to reduce the weight of coin planchets, when above the standard. The pieces are laid parallel in a trough, and their edges rest upon a cylindrical file, whereby a portion of metal is removed, the pieces rotating as the work proceeds, in order that their circular shape may be preserved unimpaired.

2. A machine in which a file is mounted as a jig-saw; or to reciprocate in a manner similar to that of a file in the hands of a workman.

filings-separator, *s.* A machine in which filings of iron and copper are separated by exposure to magnets, which are brought into contact with all the particles, and select, retain, and remove the iron particles from those of brass and copper, so that the latter may be used for re-melting.

fil-i-pĕn'-du-loŭs, *a.* [Lat. *filum* (genit. *fili*) = a thread, and Eng. *pendulous* (q.v.).]

1. *Ord. Lang.:* Hanging or suspended by a thread.

2. *Bot.:* Seemingly suspended by or strung upon a thread; applied to tuberous swellings in the middle or at the extremities of slender thread-like rootlets.

fil-i-tăn'-nĭc, *a.* [Lat. *filix* (genit. *filicis*) = a fern, and Eng. *tannic* (q.v.).] (See the compound.)

filitannic-acid, *s.*

Chem.: An acid obtained from the aqueous decoction of the root of *Aspidium Filix*, by first removing the resin by ether, and then adding lead acetate, and decomposing the precipitate with H_2S. It is hygroscopic, giving an olive-green solution on the addition of ferric chloride, which is turned violet on the addition of sodium carbonate. Its solution, when boiled with dilute sulphuric acid, deposits dark-red flocks of Filix red, $C_{20}H_{18}O_{12}$. (*Watts: Dict. Chem.*)

fil-i-tē'-læ, *s. pl.* [Lat. *filum* (genit. *fili*) = a thread, and *tela* = a web.]

Entom.: A tribe of spiders noted for the construction of their webs.

"Take *filetes* of porke, and half hom rost."—*Liber Cure Cocorum*, p. 31.

3. Portions of meat or fish removed from the bone and served either flat or rolled together and tied round. The term is specially applied to the under-cut of the sirloin of beef, served whole or cut into steaks, and to slices of flat-fish removed from the bone.

"*Fillet* of a fenny snake,
In the cauldron boil and bake."
Shakesp.: Macbeth, iv. 1.

II. *Technically:*

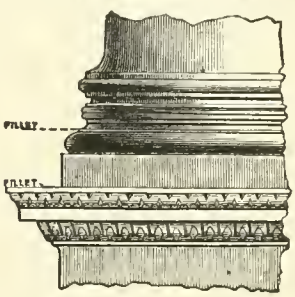
1. *Anatomy:*

(1) A collection of fibres passing upwards from the anterior columns of the spinal cord, embracing the olivary nucleus, above which they are again collected and joined by other fibres arising from the nucleus so as to form the olivary fasciculus. The whole then ascends through the pons and at the side of the cerebral peduncle.

(2) A similar bundle of fibres in the *corpus callosum.* (*Quain.*)

2. *Architecture:*

(1) A small flat face or band, used principally between mouldings to separate them



FILLET.

from each other in classical architecture: in the Gothic, Early English, or Decorated styles of architecture, it is also used upon larger mouldings and shafts.

"Their *fillets* shall be of silver."—*Exodus* xxvii. 10.

(2) The projection between the flutes of a column.

3. *Bookbinding:* A rolling tool which has a plain line, lines, or band; differing in this respect from the ornamental rolls.

4. *Carding:* A strip of card-cloth. A strip of leather furnished with the bent wire teeth peculiar to carding-engines.

5. *Carpentry:*

(1) A square moulding, frequently forming an upper finish or corona; a band or listel.

(2) A strip nailed to a wall or partition to support a shelf.

(3) A stop for room or closet doors to close against.

(4) A strip inserted into the angle formed by two boards or surfaces.

6. *Dairy:* A perforated curb to confine the curds in making cheese.

7. *Die-sinking:* A ribbon of metal of gauged proportions fed to the machine which punches out the planchets for coining.

8. *Gilding:* A band of gold-leaf on a picture-frame or elsewhere.

9. *Her.:* A kind of orle or bordure, containing only the third or fourth part of the breadth of the common bordure. It runs quite round near the edge, as the lace over a cloak. It is supposed to be drawn inwards, and is of a different colour from that of the field.

FILLET.

10. *Mach.:* The thread of a screw.

11. *Manége:* The loins of a horse, beginning at the place where the hinder part of the saddle rests.

A. *As pr. par.:* (See the verb).

B. *As adjective:*

1. Occupying the whole space or capacity.

2. Calculated to satisfy, fill, or satiate: as, a *filling* food.

C. *As substantive:*

I. *Ord. Lang.:* The act of making full; the state or process of becoming filled.

II. *Technically:*

1. *Civil Engin.:* An embankment of stone, gravel, earth, &c., to make a raised bed for a road, railroad track, or canal. An artificial elevated way.

2. *Dent. Surg.:* A stopping for decayed or carious teeth.

3. *Nautical:*

(1) A slip of wood forming a part of a built structure, such as a made mast; or a piece inserted to fill a defect.

(2) The covering of a pile, below water, with broad-headed nails, to exclude *Teredo navalis.* [TEREDO.]

4. *Shipbuild.:* Pieces or composition fitted in between the frames of the hold, to water-tight the vessel, to resist compression, and to prevent the collection of dirt, bilge-water, and vermin. Blocks of wood, bricks, mortar, cement, and asphalte, have been used.

5. *Weaving:* The weft-thread which fills up the warp, being introduced by the shuttle and beaten up by the batten or lathe. Also known as the Woof, Shoot, or Trau.

filling-engine, *s.*

Silk-mach.: A machine in which waste and floss silk from the regular silk-machinery is disentangled, and the fibres laid parallel. The silk, previously hackled, is fed between rollers and subjected to the action of a series of moving combs. It then passes to the drawing-frame, where it is subjected to a further process of a substantially similar character. From the drawing-frame it passes to the scutcher, and thence to the cutting-engine, which cuts it into lengths of about an inch and a quarter. The staple is then cleansed, dried, and eventually carded and doubled, drawn and spun, like cotton.

filling-in, *s.* The act of filling up a vacancy or blank by the insertion of words, &c.

Filling-in pieces:

Carp.: Timbers occurring in partitions, groins, and roofs of less length than those with which they range; as the jack-rafters next a hip, and the short rafters filled in the side of a roof next the chimney-shaft.

filling-pile, *s.*

Hydr. Engin.: A backing or retaining-pile in a coffer-dam.

filling-post, *s.*

Arch.: A middle post in a wooden frame.

filling-timbers, *s. pl.*

Shipbuild.: Those timbers placed between the frames to fill up.

fĭl'-lĭp, *v.t.* [A variant of *flip* (q.v.).]

1. *Lit.:* To strike with the nail of the finger by a sudden jerk, spring, or motion; to strike in any way.

"If I do, *fillip* me with a three-man beetle."
Shakesp.: 2 Henry IV., i. 2.

2. *Fig.:* To urge or drive forward; to incite, to encourage.

"With good endeuour *fillip* nature forwards."—*Wilson: Arte of Logike*, fo. 10.

fĭl'-lĭp, * **fil-ip,** *s.* [FILLIP, *v.*]

1. *Lit.:* A sharp, sudden blow or stroke with the finger; any smart blow.

"Let them look never so demurely, one *fillip* chokes them."—*Ford: Love's Sacrifice*, i. 1.

2. *Fig.:* Anything which serves to rouse, enliven, or excite: as, a *fillip* to one's courage.

fil-lĭp-ēen', phil-lĭ-pē'-na, *s.* [Ger. *vielliebchen* = much-loved.] A small present. When a person eating nuts finds one with a double kernel, he or she gives it to one of the opposite sex, and the individual who, at the next meeting, first utters the word *fillipeen* is entitled to a present from the other.

fĭl'-lis-tĕr, *s.* [Etym. doubtful.]

Carpentry:

1. The rabbet on the outer edge of a sash-bar, to hold the glass and the putty.

2. A plane for making a rabbet. The varieties are known as side-fillisters and sash-fillisters. The former is regulated for depth by a movable stop.

fĭl'-lў, * **fil-lie,** *s.* [A dimin. of *foal* (q.v.).]

I. *Literally:*

* 1. A young horse of either sex. (*Tusser.*)

2. A young mare; a female foal.

"A young mare-colt or *filly*, breaking by chance from other mares."—*North: Plutarch*, p. 247.

II. *Fig.:* A young, lively girl.

"My first wife
Which was indeed a fury to this *filly*."
Beaum. & Flet.: Woman's Prize, i. 2.

filly-foal, *s.* A female foal; a filly.

"Neighing in likeness of a *filly-foal*."
Shakesp.: Midsummer Night's Dream, iii. 1.

fĭlm, * **fylme,** *s.* [A.S. *film*, from O. Fris. *film*, found only in the dimin. *filmene* = skin; cogn. with Eng. *fell* = a skin.]

I. *Literally:*

1. A thin pellicle or skin.

"Dull the *film* along his dim eye grew."
Byron: Lara, ii.

2. A fine thread or filament, as of a cobweb.

"I quiescent watched
The sooty *films* that play upon the bars."
Cowper: Task, iv. 291, 292.

II. *Fig.:* A thin, slight covering or veil.

"If our understanding have a *film* of ignorance over it."—*Milton: Reformation in England*, bk. i.

* **fĭlm,** *v.t.* & *i.* [FILM, *s.*]

A. *Trans.:* To cover with a film or thin skin or pellicle.

"It will but skin and *film* the ulcerous place."
Shakesp.: Hamlet, iii 4.

"Straight her eyeballs *filmed* with horror."
E. B. Browning.

* **fĭl'-mĭ-nĕss,** *s.* [Eng. *filmy*; *-ness.*] The quality or state of being filmy.

† **fĭl'-mў,** *a.* [Eng. *film*; *-y.*] Composed of thin membranes, filaments, or pellicles.

"Incessant thence she draws the *filmy* twine."
West: Triumphs of the Gout.

filmy-fern, *s.*

Bot.: The English book-name of the fern-genus Hymenophyllum (q.v.). One of the most common species, *H. tunbridgense*, is very widely distributed, being found in Europe, South America, South Africa, and New Zealand. There are many other species. These plants grow in very wet places, often in the spray of waterfalls. Their filmy foliage, saturated with water, is peculiarly translucent.

filmy-leaf, *s.*

Bot.: The same as FILMY-FERN (q.v.). (*Loudon.*)

fĭl'-ô-plûme, *s.* [Lat. *filum* = a thread, *pluma* = a feather.]

Ornith.: A long, slender, and flexible feather, consisting of a delicate shaft, having a few bands at the tip, or else entirely destitute of vanes.

fĭ-lōse, *a.* [Lat. *filum* = a thread.]

Bot., Zool., &c.: Ending in a thread-like process.

fĭl-ô-sĕlle, *s.* [Fr.] Floss silk; ferret; grogram yarn or thread.

fĭl'-tĕr (1), * **fil-tre,** *s.* [Fr. *filtre*, from Low Lat. *filtrum*, *feltrum* = felt.] [FILTER, *v.*]

* 1. A twist of thread, of which one end is dipped in the liquor to be defecated, and the other hangs below the bottom of the vessel, so that the liquor drips from it.

2. A vessel, chamber, or reservoir through which water or other liquid is passed to arrest matters mechanically suspended therein. The idea does not necessarily include specific chemical action, though doubtless animal and vegetable charcoal have a faculty for absorbing gases and deleterious and effete matter, especially organic.

"There remained in the *filtre* a powder of a very deep and lovely colour."—*Boyle: Works*, i. 365.

3. The term is also applied to an apparatus for arresting dust, steel-filings, smoke, &c., in the air breathed. A filter recommended by Professor Tyndall consists of a cylinder four or five inches long and two inches or more in diameter. Its interior contains, at the top, a layer of cotton-wool which has been moistened with glycerine, then a layer of dry cotton-wool, then a layer of charcoal, then cotton-wool, with wire gauze covers at both ends, and at the upper end a mouth-piece so shaped as to fit closely over the mouth of the wearer. By drawing the breath through this instrument, the most dense smoke may be entered with impunity.

filter-bed, *s.*

Water-works: A settling pond whose bottom is a filter. It may consist of a reservoir five feet deep, with a paved bottom covered with open-jointed tubular drains leading into a central conduit. The drains are covered with a layer of gravel, and a top layer of sand. The water is delivered upon the surface uniformly, and the rate of subsidence is about six inches an hour. The more rapid the rate (other things being equal) the less effective is the operation.

filter-faucet, *s* A faucet having a chamber containing sand, sponge, or other material to arrest impurities in water.

fĭl'-tĕr (1), * **fil-tre,** *v.t.* & *i.* [Fr. *filtrer* = to strain through felt; from Low Lat. *filtrum*, *feltrum* = felt; from O. H. Ger. *filt*; Dut. *vilt* = felt.]

A. *Trans.:* To strain, purify, or defecate a liquid by passing or allowing it to percolate through a filter, so as to arrest all feculent matter. Sometimes followed by *off*.

"Sages after sages strove
In vain to *filter off* a crystal draught."
Cowper: Task, ii. 506, 507.

B. *Intrans.:* To percolate or pass through a filter.

* **fĭl-tĕr** (2), *s.* [PHILTER.]

fĭl'-tĕr-ĭng, *pr. par., a., & s.* [FILTER, *v.*]

A. *As pr. par.:* (See the verb).

B. *As adj.:* Serving to filter; capable of or fitted for the filtering of liquids.

C. *As subst.:* The act or process of purifying liquids by passing them through a filter; filtration.

filtering-bag, *s.* A bag of fine flannel, of a conical shape, used for filtering coarse liquids.

filtering-basin, *s.*

Hydr. Engin.: The chamber in which the water from the reservoir of water-works is received and filtered previous to entering the mains.

filtering-cup, *s.* A pneumatic apparatus for the purpose of illustrating the force of the pressure of the atmosphere.

filtering-funnel, *s.* A glass or other funnel made with slight flutes or channels

down the lower parts of the sides. When used, it is lined with filtering-paper, folded and loosely put in. The channels allow the liquid to flow more freely than in a funnel of a smooth surface.

filtering-hydrant, *s.* One which subjects the water from the service-pipe and main to the action of a material to arrest mud.

filtering-paper, *s.* A bibulous, unsized paper, thick and woolly in texture, used for filtering solutions in the pharmacy or laboratory. Swedish filtering-paper is thinner and of superior quality.

filtering-press, *s.* A press in which the passage of a liquid through a body of filtering material is expedited by pressure applied thereto. A pressure-filter.

filtering-stone, *s.* A porous stone, such as sandstone, through which water is filtered.

filtering-tank, *s.* The same as FILTERING-BASIN (q.v.).

filth, * **felthe,** * **filthe,** * **fulthe,** * **velthe,** *s.* [A.S. *fyldh* (properly *fýldhu*). Formed by vowel change of *u* to *ý*, and by adding the suff. *-dhu* to the adj. *fúl* = foul; cogn. with O. H. Ger. *fúlida* = filth, from *fúl, vúl* = foul. (*Skeat.*) Dut. *vuilte.*]

I. *Lit.:* Anything filthy, dirty, or foul; anything which fouls or defiles; dirt.

"On one side of which was the sink and and *filth* of all the house."—*Strype: Memorials: Q. Mary* (an. 1554.)

II. *Figuratively:*

1. A filthy, foul, or loathsome creature or animal.

"In that abbeye ne entrethe not no flye ne todes ne ewtes, ne suche foule, venymouse bestes, ne lyzs ne flees. For there were wont to ben many suche manere of *filthes*, that the moukes were in wille to leve the place."—*Maundeville*, p. 61.

* 2. A vile fellow.

"Lest that foule *felthe* scbold have ben founud there." *William of Palerne*, 2,541.

"With water of baptym fro *felthe* weash us cleene." *Lydgate: Minor Poems*, p. 234.

4. Filthy, low, or obscene language.

* **filth'-hĕd,** * **filth-hede,** * **filth-hecd,** * **fulth-hede,** *s.* [Eng. *filth*; *-hed* = hood.]

I. *Lit.:* Filthiness; dirt, filth.

"Lothsom glette and *filthede* of blode."—*Hampole: P. C.*, p. 14 (Note).

II. *Figuratively:*

1. That which defiles morally; sin, uncleanness.

"Mawlis in to mawlis worcbinge *filthhede*."—*Wycliffe: Romans*, i. 27.

2. That which should be kept private; the privy parts.

"The *filthheed* of thi fader and the *filthheed* of thi moder thou shalt not discover."—*Wycliffe: Leviticus* xviii. 7.

filth'-ĭ-lў, *adv.* [Eng. *filthy*; *-ly.*] In a filthy, dirty, or foul manner; foully, nastily.

"For hut and palace show like *filthily*: The dingy denizens are reared in dirt." *Byron: Childe Harold*, i. 17.

filth'-ĭ-nĕss, * **filth-i-nesse,** *s.* [Eng. *filthy*; *-ness.*]

1. The quality or state of being filthy, foul, or dirty; foulness, dirtiness.

"Men of virtue suppressed it, lest their shining should discover the others' *filthiness*." — *Sydney: Arcadia.*

2. That which is filthy, foul, or dirty; filth.

"The very *filthiness* of Pandora's box." *Dryden: Death of Lord Hastings*, 64.

3. That which is morally filthy or foul; pollution in action, thought, or language.

"Cleansed by bim from all *filthiness* of flesh and spirit."—*Horne: On the Psalms*, Ps. lxxvi.

filth'-ў, *a.* [Eng. *filth*; *-y.*]

1. Nasty, dirty, foul, unclean.

"It smells like a *filthy* fast-day soup." *Longfellow: Golde= Legend*, ii.

2. Polluting or defiling morally.

3. Obscene, coarse, low.

"As all stories are not proper subjects for an epick poem or a tragedy, so neither are they for a noble picture: the subjects both of the one and of the other ought to have nothing of immoral, low, or *filthy* in them."—*Dryden: Dufresnoy.*

4. Polluted, defiled; morally impure or unclean; obscene.

"He that is *filthy*, let him be *filthy* still."—*Revelation* xxii. 11.

* **fĭl'-trāte,** *v. t.* or *i.* [Low Lat. *filtratus*, pa. par. of *filtro* = to filter.] [FILTER, *v.*] To filter, to strain; to purify or defecate by filtration.

"The extract obtained by the former operation, burnt to ashes, and those ashes boiled in water and *filtrated*, yield a fiery salt."—*Arbuthnot: On Aliments.*

fĭl'-trāte, *s.* [FILTRATE, *v.*] Any liquid which has passed through a filter.

fĭl-trā'-tion, *s.* [FILTRATE, *v.*] The act or process of filtering or defecating liquids by passing them through a filter; the mechanical separation of solid substances from a liquid in which they exist, by filtering or percolation through a filter.

"We took then common nitre, and having, by the usual way of solution, *filtration*, and coagulation, reduced it into crystals, we put four ounces of this purified nitre into a strong new crucible."—*Boyle.*

fī'-lŭm (pl. **fī'-la),** *s.* [Lat. = a thread of anything woven.]

Anat.: A thread-like process. Thus the *filum terminale* of the spinal cord is its central ligament. (*Quain.*)

fĭm'-ash-ĭng, *s.* [Etym. doubtful.: prob. from Lat. *fimus* = dung.] The dung of several kinds of wild beasts; fumets.

fĭm'-ble, *a.* & *s.* [A corrupt. of *female* (q.v.).]

B. *As subst.:* The same as FIMBLE-HEMP (q.v.).

"Good flax and good hemp, for to have of her own. In May a good housewife will see it be sown; And afterwards trim it, to serve as a need; The *fimble* to spin, and the carle for her seed." *Tusser: Husbandrie.*

fimble-hemp, *s.*

Bot.: The female plant of *Cannabis sativa* is now so called, though the name was formerly applied to the male plant.

fĭm'-brĭ-ą (pl. **fĭm'-brĭ-æ),** *s.* [Lat., = a fringe.]

I. *Ord. Lang.:* A fringe.

II. *Technically:*

1. *Anatomy:*

(1) *Gen.:* Anything resembling a fringe.

(2) *Spec. & Pl.:* The radiated fringes of the Fallopian tube.

2. *Bot.:* An elastic toothed membrane situated beneath the operculum of any of the urn mosses (Bryaceæ).

fĭm'-brĭ-āte, *a.* [Lat. *fimbriæ* = a fringe.]

Bot.: Fringed; having a fringe or border.

fĭm'-brĭ-āte, *v.t.* [FIMBRIATE, *a.*] To fringe, to hem.

fĭm'-brĭ-ā-tĕd, *pa. par.* & *a.* [FIMBRIATE, *v.*]

A. *As pa. par.:* (See the verb).

B. *As adjective:*

I. *Ord. Lang.:* Fringed.

II. *Technically:*

1. *Bot.:* The same as FIMBRIATE (q.v.).

"The margin is either entire, or divided into lobes or teeth. These teeth sometimes form a regular fringe round the margin, and the petal becomes *fimbriated*." —*Balfour: Botany*, § 372.

2. *Her.:* Ornamented, as an ordinary, with a narrow border or hem of another tincture.

3. *Zool.:* Having fimbriæ or fringes.

fimbriated extremity, *s.*

Anat.: The fringed end of the Fallopian tube. [FIMBRIA.]

fĭm'-brĭ-ā-tō, *in compos.* [Lat. *fimbriatus.*] Fringed.

fimbriato-laciniate, *a.*

(2) The hand. (*Slang.*)

II. *Technically:*

1. *Comp. Anat.* (*Pl.*): The organs by which locomotion is effected in a fish. As a rule they consist of a membrane supported by rays. Of these organs the two pectoral fins, so called from being situated on the breast, where they are just behind the branchial aperture, are modifications of the anterior limbs in other vertebrata. The ventral fins, so called from being, as a rule, situated on the belly, correspond to the hind limbs in other vertebrata. Often there are also one or more dorsal fins on the back, two anal fins near the anus, whilst the tail is technically called the caudal fin. It corresponds to the tail in other mammals. As was shown by Agassiz and Owen, the embryonic character in recent fins existed through all the lifetime of the Old Red Sandstone Fishes. The term fin is often applied also to the paddles of a whale.

2. *Carp.:* A tongue on the edge of a board.

3. *Comm.:* A blade of whalebone.

4. *Mach.:* A slip inserted longitudinally into a shaft or arbor, and left projecting so as to form a guide for an object which may slip thereon, but not rotate; a spline or feather.

3. Respecting the end, motive, or purpose in view to be gained.

"By its gravity air raises the water in pumps, and performs all those feats which former philosophers attributed to a *final*, namely, nature's abhorrence of a vacuity."—*Ray: On the Creation.*

¶ Crabb thus discriminates between *final* and *conclusive*: "*Final* designates simply the circumstance of being the last: *conclusive* the mode of finishing or coming to the last: a determination is *final* which is to be succeeded by no other; a reasoning is *conclusive* that puts a atop to further question. The *final* is arbitrary: it depends upon the will to make it so or not; the *conclusive* is relative; it depends upon the circumstances and the understanding: a person gives a *final* answer at option; but in order to make an answer *conclusive* it must be satisfactory to all parties." (*Crabb: Eng. Synon.*)

final-causc, *s.*

Nat. Phil.: The final end or aim for which anything was made. Many Evolutionists are against the acknowledgment of final causes. [Teleology.]

¶ 1. *To find one's self:*

(1) To be or feel as regards the state of health; to fare in respect of ease or pain, health or sickness.

"'Well, Verdant,' said Charles Larkyns, 'how do you *find yourself* this morning?'"—*Cuthbert Bede: Verdant Green*, pt. i., ch. viii.

(2) To provide or furnish all necessary requirements of life for oneself.

2. *To find out:*

(1) To discover by searching or seeking or enquiry.

"Canst thou by searching *find out* God?"—*Job* xi. 7.

(2) To discover the meaning of; to unravel; to solve; as, To *find out* a riddle.

(3) To obtain, acquire, or attain to the knowledge of.

"The principal part of painting is to *find out*, and thoroughly to understand, what nature has made most beautiful."—*Dryden.*

(4) To excogitate, to discover, to invent.

"A man of Tyre, skilful to work in gold, and to *find out* every device which shall be put to him."—*2 Chron.* ii. 14.

(5) To detect, to catch.

"When you *find* him *out*, you have him ever after."
Shakesp.: All's Well That Ends Well, iii. 6.

3. *To find fault with:* To blame, to censure, to object to.

4. *To find in:* To provide with: as, To *find* a person *in* clothes, board, and lodging, &c.

¶ (1) Crabb thus discriminates between to *find fault with*, to *blame*, and to *object to*: "To *find fault with* signifies to point out a fault either in some person or thing: to *blame* is said only of the person: *object* is applied to the thing only: we *find fault with* a person for his behaviour: we *find fault with* our seat, our con-

veyance, and the like: we *blame* a person for his temerity or his improvidence: we *object* to a measure that is proposed; we *find fault with* or *blame* that which has been done: we *object to* that which is to be done."

(2) He thus discriminates between to *find*, to *find out*, to *discover*, to *espy*, and to *descry*: "To *find* signifies simply to come within sight of a thing, which is the general idea attached to all these terms; they vary, however, either in the mode of the action or in the object. What we *find* may become visible to us by accident, but what we *find out* is the result of an effort. We may *find* anything as we pass along in the streets: but we *find out* mistakes in an account by carefully going over it, or we *find out* the difficulties which we meet with in learning, by redoubling our diligence. What is *found* may have been lost to ourselves, but is visible to others. What is *discovered* is always remote and unknown, and when *discovered* is something new. A piece of money may be *found* lying on the ground; but a mine is *discovered* underground. What has once been *discovered* cannot be *discovered* again; but what is *found* may be many times *found*. *Find out* and *discover* differ principally in the application; the former being applied to familiar, and the latter to scientific objects: scholars *find out* what they have to learn; men of research *discover* what escapes the notice of others. To *espy* is a species of *finding out*, namely, to *find out* what is very secluded or retired; and *descry* is a species of *discovering*, or observing at a distance, or among a number of objects."

(3) He thus discriminates between to *find*, to *discover*, and to *invent*: "To *find* or *find out* is said of things which do not exist in the forms in which a person *finds* them: to *discover* is said of that which exists in an entire state: *invent* is said of that which is new made or modelled. The merit of *finding* or *inventing* consists in newly applying or modifying the materials, which exist separately; the merit of *discovering* consists in removing the obstacles which prevent us from knowing the real nature of the thing; imagination and industry are requisite for *finding* or *inventing*; acuteness and penetration for *discovering*. A person *finds* reasons for justifying himself: he *discovers* traits of a bad disposition in another. Cultivated minds *find* sources of amusement within themselves, or a prisoner *finds* means of escape. Many traces of a universal deluge have been *discovered*: the physician *discovers* the nature of a particular disorder. *Find* is applicable to the operative arts; *invent* to the mechanical; *discover* to the speculative. We speak of *finding* modes for performing actions, and effecting purposes; of *inventing* machines, instruments, and various matters of use or elegance; of *discovering* the operations and laws of nature. Thus the astronomer *discovers* the motions of the heavenly bodies, by means of the telescope which has been *invented*." (*Crabb: Eng. Synon.*)

find, *s.* [FIND, *v.*]

1. The discovery or finding of anything valuable.

*** B.** *As adv.:* Finely.

"Admire to hear me speak so *fine.*"
Swift: Panegyrick on the Dean.

¶ (1) Crabb thus discriminates between *fine*, *delicate*, and *nice*: "*Fine*, in the natural sense, denotes smallness in general. *Delicate* denotes a degree of *fineness* that is agreeable to the taste. Thread is said to be *fine* as opposed to the coarse and thick; silk is said to be *delicate*, when to *fineness* of texture it adds softness. The texture of a spider's web is remarkable for its *fineness*; that of the ermine's fur is remarkable for its *delicacy*. In their moral application these terms admit of the same distinction: the *fine* approaches either to the strong or to the weak; the *delicate* is a high degree of the *fine*, as a *fine* thought, which may be lofty, or *fine* feeling, which is acute and tender, and *delicate* feeling, which exceeds the former in *fineness*. *Delicate* is said of that which is agreeable to the sense and the taste; *nice* to what is agreeable to the appetite: the former is a term of refinement; the latter of epicurism and sensual indulgence. The *delicate* affords pleasure only to those whose thoughts and desires are purified from what is gross; the *nice* affords pleasure to the young, the ignorant, and the sensual: thus *delicate* food, *delicate* colours, *delicate* shapes and forms are always acceptable to the cultivated; a meal, a show, a colour, and the like will be *nice* to a child, which suits its appetite, or meets its fancy. . . . A person may be said to have a *delicate* ear in music, whose ear is offended with the smallest discordance; he may be said to have a *nice* taste or judgment in music, who scientifically discriminates the beauties and defects of different pieces. A person is *delicate* in his choice who is guided by taste and feeling; he is *nice* in his choice, who adheres to a strict rule. A point in question may be either *nice* or *delicate*: it is *delicate* as it is likely to touch the tender feelings of any party; it is *nice* as it involves contrary interests, and becomes difficult of determination." (*Crabb: Eng. Synon.*)

(2) For the difference between *fine* and *beautiful*, see BEAUTIFUL.

fine-arch, *s.*

Glass: The smaller fritting-furnace of a glass-house.

II. *Law:*

1. In the same sense as I. 4.

* 2. In feudal law a final agreement between persons concerning lands or rents, or between the lord and his vassal, prescribing the conditions on which the latter shall hold his lands.

"A *fine*, which was till quite recently a very usual method of transferring an estate of freehold, was neither more or less than an amicable agreement of a suit, actual or fictitious, by leave of the king or his justices, whereby the lands which were the subject of the action became, or were acknowledged to be, the right of one of the parties."—*Blackstone: Comment.*, bk. ii., ch. 18.

* 3. A sum of money paid by a tenant on entering into possession, or for admission to a copyhold; also, a sum paid for the renewal of a lease.

"Some landlords, instead of raising the rent, take a *fine* for the renewal of the lease."—*Smith: Wealth of Nations*, bk. v., ch. ii.

¶ Crabb thus discriminates between *fine*, *forfeiture*, *mulct*, and *penalty*: "The *fine* and *mulct* are always pecuniary; the *penalty* may be pecuniary; a *forfeiture* consists of any personal property: the *fine* and *mulct* are imposed; the *penalty* is inflicted or incurred; the *forfeiture* is incurred. The violation of a rule or law is attended with a *fine* or *mulct*, but the former is a term of general use; the latter is rather a technical term in law: a criminal offence incurs a *penalty*; negligence of duty occasions the *forfeiture*." (*Crabb: Eng. Synon.*)

¶ (1) *Fine of alienation:* A fine or sum of money paid to the lord by a tenant, whenever he had occasion to alienate, or make over his land to another.

"For, when everything came in process of time to be bought and sold, the lords would not grant a licence to their tenant, to alien, without a *fine* being paid."—*Blackstone. Comment.*, bk. ii., ch. 8.

(2) *Fine of lands:* [FINE, *s.* II. 2].

(3) *In fine:* In conclusion, in short, finally; to sum up.

"*In fine*, delivers me to fill the time,
Herself most chastely absent."
Shakesp.: All's Well That Ends Well, iii. 7.

* **fīne** (1), * **fyn,** * **fyne** (1), * **fynen,** *v.t.* [FINE, *a.* O. Fr. *afiner, affiner*; Sp. *afinar*; Port. *affinar*; Ital. *affinare*; M. H. Ger. *finen*; Icel. *fina.*]

fĭn'-ĭsh, * **fĭn-ĭsch-en,** * **fyn-ĭsshe,** *v.t.* & *i.* [O. Fr. *finiss*, base of *finissant*, pr. par. of *finir* = to finish; Lat. *finio*, from *finis* = an end.]

A. *Transitive:*

1. To bring to an end; to complete.

"For which of you intending to build a tower sitteth not down first and counteth the cost, whether he have sufficient to *finish* it?"—*Luke* xiv 28.

2. To arrive at the end of: as, To *finish* a journey.

* 3. To make complete; to fill up; to complete.

"How many days will *finish* up the year?" *Shakesp.: 3 Henry VI.*, ii 5.

4. To make perfect or complete.

"A poet uses episodes; but episodes, taken separately, *finish* nothing."—*Broome: On the Odyssey.*

5. To perfect; to elaborate; to bring to a high state of excellence; to polish.

"A faultless sonnet, *finished* thus, would be Worth tedious volumes of loose poetry." *Dryden: Art of Poetry.*

B. *Intransitive:*

1. To come to an end or completion; to terminate; to expire.

"His days may *finish* e'er that hapless time." *Shakesp.: As You Like It*, v 4.

2. To make or come to an end of anything; to reach the end.

"Havock, who *finished* half a length in the rear of Shrewsbury, was third."—*Standard*, June 28, 1883.

fĭn'-ĭsh, *s.* [FINISH, *v.*]

I. *Ordinary Language:*

1. The act of finishing.

2. The last touch to a work, whereby it is brought to completion and excellence; careful elaboration; polish.

II. *Technically:*

1. *Art:* The last touches applied to a picture or other work of art. It always constitutes the difference between excellence and mediocrity. Small pictures require the most careful finish, but in large ones too much attention to high finish detracts from the boldness and vigour demanded by works on a large scale.

2. *Build.:* The last raw coat of plaster on a wall.

3. *Racing:* The very last part or end of a race, when the competitors are close to the winning-post.

"Lady Auckland, getting the best of a good *finish*, won cleverly by a neck."—*Sporting Life*, Aug 28, 1883.

fĭn'-ĭshed, *pa. par.* & *a.* [FINISH, *v.*]

A. *As pa. par.:* (See the verb).

B. *As adjective:*

1. Brought to an end or completion; completed, ended, terminated.

2. Brought to a high degree of excellence; carefully elaborated, or perfected.

"What *finished* Agriculture knows." *Thomson: Castle of Indolence*, ii 19.

¶ For the difference between *finished* and *complete*, see COMPLETE.

fĭn'-ĭsh-ĕr, *s.* [Eng. *finish*; *-er.*]

I. *Ordinary Language:*

1. One who brings to a completion or end; a terminater; an ender.

"The one a defender of his innocency, the other a *finisher* of all his troubles."—*Hooker.*

2. A performer; one who carries out or completes.

"He that of greatest works is *finisher*,
Oft does them by the weakest minister."
Shakesp.: All's Well That Ends Well, ii. 1.

3. One who perfects or completes; a perfecter.

"Jesus the author and *finisher* of our faith"—*Heb.* xii. 2.

4. Anything which gives a finishing touch to, or settles anything. (*Colloquial.*)

II. *Technically:*

1. *Carding:* The final carding-machine, which perfects the fleece or delivers the sliver, as distinguished from the prior machine, known as the breaker. A finishing-card.

2. *Paper-making:* The second beating-engine, or half-stuff engine, which operates upon the partially-worked rags that have been previously reduced in the stuff-engine and then bleached.

finisher's-press, *s.*

Book-binding: A small press, like a cutting-press, used by the finisher, who does the ornamental work on the cover.

fĭn'-ĭsh-ĭng, * **fĭn-ĭsh-yng,** *pr. par.*, *a.*, & *s.* [FINISH, *v.*]

A. & **B.** *As pr. par. & particip. adj.:* (See the verb).

C. *As substantive:*

I. *Ord. Lang.:* The act or process of bringing to an end or completion; the act of completing or perfecting; finish.

"A certayne toole or instrument towards the *finishyng* of his worke."—*Fisher: On Prayer.*

II. *Technically:*

1. *Bookbinding:* The ornamental work on a book after it is simply covered with leather or cloth, which is known as forwarding.

2. *Engraving:* The work of the graver, drypoint, and machine-ruler upon an etched plate.

finishing-card, *s.* A machine in which the process of carding is repeated. The machine which first operates upon the material is known as the breaker-card.

finishing-coat, *s.*

Plastering: The third coat on the better style of work. For painting, it consists of the best stuff, and is called stucco. For paper, it consists of the same as the previous coat, and is called setting.

finishing-hammer, *s.* The last hammer used by the gold-beater. The series is as follows:- The flat or enlarging hammer; the commencing-hammer; the spreading-hammer; the finishing-hammer. The latter has a face four inches in diameter, and more convex in form than the faces of the other hammers; the weight of the finishing-hammer is thirteen or fourteen pounds. [GOLD-BEATING.]

finishing-rolls, *s. pl.* A second set of rolls in a rolling-mill. The first set is the roughing-rolls, which operate on the bloom from the tilt-hammer or squeezer, and reduce it to bar form. This is then cut up, piled, reheated, and taken to the finishing-rolls, which make it into bar or rod iron. The reheating purifies, and the second rolling improves the tenacity by the repetition of the drawing. The finishing-rolls run at a speed two or three times greater than the roughing-rolls, according to size.

fī'-nītc, *a.* [Lat. *finitus*, pa. par. of *finio* = to finish; *finis* = an end.]

fĭn'-lĭke, *a.* [Eng. *fin*; *-like.*] Like or resembling a fin; made in form or imitation of a fin.

"*Finlike* oars did spread from either side."
Dryden: Annus Mirabilis clvii.

Fĭnn, *s.* [A contr. of *Finlander.*] A Finlander; a native of Finland.

fĭn'-năc, * **fĭn-nack,** * **fĭn-noc,** * **fĭn-ner,** *s.* [Prob. from Gael. *feannog* = a whiting.] A white trout, a variety of the *Salmo fario.* Dr. Shaw, in his *General Zoology*, gives the Phinoc of Scotland, as a distinct species, by the name of *Salmo Phinoc*, or Whiting Salmon. It is asserted that the fry of this fish have never been seen by the most experienced anglers or salmon-fishers.

"*Finnacs* are a species of fish in colour and shape like a salmon. They weigh from 2 lb. to 4 lb. White trouts are of a less size, but of a whiter colour. They are supposed to be two species of sea-trouts."—*P. Birnie: Elgin, Statist. Acc.*, ix. 156, N.

finned, *a.* [Eng. *fin*; *-ed.*]

1. Having fins.

2. Having broad edges spread out on either side.

"They plough up the turf with a broad *finned* plough."—*Mortimer: Husbandry.*

fĭn'-nĕr, fĭn'-băck, *s.* [For etym. see def. 1.]

1. *Gen.:* Any whale which has an adipose fin on its back. The genera Megaptera, Balæn-

optera, and Physalus have this character. All of them belong to the family Balænidæ.

"Large lean whales are sometimes stranded in the creeks, and sometimes chased ashore by boats. These commonly measure from sixty to ninety feet in length, and are denominated *finners*."—*P. Unst. Statist. Acc.*, v. 190.

According to Skene, they were of the race which inhabited Scotland and Ireland before the Scots, and Germany before the Germans. According to others, they were Irish, and derived their name from Fion MacCumhal (Fin MacCoul), their leader. [Fenian.]

fiord (as **fyord),** *s.* [Dan. & Norw.; Icel. *fiördr.*] A long, narrow inlet, bounded by high banks or rocks, often opening again into the sea, such as are common on the coast of Norway.

fī'-ō-rĭn, *s.* [Ir. *fioran, feoirn* = a coarse grass.]

Bot.: Agrostis stolonifera. Sir Joseph Hooker applies the name Fiorin-grass to *A. alba,* of which he makes *A. stolonifera* a more stoloniferous state.

fiorin-grass, *s.*

Bot.: The same as Fiorin (q.v.).

fī'-ō-rīte, *s.* [From *Santa Fiora,* in Italy, where it is found; Eng. suff. (*Min.*) *-ite* (q.v.).]

Min.: A variety of opal found in the form of translucent to opaque, greyish, whitish, or brownish incrustations, and also in globular, botryoidal, and stalactitic concretions. It is formed from the decomposition of the siliceous minerals of volcanic rocks about fumaroles, or from the siliceous waters of hot springs.

fĭp'-pĭl, *v.i.* [Etym. doubtful.] To whimper, to whine, to act in an unmanly manner.

"He *fippilit* lik ane faderles fole."
Peebles to the Play, st. xxv.

fĭp'-ple, *s.* [Prob. from Lat. *fibula* = a brooch, a clasp.] A stopper.

"In recorders, which go with a gentle breath, the concave of the pipe, were it not for the *fipple* that straiteneth the air much more than the simple concave, would yield no sound."—*Bacon: Nat. Hist.*, § 116.

fĭr, * **firre,** * **fyr,** * **fyrre,** *s.* [A.S. *furh,* in the compound *furh-wuder* = firwood; cogn. with Dan. *fyr;* Icel. *fura;* Sw. *furu;* Ger. *föhre;* Wel. *pyr;* Lat. *quercus* = an oak; M. H. Ger. *vorhe.*]

A. *As substantive:*

Botany & Ordinary Language:

1. A name popularly given to many coniferous trees, Pinus, Abies, Larix. (See the compounds.)

2. A name limited by botanists to the true genus Abies, which formerly was merged in that of Pinus, but now is made distinct.

3. The wood of the trees mentioned under No. 1.

B. *As adj.:* Consisting of fir, derived from fir.

¶ (1) *Abies balsamea* is popularly known as the Balm of Gilead fir; *A. nigra* as the Black Spruce fir; *A. clanbrasiliana* as the Clanbrazil fir; *A. Fraseri* as the Double Balsam fir; *A. canadensis* as the Hemlock Spruce fir; *A. Larix* (called by Decandolle *Larix Europæa*) as the Larch fir; *A. excelsa* as the Norway or Common Spruce fir; *A. rubra* as the Red Spruce fir; *Pinus sylvestris* (the only fir indigenous to Britain) as the Scotch fir; *Abies picea* as the Silver fir; and *A. alba* as the White Spruce fir.

(2) *Joint firs:*

Bot.: The name given by Lindley to the order Gnetaceæ (q.v.).

fir-tree, * **fir-tre,** * **fyr-tree,** * **fyrr-tree,** * **fyrre-tre,** *s.*

1. *Ord. Lang.:* The same as Fir, A, 1. or 2.

2. *Scrip.:* [Heb. ברוֹשׁ (*berosh*).] Some tree belonging to the Coniferous order. It grew on Lebanon (Isaiah xxxvii. 24). Its wood was used with cedar in Solomon's Temple (1 Kings vi. 15, 34; 2 Chron. ii. 8, iii. 5), in ship-building (Ezekiel xxvii. 5), and for musical instruments (2 Sam. vi. 5). Gesenius thioks it was the cypresa, but perhaps the Hebrew word *berosh* may have been used as vaguely as the English appellation *fir.*

fir-wood, *s.* The wood of the fir-tree.

fire, * **fir,** * **fier,** * **fur,** * **fyr,** * **fyer,** * **fuyr,** *s.* [A.S. *fŷr;* cogn. with Dut. *vuur;* Icel. *fyri;* Dan. & Sw. *fyr;* Sw. *feuer;* Gr. πῦρ (*pur*).]

I. *Ordinary Language:*

1. *Literally:*

(1) In the same sense as II. 1.

"The bush burned with *fire*."—*Exodus* iii. 2.

(2) Fuel in a state of combustion: as in a furnace, a grate, &c.

"And while the rest, a ruddy quire,
Were seated round their blazing *fire*."
Wordsworth: Oak & the Broom.

(3) Anything burning.

"A little *fire* is quickly trodden out."
Shakesp.: 3 Henry VI., iv. 8.

(4) A conflagration; the burning, as of a house or town.

"There is another liberality to the citizens, who had suffered damage by a great *fire*."—*Arbuthnot: On Coins.*

2. *Figuratively:*

(1) A state of heat; glow of warmth.

"The heavens were all on *fire*."
Shakesp.: 1 Henry IV., iii. 1.

(2) Anything which seems as if on fire: as a star.

"By the *fires* of heaven."
Shakesp.: Coriolanus, i. 4.

*(3) Torture by burning; hence, trouble, suffering, afflictions.

"Did Shadrach's zeal my glowing breast inspire,
To weary tortures, and rejoice in *fire*."
Prior: Charity, 7, 8.

(4) The punishment of the damned.

"Depart, ye cursed, into everlasting *fire*."—*Matthew* xxv. 41.

(5) In the same sense as II. 2.

(6) Flame, lustre, light, brightness.

"Stars, hide your *fires*,
Let not night see my black and deep desires."
Shakesp.: Macbeth, i. 4.

(7) Anything which provokes or inflames the passions.

"What *fire* is in my ears? Can this be true?
Stand I condemned for pride and scorn so much."
Shakesp.: Much Ado About Nothing, iii. 1.

(8) Heat, violence.

"The raging *fire* of fever."
Shakesp.: Comedy of Errors, v.

(9) Ardour or violence of temper or passion; heat, passion.

Milit.: A rapid discharge of fire-arms by a line of troops in succession.

6. *Greek fire:* An artificial fire, capable of burning even in water, used by the Greeks in their wars with the Saracens. It is supposed to have been a composition of sulphur, naphtha, pitch, gum, and bitumen.

7. *Fire of joy:* A literal translation of the French *feu de joie;* a bonfire.

"Preparations being made by the magistrates for making *fires of joy* and other triumphant solemnities."—*Clarendon: Religion & Policy*, ch. vi.

¶ Crabb thus discriminates between *fire, heat, warmth,* and *glow:* "*Fire* is with regard to *heat* as the cause to the effect. *Fire* is perceptible to us by the eye, as well as the touch; *heat* is perceptible only by the touch. *Fire* has within itself the power of communicating *heat* to other bodies at a distance from it; but *heat,* when it lies in bodies without *fire,* is not communicable or even perceptible, except by coming in contact with the body. *Fire* is producible in some bodies at pleasure, and when in action will communicate itself without any external influence; but *heat* is always to be produced and kept in being by some external agency; *fire* spreads, but *heat* dies away. *Fire* is producible in certain bodies; but *heat* may be produced in many more bodies: *fire* may be elicited from a flint, or from wood, steel, and some few other materials; but *heat* is producible, or exists to a greater or less degree, in all material substances. *Heat* and *warmth* differ principally in degree; the latter being a gentle degree of the former. *Heat* is less active than *fire,* and more active than *warmth:* the former is produced in bodies, either by the violent action of *fire* or the violent friction of two hard bodies; the latter is produced by the simple expulsion of the cold. *Glow* is a partial *heat* or *warmth* which exists, or is known to exist, mostly in the human frame; it is commonly produced in the body when it is in its most vigorous state, and its nerves are firmly braced by the cold." (*Crabb: Eng. Synon.*)

fire-alarm, *s.*

1. An apparatus for communicating warning of a fire, as by telegraphic signal, &c.

2. An automatic arrangement by which notice of fire is given. It depends for its action upon the increased temperature of the air in the vicinity of the fire, or upon the burning away of certain connecting cords which are stretched in exposed situations.

fire-annihilator, *s.* A vessel charged with water and a mixture of dried ferro-cyanide of potassium, sugar, and chlorate of potassa. It is set in action by a blow on a glass bottle containing sulphuric acid, which flows over the charge and liberates gas, which, with the water, is emitted at a nozzle and expended upon a fire to quench it.

fire-arm, *s.* [Firearms.]

fire-armed, *a.* Armed with fire.

fire-arrow, *s.* An arrow, formerly used in warfare, carrying a combustible for incendiary purposes, as for setting fire to the sails of ships, &c.

fire-back, *s.* The back-wall of a furnace or fireplace. It is frequently of fire-brick, in order to protect the iron walls of the furnace, but is sometimes of iron ribbed, partly to protect and stiffen it, and partly to allow access of air close to it. Sometimes the fire-back is perforated to admit air at that point, or it may be hollow, and form a heater for water for household purposes.

fire-balloon, *s.*

1. A balloon whose ascensional power is derived from a body of heated air rising from a fire beneath the open mouth of the bag. Montgolfier's balloon was of this kind.

2. A balloon sent up at night with fireworks, which ignite at a certain regulated height.

fire-bar, *s.* A grate-bar in a furnace resting on a frame, called the fire-bar frame; inside the fire-box in a locomotive engine, wedge-shaped iron bars fitted to the fire-box with the thick side uppermost, to support the fire; the ends rest on a frame; they are inclined inwards, with an air-space between each, to promote combustion, and are jointed at one end, and supported by a rod at the other, so that the rod being withdrawn, the bars fall, and the fire-box is emptied.

fire-basket, *s.* A portable grate or cresset.

fire-bell, *s.* A bell rung to give an alarm of fire. In American towns fire-bells indicate by a definite number of strokes the district or locality in which a fire is raging.

fire-blasted, *a.* Struck with lightning.

fire-boom, *s.*

Naut.: A long boom having a goose neck, to slip on to a bolt in a ship's wales; the ends of fire-booms are formed with open prongs, through which a rope is reeved and carried round the vessel to prevent an enemy's boats from getting alongside during the night, or to keep off fire-ships, fire-stages, or vessels accidentally on fire.

***fire-bote,** *s.* [Firebote.]

fire-brand, *s.* [Firebrand.]

***fire-brass,** *s.* A bully, a hector. (*Ash.*)

fire-bridge, *s.* A plate or wall at the back of the furnace to support the ends of the grate-bars and prevent the fuel being carried over. It also serves to give an up turn to the flames against the bottom of the boiler.

***fire-brief,** *s.* A circular letter asking for help for sufferers from a fire.

"We laugh at *fire-briefs* now, although they be commended to us by his Majesty."—*Cartwright.*

fire-brigade, *s.* A body of men organized for the working of fire-engines in towns.

fire-cage, *s.* A skeleton box or basket of iron for holding lighted fuel; a cresset.

fire-chamber, *s.*

Puddling: The chamber at the end of the puddling-furnace, whence the flame passes to the reverberating chamber where the charge is placed.

fire-company, *s.*

1. A fire-brigade. (*American.*)

2. A fire-insurance company.

fire-cracker, *s.* A small paper cylinder charged with a preparation of gunpowder, and furnished with a short fuse, which being lighted, explodes with a loud report.

fire-cross, *s.* [Firecross.]

fire-detector and alarm, *s.* An apparatus invented by Prof. Grechi, and exhibited in 1873, for detecting and giving the alarm of fire, the principle being that high temperature in a room shall itself be utilized to ring a bell and display a coloured light. (*Huydn.*)

fire-dog, *s.* An andiron (q.v.).

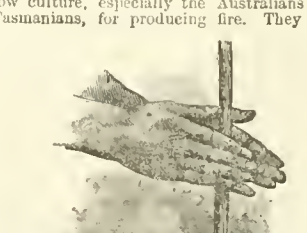
fire-door, *s.* The door of a furnace; feeding and stoking are usually performed at the opening.

fire-drake, *s.* [Firedrake.]

fire-dress, *s.* An invention intended to be worn as a protection against fire, enabling the wearer to approach and even to pass through flames for the purpose of rescuing life, or saving property. It consists of a light armour of metallic gauze, having an inner covering of some material, such as cotton, &c., which is a bad conductor of heat, steeped in a certain saline solution.

fire-drill, *s.*

Anthrop.: A term introduced by Tylor to describe the instrument used by peoples of low culture, especially the Australians and Tasmanians, for producing fire. They take



FIRE-DRILL.

(*From the Pitt-Rivers Collection.*)

two pieces of soft dry wood; one is a stick of about eight or nine inches long, the other piece is flat; the stick they shape into an obtuse point at one end, and, pressing it upon the other, cause it to revolve quickly between both hands. By this method fire is produced in less than two minutes.

"The geographical range of the simple *fire-drill* is immense."—*Tylor: Early History of Mankind,* p. 239.

fire-drilling, *s.*

Anthrop.: The process of producing fire by means of a fire-drill (q.v.).

"It [the stick-and-groove process] comes much nearer than *fire-drilling* to the yet simpler process of striking fire with two pieces of split bamboo."—*Tylor: Early History of Mankind,* ch. ix.

fire-eater, *s.*

1. A juggler, who pretends to eat or swallow fire.

"The drummer, the *fire-eater,* the wire-walker, and the salt-box, were all employed to invite him in."—*Goldsmith: The Bee; No. 4.*

2. A bully, a duellist, a fighting character.

"I'm sorry for your disappointment, you Fenchurch Street *fire-eater.*"—*Thackeray: Newcomes,* ch. xxix.

fire-engine, *s.*

1. An engine or form of pump for throwing water to extinguish fires. It is a kind of force-pump in which the water is subjected by a pressure sufficient to raise it to the necessary height. They are now generally worked by steam. The chemical fire-engine is one on the principle of the fire-annihilator (q.v.). [Extinctеur.]

* 2. A steam-engine.

"My method of lessening the consumption of steam, and consequently of fuel, in *fire-engines,* consists of the following principles."—*Wallace: History of the Steam-engine,* 61.

fire-escape, *s.* An apparatus for enabling persons to escape from the upper parts of buildings when on fire.

fire-extinguisher, *s.* [Extinctеur, Fire-annihilator.]

fire-fan, *s.* A small blast apparatus adapted to a portable forge, or one which has small proportions.

***fire-fanged, *fire-fangit,** *a.*

1. Laid hold of or caught by fire.

"This Chorineus als fast
Ruschit on his fa, thus *fire-fangit* and vnsaucht."
Douglas: Virgil, 419, 24.

2. Cheese is said to be *fire-fangit,* when it is swelled and cracked, and has received a peculiar taste, in consequence of being exposed to too much heat before it has been dried.

3. Applied to manure it means impaired in value, or damaged by too high a degree of fermenting heat.

"If it [a heap of dung and peat earth] does not come up to near blood heat, it ought to be turned over, and more dung applied; and if it becomes hotter, a large quantity of moss ought to be introduced, that it may not be *fire-fanged,* by which it is greatly injured."—*Agric. Surv. Ayrs.,* p. 399.

fire-fanging, *s.* Injury produced by fermentation in a cheese.

"Having or *fire-fanging* is so seldom met with in the sweet milk cheese of that county [Ayrshire] that nobody can tell from what it proceeds."—*Agric. Surv. Ayrshire,* p. 456.

***fire-flag,** *s.* A flash or gleam of lightning.

fire-flaire, *s.* [Fire-flaucht.].

Ichthy.; Trygon pastinaca, the only British species of sting-ray.

***fire-flaught, *fyre-flaucht,** *s.* A flash of lightning.

"And of thare cupling wittering schews the are,
The flamb of *fyre-flaucht* lighting here and thare."
Douglas: Virgil, 105, 41.

*** fire-flinger,** *s.* An incendiary.

fire-flout, *s.*

Bot.: Papaver Rhœas. (*Britten & Holland.*)

*** fire-fork,** *s.* A poker.

"Till one of the servants flung a *fire-fork* at him."—*Smith: Lives of Highwaymen,* i. 125.

fire-gilding, *s.* The mode of gilding in which the gold is put on in the form of an amalgam, and the quicksilver afterwards driven off by heat.

fire-grass, *s.*

Bot.: Alchemilla arvensis, from its being considered beneficial in erysipelas. (*Britten & Holland.*)

fire-guard, *s.* A wire frame placed before an open fire to arrest sparks and burning coals.

fire-insurance, *s.* Insurance against loss by fire. [Assurance, Insurance.]

fire-insurance company, *s.* A company which insures property against fire.

fire-iron, * fyre-yron, *s.*

1. A piece of iron or steel to strike light with a flint. (*Huloet.*)

2. (*Pl.*) The implements for tending a fire; poker, tongs, and shovel.

fire-kiln, *s.* A kiln or oven for heating anything.

fire-kindling, *s.* A feast or merrymaking upon going into a new house; housewarming.

fire-ladder, *s.* A fire-escape (q.v.).

fire-leaves, *s.*

Bot.: A name given to *Plantago media,* in Gloucestershire, and to *Scabiosa succisa,* in Herefordshire, from their tendency to fire a rick of hay, owing to their special capacity for retaining moisture.

fire-light, *s.*

1. The light coming from a fire.

"The windows of the way-side inn
Gleamed red with *fire-light* through the leaves."
Longfellow: Tales of a Wayside Inn. (Prel.)

2. A composition of inflammable substances for lighting fires.

fire-main, *s.* A main or pipe for water to be used in case of fire.

fire-maker, *s.* The same as FIRE-LIGHT.

fire-making, *s.*

Anthrop.: The art of producing fire. It was believed by the ancients that man was without fire till Prometheus stole some from the chariot of the sun, but the whole story has a mythic look. Plutarch says that in his time there were fireless races of mankind, and the geographer Pomponius Mela indicates Ethiopia as the locality of one of these. A certain Eudoxus, however, taught them how to produce it. This story cannot be tested now, but Mr. Edward Tylor, F.R.S., after passing in review the alleged modern instances of fireless races, rejects them one and all. He believes that there was a time when man was without fire, but it now everywhere appears to have passed away. The oldest method known of making fire is the South Sea Island one by means of a stick and a groove (q.v.). By a change in the way of working this became the fire-drill (q.v.) There followed next, it is believed, the method of striking fire by means of a flint, a piece of iron pyrites and tinder. This process was known to the ancients, which is the reason why they called one of the two minerals used pyrites —*i.e.*, firestone. The Greeks, in the time of Aristophanes, knew how to concentrate the sun's rays by a burning-glass, and the Romans in the age of Pliny (A.D. 23-79), effected the same result by concave mirrors. In the case of the need-fire, a superstitious rite connected with Sun-worship, and of which an instance occurred near Perth as late as 1826, fire was obtained by the revolution of a windlass in the hole of an oaken post smeared with tar. [NEED-FIRE.] The present generation remembers the time when fire was obtained by flint, steel, and a tinder box, till superseded by the lucifer matches now in use. (*Tylor: Early Hist. of Mankind*, ch. IX.) [FIRE-DRILL, STICK-AND-GROOVE.]

"The friction of two pieces of wood may perhaps be the original means of *fire-making* used by man."—*Tylor: Early History of Mankind*, p. 237.

fire-marble, *s.* [MARBLE.]

fire-office, *s.* A fire-insurance office; an office where property can be insured against fire.

fire-o'-gold, *s.*

Bot.: Caltha palustris.

fire-opal, *s.*

Min.: A variety of opal, of a hyacinth-red to honey-yellow colour, with fire-like reflections, somewhat irised on turning.

fire-ordeal, *s.*

Old Law: An old way of trying an accused person by means of fire. [ORDEAL.]

fire-pan, *s.* [FIREPAN.]

Fire-philosophers, *s.*

Hist.: Certain religionists, rather than philosophers, who in the sixteenth and seventeenth centuries attempted by the aid of fire to penetrate to the primary elements of things. They attributed little to human reason and reflection, but nearly everything to experience and divine illumination. One of the most notable among them was Jacob Boehme, a shoemaker, of Gorlitz, whom his patrons called the German Theosophist. He lived in the seventeenth century. The others were also called Theosophists. They were opposed by the Peripatetics. (*Mosheim.*) [ROSICRUCIANS.]

Fire-philosophy, *s.* The tenets of the Fire-philosophers (q.v.).

fire-point, *s.* A poker.

fire-policy, *s.* A deed or instrument whereby, in consideration of the payment, either in one sum or periodically, of a certain premium, an insurance company agrees to make good all loss or damage by fire which may happen to the property of the insurer, within a time specified in the document up to a certain fixed amount.

fire-proof, *v.t.* To make incombustible or proof against fire.

fire-proof, *a.* Proof against fire; incombustible. Buildings are rendered fire-proof by constructing them entirely of brick or stone, and using iron doors, lintels, &c., and stone stairs. Wood can be treated with silicate of soda, which, on the application of strong heat, fuses into a kind of glass, forming a shield against fire. Cloth or wood impregnated with certain saline substances will not blaze. Borax, alum, and phosphate of soda or ammonia are recommended as most suitable for this purpose. By treating cloth with graphite in a bath in which the mineral is suspended, and then subjecting it to the action of the electro-metallic bath, the cloth may be coated with metal. Woollen and ordinary stuffs may be treated with borax, alum, or soluble glass, but these cannot well be applied to the lighter descriptions, which are most liable to take fire. A weak solution of chloride of zinc has long been employed by figurantes to render their dresses incombustible.

Fire-proof building: The term is somewhat loosely applied, and may be held to mean: (1) A building absolutely incombustible, such as one whose walls, floors, and roofs are of metal, stone, brick, or cement. (2) A building capable of opposing the access of fire from without, having walls, window-shutters, and roofs which are incombustible from external flame and heat.

Fire-proof safe: A safe for the protection of valuables in case of the burning of a building in which they are placed.

Fire-proof structure: A vault, safe, or building proof against destruction by fire, either from the outside or by the burning of its contents. The provision against outside fire is the usual object, but in fire-proof structures the internal floors or partitions must also be impenetrable by fire, to make the building technically fire-proof.

fire-raft, *s.* A raft or timber structure carrying combustible materials, used by the Chinese to destroy the vessels of an enemy.

fire-rail, *s.*

Ship-build.: A rail fixed above the plank sheer or the forecastle and quarter deck, worked similar to the plank-sheer. (*Ogilvie*, 1st. ed.)

fire-regulator, *s.* A thermostatic device to open or close the access of air to the fire, or to govern the draft-area in the chimney, in order to urge or moderate the fire as it may sink below or rise above the desired point to which the thermostat is adjusted.

fire-salvage, *s.* The saving from a fire of as much property as possible. A fire-salvage corps was organised by the insurance offices of London in 1865.

fire-screen, *s.*

1. A fire-guard.

2. A screen to place between a person and the fire to intercept the direct rays.

fire-set, *s.* A set of fire-irons (q.v.).

fire-shield, *s.* A portable structure on wheels or on legs, used to protect a fireman on duty from the heat of a burning building, or to isolate a fire and prevent its spreading to adjacent buildings. It is usually a screen of sheet-iron supported by posts and stayed by guys. Fire-shields are in use at the Aldershot camp.

fire-steel, *s.* A steel used in connection with a flint for striking fire.

fire-stop, *s.* The fire-bridge at the back of a furnace; so called because it prevents coals being pushed over.

fire-surface, *s.*

Steam-engine: The area of surface of the boiler which is exposed to the direct and radiant action of the flames. The heating-surface of a boiler is made up of the fire-surface and flue-surface.

fire-swab, *s.*

Naut.: A swab or bunch of rope-yarn, secured to the tompion, and immersed in water to wet the gun and clear away any particles of powder, &c.

fire-telegraph, *s.* A telegraph to give alarm of fire in any part of a city; a fire-alarm telegraph.

fire-tower, *s.*

1. A tower supporting a cresset or other vessel for holding fire, and serving the purpose of a modern lighthouse.

2. A look-out tower whence outbreaks of fire can be discovered.

fire-trap, *s.* A building notoriously inflammable in which life is greatly exposed.

fire-tree, *s.* *Nuytsia floribunda*, so called from its bright orange-blossoms.

fire-tube, *s.*

Steam-engine: A furnace-tube, through which the flame and heated air pass from the fire-chamber. A flue, a pipe-flue, or flame-tube.

fire-using, *a.*

Anthrop.: Possessing a knowledge of the means of procuring fire, sustaining it, and employing it for cooking and other purposes. So far as is known Man is the only Primate capable of doing this; for though the anthropoids keenly enjoy the warmth of a fire, they can neither procure it themselves nor preserve it from extinction.

"He [man] may be appropriately designated the *fire-using* animal."—*Wilson: Prehistoric Man*, i. 136.

fire-water, *s.* The name given by the native Indians of North America to ardent spirits.

fire-weed, *s.*

1. *In England: Plantago media.* [FIRE-LEAVES.]

2. *In America:* A name for a composite plant, *Erechthites* (formerly *Senecio*) *hieracifolia*. It is so called because it grows abundantly on land laid waste by fire.

fire-winged, *a.* Having wings bright or shining as fire.

fire-worm, *s.* A glow-worm (q.v.).

Fire-worship, *s.*

Religions: The worship or veneration of fire, a very old and very widely extended form of faith. The real and absolute worship of fire exists in two forms, the first belonging to fetichism and the second to polytheism. In the former the rude barbarian adores the actual flame as if it was the highest object he could adore; in the latter he regards any individual fire as a manifestation of one great elemental being—the Fire-god (q.v.). It seems to have existed among the American Indians, the Asiatics and Turanians generally, the Assyrians, Chaldeans, Phœnicians, and other Syro-Arabians, and finally among the Aryans. Among the last-named race, the Vedic Hindoos worshipped Agni, Fire (cf. Lat. *ignis*, which is essentially the same word). The first word of the first Vedic hymn is his name in an oblique case, Agnim. The first sentiment is "Agni, I entreat, divine appointed priest of sacrifice." [For Persian Fire-worship see FIRE-WORSHIPPERS.] The classical religions bring prominently into view the special deities of Fire: Among the Greeks, Hephaistos (Vulcan), and the virgin goddess Hestia, the divine hearth, who was worshipped by the Romans under the name of Vesta, and whose sacred fire was tended incessantly in her temple in the Forum by the vestal virgins. One great branch of Fire-worship was Sun-worship (q.v.).

Fire-worshippers, *s. pl.*

Religions: The Zoroastrians, called also Guebres. Herodotus, about 450 B.C., said "the Persians think fire to be a god." Strabo, about 50 A.D., says "They peculiarly sacrifice to fire and water, placing dry wood on the fire stript of its bark, with fat thrown upon it." The Rev. Dr. Wilson, of Bombay, alleges that "they actually address it in supplication, as if it were sentient, intelligent, divine, and omnipresent, and ready to hear, bless, assist, and deliver; as is clearly proved by many passages of the Vandidad and by several of the Yasts and Has of the Yacna and Niashes, to be found in the works esteemed sacred, and used by the Parsis in their daily prayers" (*Wilson: Sermon to the Parsis*, 3rd ed. (1847), pp. 60, 61). No prominent race now in India has become more rapidly modified by intercourse with Europeans, and Prof. Max Müller believes that the so-called Fire-worshippers do not worship the fire, but regard it like other great material phenomena, as an emblem of the Divine power. This, as Tylor states, is probably now true of the intelligent Parsees: how far it is so of those less enlightened remains to be ascertained. The Fire-worshippers have, in the course of their history, suffered the most cruel persecution from the Mohammedans, and the leading features of the picture drawn of this in the part of Moore's *Lalla Rookh* called the *Fire-Worshippers*, is true to history. [GHEBRE, PARSEE, ZOROASTRIAN.]

fīre, *v.t. & i.* [Fire, *s.*]

A. *Transitive:*

I. *Ordinary Language:*

1. *Literally:*

(1) To set on fire; to kindle.

(2) To bake with fire.

"The dough is then rolled thin, and cut into small scones, which, when *fired*, are handed round the company."—*J. Nicol: Poems*, i. 23 (Note).

2. *Figuratively:*

*(1) To drive by fire.

"He that parts us shall bring a brand from heaven
And *fire* us hence." *Shakesp.: Lear*, v. 3.

(2) To discharge; to cause to explode: as, To *fire* a gun, to *fire* a mine.

"Bertram, forbear!—we are undone
For ever, if thou *fire* the gun."
Scott: Rokeby, iv 26.

(3) To inflame; to irritate; to excite or arouse the passions.

"For from the first, when love had *fired* my mind,
Resolved I left the care of life behind."
Dryden: Cymon & Iphigenia, 534, 535.

(4) To stir, to arouse, to excite.

"Oft have I heard it *fire* the fight."
Scott: Lord of the Isles, iv. 13.

(5) To animate, to give life or spirit to: as, To *fire* the genius.

(6) To cause to appear as if on fire; to illuminate strongly.

(7) To dismiss; to cast out of a place or position. (*U. S. Slang.*)

II. *Farriery:* To cauterize, to burn.

B. *Intransitive:*

I. *Ordinary Language:*

1. *Lit.:* To take fire; to be kindled.

"The greatest inconvenience of this wooden building is the aptnesse for *firing*."—*Hackluyt: Voyages*, i. 480.

2. *Figuratively:*

(1) To discharge firearms.

"The fainting Dutch remotely *fire*." *Smith.*

(2) To be inflamed with passion; to be irritated. (Generally with *up*.)

II. *Campanology:* To ring a peal of bells simultaneously; to give a full peal.

"[The chimes] can play sixteen tunes and one hundred and fifty changes, besides *firing* at full speed."—*Daily Telegraph*, Sept. 19, 1882.

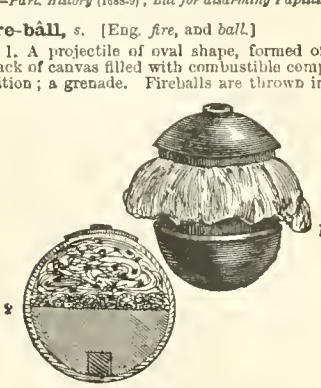
¶ *To fire away:* To begin, to start, to go on, to proceed.

fīre-arm, *s.* [Eng. *fire*, and *arm*.] A weapon which projects a missile by the explosive force of gunpowder: as guns, pistols, cannon, &c., but the term is not now generally extended to cannon. The first firearms in Europe were cannon. [Gun, Musket, Pistol, Rifle.]

"All those of that religion bring all their *firearms*."—*Parl. History* (1688-9); *Bill for disarming Papists.*

fīre-bâll, *s.* [Eng. *fire*, and *ball*.]

1. A projectile of oval shape, formed of a sack of canvas filled with combustible composition; a grenade. Fireballs are thrown into



FIREBALL.
1. Outer Case. 2. Section.

an enemy's works for the purpose of lighting them up, and are loaded with shells to prevent them from being approached. A wrought-iron bottom is attached to the bag to prevent breakage when discharged.

"He put a *fireball* at the end of a long pole, and lighting it with a piece of match he put it in at a window, and staid till he saw the house in a flame."—*State Trials* (an. 1666); *Firing of London.*

2. In meteorology, a kind of meteor which passes through the sky in the form of a globe of light without exploding.

***fīre-bāre,** *s.* [Eng. *fire*, and *bare* = bear.] A beacon, a creaset.

fīre-băr-rel, *s.* [Eng. *fire*, and *barrel*.] A hollow cylinder filled with inflammable materials, used in fireships.

fīre-băv-in, *s.* [Eng. *fire*, and *bavin*.] A bunch of brushwood, used in fireships, or for lighting fires generally; firewood.

fīre-bird, *s.* [Eng. *fire*, and *bird*.]

Ornith.: The Baltimore oriole.

fīre-blast, *s.* [Eng. *fire*, and *blast*.]

Agric.: A disease in plants, especially in hops, and chiefly toward the later periods of their growth, in which the delicate parts of the plants are dried and shrivelled up by a too sudden exposure to a brilliant and burning sun.

fīre-blĕnde, *s.* (Eng. *fire*; *blende*.]

Min.: The same as Pyrostilpnite (q.v.).

fīre-bōard, *s.* [Eng. *fire*, and *board*.] A chimney-board, to close up a fireplace in summer.

***fīre-bōte,** *s.* [Eng. *fire*, and *bote*.]

Old Law: An allowance of fuel to which a tenant was entitled.

fīre-bŏx, *s.* [Eng. *fire*, and *box*.] The fire-chamber of a locomotive-boiler. It is jacketed with a water-chamber to prevent radiation of heat. The firebox door may also be double, and have a circulation of water through the hinges. A partition in the box sometimes divides the fire space into two parts, and, being full of water, increases the fire surface.

firebox-door, *s.* The door opening into the firebox by which fuel is supplied to the fire.

firebox-partition, s. In large fireboxes a division is made in the box, into which water is admitted: this division is about the height of the firebox-door, and divides the fire into two parts in a locomotive engine, thereby increasing the heating surface of the firebox. [Midfeather.]

firebox-stays, *s. pl.* Rods which prevent the crushing down of the top of the box by the pressure of the steam.

fīre-brănd, ***fire-brond,** *s.* [Eng. *fire*, and *brand*.]

1. *Lit.:* A piece of wood kindled or on fire.

"I have eased my father-in-law of a *firebrand*, to set my own house in a flame."—*L'Estrange.*

2. *Fig.:* An incendiary; one who inflames or excites the passions of others.

"Troy must not be, nor goodly Ilion stand;
Our *firebrand* brother, Paris, burns us all."
Shakesp.: Troilus & Cressida, ii. 2.

fīre-brănd'-ĕd, *a.* [Eng. *fire*; *brand*; *-ed*.] Armed with or carrying firebrands, in allusion to the story of Samson destroying the corn of the Philistines (*Judges* xv.).

"*Firebranded* foxes to sear up and singe
Our gold and ripe-eared hopes."
Keats: Endymion, iii. 7.

fīre-brĭck, *s.* [Eng. *fire*, and *brick*.] A brick of refractory clay for lining furnaces, ovens, and for all kinds of brickwork exposed to such an intense heat as would melt common bricks. Firebricks are made from a natural compound of silica and alumina, which, when free from lime and other fluxes, is infusible under the greatest heat to which it can be subjected. Oxide of iron, however, which is present in most clays, renders the clay fusible when the silica and alumina are nearly in equal proportions, and those fire-clays are the best in which the silica is greatly in excess over the alumina. In making bricks and refractory goods, it is usual to use about two-thirds of fire-clay and one-third of burnt clay or bricks, to stiffen the mass and prevent undue combustion. This addition goes in Staffordshire by the name of *grog*. (*Weale.*)

fīre-brŭsh, *s.* [Eng. *fire*, and *brush*.] A brush to sweep the hearth.

"When you are ordered to stir up the fire, clean away the ashes from betwixt the bars with the *fire-brush*."—*Swift: Instructions to Servants.*

fīre-bŭe-kĕt, *s.* [Eng. *fire*, and *bucket*.] A bucket made of canvas, leather, or wood, and kept in readiness for emergencies. On board ship, a fire-bucket has a sennit lanyard of a length regulated to reach the water alongside, from the station whence the fire-bucket is to be thrown overboard to be filled.

fīre-clāy, *s.* [Eng. *fire*, and *clay*.] A kind of clay consisting of nearly pure silicate of alumina, capable of standing intense heat, and therefore used in the manufacture of fire-bricks (q.v.). Fire-clay is found throughout the coal formation, but that of Stourbridge is considered the best. In the Vale of Neath, in Glamorganshire, is a layer of clay superposed on a bed of limestone, and consisting almost entirely of silica, or sand, the colour of which, when dry, is a pale grey. The mass is crushed between iron rollers; it softens by exposure to the atmosphere, but some of it is too hard for making into bricks. The powder thus obtained is mixed with a small portion of lime when that substance is not previously contained in it, and sufficient water to make it cohere slightly by pressure. (*Weale.*)

fīre-cŏck, *s.* [Eng. *fire* and *cock*.] A street plug for attachment of hose for extinguishing fire, or for other municipal purposes.

fīre-cross, *s.* [Fiery-cross.]

fīred, *pa. par. & a.* [Fire, *v.*]

A. *As pa. par.:* (See the verb)

B. *As adjective:*

I. *Literally:*

1. Set on fire; kindled; in a flame.

2. Subjected to great heat; as, pottery

II. *Fig.:* Inflamed, excited.

"*Fired* at the sound my genius spreads her wing.
Goldsmith: The Traveller.

fīre-dămp, *s.* [Eng. *fire*, and *damp*.] An explosive mixture of marsh gas (methane CH_4), (q.v.), and air which accumulates in coal-mines.

firedamp-alarm, *s.* An apparatus which indicates the presence of dangerous quantities of gas or firedamp in coal-workings; a gas-alarm or gasoscope.

firedamp indicator, *s.* An instrument invented by Mr. Ansell, founded on the laws of the diffusion of gases. It is essentially an aneroid barometer with a porous tile for its back; by the diffusion of carburetted hydrogen, if any be present, the pressure is increased, and the index marks the difference between the atmospheric and the gaseous pressures.

***fīre-drāke,** *s.* [Eng. *fire*, and *drake*.]

1. A fiery dragon or serpent.

"By the hissing of the snake,
The rustling of the *fire-drake*,
I charge thee thou this place forsake."
Drayton: Nymphidia, v. 1.

2. A fiery meteor; an ignis fatuus.

"It may be 'tis but a glowworm now, but 'twill
Grow to a *firedrake* presently."
Beaum. & Flet.: Beggar's Bush, v. 1.

3. A worker at a furnace or fire; a fireman. (*Ben Jonson.*)

fīre-fĭend, *s.* [Eng. *fire*, and *fiend*.] A fiend assumed to preside over fire. The term is used by a foe of the Fire-worshippers.

"The fellest of the *Fire-fiend's* brood,
Hafed, the demon of the fight, . . .
Is her own loved Gheber maid."
Moore: Fire-worshippers.

fīre-flȳ, *s.* [Eng. *fire*, and *fly*.]

Entom. & Ord. Lang.: Popularly, a comprehensive name for any small insect which flies and is luminous. They belong to the Lampyridæ and the Elateridæ. The *Fulgora lanternaria*, or Lantern-fly, a homopterous insect, is too large to be called a firefly. The Glow-worm (*Lampyris noctiluca*) is also excluded, because the luminous sex, the female one, only crawls. In the case of several foreign Lampyri in hot countries the female, like the male, flies. The firefly of the south of Europe is *Lampyris italica*, that of Canada, *L. canadensis*. An East Indian species may be seen in myriads during the rainy season, glancing round trees as the male of the Ghost-moth, *Hepialus humuli* does here. The firefly of South America is one of the *Elateridæ Elater* or *Pyrophorus noctilucus*.

"Is it where the flower of the orange blows,
And the *fireflies* glance through the myrtle boughs?"
Hemans: The Better Land.

fīre-god, *s.* [Eng. *fire*, and *god*.]

Ord. Lang. & Religions: A god imagined to preside over fire. [Fire-worship.]

"There by the Fire-god's shrine it stands."
Moore: Fire-worshippers.

fī're-hook, *s.* [Eng. *fire*, and *hook.*]

1. A large hook on the end of a pole for tearing down buildings on fire, or to arrest a fire.

"*Fire-hook*, pipe, bucket, all complete."
J. & H. Smith. Rejected Addresses, p. 89

2. *Steam-eng.:* A kind of hook for raking and stirring the furnace fire.

* **fī're-hŏuse,** *s.* [Eng. *fire*, and *house.*] A hearth.

"Peter-pences . . . to be paid out of every *firehouse* in England."—*Fuller: Church History*, 11. iii. 13.

fī're-lĕss, *a.* [Eng. *fire*, and *less.*]

1. *Ord. Lang.:* Destitute of or without fire.

"*Fireless* are the valleys far and wide."
Wordsworth: Evening Walk.

2. *Anthrop.:* A term applied to races who are said to be ignorant of any method of producing fire. Many ethnographers doubt if peoples in such a low state of culture exist.

"An unquestionable account of a *fireless* tribe would be of the highest interest to the ethnographer."—*Tylor: Early History of Mankind*, p. 235.

fī're-lŏck, *s.* [Eng. *fire*, and *lock.*]

1. *Lit.:* A musket or other gun provided with a lock furnished with a flint and steel, by means of which fire was produced to discharge it, as distinguished from a matchlock, which was fired by means of a match.

"They had among them sixty *firelocks*, and as many pikes and swords."—*Macaulay: Hist. Eng.*, ch. xii.

* 2. *Fig.:* A term of contempt.

"Damn that old *firelock*, what a clatter he makes!"
History of Jack Connor, i. 233 (1752).

fī're-măn, *s.* [Eng. *fire*, and *man.*]

I. *Ordinary Language:*

1. *Literally:*

(1) One who is employed to extinguish fires in cities; a member of a fire-brigade.

"The *fireman* sweats beneath his crooked arms."
Gay: Trivia.

(2) A man employed in attending to the fire of an engine; a stoker.

2. *Fig.:* A man of violent passions; a fire-eater.

"I had last night the fate to drink a bottle with two of these *firemen*."—*Tatler.*

II. *Coal-min.:* A man who is specially employed to examine a coal-mine every morning to see that no fire-damp is present.

fī're-măs-tẽr, *s.* [Eng. *fire*, and *master.*]

1. An officer who directs the manufacture of fireworks.

2. The chief of a fire-brigade.

* **fī're-new (ew** as **ū),** *a.* [Eng. *fire*, and *new.*] New as from the forge; brand-new.

"Your *firenew* stamp of honour is scarce current."
Shakesp.: Richard III., i. 3.

fī're-păn, * **fyre-panne,** *s.* [Eng. *fire*, and *pan.*]

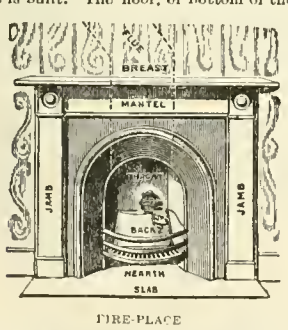
1. A pan or vessel for holding or conveying fire; a fireshovel.

"His *firepans*, and all the vessels thereof, thou shalt make of brass."—*Exodus* xxvii. 3.

2. In a firelock, the receptacle for the priming-powder.

fī're-plāçe, *s.* [Eng. *fire* and *place.*]

Arch: That part of a room in which the fire is built. The floor, or bottom of the fire-



FIRE-PLACE

place is called the hearth, the broad flat stone in front of the hearth is the slab, the vertical sides of the fireplace opening are called the jambs, and the lintel lying on them the mantel. The part of the wall immediately above the mantel is the breast, and the wall behind the fireplace is the back. The tube or passage for the smoke is the flue; the narrow part where the flue opens into the fireplace is the throat. A damper is fixed at the throat to regulate the draught.

"For forage, food, and *firing* call."
Scott: Marmion, iii. 2.

II. *Technically:*

1. *Farriery:* The act of canterizing; the application of a cautery.

2. *Furnace:* The mode of introducing fuel into the furnace and working it. Hard-firing: charges in quick succession, with frequent stoking. Heavy-firing: large charges of fuel and frequent stoking. Known also as Close-firing, Thick-firing, and Charging, from the large body of fuel introduced at a time. Light-firing: moderate and frequent in quantity; coking the charge on the dead-plate, and then pushing it on to the coals. Also called Open-firing, as the charge is thinly spread on the grate-bars and the draft is free.

3. *Glass-man.:* The process of fixing the colours upon glass. The colours are metallic oxides, ground up with flint glass and borax, and laid by a paint-brush upon the pieces or sheets of crown-glass. These are then removed to the kiln, where the colours become fused and unite inseparably with the surface of the glass on which they are laid, the flux enabling the colour to melt before the glass plate becomes distorted by the heat. The crown-glass being a silicate of potash and lime, is much more intractable than a glass into whose composition lead enters.

firing-iron, *s.* A farrier's cautery.

***fisc (2),** *s.* [A.S. *fisc.*] A fish (q.v.).

"Thar is fughel, thar is *fisc*." *Layamon*, i. 53.

fisc'-al, *a.* & *s.* [O. Fr. from *fisque* = the public purse, from Lat. *fiscus.*]

A. *As adj.:* Of or pertaining to the public revenue or exchequer.

"To be extinguished by *fiscal* difficulties."—*Burke: French Revolution.*

***B.** *As substantive:*

1. Revenue; income of a sovereign or state.

"War, as it is entertained by diet, so can it not be long maintained by the ordinary *fiscal* and receipt."—*Bacon: War with Spain.*

2. A treasurer.

3. A procurator-fiscal (q.v.).

4. In Spain and Portugal, the king's solicitor or attorney-general.

fiscal lands, *s.pl.* Lands, among the Franks, set apart for the use of the sovereign, to support his dignity, and to give him the means of rewarding merit or valour, for which purpose they were granted by him to his subjects, on condition of personal service in the field being rendered to him by the grantees.

fisch'-ŏr-īte, *s.* [From Dr. G. Fischer, who wrote on the palæontology of Russia.]

Min.: An orthorhombic, translucent, green mineral of vitreous lustre; its hardness, 5; its sp. gr., 2·46. Compos.: Phosphoric acid, 29·03; alumina, 38·47; water, 27·50. Found at Nischne Tagilsk. (*Dana, &c.*)

fĭş'-ĕt, *s.* [Sp. *fusette;* Fr. *fustet.*] [Fustic.]

fisct-wood, *s.*

Bot.: The wood of *Rhus Cotinus.*

fĭş'-ĕ-tĭn, *s.* [*Fiset; -in.*]

Chem.: The yellow colouring-matter of Fisetwood, a species of sumach, *Rhus cotinus.* Fisetin crystallizes in needles which have the formula, $C_{15}H_{10}O_6$.

I. *Ordinary Language:*

1. One of the class of animals described in II. 1.

2. The flesh of fish used as food.

"Tis well thou art not *fish*."—*Shakesp.: Romeo & Juliet*, i. 1.

II. *Technically:*

1. *Zool.* (Pl. *fishes;* Lat. *Pisces*): The fifth and last class of vertebrated animals. Like Reptiles and Amphibians, they have cold red blood; but, unlike them, they are normally fitted for a permanently aquatic life by being provided with branchiæ or gills which do not pass away. The covering is of scales. Propulsion is by fins, into which the four limbs of the more typical vertebrates are transformed. [Fin.] The skeleton varies greatly in the degree of its consolidation. Most modern fishes have it bony; but some well-known families, notably the Sharks and Rays, have it cartilaginous, whilst in the highly aberrant Lancelet (Amphioxus) it almost disappears. In all fishes but the last-named genus there is a heart, which as a rule has but one auricle and one ventricle. The forms of the several genera vary, the normal one approaching what is mathematically called the solid of least resistance. The sexes are distinct. Propagation is by means of ova, and fishes are prolific beyond all conception. About 8,000 species are known. Linnæus had a class Pisces, but he excluded from it various genuine fish-genera: *Squalus, Raia, Ostracion, Diodon,* &c., calling them *Amphibia Nantes.* (*Linnæus: Systema Natura*, 3rd ed., 1767). Cuvier divided them into two series, (1) Fish properly so called, Common Fish (*i.e.*, Osseous Fishes), and (2) Chondropterygii or Cartilaginous Fishes. The first are divided into the orders Plectognathi, Lophobranchii, Malacopterygii, and Acanthopterygii (q.v.). (*Griffith: Cuvier*, 1834 pp. 6, 7, 8.) For the classification of Agassiz, see 2. *Palæont.* Prof. Owen, slightly modifying the classification of Prof. J. Muller, divides the class into the eleven following orders — Dermopteri, Malacopteri, Pharyngonathi, Anacanthini, Acanthopteri, Plectognathi, Lophobranchii, Ganoidei, Protopteri, Holocephali, and Plagiostomi. (*Owen: Compar. Anat. Invertebr. Anim.*, 1846, pp. 47–51.) Prof. Huxley divides them into the six following orders—Dipnoi, Elasmobranchii, Ganoidei, Teleostei, Marsipobranchii, and Pharyngobranchii.

2. *Palæont.:* Fishes being the lowest vertebrates in organization seem, as might have been expected, to have been the first of that kingdom brought into being; they appear in the Upper Silurian rocks of Britain, and are found in every marine formation since deposited. Teeth, the spines called ichthyodorulites, scales, and even the whole external framework occur in various formations. To meet the necessities of the palæontologist, Louis Agassiz, about 1840, or earlier, divided

fishes by their scales alone into four orders—Cycloidei, Ctenoidei, Ganoidei, and Placoidei (q.v.). The oldest fossil fish is generally considered a placo-ganoid one. It is a Pteraspis from the base of the Lower Ludlow Rocks. Ichthyodorulites at the top of the Upper Ludlow may be of the Cestraciont family. In the Old Red Sandstone, as the readers of Hugh Miller's works know, fishes abound so much so that it has been called the Age of Fishes. The oldest genera are Cephalaspis, Acanthodes, &c., from the Lower Old Red Sandstone of Scotland. In the Middle Old Red follow Pterichthys, Coccosteus, Diplopterus, Dipterus, Asterolepis, &c., and in the Upper Holoptychius. Some are so abnormal in aspect that only an expert could tell that they were fishes at all; others so much the reverse that a child could name correctly their class. The Dipnoi, or Mud Fishes, now first appear. In the Carboniferous rocks Ganoids are still numerous, but many Plagiostomous fishes occur. With the commencement of the Mesozoic rocks the Ganoids lose their preponderance, and an antique pattern of tail, called the heterocercal [HETEROCERCAL], one which had hitherto been usual, now becomes rare, its place being taken by the modern or homocercal tail [HOMOCERCAL]. In the Cretaceous period the Teleostean or Bony fishes begin, with Ctenoid or Cycloid scales. If the resemblance pointed out by Prof. Huxley between Pteraspis and Cephalaspis on the one hand, and the Teleostean Siluroids on the other, are those of affinity (*Quar. Jour. Geol. Soc.*, 1858, pt. i., 278 to 280), the regularity of this line of progressive development would be overthrown: if those of analogy only, no such consequence follows.

fish-backed, *a.* Swelling upwards, like a fish's back.

fish-bar, *s.* The splice-bar which breaks the joint of two meeting objects, as of railroad rails or scarfed timber. [FISHING.]

fish-beam, *s.* A beam with a bulging belly.

fish-bellied, *a.* Bellying on the under side, as a beam, a rail, &c.

fish-belly, *s.*
Bot.: Cnicus heterophyllus.

fish-block, *s.*
Naut.: The block of the fish-tackle for raising the anchor.

*** fish-brow, * fisc-browe,** *s.* Broth made with fish.
"Hic garus, *fisc-browe*." — *Wright's Vol. of Vocab.*, p. 241.

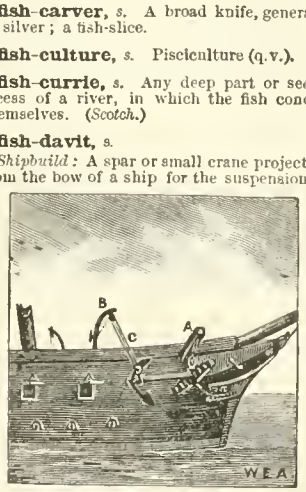
fish-carle, *s.* A fisherman.

fish-carver, *s.* A broad knife, generally of silver; a fish-slice.

fish-culture, *s.* Pisciculture (q.v.).

fish-currie, *s.* Any deep part or secret recess of a river, in which the fish conceal themselves. (*Scotch.*)

fish-davit, *s.*
Shipbuild: A spar or small crane projecting from the bow of a ship for the suspension of



B. FISH-DAVIT.
A. Cat-head. C. Fish-fall.

the tackle, called the fish-fall, used in hauling up the arms of the anchor in getting it aboard. The fish-davit is such a distance abaft the cat-head as the length of the anchor may require, and is used to lift the fluke of the anchor to the bill-board; a roller keeps the fluke from bruising the vessel's side. In preparing for letting go the anchor, it is suspended by its throat from the fish-davit by a chain or rope called the shank-painter, which is cast loose simultaneously with the cat-head stopper, the two being secured on board by means of movable pins called tumblers, which are moved by a lever and disengage the chains or ropes at the same instant.

fish-day, * fisshe-day, * fysshe-day, *s.* A day on which fish is eaten; a fast-day.
"Hastelattes for *fysshe*day."—*Liber Cure Cocorum*, p. 37.

fish-eye, *s. & a.* (See the compound.)
† *Fish-eye stone:*
Min.: Apophyllite. (*Rossiter.*)

fish-fall, *s.*
Naut.: The tackle depending from the fish-davit and used in hauling up the arms of the anchor.

fish-flake, *s.* A structure on which fish are spread to be air and sun-dried. [FLAKE.]

fish-front, *s.*
Naut.: Curved pieces of timber bound upon the outside of a broken spar to stiffen it and make it serviceable. (*American.*)

fish-garth, *s.* A staked or dammed enclosure on the margin of a river to form a fish-preserve.

fish-globe, *s.* A spherical glass vessel in which gold and silver fish are kept.

fish-glue, *s.* Isinglass (q.v.).

fish-guano, *s.* The excreta of fishes, sold as guano.

fish-hawk, *s.*
Ornith.: Pandion haliaëtus, the Osprey, or Fishing Eagle.

fish-hook, *s.*
I. A hook with which fish are caught.
"A sharp point, bent upward and backward, like a *fish-hook*."—*Grew: Museum.*
2. [FISH-TACKLE].

fish-joint, *s.*
Rail. Eng.: A plate or pair of plates fastened upon the junction of a couple of meeting portions of a beam or plate. The fish-joint for connecting railway-rails was designed in 1847, and was soon extensively used. [FISHING.]

fish-knife, *s.* A fish-slice (q.v.); a knife for eating fish.

fish-ladder, *s.* A dam with a series of steps to enable fish to ascend the fall by a succession of leaps. [FISH-WAY.]

fish-leaves, *s.*
Bot.: Potamogeton natans. (*Britten & Holland.*)

*** fish-leep, fysch-leep,** *s.* A fish-basket.
"*Fysch-leep. Nassa.*"—*Prompt. Parv.*

*** fish-lock,** *s.* A fish-weir.
"Catched in the nets, in kiddels or *fish-locks*."—*Money Masters All Things* (1698), p. 86.

fish-louse, *s.*
Zoology:
I. The Crustaceous genus Caligus, order Pœcilopoda. The species are parasitic upon various fishes.
2. The Crustaceous genus Cymothoa, belonging to the Isopoda.

fish-meter, *s.* An officer appointed by the local authorities to inspect all fish which comes in to the market.

fish-mint, *s.*
Bot.: Mentha aquatica.

fish-oil, *s.* Oil obtained from the bodies of fishes and marine animals, as whales, porpoises, sharks' and cods' livers, &c.

fish-plate, *s.*
Rail. Eng.: A plate used to secure together the ends of adjacent rails, to hold them strictly in line, avoiding lateral deflection or sagging. It usually consists of a plate on each side of the joint, clasping the web of the rail, and secured by bolts and nuts. [FISHING.]

fish-poison, *s.*
Bot.: Lepidium Piscidium.

fish-pool, * fischepole, *s.* A fishpond.
"To a *fische-pole* he come." *Sevyn Sages*, 853.

fish-pot, *s.* An open-mouthed wicker basket containing bait, and sunk in the haunts of fish to catch them.

fish-royal, *s.*
Law: A "fish" which, when thrown ashore or caught near the coast is the property of the sovereign. Whales (which are mammals and not fish) and sturgeons are fishes-royal.

fish-sauce, *s.* Sauce, such as anchovy, to be eaten with fish.

fish-semblance, *s.* A mythologic monster partaking of the nature of or resembling a fish.
"*Fish-semblances* of green and azure hue."
Keats Endymion, ii. 717.

fish-skin, *s.* The rough skin of the dog-fish or shark is used as a rasp. Shagreen is a leather of fish-skin. The skins of the porpoise, beluga, and seal are tanned. Eel-skins are used as whang (q.v.). Sole and other skins are used in making a kind of isinglass for clarifying liquors.
Fish-skin disease:
Med.: Ichthyosis, a horny condition of the skin.

fish-slice, *s.* A broad-bladed silver knife used for serving fish at table. The trowel-shaped blade enables a portion of fish to be removed from the backbone without breaking it into unsightly fragments.

fish-sound, *s.* The swimming-bladder or air-sac of a fish. That of a cod is eaten; isinglass is prepared from those of some other fish.

fish-strainer, *s.*
I. A colander with handles, used for raising fish from the fish-kettle.
2. A perforated earthenware slab placed at the bottom of a dish to drain the water from cooked fish.

fish-tackle, *s.*
Naut.: A purchase to raise the flukes of an anchor to the gunwale for stowage after being catted. A fish-fall. A large hook, called a fish-hook, is attached to the end.

fish-tail, *s. & a.*
A. *As subst.:* The tail of a fish.
B. *As adj.:* Resembling in shape the tail of a fish.
Fish-tail burner: A gas burner whose burning jet assumes a two-lobed form, like the tail of a fish.
Fish-tail propeller: A single-winged propeller hinged to the stern-post, and oscillating like the tail of a fish.

fish-tongue, *s.* An instrument used by dentists for the removal of the wisdom-teeth, the last in the dental range.

fish-torpede, *s.* [TORPEDO.]

fish-trap, *s.* A box or basket set in a river, and having bait slung in a bag to attract fish: it is sprung by hand. A basket, net, or staked area with a divergent-sided or funnel-shaped opening through which fish pass, and in which they find a difficulty in retracing their course, owing to obstacles or blind sacs.

*** fish-trowel,** *s.* A fish-slice (q.v.).

fish-way, *s.* A device to enable a fish to ascend a fall. It may consist of a series of steps over which the water descends, turning a fall into a cascade, and sometime known as a fish-ladder; or it may consist of a chute with a sinuous track for diminishing the velocity and assisting the passage of the fish to the level above the dam.

fish-weir, *s.* A fish-garth (q.v.).

fish-wood, *s.*
Bot.: Piscidia erythrina.

fish (2), *s.* [Fr. *fiche* = (1) a gardener's dibble, (2) a peg used to mark distances; *ficher* = to fix.]
I. *Ord. Lang.:* A counter used in games.

II. *Technically:*

1. *Nautical:*

(1) One of a pair of bars laid on opposite sides along and tightly lashed to a spar which has been sprung or broken.

(2) A purchase for hauling the fluke of an anchor on to the gunwale; a fish-hook.

2. *Rail. Eng.:* A *fish-bar* (q.v.).

3. *Joiner.:* A strengthening or stiffening bar or piece of timber laid alongside another.

fĭsh (1) * **fysh,** * **fiss-en,** * **fissh-en,** * **fisch-en,** *v.i.* & *t.* [Fish, *s.*]

A. *Intransitive:*

I. *Lit.:* To be employed in catching or attempting to catch fish, as by angling, netting, &c. (Followed by *for.*)

"Peter *fyshed* for his fode, and his fere Andreu."
P. Plowman, 10,199

2. *Figuratively:*

(1) To seek to gain or obtain; to try for; to seek to draw forth.

"While others *fish,* with craft, for great opinion,
I with great truth catch mere simplicity."
Shakesp.: Troilus & Cressida, iv. 4.

(2) To try to learn, gain, or bring out by artifice or cunning: as, To *fish* for information.

B. *Transitive:*

I. *Ordinary Language:*

1. *Lit.:* To attempt to catch fish in; to search or try for fish.

2. *Figuratively:*

(1) To catch or lay hold of, especially in water; to draw or drag up: as, To *fish* a body out of a river.

* (2) To gain in any way.

"Thei that preche vs povert and distresse,
And *fisshen* hem silf great richesse."
Romaunt of the Rose, 6,186.

(3) To search, to examine, as by raking, sweeping, dragging, &c.

¶ *To fish out:* To ascertain, or find out by cunning inquiry: as, To *fish out* a man's reasons.

II. *Naut.:* To hoist and draw up the flukes of a ship's anchor towards the top of the bow, in order to stow it after it has been catted.

fĭsh (2), *v.t.* [Fish (2), *s.*]

1. *Joinery:* To strengthen, as a piece of wood, by placing a piece of timber of the same scantling to one side of the timber to be united, and bolting or hooping them together.

2. *Naut.:* To strengthen a sprung mast or yard with a piece of timber.

3. *Rail. Eng.:* To splice, as rails, by fishing.

¶ *To fish an anchor:*

Naut.: [Davit, 1].

fĭsh'-ă-ble, *a.* [Eng. *fish*; *-able.*] Capable of being fished.

"There was only a small piece of *fishable* water in Englebourn."—*Hughes: Tom Brown at Oxford,* ch. xlvii.

fĭsh'-bas-kĕt, *s.* [Eng. *fish,* and *basket.*] A fisherman's basket for carrying fish.

fished, *pa. par.* or *a.* [Fish (2), *v.*]

fished-beam, *s.*

Joinery: A long beam composed of two shorter beams joined end to end and fished.

fĭsh'-ĕr, * **fisch-er,** * **fish-ere,** * **fissh-er,** * **fysch-ar,** * **fysoh-er,** * **fysch-ere,** *s.* [A.S. *fiscere*; O. S. *fiskari*; O. Fris. *fisker*; Dut. *visscher*; O. H. Ger. *fiscâri*; Icel. *fiskari*; Sw. *fiskare*; Dan. *fisker.*] [Fish (1), *v.*]

1. *Ord. Lang.:* One who is employed in fishing; a fisherman.

"Three *fishers* went sailing out into the west,
Into the west when the sun went down."
C. Kingsley: The Fishers.

2. *Zool.:* A species of marten; the pekan (q.v.).

fisher's-knot, *s.* A slip-knot, the ends of which lie horizontally, and will not become untied.

"Be knit together with that *fisher's-knot.*"—*Dennis: Secrets of Angling.*

* **fisher-town,** *s.* A fishing-town or village; a town inhabited by fishermen.

"Others of them, in that time burned that *fisher-town* Mousehole."—*Carew: Survey of Cornwall.*

fĭsh'-ĕr-bōat, *s.* [Eng. *fisher,* and *boat.*] A boat employed in catching fish.

"Got into the *fisherboats* to see the fishing."—*North: Plutarch,* p. 764.

fĭsh'-ĕr-man, * **fysh-er-man,** *s.* [Eng. *fisher,* and *man.*]

1. One whose employment or occupation is to catch fish.

"The *fishermen* that walk upon the beach
Appear like mice." *Shakesp.: Lear,* iv. 6.

2. A boat or vessel employed in catching fish; a fishing-boat.

¶ *The Fisherman:* A title given to the Pope, from the fact that St. Peter, who is claimed as the first Bishop of Rome, was a fisherman.

"Mandates for deposing sovereigns were sealed with the signet of the *Fisherman.*"—*Burke: On the French Revolution.*

fisherman's-bend, *s.*

Naut.: A sailor's knot, used in bending halyards to a studding-sail yard. Two turns are taken round the spar, the end passed between them and the spar, and half-hitched around the standing part.

fĭsh'-ĕr-ў, *s.* [Eng. *fish*; *-ery.*]

1. The business or occupation of catching fish.

¶ The word fishery is popularly used in a comprehensive sense; not merely is there a herring-fishery, a salmon-fishery, a cod-fishery, a pilchard-fishery, &c., for catching these genuine fishes, there is a whale-fishery for harpooning the mammals called whales, a crab and lobster-fishery for catching those crustaceans, and an oyster-fishery for obtaining those testaceous molluscs. The great locality for the whale-fishery is the Polar regions of the Northern and Southern Hemispheres, that for the cod-fishery the banks of Newfoundland, that for the salmon-fishery the rivers of the Pacific coast of the United States and Canada, that of the mackerel and herring-fishery the coast waters of Europe and Northern United States, that of the pilchard-fishery the coasts of Devonshire and Cornwall, England. Other important American fisheries are the menhaden, which is caught in vast numbers, and the shad, whose leading localities are the Delaware and Hudson Rivers. There are numerous other important fisheries which might be named, among them that of the oyster, of which the Atlantic coast of the United States furnishes vast numbers of a quality very superior to the European oyster. The localities native to many of the fish named are rapidly being added to, by distributing young fish in other streams and lakes, which has been attended with much success. The practice of salting fish was known to the Egyptians of 1350 B. C., or even earlier. The fisheries of the waters of Eastern Canada and Newfoundland have long been a source of trouble between the United States and Great Britain. A magnificent display of fish and fishery equipment was shown in the Fish and Fisheries Building of the World's Columbian Exposition of 1893.

"Holland will suffer us to improve our *fishery.*"—*Parl. Rist.,* vol. vi., app. p. 139.

2. The place where fishing is carried on.

"The *fisheries* of Newfoundland have been for a century the constant object of rivalship between France and England."—*Pitt: Speech,* Nov. 27, 1800.

fĭsh'-făg, *s.* [Eng. *fish,* and *fag.*] A woman who sells fish; a fishwife, a fisherwoman.

"With vulgar *fishfags* to be forced to talk."
Wolc it: Peter Pindar, p. 106.

* **fĭsh'-fŭl,** * **fish-full,** *a.* [Eng. *fish,* and *full.*] Full of or abounding with fish; well atored with fish.

"It is walled and guarded with the ocean, most commodious for traffic to all parts of the world, and watered with pleasant, *fishful,* and navigable rivers."—*Camden: Remains.*

fĭsh'-gĭg, fĭz'-gĭg, *s.* [Eng. *fish,* and *gig* = a dart.] A spear with several barbed prongs used in spearing fish. It has usually five prongs, called grains.

fĭsh'-ĭ-fў, *v.t.* [Eng. *fishy,* and Lat. *facio* (pass. *fio*) = to make.] To turn or change to fish.

"O flesh, flesh, how art thou *fishified.*"
Shakesp.: Romeo & Juliet, ii. 4.

fĭsh'-ĭ-nĕss, *s.* [Eng. *fishy*; *-ness.*] The quality or state of being fishy. (*Lit. & fig.*)

"Its flesh has nothing of the *fishiness* of that of the heron."—*Pennant: Zoology; Bittern.*

fĭsh'-ĭng, * **fissch-ing,** * **fiss-ing,** * **fysch-ynge,** *pr. par., a., & s.* [Fish, *v.*]

A. *As pr. par.:* (See the verb).

B. *As adjective:*

I. *Literally:*

1. Employed or occupied in catching fish.

2. Used or employed by fishermen; suitable for fishing.

"Equipped in his wading boots, and *fishing* dress."—*Cuthbert Bede: Verdant Green,* pt. iii., ch. ii.

II. *Fig.:* Seeking to gain, draw out, or obtain by artifice or stratagem: as, a *fishing* question.

"A party shall not make a *fishing* application into the manner in which his adversary intends to shape his case."—*Lord Campbell,* in *Law Times Report* xxvii. 202, June 9, 1856.

C. *As substantive:*

I. *Literally:*

1. The act or occupation of catching fish.

"Oure louerd com and here *fissching* isay."
St. Andrew, 4.

2. A fishery.

"There also would be planted a good town, having both a good haven and a plentiful *fishing.*"—*Spenser.*

fishing-boat, *s.* A boat employed in catching fish.

fishing-cruive, *s.* A cruive or enclosure for fish in a river.

fishing-fly, *s.* An artificial fly used by anglers as a bait.

fishing-frog, *s.*

Ichthy.: *Lophius piscatorius,* the Angler (q.v.).

fishing-ground, *s.* A place frequented by fish, and suitable for fishing; a fishing-place, a fishery.

fishing-line, *s.* A line with hook attached for catching fish.

fishing-net, *s.* A net for catching fish. Fishing-nets are of various kinds, according to the particular use for which they are intended: as a bag-net, a drag-net, a casting-net, a trawl, a seine, &c.

fishing-place, *s.* A fishing-ground (q.v.).

fishing-rod, *s.* A long, slender, tapering rod, to which the fishing-line is attached.

fishing-tackle, *s.* All the apparatus required by a fisherman: as, the fishing-rod, fishing-line, hooks, artificial flies, bait, &c.

fishing-wand, *s.* A fishing-rod.

fĭsh'-kĕt-tle *s.* [Eng. *fish,* and *kettle.*] A long kettle adapted to boil fish of, say, from four to ten pounds' weight, without either destroying the symmetry of the fish or cutting it into pieces.

"It is probable, that the way of embalming amongst the Egyptians was by boiling the body in a long caldron like a *fishkettle,* in some kind of liquid balsam."—*Grew: Museum.*

fĭsh'-like, *a.* [Eng. *fish*; *-like.*] Resembling fish in form or qualities; suggestive of fish.

"A very ancient and *fishlike* smelt."
Shakesp.: Tempest, ii. 2.

fĭsh'-mar-kĕt, *s.* [Eng. *fish,* and *market.*] A market established for the sale of fish.

fĭsh'-mâw, *s.* [Eng. *fish,* and *maw.*] The sound or air-sac of a fish; a fish-sound.

* **fĭsh'-mēal,** *s.* [Eng. *fish,* and *meal.*] A meal of fish; diet of fish; an abstemious diet.

"Thin drink doth overcool their blood, and making many *fishmeals,* they fall into a kind of male greensickness."—*Shakesp.: 2 Henry IV.,* iv. 2.

fĭsh'-môn-gĕr, * **fych-man-ger,** *s.* [Eng. *fish,* and *monger.*] A dealer in fish; a seller of fish.

* **fishmongers' fair,** *s.* Lent.

fĭsh'-pŏnd, *s.* [Eng. *fish,* and *pond.*] A pond or pool where fish are bred and kept.

"*Fishponds* were made where former forests grew."
Prior: Solomon, ii. 21.

fĭsh'-roŏm, *s.* [Eng. *fish,* and *room.*]

Naut.: A room or compartment in a ship, between the afterhold and the apirit-room.

fĭsh'-spēar, *s.* A barbed spear for catching fish; a gig.

fĭsh'-stō-rў, *s* An incredible narrative, such as amateur fishermen are usually credited with telling. (*U. S. Colloq.*)

fĭsh'-wīfe, *s.* [Eng. *fish,* and *wife.*] A fishwoman.

fĭsh'-wom-an, *s.* [Eng. *fish,* and *woman.*] A woman who sells fish.

fish'-y, *a.* [Eng. *fish*; *-y.*]

I. *Literally:*

1. Consisting of fish.

2. Pertaining to fish; suggestive of fish; fishlike: as, a *fishy* taste, a *fishy* smell. (*Milton: P. L.*, iv. 168.)

3. Having the appearance or form of a fish.

"Few eyes have escaped the picture of mermaids, that is, according to Horace, a monster with a woman's head above, and *fishy* extremity below."—*Browne: Vulgar Errours.*

4. Inhabited by fish: stored with fish.

"Smoothly flow the watery stores
Of *fishy* Hipparis, profoundest stream."
West: Pindar; Olympiad 5.

II. *Figuratively* (*slang*):

1. *Of persons:* Worn out, done up, seedy.

2. *Of things:* Of a doubtful character; suspicious, unsafe, unsound.

fisk, * **fis'-kin,** * **fysk,** *v.i.* [Sw. *fiska.*] To bustle about, to frisk.

"What frek of thys folde *fisketh* thus aboute."
P. Plowman, c. x. 153.

fisk, *s.* [Fisc.]

Scots Law: The right of the Crown to the movable estate of a rebel. (*Bell.*)

fis'-sel, * **fis'-sil,** *v.i.* [Fissle.]

fis'-sen-less, * **fis'-zen-less,** *a.* [Eng. *fissen*; *-less.*] Weak, destitute of strength or pith.

fis'-si-cos'-tate, *a.* [Lat. *fissus*, pa. par. of *findo* = to cut, to cleave, and Eng. *costate* (q.v.).] Having the ribs divided.

fis-si-den'-ta, *s.* [Lat. *fissus* = cloven, and *dens* = a tooth.]

Bot.: The typical genus of the family Fissidenteæ (q.v.). It has representatives in Britain.

fis-si-den'-te-æ, *s. pl.* [Lat. *fissus* = cloven; *dens* (genit. *dentis*) = a tooth, and fem. pl. adj. suff. *-eæ.*]

Bot.: A tribe of operculate apocarpous mosses of gregarious or cæspitose habit with much branched stems and amplexicaul leaves. Type Fissidens (q.v.).

fis'-sile, *a.* [Lat. *fissilis*, from *fissus*, pa. par. of *findo* = to cut, to cleave.] That may or can be cleft or split in the direction of the grain, like wood, or along natural planes of cleavage, as crystals, or along superinduced planes like slates, or in the planes of stratification.

"This crystal is a pellucid *fissile* stone, clear as water or crystal of the rock, and without colour: enduring red heat without losing its transparency, and in a very strong heat calcining without fusion."—*Newton: Opticks.*

fis-si-lin'-gui-a (gu as gw), *s.* [Lat. *fissus* = cleft, and *lingua* = a tongue.]

Zool.: A sub-order of Lacertilia, in which the tongue is long, protrusible, and forked, like that of the serpent. Most of the Lizards have this character. The sub-order has been called also Leptoglossa. (*Nicholson.*)

* **fis-sil'-i-ty,** *s.* [Eng. *fissil(e)*; *-ity.*] The quality or state of being fissile.

"Not unlike the *fissility*, as the schools call it, in wood."—*Boyle: Works*, iii. 521.

fi'-ssion, *s.* [Lat. *fissio*, from *fissus*, pa. pa. of *findo* = to cleave.]

1. *Ord. Lang.:* The act of cleaving, splitting, or breaking up into parts.

2. *Physiol.:* Asexual generation by the splitting of a parent body into two parts, which become separate individuals. It occurs in the Coralligenous Actinozoa. In plants it is seen in the Diatomaceæ.

fis-si-pal'-mate, *a.* [Lat. *fissus* = cleft, divided, and Eng. *palmate* (q.v.).] Having the membranes between the toes deeply cleft or incised, as in the foot of a grebe.

's-sip'-a-ra, *s. pl.* [Lat. *fissus* = cleft, and *pario* = to bring forth, to produce.]

Zool.: Animals which are propagated by Fission (q.v.).

fis-sip-ar-ism, *s.* [Mod. Lat *Fissipar(a)*; Eng. suff. *-ism.*]

Physiol.: Reproduction by fission. [Fission, 2.]

fis-si-par'-i-ty, *s.* [Mod. Lat. *Fissipar(a)*; Eng. suff. *-ity.*]

Physiol.: The same as Fissiparism (q.v.).

fis-sip'-a-rous, *a.* [Lat. *fissus* = cleft; *pario* = to bring forth, to produce, and Eng. adj. suff. *-ous.*]

Physiol.: Producing fresh structures by the fission of those already existing. [Fission.]

fis-sip'-a-rous-ly, *adv.* [Eng. *fissiparous*; *-ly.*]

Physiol.: In a fissiparous manner; by means of fission.

fis-si-pa'-tion, *s.* [Fissipara.]

Physiol.: Reproduction by fission; fissiparism.

fis'-si-ped, * **fis'-si-pede,** *a.* & *s.* [Lat. *fissus* = cleft, and *pes* (genit. *pedis*) = a foot.]

A. *As adj.:* Having separate toes; cloven-footed.

B. *As subst.:* An animal having the toes separate, or not connected by a membrane.

"It is described like *fissipedes*, or birds which have their claws or feet divided."—*Browne: Vulgar Errours*, bk. v., ch. ii.

fis'-si-pe-di-a, *s. pl.* [Lat. *fissus* = cloven, and *pes* (genit. *pedis*) = a foot.]

Zool.: A division of Carnivorous Mammals, in which the toes are free from each other. Example, the Felidæ, Canidæ, Ursidæ, &c.

fis-si-pen'-næ, *s. pl.* [Lat. *fissus* = cleft, and *penna* = a wing.]

Entom.: A small section of Moths which have the wings divided into ray-like branches, so fringed as to resemble feathers. They are called in consequence Plume-moths (q.v.). The Pterophorina and Alucitina have this structure beautifully apparent. [Alucita, Alucitidæ.]

fis-si-ros'-tral, *a.* [Lat. *fissus* = cleft; *rostrum* = a beak, and Eng. adj. suff. *-al.*] Pertaining or belonging to the Fissirostres; having the bill deeply cleft.

"The *fissirostral* birds as a whole are particularly distinguished by having the powers of flight developed in the highest degree."—*Swainson: Birds*, ii. 150.

fis-si-ros'-tres, *s. pl.* [Lat. *fissus* = cleft, and *rostrum* = a beak.]

Ornith.: One of the four or five tribes or sub-orders into which the Insessorial Birds have been divided. The gape of the mouth is enormously wide, so as to render it more easy for them to capture their prey, as they do, on the wing. The power of flight is developed in the highest degree, while the feet in the typical family are short and so feeble that some naturalists have removed them from the order Insessores (Perchers) and elevated them into an independent one, called by Owen Volitores. Swainson ranks under the Fissirostres the five following families:—Hirundinidæ (Swallows), Caprimulgidæ (Goat-suckers), Meropidæ (Bee-eaters), Halcyonidæ (Kingfishers), and Trogonidæ (Trogons). Now the family Cypselidæ (Swifts) is generally separated from the Hirundinidæ, in which it had been merged, and the Trogonidæ transferred to the order Scansores (Climbers).

fis'-sle, fis-sel, fis-sil, *v.i.* [A frequent. from *fuss* (q.v.).]

1. To make a slight, continued, rustling noise.

"He heard the curtains of his bed *fissil*."—*Scott: Antiquary*, ch. ix.

Anat.: Irregular gaps transversely dividing the cartilaginous tube of the ear. (*Quain.*)

(5) *Great fissure of Bichat:*

Anat.: A fissure connecting the two limbs of the Fissure of Sylvius.

fissure-needle, *s.* A spiral needle for drawing together the gaping lips of wounds. By revolution, the point is made to pierce the lips alternately, carrying its thread with it. Tiemann's needle for cleft palate is hollow throughout its length, and carries a silver wire which is left in its place when the needle is withdrawn.

fissure (pron. **fi'-shur**), *v.t.* [Fissure, *s.*] To split, to cleave, to crack; to make a fissure, cleft, or crack in.

"By a fall or blow the skull may be *fissured* or fractured."—*Wiseman: Surgery.*

fis-su-rel-la, *s.* [A dimin., from Lat. *fissura* = a fissure.]

Zool.: The typical genus of the family Fissurellidæ (q.v.). The shell is oval, conical, depressed, and perforated; hence they are called Key-hole Limpets; 132 recent species are known, and thirty fossil, the latter from Carboniferous times onward. The recent species chiefly inhabit the laminarian zone, but range to a depth of fifty fathoms. (*Woodward.*)

fis-su-rel'-li-dæ, *s. pl.* [Mod. Lat. *fissurell(a)*; Lat. fem. adj. pl. suff. *-idæ.*]

Zool.: A family of Gasteropodous Mollusca, section Holostomata. They have concave limpet-like shells, with a recurved apex, the anterior margin notched or perforated. Chief genera, Fissurella and Emarginula. (*Woodward.*)

fist (1), * **fest,** * **fust,** * **fyst,** * **fyste,** *s.* [A.S. *fyst*; cogn. with Dut. *vuist*; O. Fris. *fêst*; O. H. Ger. *faust*; Ger. *faust*; Lat. *pugnus*; Gr. πυγμή (*pugmē*).]

II. *Technically:*

1. *Music:* A kind of flute or flageolet made of reeds.

2. *Path.:* A kind of ulcer or suppurating swelling, in form like a pipe. It is narrower than a sinus, and continues further. Its seat is in the cellular membrane.

¶ (1) *Fistula in ano:*

Med.: A fissure in the cellular substance surrounding the anus, in the rectum, or in both. When there are two apertures, the one into the rectum and the other externally, the fistula is called complete: when there is no external aperture it is incomplete.

(2) *Fistula in perinæo:*

Med.: A fissure or opening in the skin of the perinæum, corresponding with one in the urethra.

fistula-lachrymalis, *s.*

Path.: Inflammation of the lachrymal sac. It is of two kinds, acute and chronic. In the former there is a red inflamed tumour about the size of a horse-bean at the inner side of the eye, with abundant discharge of tears. Suppuration ultimately takes place.

fĭs'-tu-lar, *a.* [Lat. *fistul(a)*; Eng. adj. suff. *-ar.*] Hollow like a reed or pipe.

fĭs-tu-lā'r-ĭ-ą, *s.* [Lat. *fistul(a)* = a pipe; neut. pl. adj. suff. *-aria.*]

Ichthy.: A genus of fishes, the typical one of the family Fistularidæ or Aulostomidæ. *Fistularia tabaccaria*, the Tobacco-pipe Fish, has the facial bones prolonged into a tube, with a small mouth at the extremity. It inhabits the Eastern seas.

fĭs-tu-lā'r-ĭ-dæ, *s. pl.* [Lat. *fistula* = a pipe; fem. pl. adj. suff. *-idæ.*]

Ichthy.: A family of fishes, order Acanthopteri. From the peculiarity of mouth described under Fistularia, they are popularly termed Trumpet-fishes, Bellows-fishes, Sea-snipes, &c. One, *Centriscus scolopax*, is British. By some the genus Aulostoma instead of Fistularia is made the typical genus, the family being then called Aulostomidæ.

***fĭs'-tu-lar-ў,** ***fis-tu-lar-ie,** *a.* [Eng. *fistular*; *-y.*] Hollow, as a pipe or reed.

"Gaue him the farr-heard, *fistularie* reede."

***fĭs'-tūle,** *s.* [Fr.] A fistula.

fĭs-tūl'-ĭ-dæ, *s. pl.* [Lat. *fistul(a)* = a pipe; fem. pl. adj. suff. *-idæ.*] [FISTULIDANS.]

fĭs-tūl'-ĭ-dănş, fĭs-tūl'-ĭ-dæ, *s. pl.* [Lat. *fistul(a)* = a pipe, and Eng. pl. suff. *-idans*; Lat. fem. pl. adj. suff. *-idæ.*]

Zool.: An old name for the Holothuroidea (q.v.).

fĭs'-tu-lĭ-form, *a.* [Lat. *fistula* = a pipe, and *forma* = form, shape.] Having the form of a pipe or reed; of a fistular form; being in round hollow columns, as a mineral.

fĭs-tu-lĭ'-ną, *s. pl.* [From Lat. *fistula* = a pipe.]

Bot.: A genus of Hymenomycetous Fungals. *Fistulina hepatica* is found in liver-like crimson patches on oak trees. It is about six inches high, and most conspicuous in autumn. When cut it presents the appearance of beetroot, and drips with red juice.

fĭs'-tu-lōse, *a.* [Lat. *fistul(a)*; Eng. adj. suff. *-ose.*] Formed like a fistula; fistular, containing hollow chambers.

fĭs'-tu-loŭs, *a.* [Lat. *fistul(a)*; Eng. adj. suff. *-ous*; Fr. *fistuleux.*]

1. Hollow like a pipe or reed, but closed at each end like the stems of an onion; fistular.

"The same is *fistulous* and full of filth."—*P. Holland: Plinie*, bk xxxvii., ch. viii.

2. Having the form or nature of a fistula.

"How these sinous ulcers become *fistulous*, I have shewn you."—*Wiseman: Surgery.*

***fĭst'-ў,** *a.* [FIST (1). *s.*; *-y.*] Pertaining to the fists or pugilism; fistic.

"Like to the champion in the *fisty* ring."
Byron: Don Juan, xi. 54.

fĭt, ***fyt,** ***fytt,** ***fytte,** *s.* [A.S. *fit* = (1) a song, (2) a struggle; cogn. with Icel. *fit* = a pace, a foot (in poetry), part of a poem; Sans. *pada* = a slip, a verse of a poem; *pad, pād* = a foot.] [FOOT.]

I. *Ordinary Language:*

* 1. A step.

* 2. A part of a poem; a canto.

"Shalle I now syng you a *fytt*
With my mynstrelsy."
Towneley Mysteries, p. 51.

* 3. A contest, a struggle, a combat, a fight.

"That ferful *fit* may no mon fle."
E. Eng. Poems, p. 135.

4. The attack of a disease; the invasion, paroxysm or excubation of a disease.

"Small stones and gravel collect and become very large in the kidneys, in which case a *fit* of the stone in that part is the cure."—*Sharp: Surgery.*

5. A sudden and violent attack of any disorder; a sudden attack of pain.

6. Any violent affection of the mind or body; a temporary but violent mental affection or paroxysm: as, a *fit* of madness or passion, a *fit* of melancholy. [II.]

"Unless some *fit* or frenzy do possess her."
Shakesp.: Titus Andronicus, iv. 1.

¶ *By fits and starts:* With intervals of activity and intermission; intermittently.

"Men that are habitually wicked may now and then, *by fits and starts*, feel certain motions of repentance."—*L'Estrange.*

fit-weed, fitt-weed *s.*

Bot.: *Eryngium fœtidum*, a West Indian plant, so called from its being used as a medicine in fits, hysteria, &c.

fĭt, ***fittc,** ***fyt,** ***fytte,** *a.*, *adv.* & *s.*

A. *As adjective:*

1. Becoming, suitable, proper, meet; in accordance with right, duty, or taste; appropriate.

"Hell, their *fit* habitation, fraught with fire
Unquenchable." *Milton: P. L.*, vi. 876.

2. Suitable or adapted for any purpose or object; qualified, competent.

"Men of valour, *fit* to go out for war and battle."—1 *Chronicles* vii. 11.

* 3. Appropriate, apt.

"Botch the words up *fit* to their own thoughts."
Shakesp.: Hamlet, iv. 5.

4. In a state of preparedness; prepared, ready.

"Tell Valeria,
We are *fit* to bid her welcome."
Shakesp.: Coriolanus, i. 3.

* **B.** *As adv.:* Fitly, appropriately, suitably, becomingly.

"How *fit* his garments serve me!"
Shakesp.: Cymbeline, iv. 1

C. *As substantive:*

* 1. An equal, a match.

"Other thing nis non his *fitte*."
Owl & Nightingale, 781.

2. Nice adjustment or adaptation, as of a dress to the body.

"He'd two shoes, and one shoe's a boot, and not a *fit*."
Hood: The Lost Child.

¶ (1) Crabb thus discriminates between *fit*, *apt*, and *meet*: "*Fit* is either an acquired or a natural property; *apt* . . . is a natural property; *meet* . . . is a moral quality. A house is *fit* for the accommodation of the family, according to the plan of the builder; the young mind is *apt* to receive either good or bad impressions. *Meet* is a term of rare use, except in spiritual matters or in poetry: it is *meet* to offer our prayers to the supreme disposer of all things." (*Crabb: Eng. Synon.*)

(2) For the difference between *fit* and *becoming*, see BECOMING; for that between *fit* and *expedient*, see EXPEDIENT.

fit-rod, *s.*

Shipwright.: A gauge-rod used to try the depth of a bolt-hole in order to determine the length of the bolt required.

fĭt, *v.t.* & *i.* [Icel. *fitja* = to knit together; Goth. *fetjan* = to adorn.]

A. *Transitive:*

1. To adapt to any shape; to bring into any required form; to shape, to fashion, to form.

"The carpenter marketh it out with a line; he *fitteth* it with planes."—*Isaiah* xliv. 13.

2. To accommodate a person with anything; to fit out, to suit.

"A trussmaker *fitted* the child with a pair of bodice, stiffened on the lame side."—*Wiseman: Surgery.*

3. To prepare, to make ready, to equip, to furnish with things necessary or proper as an outfit; to fit out.

"With long resounding cries they urge the train,
To *fit* the ships and launch into the main."
Pope: Homer; Iliad ii. 185, 186.

4. To qualify, to prepare: as, To *fit* a person for an office, or for any emergency.

"I am not *fitted* for it [death]."—*Shakesp.: Measure for Measure*, iv. 3.

5. To be adapted to, to suit, to be fitted or proper for, to become.

"Every true man's apparel *fits* your thief."—*Shakesp.: Measure for Measure*, iv. 2.

6. To meet, to answer.

"An answer that *fits* all questions."—*Shakesp.: All's Well That Ends Well*, ii. 2.

* 7. To be becoming or proper for.

"Where it *fits* you not to know."
Shakesp.: Winter's Tale, iv. 4.

8. To agree or accord with, to suit.

"This valley *fits* the purpose passing well."
Shakesp.: Titus Andronicus, ii. 3.

B. *Intransitive:*

1. To be adjusted or adapted to the shape intended; to match the form: as, A dress *fits* well.

2. To be proper, suitable, or becoming.

"Where hope is coldest, and despair most *fits*."
Shakesp.: All's Well that Ends Well, ii. 1.

3. To be convenient, suitable, or adapted; to suit.

"And now the happy season once more *fits*"
Shakesp.: Venus & Adonis, 327.

¶ (1) *To fit out:* To equip, to furnish with the necessary outfit, stores, armament, &c.

"The Spaniards began to *fit out* armaments."—*Macaulay: Hist. Eng.*, ch. xxiv.

(2) *To fit up:* To furnish with the things suitable or necessary, to prepare.

"He has *fitted* up his farm."—*Pope: Letter to Swift.*

¶ (1) Crabb thus discriminates between to *fit*, to *equip*, to *prepare*, and to *qualify*: "To *fit* is employed in ordinary cases: to *equip* is employed only for expeditions: a house is *fitted* up for the residence of a family; a vessel is *equipped* with everything requisite for a voyage: to *fit* is for an immediate purpose; to *prepare* is for a remote purpose. A person *fits* himself for taking orders when he is at the university, he *prepares* himself at school

before he goes to the university. To *fit* is said of everything, both in a natural and a moral sense: to *qualify* is used only in a moral sense. *Fit* is employed mostly for acquirements which are gained by labour; *qualify* for those which are gained by intellectual exertion."

(2) He thus discriminates between to *fit*, to *suit*, to *adapt*, to *accommodate*, and to *adjust*: "To *fit* is to provide oneself with the requisite qualification; to *suit* is to provide the thing with the *suitable* or agreeable qualities: we *fit* ourselves for the thing; we *suit* the thing to ourselves. To *fit*, in the intransitive sense, is said of things in general as they respect each other; *suit* is mostly of things as they respect the moral agent. In the mechanical and literal sense, things *fit* each other; and also in the moral sense, there is a manifest *fitness* in all things which we term right and just; things, whether of a corporeal or a spiritual nature, are said to *suit* the taste of a person. To *adapt* is a species of *fitting*; to *accommodate* is a species of *suiting*; both applied to the moral actions of conscious beings. *Accommodate* and *adjust* are both applied to the affairs of men which require to be kept, or put in right order; but the former implies the keeping as well as putting in order." (*Crabb: Eng. Synon.*)

fit (2), *s.* [Foot.] (*Scotch.*)

* **fitch** (1), *s.* [Vetch.]

1. *Bot.: Vicia sativa.*

"He thresseth the *fitches* cote with a flayle."—*Bible* (1551), *Isaye*, cxxviii.

2. *Scripture:*

(1) The rendering of the Hebrew word פֶּצֶת (*qetsachh*); Sept. μελάνθιον (*melanthion*) = *Nigella sativa* (the Black Poppy). Its seeds were used for spice. (Isaiah xxviii. 25–27.)

(2) The rendering of the Hebrew word כֻּסֶּמֶת (*kussemeth*); Sept. ὄλυρα (*olura*) = a kind of corn, probably the Spelt (*Triticum spelta*). (Ezek. iv. 9.) The same word *kussemeth* is translated rye in Exod. ix. 32 and Isaiah xxviii. 25, but rye is a grain of cold climates.

¶ *Bot.: Vicia Cracca* is popularly known as the Blue Tar Fitch; *Onobrychus sativa* as the Medick Fitch; *Vicia sativa* as the Wild Fitch; and *Lathyrus pratensis* as the Yellow Tar Fitch.

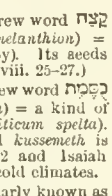
fitch (2), *s.* [Fitchet.]

Furriery: The skin of the polecat or Fitchet (q.v.).

fitch-brush, *s.* A brush or hair-pencil made of the fur of the polecat. These brushes are prized by artists, as they are elastic and firm, though soft, and can be brought to a fine point. They are black in colour.

fitch'-ée, fitched, *a.* [Fr. *fiché*, pa. par. of *ficher* = to fix, to drive in.]

Her.: Pointed, like a dagger; sharpened at the lower part. *Fitchée* is usually applied to crosses to indicate that they taper from the centre downwards, or *fitchée at the foot*, when the tapering commences only at the bottom of the cross. The arms of the See of Canterbury represent four crosses patée fitchée upon the archiepiscopal pale, which is the principal charge.



FITCHÉE.

fitch'-ĕt, fitch'-at, fitch'-ew (eu as ū), *s.* [A corrupt. of O. Fr. *fissan*, from O. Dut. *fisse* = a polecat, from O. Low Ger. **fis*; Dut. *vies* = nasty, loathsome (*Skeat*).] A polecat (q.v.).

"The *fitchat*, the fallimart, and the like creatures, live upon the face and within the bowels of the earth."—*Walton: Angler*, pt. i., ch. i.

fitch'-y (1), *a.* [Eng. *fitch* (1); *-y.*] Having fitches or vetches; vetchy.

fitch'-y (2), *a.* [Fitchee.] Pointed.

fitting-out, *s.* The act of preparing, equipping, or providing with the necessary outfit, equipment, or apparatus for any purpose or undertaking.

fitting shop, *s.*

Mech.: A workshop in which machinery is fitted up, as contradistinguished from a shop where the several parts are manufactured, as a foundry, a smithy, &c.

fitting-up, *s.*

Mech.: The act of fitting or equipping with all the necessary fittings or fixtures.

fitt'-ing-ly, *adv.* [Eng. *fitting*; *-ly.*] In a fitting, becoming, appropriate, or suitable manner; suitably, appropriately.

"Which being abstracted terms . . . do very *fittingly* agree with the notion we have put upon this symbolled earth."—*H. More: Defence of Philosophy; Cabbala*, ch. i.

fitt'-ing-ness, * **fitt-ing-nesse,** *s.* [Eng. *fitting*; *-ness.*] The quality or state of being fitting, suitable, or appropriate; suitableness, fitness.

"The *fittingnesse* of godfathers promising on behalf of the children for whom they answer."—*Bp. Taylor: Great Exemplar*, pt. i., desc. vi.

* **fit'-tle,** *a.* [A corrupt. of *fickle* (q.v.).] Silly.

"*Fittle* or runnynge witted. *Futilis*."—*Huloet.*

* **fit'-tŏn,** * **fit-ten,** *s.* [Fiction.] A fiction, a fabrication, a fable.

"Ye will take back your *fittons* unto yourself."—*Jewell: Defence*, p. 180.

* **fit'-tŏn,** * **fit-ten,** *v.i.* [Fitten, *s.*] To form lies or fictions.

"He commonly used to *fitton* and to write devises of his own head."—*North: Plutarch*, p. 1,016.

* **fit'-ty** (1), *a.* [Eng. *fit*, *s.*; *-y.*] Subject or liable to fits.

"They turned out so sickly and *fitty* that there was no rearing them anyhow."—*Nares: Thinks I to Myself*, ii. 168.

* **fit'-ty** (2), *a.* [Eng. *fit*, *a.*; *-y.*] Fit, suitable.

"Yet nothing so apt and *fitty*."—*Puttenham: Eng. Poesy*, bk. iii., ch. 9.

fitz, *pref.* [Norm. Fr. *fites, fiz*; Fr. *fils*; from Lat. *filius* = a son.] A prefix used with surnames to indicate the paternity of the holder of the title, as, *Fitz*herbert, *Fitz*gerald, *Fitz*william.

"The *Fitzes* sometimes permitted themselves to speak with scorn of the Os and Macs."—*Macaulay: Hist. Eng.*, ch. vi.

five, * **fif,** * **fife,** * **fyve,** *a.* & *s.* [A.S. *fif, fife* (the true form being *finf* or *fimf*); cogn. with Dut. *vijf*; Dan. & Sw. *fem*; Icel. *fimm*; Goth. *fimf*; O. H. Ger. *fimf, finf*; Ger. *fünf*; Welsh *pump*; Lat. *quinque*; Gr. πέμπε, πέντε (*pempe, pente*); Sans. *panchan*, all = five.]

A. *As adj.:* Amounting to one more than four; the half of ten.

B. *As substantive:*

1. The number amounting to one more than four; the number consisting of four and one added.

2. A symbol representing such number; as 5 or v.

* 3. The hand, as containing five fingers. [Fives.]

five-finger, *s.*

1. *Bot.: Potentilla reptans*; Cinquefoil.

2. *Zool.:* [Five-fingers].

Five-finger blossom:

Bot.: Potentilla reptans.

Five-finger-grass, Five-fingered-grass:

Bot.: (1) *Potentilla reptans*, (2) Oxlips. (*Britten & Holland.*)

3. *Cards:* A name given to the five of trumps. (*Slang.*)

five-mile act, s.

Law: An Act, 17 Chas. II., c. 2, passed in 1665, which forbade Nonconformist pastors who refused to take an oath of non-resistance, to come within five miles of any corporation in which they had preached since the passing of the Act of Oblivion in 1660. The Toleration Act of 1689 swept it away.

five-points, s. pl.

1. The five leading tenets of Arminianism. [ARMINIAN.]

2. The five leading tenets of Calvinism (q.v.).

five-bar, fi've-barred, a. [Eng. *five,* and *bar, barred.*] Having five bars.

"There Master Betty leaps a *five-barred* gate."
Young: On Women, sat. v.

five-cleft, a. [Eng. *five,* and *cleft.*]

Bot.: Divided deeply into five segments; quinquefid.

fi've-fĭn-gĕred, a. [Eng. *five,* and *fingered.*] Having five fingers.

Five-fingered root:

Bot.: Œnanthe crowata. (*Britten & Holland.*)

fi've-fōld, *fi-fealde, *fif-fald, *fif-falde, *fif-folde, a. & adv. [A.S. *fiffeald;* O. H. Ger. *finffalt;* Dut. *vijfvond;* Ger. *fünffalt, fünffaltig.*] [FOLD.]

A. *As adj.:* Five times as much or as great.

B. *As adv.:* To an amount or extent five times as much or as great.

fi've-lēaf, s. [Eng. *five,* and *leaf.*]

Bot.: Cinquefoil (q.v.).

fi've-lēafed, fi've-lēaved, a. [Eng. *five; leaf; -ed; leaved.*] Having five leaves.

"*Five-leaved* flowers are commonly disposed circularly about the stylus."—*Browne: Garden of Cyrus* ch. iii.

fiveleaved-grass, s.

Bot.: *Potentilla reptans.*

"As for cinque-foile or *fiveleaved-grasse,* there is not one but knoweth it."—*P. Holland: Plinie,* bk. xxv., ch. ix.

fi've-lōbed, a. [Eng. *five,* and *lobed.*] Having five lobes.

fi've-nĕrved, a. [Eng. *five,* and *nerved.*]

Bot. (*Of leaves*): Having five "nerves."

fi've-part-ĕd, a. [Eng. *five,* and *parted.*] Divided into five parts; five-cleft.

fi've-ribbed, a. [Eng. *five,* and *ribbed.*]

Bot. (*Of leaves*): Having five ribs all proceeding from the base of the leaf.

fiv'-ĕr, s. [Eng. *fiv(e); -er.*] A five-pound note. (*Slang.*)

"I'll trot him against any horse you can bring for a *fiver.*"—*Hughes: Tom Brown at Oxford,* ch. vi.

fives, s. [FIVE, a.]

I. A game at ball, in which the ball is struck against a wall. It is played either in close or in open courts, of various shapes and proportions. The game is known as hand-fives or bat-fives, according as the ball is struck by the open hand or a small wooden bat. The origin of the name is disputed.

"While the gentlemen jail-birds were playing at *fives.*" *Barham: Ingoldsby Legends; St. Medard.*

2. The fist, or hand, as having five fingers.

"Altho' as yet they have not took to use their *fives.*"—*Hook: Row at the Oxford Arms.*

3. A disease in horses, resembling the staggers, and consisting in an inflammation of the parotid glands; written also Vives.

"His horse sped with spavins, rayed with the yellows, was past cure of the *fives,* and stark spoiled with the staggers."—*Shakesp.: Taming of the Shrew,* iii. 2.

¶ *Bunch of fives:* The fist. (*Slang.*)

fives-court, s. A court where the game of fives is played.

fi've-tōothed, a. [Eng. *five,* and *toothed.*] Having five teeth.

fīve-vălved, a. [Eng. *five,* and *valved.*] Having five valves.

fix, *fixe, *fyx, a. & s. [O. Fr. *fixé* = fixed, settled, from Lat. *fixus,* pa. par. of *figo* = to fix; Sp. & Port. *fixo;* Ital. *fisso.*]

***A.** *As adj.:* Fixed, fastened.

"Certein nombre of stones *fixes.*"—*Chaucer: Astrolabe,* p. 11.

B. *As subst.:* An awkward predicament or dilemma; a difficulty.

"We were now placed in an uncommonly awkward *fix.*"—*Black: Adventures of a Phaeton,* ch. xxv.

fĭx, *fixe, *fyx, v.t. & i. [FIX, a.]

A. *Transitive:*

I. *Ordinary Language:*

1. To make fast, firm, or stable; to fasten or secure permanently and immovably.

2. To make fast, to fasten, to tie, to secure.

"An ass's nole I *fixed* on his head."
Shakesp.: Midsummer Night's Dream, iii. 2.

3. To stop or prevent from moving.

4. To establish or settle permanently and unalterably.

"*Fix* most firm thy resolution."
Shakesp.: Othello, v. 1.

5. To settle or establish; to locate: as, He *fixed* his residence in London.

"Here let me, though *fixed* in a desert, be free."
Cowper: Trans. from Guion.

6. To settle, to arrange, to appoint: as, The meeting is *fixed* for to-day.

7. To direct steadily; to fasten.

"My thoughts at present are *fixed* on Homer."—*Dryden: Prose Works,* vol. i., let. 36.

8. To deprive of volatility. [B. 3.]

"We pronounce concerning gold that it is *fixed.*"—*Locke.* (*Johnson.*)

9. To make solid, to congeal.

10. To make permanent or stable: as, To *fix* colours in dyeing [II.]

II. To prepare, to make ready, to adjust, to put in order, to arrange, to set right. (*Slang.*)

*12. To pierce, to transfix. (In this sense directly from the Latin).

"While from the raging sword he vainly flies,
A bow of steel shall *fix* his trembling thighs."
Sandys: Paraphrase of Job.

¶ In America the verb is used colloquially in a similar manner to *faire* in French; deriving its signification from the nouns with which it is employed.

II. *Phot.:* To give permanence to the picture on a negative or positive. [FIXING, 3.]

"No means were then known to make the pictures durable . . . as we now say to *fix* them."—*Vogel: Chemistry of Light & Photography,* ch. i., p. 6.

B. *Intransitive:*

***I.** To become fixed, made fast, or fastened.

"The darts of anguish *fix* not where the seat
Of sufferiug hath been thoroughly fortified."
Wordsworth: Excursion, bk. iv.

2. To rest or cease from moving or wandering; to settle down permanently.

"Your kindness banishes your fear,
Resolved to *fix* for ever here."
Waller: Somerset House, 17, 18.

*3. To become firm, so as to lose volatility.

*4. To cease to be fluid; to become hard and firm; to be congealed.

"The quicksilver will *fix* and run no more, and endure the hammer."—*Bacon: Natural History.*

5. To determine; to settle the opinion or resolution. (Followed by *on* or *upon.*)

"If we would be happy, we must *fix upon* some foundation that can never deceive us."—*L'Estrange.*

¶ (1) Crabb thus discriminates between to *fix,* to *fasten,* and to *stick:* "*Fix* is a generic term; *fasten* and *stick* are but modes of *fixing:* we *fix* whatever we make to remain in a given situation; we *fasten* if we *fix* it firmly; we *stick* when we *fix* a thing by means of *sticking.* Shelves are *fixed;* a horse is *fastened* to a gate; bills are *stuck.*"

(2) He thus discriminates between to *fix,* to *settle,* and to *establish:* "*Fix* is the general and indefinite term; to *settle* and to *establish* are to *fix* strongly. *Fix* and *settle* are applied either to material or spiritual objects; *establish* only to moral objects. To *fix* is properly the act of one; to *settle* may be the joint act of many. To *fix* and *settle* are personal acts, and the objects are mostly of a private nature; but *establish* is an indirect action, and the objects mostly of a public nature."

(3) He thus discriminates between to *fix,* to *determine,* to *settle,* and to *limit:* "These all denote the acts of conscious agents, but differ in the object and circumstances of the action. To *fix,* in distinction from the rest, is said in regard to a single point or a line; but to *determine* is always said of one or more points, or a whole: we *fix* where a thing shall begin; but we *determine* where it shall begin, and where it shall end, which way, and how far it shall go, and the like. So in morals we may *fix* the day and hour; but we *determine* the mode of doing. *Determine* is to *settle* as a means to the end; we commonly *determine* all subordinate matters, in order to *settle* a matter finally." (*Crabb: Eng. Synon.*)

***fĭx'-ă-ble,** a. [Eng. *fix; -able.*] That may or can be fixed; capable of being fixed.

"Since they cannot then stay what is transitory, let them attend to arrest that which is *fixable.*"—*Montaigne: Devoute Essayes,* pt. i., tr. ix., § 2.

fĭx-ā'-tion, s. [Fr., from Lat. *fixus,* pa. par. of *figo.*]

I. *Ordinary Language:*

1. The act of fixing, settling, or establishing.

2. The quality or state of being fixed, firm, or stable; stability, firmness, steadiness.

"Your *fixation* in matters of religion will not be more necessary for your soul's than your kingdom's peace."—*King Charles: Eikon Basilike.*

3. The act or process of ceasing to be fluid and becoming firm.

"Salt dissolved upon a *fixation* returns to its affected cubes."—*Glanvill: Scepsis Scientifica.*

4. The absence or loss of volatility.

"The transfusion of blood, the ponderation of air, the *fixation* of mercury, succeeded to that place in the public mind."—*Macaulay: Hist. Eng.,* ch. iii.

*5. Confinement, restriction.

"They are subject to errours from a narrowness of soul, a *fixation* and confinement of thought to a few objects."—*Watts.*

*6. Residence in a certain place; location.

"To light, created in the first day, God gave no proper place or *fixation.*"—*Raleigh: Hist. of the World.*

II. *Chem.* (*Of a gas*): The act of converting, or the state of being converted, into a liquid, or even into a solid.

fĭx'-ă-tĭve, s. [Lat. *fixus,* pa. par. of *figo.*] That which serves to fix or make stable or permanent, as a mordant fixes colours.

***fĭx'-ă-tūre,** s. [Lat. *fixus,* pa. par. of *figo.*] A gummy preparation for the hair; bandoline.

***fīxe,** a. [FIX, a.]

fīxed, pa. par. & a. [FIX, v.]

A. *As pa. par.* (See the verb).

B. *As adjective:*

1. Fastened or set firmly and securely; fast, firm.

2. Established, settled, determined, unalterable.

¶ For the difference between *fixed* and *firm,* see FIRM.

***fixed-air,** s.

Chem.: A name given by Dr. Black, in 1757, to carbonic acid gas (q.v.), as it was obtained from limestone.

fixed-alkalies, s. pl. Potash and soda, as distinguished from ammonia, which is a volatile alkali.

fixed-ammunition, s.

Mil.: A charge of powder and shot inclosed together in a wrapper or case, ready for loading.

fixed-axis, s. The axis about which a plane revolves in the formation of a solid.

fixed-bodies, s. pl. Bodies which bear a great heat without evaporation or volatization.

***fixed-ecliptic,** s. A certain imaginary plane which does not change its position in the heavens from the action of any portion of the solar system.

fixed-light, s. One character of light displayed from a lighthouse. Its beams are constant, and are susceptible of variation, as white or coloured, single or double.

fixed-liquids, s. pl.

Chem.: Liquids which do not rise in vapour without at the same time undergoing decomposition. [FIXED-OILS.]

fixed-oils, s. pl.

Chem.: Glycerides, which are liquid at ordinary temperatures. By the action of alkalies they yield glycerine and alkaline salts of fatty

acids. They are called fixed oils because they cannot be distilled unchanged; when distilled they yield gas, and carbon remains in the retort. Fixed-oils are inflammable, inodorous when purified, insoluble in water, on which they float, soluble in alcohol and ether. They produce a permanent greasy stain on paper. Some, when exposed to the air, become acid and rancid, owing to fatty acids being liberated. These are called non-drying oils; others absorb oxygen and dry up like varnish when exposed to the air in thin layers, and are called drying oils.

fixed points, *s. pl.*

Police: Certain places where a constable is permanently stationed so as to be at all times ready to render assistance in cases of emergency. This plan has been adopted in order that the public may know where to obtain the services of a police officer without delay.

* **fixed signs,** *s. pl.*

Astron.: A term applied by certain astronomers to the signs Taurus (♉), Leo (♌), Scorpio (♏), and Aquarius (♒); the seasons being considered as less variable when the sun is in these constellations.

fixed-star, *s.*

1. *Pyrotech.:* A composition introduced into a rocket-case and emitting fire at five holes, to represent a star. The composition is nitre, sulphur, gunpowder-meal, and antimony.

2. *Astron.* (*Pl.*): Stars which till lately were supposed absolutely to maintain their relative positions towards each other in the sky, and are still admitted to do so very nearly. They are contra-distinguished from planets or "wandering stars." The number of the fixed stars is infinitely great, especially in the part of the heavens called the Milky Way (q.v.) From a remote period of antiquity they have been grouped into constellations. [Constellation.] They shine by their own light, and probably are suns each one surrounded by planets of its own. Huggins considered that Sirius was moving away from the sun at the rate of 29$\frac{1}{10}$ miles a second. For the process of reasoning, see Prof. Stokes's Presidential Address before the British Association at Exeter in 1869. Some stars are periodic, and vary in brightness, others disappear and come again. There are double and triple stars, gravity operating on their movements. Spectroscopic observation is beginning to detect simple substances like those on the earth in some fixed stars. Thus Huggins and Miller have found that the red star Aldebaran has spectroscopic lines agreeing with those of sodium, magnesium, calcium, iron and bismuth, tellurium, and mercury, and that the brilliant white star Sirius has lines corresponding with those of sodium magnesium, hydrogen, and iron.

¶ To ascertain, so far as it is possible to do so, the distances of the "fixed stars," it is needful to take the major axis or principal diameter of the earth's orbit, as the base line. Though six months must elapse before the observation of the parallax of the star as from one extremity of the base can be followed by an observation of its parallax as witnessed from the other, yet as it is possible to calculate exactly how far the star will have moved during the six months, the two observations can be brought into comparison. In the vast majority of instances the calculated zenith distance of the star after the lapse of the six months, and its actual zenith distance, as in due time ascertained by observation, are found precisely to agree, the base line, upwards of 184 millions of miles in length, looking like a mathematical point in comparison with the infinite distance of the fixed stars. A few, however, are found to have parallax. Alpha Centauri, in the Southern hemisphere, has one of 2" [1" p. 214]. No star has so great a parallax. If the observation made be correct, then its distance from us would be only about 200 times as great as that of the sun. The parallax of the bright star of Lyra is only a quarter of a second. Struve of St. Petersburg says that stars of the second magnitude have an average parallax of $\frac{1}{4}$ of a second. But Professor Airy thinks the astronomical observer cannot accurately split a second into tenths. Besides this, refraction prevents observations being as accurate as Struve believes. To diminish the effect of parallax, observations are now made on two stars near each other in the heavens, the one with no parallax, and the other whose parallax we wish to ascertain. The angle between the two stars is noted twice, with an interval of six months between, and as both stars are similarly effected by refraction, precession, notation, and observation, no corrections for those sources of error require to be applied. The celebrated astronomer, Bessel of Konigsberg used this method for determining the distance of the small star No. 61 Cygni. He found the parallax to be $\frac{3}{10}$ of a second, and therefore estimated its distance at 660,000 times the radius of the earth's orbit, or 63,000,000,000,000, that is sixty-three billions of miles. Professor Airy thinks this calculation pretty accurate. (*Airy: Pop. Astron.* (6th ed.), 192–98). "The term 'fixed stars,'" says Professor Airy, "is a good one for young astronomers to use; but the vast majority of the stars which have been well observed, seem to have a proper motion of their own, and that is known by the term 'proper motion.'" (*Ibid.*, p. 215). It is in every case a small quantity. The largest known is that of the small star, 61 Cygni, which moves nearly 3" in a year, and that of a star called Groombridge, 1830, nearly 4" in a year. The first has very decided parallax, the second probably has it too, though to a smaller amount. Sirius and Arcturus have also a perceptible proper motion. (*Ibid.*, p. 216.)

fixed sun, *s.*

Pyrotech.: A device composed of a certain number of jets of fire distributed circularly like the spokes of a wheel. All the fuses take fire at once through channels charged with quick-matches.

fix'-ĕd-lў, *adv.* [Eng. *fixed*; *-ly.*]

* 1. In a fixed, firm, stable, or settled manner; firmly.

"If we pretend that the distinction of species, or sorts, is *fixedly* established by the real and secret constitutions of things."—*Locke.*

2. Steadfastly, firmly.

"[He] *fixedly* did look
Upon the muddy water, which he conned."
Wordsworth: Resolution & Independence.

* **fix'-ĕd-nĕss,** * **fix-ed-nesse,** *s.* [Eng. *fixed*; *-ness.*]

1. The quality or state of being fixed, determined, or settled; stability, firmness.

"The *fixednesse* of his terme."—*Bp. Hall: Contemp.; Hezekiah & Sennacherib.*

2. Solidity, firmness, cohesion of parts.

"The chemist knows the peculiar *fixedness* and malleability of the metal most of all."—*Goldsmith: On Polite Learning.*

3. Want or absence of volatility.

4. A state of being fixed, firm, or settled firmly in mind or opinion; steadfastness, firmness, resolution.

"A *fixedness* in religion will not give my conscience leave to consent to innovations."—*King Charles: Eikon Basilike.*

* **fix-id'-i-tў,** *s.* [Eng. *fixed*; *-ity.*] The quality or state of being fixed; fixedness.

"So much do the *fixidity* and volatility of bodies depend upon texture."—*Boyle: Works*, viii. 78.

fix'-ĭng, *pr. par., a., & s.* [Fix, *v.*]

A. & **B.** *As pr. par. & particip. adj.:* (See the verb).

C. *As substantive:*

1. *Ordinary Language:*

1. The act or process of making fixed, firm, stable, settled, or established; consolidation, settlement, establishment.

2. (*Pl.*): Equipment, apparatus, outfit, embellishments. (*Slang; orig. American.*)

II. *Technically:*

1. *Mach.:* A piece of cast-iron adapted to carry pillow-blocks and the like. When it is built into a wall it is called a wall-fixing, or wall-box; when attached to a wall by bolts it is a plate-fixing. There are also beam-fixings, as when wheels intended to work at the position where the fixing is situated; and when the fixing is adapted to them, it is then commonly called a wheel-fixing.

2. *Metall.:* The material used in preparing the hearth of a puddling or boiling furnace for receiving its charge. A certain amount of ore, cinder, and scrap are banked up round the boshes, the amount and kind varying with the character of the iron and the construction of the furnace. It is called fettling in some parts of England.

3. *Photog.:* Of a negative; the removal, by a solution of hyposulphite of soda or cyanide of potassium, of the unaffected deposit of iodide and bromide of silver in the collodion film after exposure and development of the picture. Of a positive; the removal of the unaltered chloride of silver from the surface of the photographic paper after exposure under the negative.

fix'-ĭngş, *s. pl.* [Fixing, C. 1. 2.]

fix'-ĭ-tў, *s.* [Fr. *fixité.*]

1. Coherence of parts, fixedness; opposed to volatility.

"Whose parts are kept from fuming away, not only by their *fixity*, but also by the vast weight and density of the atmospheres incumbent upon them."—*Newton: Optics.*

2. Fixed, secure, or determinate character; security; as, *fixity* of tenure.

fix'-türe, *s.* [Eng. *fixt* (*fixed*); suff. *-ure.*]

I. *Ordinary Language:*

1. *Literally:*

(1) The act of fixing, setting, or placing firmly.

"The firm *fixture* of thy foot would give an excellent motion to thy gait."—*Shakesp: Merry Wives*, iii. 2.

(2) Firmness, stability, stable state. (*Shakesp. Troilus & Cressida*, i. 3. [Folio.])

(3) Anything fixed or placed in a firm and fixed position; all clenched and riveted parts of a building.

2. *Fig.:* A person who has remained so long in one place, or office, that it is difficult to remove him.

II. *Law:* A term applied to things of an accessory nature annexed to houses or lands, so as to become part of the realty. The annexation must be by the article being set into or united with the land, or with some substance previously connected therewith. Thus a shed built upon a frame not let into the earth, is not a fixture. Machines and other things erected for the purposes of trade are not fixtures, if they can be removed without material damage to the property. Fixtures may not be distrained upon.

* **fix'-ūre,** *s.* [Eng. *fix*; *-ure.*]

1. Stability; firmness. (*Shakesp.: Troilus & Cressida*, i. 3. [Quarto.])

2. Direction, position.

"The *fixure* of her eye has motion in it."
Shakesp.: Winter's Tale, v. 3.

fiz'-gĭg (1), *s.* [Fishgig.]

fiz'-gig (2), *s.* [Fizz, *v.*]

1. A gadding, flirting girl.

2. A kind of firework, made with damp powder, which makes a fizzing or hissing noise.

fizz, *v.i.* [Icel. *fisa*; Dan. *fise.*] [Fist (2), *s.*]

1. To make a hissing sound.

"Thou oft hast made thy fiery dart
Fizz in the hollow of his heart."
Cotton: Burlesque upon Burlesque, p. 249.

2. To fail in an attempt.

fiz'-zle, *v.i.* [A frequent. from *fizz* (q.v.).] To fizz, to hiss.

fiz'-zle, *s.* [Fizzle, *v.*] A state of making a fizzing noise.

"Smoking, and curling, and all in a *fizzle*."
Barham: Ingoldsby Legends: Auto-da-fé.

fiz'-zen-lĕss, fŭsh'-lŏn-lĕss, *a.* [Fissenless.]

fjord, *s.* [Fiord.]

flăb, *s.* [Flaps.]

Bot.: Some kind of mushroom. (*Jamieson.*) Apparently the same as Eng. Flaps (q.v.).

flăb'-bĕr-gast, *v.t.* [Prob. from *flap*, and *aghast.*] To strike with wonder and amazement; to astonish. (*Colloquial.*)

"The alderman and town-councillors were what is sometimes emphatically styled *flabbergasted*: they were speechless from bewilderment."—*Disraeli: Contarini Fleming*, bk. v., ch. iii.

flăb'-bĭ-lў, *adv.* [Eng. *flabby*; *-ly.*] In a flabby manner.

flăb'-bĭ-nĕss, *s.* [Eng. *flabby*; *-ness.*] The quality or state of being flabby.

flăb'-bў, *a.* [A variant of *flappy*, from *flap* = to hang loosely.] Soft and yielding; hanging loosely by its own weight; easily shaken or yielding to the touch.

"Animal bodies are, in a great measure, made up of soft and *flabby* substances."—*Paley: Natural Theology*, ch. ix.

* **flā'-bĕl,** * **flā'-blc,** *s.* [Lat. *flabellum* = a fan.] A fan.

"Fanne or *flable*, wherewyth wynde is made. *Ventilabrum*."—*Huloet.*

* **flą-bĕll',** *v.t.* [Lat. *flabello*, from Lat. *flabellum* = a fan.] To fan.

"It is continually *flabelled*, blown upon, and aired by the north winds."—*Urquhart: Rabelais*, bk. i., ch. xxxix.

flă-bĕl-lăr'-ĭ-ą, *s.* [Lat. *flabellum* (q.v.), and fem. sing. adj. suff. *-aria*.]

I. *Zool.:* A genus of Gorgonidæ. It was formerly made to contain the Fan-corals, now removed to the genus Rhipidogorgia.

2. *Palæobot.:* A genus believed to be of fossil palms, founded by Count Sternberg in 1823. Morris, in his British Fossils, enume-

rates two species: one *Flabellaria borassifolia*, from the coal measures of Whitehaven and Coalbrook Dale; and the other, *F. Lamanonis*, from the Upper Eocene of the Isle of Wight.

flą-bĕl'-lāte, *s.* [Lat. *flabellatus*, pa. par. of *flabello* = to fan.]

Zool., Bot., &c.: The same as flabelliform (q.v.).

flą-bĕl-lā'-tion, *s.* [Lat. *flabellum* = a fan; Eng. suff. *-ation*.]

Surg.: The act of keeping fractured limbs, and the dressings about them, cool by means of a fan or other similar contrivance.

flă-bĕl'-lĭ-form, *s.* [Lat. *flabellum* (q.v.), and *forma* = form, shape.]

I. *Zool.:* Fan-shaped. (*Owen.*)

2. *Bot.:* Fan-shaped; plaited like the rays of a fan. Example, the leaf of *Borassus flabelliformis*.

flą-bĕl'-lŭm, *s.* [Lat. = a small fan or fly-flap.]

I. *Eccles. & Ch. Hist.:*

(1) *Sing.:* An ecclesiastical fan, formed in Rome of peacocks' feathers, and, in other Obediences, of metal; anciently used to drive away flies and other insects from the chalice during the Sacred Mysteries. The ministry of the flabellum was primarily confided to the deacon, though afterwards, in the Latin Church, it might be exercised by any person who had received the tonsure. The Greeks and Armenians are the only Christians who make use of the flabellum.

(2) *Pl.:* Two fans of peacocks' feathers, borne before the Pope on solemn festivals. (*Martigny.*)

2. *Zool. & Palæont.:* A genus of Actinozoa, family Turbinolidæ. It has existed from Eocene times till now.

flăb'-ĕr-gast, *v.t.* [FLABBERGAST.]

* **flăb'-ĭlc,** *a.* [Lat. *flabilis* = airy, from *flo* = to blow.] Blown about by the wind; subject to be blown about.

flăc'-çĭd, *a.* [O. Fr. *flaccide*, from Lat. *flaccidus*, from *flaccus* = flabby, hanging loosely.]

I. *Ordinary Language:*

1. Soft and weak; flabby; drooping; hanging loosely and flabbily.

"The *flaccid*, shrunk,
And withered muscle."—*Cowper: Task*, i. 892.

* 2. Weakened, relaxed, faint.

"His wonted fervent desires to turn others to God grew *flaccid*."—*Goodwin: Works*, vol. ii., pt. iv., p. 350.

II. *Bot.:* Relaxed from want of moisture.

flăc-çĭd'-ĭ-tў, *s.* [Eng. *flaccid*; *-ity.*] The quality or state of being flaccid; flaccidness.

"There is neither fluxion nor pain, but *flaccidity* joined with insensibility."—*Wiseman: Surgery.*

flăc'-çĭd-lў, *adv.* [Eng. *flaccid*; *-ly.*] In a flaccid, loose, or flabby manner.

flăc-çĭd-nĕss, *s.* [Eng. *flaccid*; *-ness.*] The quality or state of being flaccid, flabby, or lax; want of stiffness or firmness.

* **flăck,** * **flackc,** *v.i.* [Icel. *flakka*; Sw. *flacka*; Dan. *flakke*; O. H. Ger. *flackern.*] To flutter; to palpitate; to move rapidly.

"Her herte also to *flacke* and bete." *Gower*, iii. 315.

* **flăck'-ĕr,** *v.i.* [Ger. *flackeren.*] To flutter about as a bird. [FLACKE.]

"Foles in foles *flakerande* bitwene."
Early Eng. Allit. Poems: Cleanness, 1,409.

* **flăck'-ĕt,** * **flack-at,** *s.* [O. Fr. *flasquet*, dimin. of *flasque* = a flask.] A little flask or flagon.

"An asse laden with bread, and a *flackat* of wyne."—*Bible* (1551), 1 *Samuel* xvi.

flą-côur'-tē-æ, *s. pl.* [Mod. Lat. *flacourt(ia)*, and Lat. fem. pl. adj. suff. *-eæ.*]

Bot.: A tribe of Flacourtiaceæ (q.v.). They have several styles and stigmas and succulent fruit.

flą-côur'-tĭ-ą, *s.* [Named after Etienne de Flacourt, Director of the French East India Company, who headed an expedition to Madagascar in A.D. 1648, and wrote an account of it.]

Bot.: The typical genus of the order Flacourtiaceæ. It consists of shrubs or trees. The fruits of *Flacourtia Ramontchi*, *sapida*, and *sepiaria* are eaten. The young leaves and leaves of *F. cataphracta* are astringent and stomachic, and are prescribed in parts of India for diarrhœa and general debility. (*Lindley.*)

flą-côur-tĭ-ā'-çē-æ, *s. pl.* [Mod. Lat. *flacourti(a)*, and Lat. fem. pl. adj. suff. *-aceæ.*]

Bot.: Bixads, an order of Hypogynous Exogens, alliance Violales. It consists of shrubs or small trees, with simple alternate often leathery and dotted leaves; sepals 4 to 7; petals 4 to 7; stamens, the same number, or a multiple of it; ovary roundish celled, sessile, with parietal placentæ; fruit fleshy and indehiscent or capsular, 1-celled, 4 or 5 valved. Found in the hotter parts of the world. Known species about 100. Some are bitter and astringent; others yield eatable fruits. [BIXA, FLACOURTIA.] The order is divided into four tribes, Bixeæ, Prockeæ, Flacourteæ, and Erythrospermeæ.

flăg (1), * **flagg,** *v.i. & t.* [A weakened form of *flack* or *flacke* (q.v.).]

A. *Intransitive:*

I. To hang loosely, without stiffness or tension.

"Their drowsy, slow, and *flagging* wings
Clip dead men's graves."
Shakesp.: 2 *Henry VI.*, iv. 1.

2. To grow spiritless or dejected.

"Thus reputation is a spur to wit,
And some wits *flag* through fear of losing it."
Cowper: Table Talk, 520, 521.

3. To fail; to lose strength; to droop; to sink.

"By that time the Cameronians were reduced nearly to their last flask of powder; but their spirit never *flagged*."—*Macaulay: Hist. Eng.*, ch. xiii.

4. To become or be dull, cheerless, or dispirited.

"For you the hours of labour do not *flag*."
Wordsworth: Excursion, bk. v.

5. To grow stale or uninteresting; to lose interest.

"The pleasures of the town begin to *flag* and grow languid."—*Swift.*

B. *Transitive:*

I. To let fall into feebleness; to allow to droop.

"The thousand loves that arm thy potent eye
Must drop their quivers, *flag* their wings, and die."
Prior: An Ode.

2. To enervate; to enfeeble; to exhaust.

"Nothing so *flags* the spirits . . as lutense studies."
—*Erhard: Grounds of the Cont. of the Clergy*, p. 29.

¶ Crabb thus discriminates between to *flag*, to *droop*, to *drop*, and to *languish*: "In the proper application nothing *flags* but that which can be distended and made to flutter by the wind, as the leaves of plants when they are in want of water or in a weakly condition; hence figuratively the spirits are said to *flag*: nothing is said to *droop* but that the head of which can *drop* in this manner; the snowdrop *droops*, and flowers will generally *droop* from excess of drought or heat: the spirits in the same manner are said to *droop*, which expresses more than to *flag*; the human body also *droops* when the strength fails: *languish* is a still stronger expression than *droop*, and is applicable principally to persons; some *languish* in sickness, some in prison, and some in a state of distress: to *pine* is to be in a state of wearing pain which is mostly of a mental nature; a child may *pine* when absent from all its friends, and supposing itself deserted." (*Crabb: Eng. Synon.*)

flăg (2), *v.t.* [FLAG (3), *s.*] To pave or lay with flags or flagstones.

"A white stone used for *flagging* floors."—*Woodward: On Fossils.*

* **flăg** (3), *v.t.* [FLAG (1), *s.*] To ornament, deck out, or adorn with flags.

flăg (1), *s.* [Dan. *flag*; Sw. *flagg*; Dut. *vlag*; Ger. *flagge*: from the same root as *flag* (1), v.]

I. An ensign or colours; a piece of cloth, either plain or coloured, and having certain figures, lines, or marks painted or worked on it; a banner indicating nationality, occupation, or intelligence. Flags of nationality are standards, ensigns, pennants (pendants), jacks. Flags of occupation indicate service, as war, merchant, despatch, pilot, yacht-squadron, liners, &c. Flags of intelligence are of various colours and of three shapes; square, pointed, and burgee. They are used in various combinations to transmit messages according to a printed or secret code. The standard (military or naval) is a war flag. The ensign is national. The stars and stripes, the national flag of the United States, has in the upper corner next the staff a group of stars, one for each state, white on a blue field, while the remainder of the flag is made up by thirteen stripes, alternately red and white, one for each of the thirteen original states. The flag of the American admiral has the stripes alone, and the stars are used separately as a jack. In the British navy an admiral of the fleet flies the Union flag, in which the crosses of St. George, St. Andrew, and St. Patrick are blended. Each of the countries of Europe and Asia, and the republics of America, has its national standard bearing a device usually of historical significance, and appealing to national pride.

"Never comes the trader, never floats a European *flag*." *Tennyson: Locksley Hall*, 161.

* 2. The wing or pinion of a bird.

"To renew
Her broken *flags*." *Quarles: Emblem*, iii. 1.

3. The uneven end of an uncut tuft of hair on a brush.

¶ (1) *To strike* or *lower the flag:* To pull the flag down in token of respect, surrender, or submission.

(2) *To dip the flag:* To lower it for a brief space as a salute or mark of respect.

(3) *To hang the flag half-mast high:* To raise it only halfway up the staff, as a token of mourning.

* **flag-fallen,** * **flag-falne,** *a.* Out of employment, from flags being exhibited on the roofs of play-houses when there were performances at them.

"Four or five *flag-falne* players."—*Rowley Search for Money* (1609).

flag-feather, *s.* A feather of a bird's wing next to the body.

flag-licutenant, *s.*

Naut.: An officer in immediate attendance upon an admiral, and holding a similar position in regard to him to that held by the aide-de-camp of a general. Through him all orders are communicated to the commanders of the ships under the admiral's command.

flag-officer, *s.*

Naut.: A commander of a squadron; an admiral, vice-admiral, or rear-admiral.

flag-ship, *s.*

Naut.: The ship which carries the flag officer, or commander of the squadron.

"His *flag-ship* was a little Versailles."—*Macaulay: Hist. Eng.*, ch. xiv.

flag-staff, *s.* The pole or staff on which a flag is displayed.

"Over the altar are seen the French *flag-staves* taken by the garrison in a desperate sally."—*Macaulay: Hist. Eng.*, ch. xii.

flag (2), *s.* [From Eng. *flag* = to hang loose, to bend down (*Mahn*). Skeat considers it the same word as *flag* = an ensign, and thinks that it is named from waving in the wind.]

Bot. (*Either* flag *or* flags): The genus Iris, specially (1) *Iris pseudacorus* and *I. fœtidissima*, (2) the leaves of *Typha latifolia*, (3) *Aira cæspitosa* (?). (*Britten & Holland.*)

"She took an ark of bulrushes, and laid it in the *flags* by the river's brink."—*Exodus* ii. 3.

¶ *Bot.*: The genus Gladiolus is popularly known as the Corn Flag; *Acorus calamus* as the Myrtle Flag and Sweet Flag; *Iris pseudacorus* as the Water Flag, Wild Flag, and Yellow Flag; and (in America) *Typha latifolia* as Cat-tail Flag. (*Britten & Holland*, &c.)

flag (3), *s.* [Properly a thin slice of turf or stone; Icel. *flaga* = a flag or slab of stone, from *flakna* = to split or flake off.] The same as FLAGSTONE (q.v.).

"Flagstone will not split, as slate does, being found formed into *flags*, or thin plates, which are no other than so many strata."—*Woodward: On Fossils.*

flag-broom, *s.* [Eng. *flag*, and *broom.*] A broom for sweeping flags or pavements; it is commonly made of birch-twigs.

* **flag-e-let,** *s.* [FLAGEOLET.]

fla-gel'-la, *s. pl.* [FLAGELLUM.]

* **flag-el-lant-ism,** *s.* [Eng. *flagellant*; *-ism.*] The doctrines or practices of the Flagellants. (*Kingsley.*)

Flag-el-lants, *s. pl.* [Fr. *Flagellant* (sing.), from Lat. *flagellantes*, pl. of *flagellans* = whipping, pr. par. of *flagello* = to whip; *flagellum* = a whip, a scourge.]

Ch. Hist.: A Christian sect which arose in 1260 at Perugia, called by the French Peronse, and spread throughout and beyond Italy. Its adherents, who saw a plague raging, and moreover expected the world speedily to terminate, believed that they could propitiate the Divine Being by walking in procession with only a cloth tied round them, and flagellating their bare shoulders with whips, which they carried. At first they were noted for sanctity, and made many converts even from the most abandoned classes, but doubtful characters beginning to join their ranks, they fell into disrepute, and were restrained from their processions by the civil and ecclesiastical authorities, then the sect gradually died away. The terror produced by the dreadful disease called the Black Death, which destroyed many millions of people in Europe between 1348 and 1351, produced a revival of the flagellation mania, which spread over most of Europe, and was attended by greater extravagances than before. In the reign of Edward III., a band of 120 Flagellants, male and female, made their appearance in London on a missionary enterprise. They marched in procession through the streets, singing a hymn. Then they scourged each other, trusting that the spectacle might prove contagious. But the sober-minded Englishmen could not be induced either to flagellate themselves or submit to be flagellated by others, and the strangers had to leave the country without having made even one proselyte. In 1349, Clement VII. declared the Flagellants heretics, and took steps to repress them. In 1414 an effort was made in Thuringia to revive them anew, but the burning alive of their leader, Conrad Schmidt, and ninety of his followers in part thwarted the project, though even then the extirpation of the sect was found a work of extreme difficulty.

flag-el-lar'-i-a, *s.* [Lat. *flagell(um)*, and fem. pl. adj. suff. *-aria.* In allusion to the long, flexible branches.]

Bot.: A genus of Commelynaceæ, or, according to some botanists, of Juncaceæ. The leaves of *Flagellaria indica* are said to be astringent and vulnerary. (*Lindley.*)

fla-gel-la'-ta, *s. pl.* [Lat. *flagell(a)* [FLAGELLUM], and pl. adj. suff. *-ata.*]

Zool.: An order of Infusoria furnished with flagella [FLAGELLUM, I. 2.], which are often accompanied by cilia. Both are used as organs of locomotion.

flag'-el-late, *a.* [FLAGELLATA.]

Zool.: Furnished with Flagella (q.v.)

flag'-el-late, *v.t.* [Lat. *flagellatus*, pa. par. of *flagello* = to whip, to beat; *flagellum* = a scourge.] To whip, to beat, to scourge.

flag-el-la'-tion, *s.* [Lat. *flagellatio*, from *flagellatus*, pa. par. of *flagello.*]

1. *Ord. Lang.*: The act of beating, whipping, or scourging; a scourging or flogging; the use of the whip or scourge.

"He underwent those previous pains which customarily antecede that suffering, as *flagellation* and bearing of the cross."—*Pearson: On the Creed*, art. 4.

2. *Religious*: Flagellation is said to have been practised from religious motives among the old Egyptians. It entered the Christian Church about A.D. 400. About A.D. 1056 Cardinal Peter Damian de Honestis greatly commended it. At a later period it met with the approval of Cardinal Baronius towards the close of the sixteenth century. In the thirteenth it had become the distinctive peculiarity of the sect called in consequence Flagellants (q.v.).

flag'-el-la-tor, *s.* [Lat.] One who uses flagellation; one who scourges or whips.

* **fla-gel'-le,** *s.* [Lat. *flagellum*; Ital. *flagello.*] A scourge, a whip.

"Tak this *flagelle* devoutly in thy hond."
Lydgate: Minor Poems, p. 146.

fla-gel'-li-form, *a.* [Lat. *flagelli*, genit. of *flagellum*, and *forma* = form.]

Bot.: Whip-shaped; long, taper, and supple, like the thong of a whip. Example, the stem of Vinca. The term is confined to stems and roots. (*Lindley.*)

fla-gel'-lum (Pl. **fla-gel'-la**), *s.* [Lat., = a whip, a scourge.]

I. *Zoology*:

1. *Sing.* (*flagellum*):

(1) A whip-like appendage to the legs of the Crustacea. (*Owen.*)

(2) One of the bristles described under 2. (*Nicholson.*)

(3) The whip-like appendage to the pilidium in the larva of the scolecid genus Nemertes. (*Huxley.*)

2. *Pl.* (*flagella*): Long, whip-like bristles occurring in the order of Infusoria, called in consequence Flagellata (q.v.).

II. *Botany*:

1. One of the trailing shoots of a vine. (*Lindley.*)

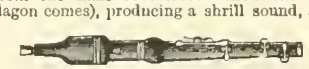
2. (*Less properly*): The runner of a strawberry or any similar plant.

* 3. (*Pl.*): The twigs or youngest shoots of branches; the ramuli, or branchlets.

flag-e-o-let, * **flag-e-let,** * **flag-el-late,** *s.* [Fr. *flageolet* = a pipe or whistle; dimin. of O. Fr. *flageol*, from a supposed Low Lat. * *flautiolus*, dimin. of *flauta* = a flute.]

Music:

1. A small pipe with a mouth-piece inserted in a bulb (hence the derivation of the name from the same root from which the word flagon comes), producing a shrill sound, similar, but much softer in quality than that produced from the flauto piccolo. It is an instrument of English invention, and was formerly employed in the orchestra. The obbligato in the song, "O, ruddier than the cherry," in Handel's *Acis and Galatea*, is for a flageolet.



FLAGEOLET.

2. The tone produced from a violin by lightly pressing the bow near the bridge upon lightly-touched strings, is called flageolet or flute tone. (*Stainer & Barret.*)

flageolet tones, *s. pl.*

Music: The natural harmonics of stringed instruments, so called from their pure flute-like quality of tone.

flā-mĕn, * **fla-mine,** *s.* [Lat.]

Rom. Antiq.: A general name for one of certain priests whose services were appropriated to one deity. There were in all fifteen, three (*Flamines Majores*) instituted by Numa, and at all times chosen from the patricians, and twelve (*Flamines Minores*) who might be taken from the Plebeians. Under ordinary circumstances they held office for life. The three *Flamines Majores* were: 1. *Flamen Dialis*, the priest of Jupiter; 2. *Flamen Martialis*, the priest of Mars, and 3. *Flamen Quirinalis*, the priest of Quirinus or Romulus. The Flamen Dialis was an important personage, and had numerous privileges. He was attended by a lictor, his house was an asylum, and he was entitled to a seat in the Senate, but was not permitted to leave the city even for a single night. He was assisted by his wife, who was termed *Flaminica*, but, as he was not allowed to marry twice, he was obliged to resign if his wife died.

"Titles of pontiffs, augurs, and *flamens* were bounty Senators, &c."—*Paley: Evidences*, pt. ii., ch. i.

B. *As adjective:*

1. Burning, blazing, emitting flames.

2. Of a bright red or yellow colour; flame-coloured.

3. Tending to inflame or excite the mind; vehement, violent.

C. *As subst.:* The act or state of burning or blazing; a flame.

"Then suddainly their *flamings* quenched are."
Mirrour for Magistrates, p. 228.

flām'-ĭng-lȳ, *adv.* [Eng. *flaming*; *-ly.*] In a flaming manner; hotly, ardently, vehemently.

"How quaint and *flamingly* amorous in the Canticles!"—*Feltham: Resolves*, pt. i., res. 20.

fla-mĭn'-gō, *s.* [Sp. & Port. *flamenco*; Fr. *flammant.* So named from its flame-like colour.]

Ornithology:

1. *Singular:*

(1) A bird, *Phœnicopterus ruber*, which has very long legs, and in other respects so much resembles one of the Grallatores (Waders), that it was long classed with them. But Swainson pointed out that its feet have the webbed toes of the duck, and the bill is a modification of a duck's bill. He, therefore,

FLAMINGO.

placed it with the Natatorial (Swimming) Birds, which it connects with the Grallatores (Waders). The plumage is rose-coloured, the wing coverts red, the quill feathers of the wings black. It is about three and a-half feet high. It occurs in the South of Europe, frequenting the sea-shore, and living on mollusca, crustacea and small fishes, for which its long neck and broad, bent bill enable it to probe in the sand.

(2) The genus Phœnicopterus, of which there are eight species, four of which are American. They are gregarious and migratory, moving in large flocks.

2. *Pl.:* The family Phœnicopteridæ, which is placed under the sub-tribe Lamellirostres, of the Natatorial Birds, its allies being the ducks, the geese, and the swans. Sometimes it is made a sub-family of Anatidæ, and is then called Phœnicopterinæ.

"Before him, like a blood-red flag,
The bright *flamingoes* flew"
Longfellow: Slave's Dream.

fla-mĭn'-ĭ-cal, *a.* [Lat. *flamen* (genit. *flaminis*).] Of or pertaining to a flamen.

"Superstitious copes and *flaminical* vestures."—*Milton: Reasons of Church Government*, bk. ii., ch. ii.

* **flăm ma-bĭl'-ĭ-tȳ,** *s.* [Eng. *flammable*; *-ity.*] The quality or state of being inflammable; inflammability.

"In the sulphur of bodies torrified, that is, the oily, fat, and unctuous parts, consist the principles of *flammability*."—*Browne: Vulgar Errours*, bk. vi., ch. xii.

* **flăm'-ma-ble,** *a.* [Lat. *flammabilis*, from *flammo* = to set on fire; *flamma* = a flame.] Capable of being set on fire or kindled into flame; inflammable.

* **flăm-mā'-tion,** *s.* [Lat. *flammatio*, from *flammatus*, pa. par. of *flammo* = set on fire.] The act of setting on fire, or kindling into flame; the state of being set on fire.

"White or crystalline arsenick, being artificial, and sublimed with salt, will not endure *flammation*."—*Browne: Vulgar Errours*, bk. iii., ch. v.

"The *flax* was boiled."—*Exodus* ix. 31.

2. The fibrous portion of the flax plant prepared for spinning by breaking, scutching, &c.

II. *Technically:*

1. *Bot., Agric., Archæol., &c.:* The English name of the genus Linum (q.v.), and especially of the common flax (q.v.).

2. *Script.:* The rendering of the Hebrew word פִּשְׁתָּה (*pishtah*), which is correctly translated flax.

"With a line of *flax* in his hand."—*Ezekiel* xl. 18.

¶ (1) *Common flax:*

(*a*) *Ord. Lang., Bot., Manufac.: Linum usitatissimum.* It is an annual plant, with alternate, linear-lanceolate leaves, ovate, acuminate, ciliate, three-nerved sepals, many flowered broad cymes, with crenulate petals. It is an escape in England. Its fibre constitutes tow, which is made into yarn, and this again is woven into linen cloth. Dr. Oswald Heer of Zurich, the eminent fossil botanist, about 1783 published a paper *On the History of Flax, and its Culture in Pre-historic Times.* He shows that it has been found among the remains of the oldest pile dwellings in the Swiss Lakes, where neither hemp nor wool has been discovered. He thinks it probable that the lake-dwellers received it from the South of Europe. He alleges that it was cultivated in Egypt about 5,000 years ago. It seems to have been so also in Bible times in Palestine (Joshua ii. 6), though linen was exported from Egypt to the adjacent lands (Ezek. xxvii. 7). For the process of the manufacture, see LINEN. Its seeds are economically valuable. [LINSEED.]

(*b*) *Pharm.:* The meal of the seed is used for poultices; the infusion is demulcent and emollient. The oil, mixed with lime-water, is applied to burns.

(2) *Fairy flax:* [FAIRY].

(3) *New Zealand flax:*

Bot.: Phormium tenax, a plant belonging to the Liliaceæ, and not to the Linaceæ. It has a very tenacious fibre.

(4) *Flax-bush, Flax-lily,* and *Flax-plant* are popular names for *Phormium tenax*, New Zealand flax. [FLAX, ¶ (3).]

(5) *Purging flax:* Dwarf Flax, Mountain Flax (*Linum catharticum*). It is a small annual plant with white flowers, found on heaths and pastures, flowering from June to September. Its leaves are purgative. *Erythræa centaurium* is also known as the Mountain Flax. (*Britten & Holland*, &c.)

(6) *Toad-flax, Yellow Toad-flax:*

Bot.: (1) *Linaria vulgaris;* (2) *Spergula arvensis.* [TOAD.]

(6) *Wild flax:*

Bot.: (1) *Linaria vulgaris;* (2) *Cuscuta Epilinum.* (*Britten & Holland*, &c.)

flax-brake, *s.*

1. A machine for removing the woody and cellular portion of flax from the fibrous. The hemp-brake is substantially similar in its construction, and identical in its purpose.

2. A machine for shortening flax staple to adapt it to be worked by a given class of machines.

flax-cotton, *s.* A substance produced by a process invented by Chevalier Claussen for cottonizing flax, to render it suitable for manufacture, the objects being to expedite the processes of separating the fibre from the cellular and glutinous matters, and then reducing the fibre to a staple which can be readily treated by machinery. The flax-straw is boiled for four hours in a solution of caustic alkali in a stone vessel, by which the extraneous matters are loosened; it is then placed for two hours in a bath slightly acidulated with sulphuric acid. It is then dried and scutched to remove the cellulose. The cottonizing is performed by steeping the fibre in a bath of dilute bicarbonate of soda, and subsequently in an acidulated liquid. The action of the acid and alkali within the flax fibre generates carbonic-acid gas, and has the effect of bursting apart the fibres, which assume a cotton-like appearance. It is then bleached and spun, either mixed or otherwise.

flax-mill, *s.* A mill or place where flax is spun; a manufactory for linen goods.

flax-plant, *s.* [FLAX, ¶ (4).]

flax-puller, *s.* A machine for pulling flax-plants in the field.

flăx'-rāiş-ẽr, *s.* [Eng. *flax*, and *raiser.*] One who raises flax.

flăx'-sēēd, *s.* [Eng. *flax*, and *seed.*]

Bot.: (1) The seed of *Linum usitatissimum*, linseed; (2) *Radiola Millegrana.*

flaxseed-mill, *s.* A mill for grinding flaxseed for the more ready abstraction of the oil, generally known as linseed oil. It is usually a coarse grist-mill, but is sometimes of a portable form and size for farm or plantation use, and adapted for other grain and seeds.

flăx'-tāil, *s.* [Eng. *flax*, and *tail.*]

Bot.: Typha latifolia, from the fruiting heads being downy like finely-combed flax. (*Britten & Holland.*)

flăx'-wēēd, *s.* [Eng. *flax*, and *weed.*]

Bot.: Linaria vulgaris. (*Britten & Holland.*)

flăx'-wŏrţ, *s. pl.* [Eng. *flax*; suff. *wort.*]

Bot.: The name given by Lindley to the order Linaceæ (q.v.).

* **flăx'-ẏ,** * **flax-ey,** *a.* [Eng. *flax; -y.*] Resembling flax; of a light or fair colour; flaxen.

"The four colours signify these four virtues. The *flaxey*, having whiteness, appertains to temperance."—*Sandys: Essays* (1634), p. 16.

1. *Lit.:* The insect described under II. 1.

* 2. *Fig.:* Anything insignificant.

"After whom is the King of Israel come out? after whom dost thou pursue? after a dead dog, after a *flea*?"—*1 Samuel* xxiv. 14.

II. *Technically:*

1. *Entom.:* A too well-known wingless insect, *Pulex irritans.* Though, as a rule, each species of *Pulex* is parasitic only upon one animal, as *Pulex canis* upon the dog, *P. talpæ* on the mole, and *P. Hirundinis* on the swallow, yet *P. penetrans* is said to be an exception, and to prey on man, the dog, and the cat. If there is no confounding of species, then the presence of a dog or cat in the house can introduce fleas. The female lays in the cracks of floors or such places, a dozen of eggs, white and a little viscous. In favourable weather they hatch in five or six days, giving exit to little footless larvæ, like small worms, first white, then reddish, which roll themselves in a circle or spiral, and move forward in a serpentine manner. In about twelve days they enclose themselves in a small silken shell, and become nymphs. After other twelve they come forth as perfect insects. The last brood of summer continues in the larval state all winter. The flea is encased in armour like a mediæval knight. It can leap thirty times its own height; it can draw with ease eighty times its own weight. A plant [FLEABANE] has been said to destroy it. This can be done more effectually by putting a piece of fur or flannel in the haunts of the insects. In this they take refuge, and can then be detected and killed.

2. *Script.:* The rendering of the Hebrew word פַּרְעֹשׁ (*parsh*); Sept. ψύλλος (*psullos*); Vulg. *pulex*, which is probably correct. The Hebrew word, according to Gesenius, is from an obsolete quadrilateral root, פרעש (*parash*) = to leap. (*Ps.* xxiv. 14, xxvi. 20.)

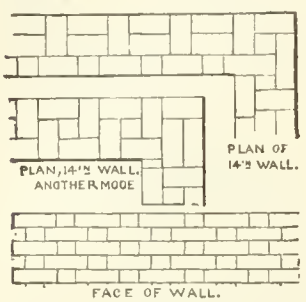
Bricklaying: A particular mode of disposing bricks in a wall, so as to tie and break joint. It consists of a header and stretcher alternately. [BOND.]



FLEMISH-BOND.

Flemish-brick, *s.* A species of brick used for paving; seventy-two will pave a square yard. They are of a yellowish colour, and harder than the ordinary bricks.

Flemish-eye, *s.*

Naut.: An eye made at the end of a rope, without splicing. The ends of the strands are tapered, passed over oppositely, marled, and sewed with spun-yarn; a made-eye, in contradistinction to a spliced-eye.

Flemish-horse, *s.*

Naut.: A foot-rope for the man at the earing in reefing. The horse extends below the yard; the Flemish horse is the outer portion.

Flemish-school, *s.*

Paint.: This school is highly recommended to the lovers of the art by the invention, or at least the first practice, of painting in oil. It has been generally attributed to John Van Eyck, in the beginning of the fifteenth century, who was, it is said, accustomed to varnish his distemper pictures with a composition of oils, which was pleasing on account of the lustre it gave them. In course of practice he came to mix his colours with oil, instead of water, which rendered them brilliant without the trouble of varnishing. From this and subsequent experiments arose the art of painting in oil. The attention of the Italian painters was soon excited. John of Bruges was the founder of painting as a profession in Flanders. The chief masters of the school were Memling, Weyden, Rubens, Vandyck, Snyders, and the younger Teniers.

flĕnçh, flense, *v.t.* [Dan. *flense;* Dut. *vlensen.*] To strip the blubber from: as, To *flense* a whale.

***flende, *flenned,** *a.* [A.S. *flēán* = to flay.] Circumcised.

B. *As adj.:* Derived from the place described under A.

Flenu-coal, *s.*

Petrol. & Comm.: A kind of Belgian coal which gives out a disagreeable smell when burnt.

***flies** (1), ***flese,** *s.* [FLEECE.]

flĕsh, *flies (2), ***fiesce, *flesch, *fleis, *fleisch, *flesche, *flessh, *flesshe, *flexs,** *s.* & *a.* [A.S. *flæsc;* O. S. *flēsk;* cogn. with Dut. *vleesch;* Dan. & Icel. *flesk* = pork, bacon; Sw. *fläsk;* Ger. *fleisch;* O. H. Ger. *fleisc.*]

A. *As substantive:*

*** I.** *Ordinary Language:*

1. *Literally:*

(1) The animal substance investing the bones and covered by the skin.

"A spirit hath not *flesh* and bones as ye see me have."—*Luke* xxiv. 39.

(2) Animal food, as distinguished from vegetable food; the meat of beasts or fowls, as distinguished from fish.

"With rosted *flesh,* and milk, and wastel brede."
Chaucer: C. T., 147. (Prol.)

(3) The body as distinguished from the soul.

"As if this *flesh,* which walls about our life,
Were brass impregnable."
Shakesp.: Richard II., iii. 2.

2. *Figuratively:*

(1) Animal nature; the human race; humanity.

"The end of all *flesh* is come before me."—*Gen.* vi. 13.

(2) Carnality; corporal appetites or desires.

"Name not religion, for thou lovest the *flesh.*"—*Shakesp.: 1 Henry VI.,* i. 1.

(3) A carnal state; worldly disposition.

"The *flesh* lusteth against the spirit, and the spirit lusteth against the *flesh.*"—*Gal.* v. 16.

(4) Human nature or feeling; tenderness.

(5) Used to denote near relationship.

"They twain shall be one *flesh.*"—*Matt.* xix. 5.

II. *Technically:*

1. *Anat.:* A popular rather than a scientific term for the soft portions of the human body, connected internally with the bony skeleton, and enclosed externally by the skin. It is sometimes used a little more specifically for those softer parts excluding the lungs, the stomach, and other organs of the body which have received distinct popular names. In this more limited sense it embodies the muscles, arteries, veins, lymphatic vessels, &c. Sometimes it is used yet more specifically for the several muscles by the alternate contraction and relaxation of which the various functions of the body, such as respiration, locomotion, &c., are performed. When blood separates into the thicker and more watery portions, the former has the same chemical composition as flesh.

2. *Bot.:* The soft parts, as of a fruit or of a succulent leaf.

3. *Theol.:* That which is carnal; that of which the motive power consists in the natural appetites or fleshly properties inherent in man, as distinguished from the grace implanted by the Spirit of God.

"For the *flesh* lusteth against the Spirit, and the Spirit against the flesh, and these are contrary the one to the other."—*Gal.* v. 17.

¶ For the works of the flesh, see Gal. v. 19-21; for the fruit of the Spirit, see verses 22, 23.

4. *Chem.:* The flesh of animals is a complex tissue, made up of striated and non-striated muscular fibre, connective tissue, nerves, blood-vessels, and lymphatics. The flesh of oxen contains 72·5 per cent. of water, 25 of muscular flesh, and 2·5 of fat; the flesh of sheep 73·6 of water, 23·4 of muscular flesh, and 3 of fat. The quantity of ash left by the muscular flesh of oxen is 0·16 per cent., composed chiefly of alkaline and calcium phosphates, with smaller quantities of chloride sulphate and carbonate of sodium. The juice of flesh is reddish and acid, and contains albumin, casein, creatine, creatinine, surcine, lactic acid, acetic acid, butyric acid, and a red pigment, &c., and alkaline chlorides and phosphates.

B. *As adj.:* Pertaining to flesh; of the nature of flesh.

¶ (1) *A heart of flesh:*

Scrip.: A heart capable of spiritual feeling and tenderness of conscience. (Ezek. xi. 19.)

(2) *After the flesh:*

Scripture:

(*a*) After the manner of man; in a gross or carnal manner.

"If ye live *after the flesh* ye shall die."—*Rom.* viii. 13.

(*b*) In worldly estimation, in the opinion held by worldly men.

"Not many wise men *after the flesh.*"—*1 Cor.* i. 26.

(3) *Flesh and blood:*

(*a*) *Ord. Lang.:* Human nature; man in his corporeal personality.

"As true we are as *flesh and blood* can be."
Shakesp.: Love's Labour's Lost, iv. 3.

(*b*) *Scripture:*

(i.) The body constituted as it now is with liability to corruption.

"*Flesh and blood* cannot inherit the kingdom of God."—*1 Cor.* xv. 50.

(ii.) Human beings; a person or persons.

"I conferred not with *flesh and blood.*"—*Gal.* i. 16, 17.

(4) *In the flesh:*

Scripture:

(*a*) *Lit.:* In the flesh of the individual when he was circumcised in the flesh of the foreskin. (Gen. xvii. 24; cf. also ver. 25.)

(*b*) *Figuratively:*

(ii.) In the body; in the present state of existence.

"Nevertheless to abide *in the flesh* is more needful for you."—*Phil.* iii. 4.

(ii.) (*Of the advent of Christ*): Actually as distinguished from figuratively, with bodily as well as spiritual presence.

"Every spirit that confesseth that Jesus Christ is come *in the flesh* is of God."—*1 John* iv. 2.

(iii.) In a carnal or unregenerate state.

"So then they that are *in the flesh* cannot please God."—*Rom.* viii. 8.

(5) *To be made flesh:*

Scrip. (Of Christ): To assume human nature, to become incarnate.

"And the Word was made *flesh* and dwelt among us."—*John* i. 14.

(6) *To be one flesh:*

Script.: To be as if they were one person instead of two; to be united in affection, interest, &c.

"And shall cleave unto his wife, and they shall be *one flesh.*"—*Gen.* ii. 24. (Cf. *Ephes.* v. 31, 32.)

flesh-animals, *s. pl.* Oken's name for Vertebrata. They were called by him also Head-animals.

*** flesh-bird,** *s.* A carrion bird.

A fleeching, *fleth'rin* dedication."
Burns: Dedication.

B. *Trans.:* To coax or wheedle by flattery or fair words.

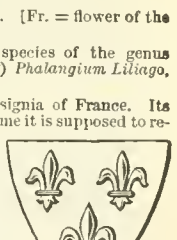
*** flē-tĭf'-ĕr-oŭs,** *a.* [Lat. *fletifer*, from *fletus* = weeping; *fero* = to bear, bring., and Eng. suff. *-ous*.] Producing or causing tears.

flĕtz, *a.* [Ger. *flötz*.] [FLOETZ.]

flēur dę lis (*s* silent), *s.* [Fr. = flower of the lily.]

1. *Bot.:* (1) Various species of the genus Iris [FLAG (2), IRIS]; (2) *Phalangium Liliago*, a liliaceous plant.

2. *Her.:* The royal insignia of France. Its origin is disputed; by some it is supposed to represent a lily, by others the iron head of some weapon. In the old time the French royal banner was *semé* of *lys*, that is, completely covered with *fleur-de-lis*; but from the time of Charles VI. it has consisted of three golden *fleur-de-lis* on a blue field. It is of frequent occurrence in English armoury. From the claims invariably put forth by English sovereigns to certain principalities in France, gained by inheritance or marriage, the French royal coat appeared as a quartering in the English royal arms; and although all such claims had long ceased to be enforced or justified, it remained until the accession of George IV., by whom it was abolished.



FLEUR DE LIS.

flēur'-oń, *s.* [Fr.]

Art: The French term for the graceful honeysuckle pattern in Greek art.

fleûr-ў, *a.* [Fr. *fleur*; Eng. adj. suff. *-y.*]

*** flĕx,** *v.t.* [Lat. *flexus*, pa. par. of *flecto* = to bend.] To bend; as, A muscle *flexes* the arm.

*** flĕx-ăn'-ĭ-mŏŭs,** *a.* [Lat. *flexanimus*, from *flecto*, pa. par. *flexus* = to bend, and *animus* = the mind.] Having power to bend or change the disposition of the mind.

"The most rhetorically, pathetically, *flexanimous* encomiums."—*Prynne: 1 Histrio-Mastix*, vi. 3.

*** flĕxed,** *a.* [Lat. *flexus*, pa. par. of *flecto* = to bend.] Bent; as, a limb in a *flexed* position.

flĕx-ĭ-bĭl-ĭ-tў, *s.* [Fr. *flexibilité*, from Lat. *flexibilis* = easily bent, flexible (q.v.).]

1. The quality or state of being flexible or admitting to be bent; pliancy; flexibleness.

"Corpuscles of the same set agree in everything, but those that are of diverse kinds differ in specific gravity, in hardness, and in *flexibility*, as in bigness and figure."—*Woodward: On Fossils.*

2. Readiness or willingness to be persuaded, or to yield to argument, persuasion, or circumstances; facility or ductility of mind or disposition.

"Godolphin had been bred a page at Whitehall, and had early acquired all the *flexibility* and the self-possession of a veteran courtier."—*Macaulay: Hist. Eng*, ch. ii.

flĕx'-ĭ-ble, *a.* [Fr. *flexible*, from Lat. *flexibilis*, from *flexus*, pa. par. of *flecto* = to bend.]

1. Possible to be bent; pliant, easily bent; not stiff or brittle.

"Supple and *flexible* as Indian cane."
Cowper: Hope, 602.

2. Willing or ready to yield to arguments, persuasion, or circumstances; pliant, tractable, facile, ductile; not obstinate or inexorable.

"Seeing him of a nature *flexible* and weak."
Daniel: Civil Wars, bk. i.

3. Manageable, tractable.

"Under whose care soever a child is put to be taught, during the tender and *flexible* years of his life, it should be one who thinks Latin and language the least part of education."—*Locke: On Education.*

4. That may be adapted or accommodated to any purpose.

"This was a principle more *flexible* to their purpose."—*Rogers.*

5. Capable of being moulded into different forms or styles; plastic: as, a *flexible* language.

¶ Crabb thus diseriminates between *flexible*, *pliable*, *pliant*, and *supple:* "*Flexible* is used in a natural or moral sense; *pliable* in the familiar and natural sense only; *pliant* in the higher and moral application only: what can be bent in any degree as a stick is *flexible*; what can be bent as wax, or folded like cloth, is *pliable*. *Supple*, whether in a proper or a figurative sense, is an excess of *pliability*; what can be bent backward and forward, like ozier twig, is supple. In the moral application, *flexible* is indefinite both in degree and application; it may be greater or less in point of degree: whereas *pliant* supposes a great degree of *pliability*; and *suppleness*, a great degree of *pliancy* or *pliability:* it applies likewise to the outward actions, to the temper, the resolution, or the principles; but *pliancy* is applied to the principles, or the conduct dependent upon those principles; *suppleness* to the outward actions and behaviour only. A good-natured man is *flexible;* a weak and thoughtless man is *pliant;* a parasite is *supple*. *Flexibility* is opposed to firmness; *pliancy* to steadiness; *suppleness* to rigidity." (*Crabb: Eng. Synon.*)

flexible-binding, *s.*

Bookbind.: A book sewn on bands raised above the back of the folded sheets, so as to allow them to open more freely. The sewing-thread passes around the bands.

flexible-collodion, *s.*

Pharm.: A mixture of 6 fluid ounces of collodion, 120 grains of Canada balsam, and a fluid drachm of castor-oil. It is a better protective covering for the skin than collodion, as it does not crack. [Collodion.]

flexible-coupling, *s.* A form of coupling used for conveying power from one shaft to another when they are not in line. It is a spiral steel band attached at its opposite ends to the two shafts to be connected. The diameter of the spiral is larger than that of the shaft, and the attachment consists of a cast-iron cap.

flexible-shafting, *s.*

Mech.: A shaft of steel so tempered as to admit of its being bent to a sharp curve, retaining, at the same time, its power of communicating motion, thus obviating the use of bevel gear, flexible couplings, or universal joints.

flexible silver-ore, *s.*

Min.: The same as Sternbergite (q.v.).

flĕx'-ĭ-ble-nĕss, *s.* [Eng. *flexible*; *-ness.*]

1. The quality of being flexible, or possible to be bent; pliancy; flexibility.

"These slender aerial bodies, by reason of their *flexibleness* and weight, would flag or curl."—*Boyle: Works*, i. 12.

2. Readiness or willingness to yield to argument, persuasion, or circumstances; pliancy, tractableness, ductility, facility.

"The *flexibleness* of the former part of a man's age, not yet grown up to be headstrong, makes it more governable."—*Locke.*

flint, *s.* [A.S. *flint* = a rock; cogn. with Dan. *flint*; Sw. *flinta*; Gr. πλίνθος (*plinthos*) = a brick.]

A. *As substantive:*

I. *Ordinary Language:*

1. *Literally:*

(1) *Gen.:* In the same sense as II.

(1) *Spec.:* A piece of the mineral described under II. 1; used before the invention of percussion caps to strike fire with steel in the lock of a musket.

2. *Fig.:* Anything extremely hard; extreme hardness.

"Throw my heart
Against the *flint* and hardness of my fault."
Shakesp.: Antony & Cleopatra, iv. 9.

II. *Technically:*

1. *Min.:* A crypto-crystalline variety of quartz. It is usually grey, smoke-brown, or brownish black. If derived, as it mostly is, from the cretaceous formation, the white of the chalk is still seen on its external surface. Lustre subvitreous; fracture conchoidal, leaving a cutting edge.

2. *Geol. & Palæont.:* Most of the flints scattered on the surface of the ground or existing in tertiary or more recent sedimentary deposits, came originally from the cretaceous rocks, one division of which is termed Upper White Chalk with flints, this being distinguished from the Lower White Chalk without flints. Next to the Maestricht beds and Faxoe limestone [Faxoe, Maestricht], the chalk with flints constitutes the highest or newest layer yet discovered of the sedimentary rocks. The flints are in interstratified layers a few inches thick, these being sometimes continuous, but more frequently in separate nodules. They recur at intervals from each other of about four feet. They are thus formed: Small plants and animals when decomposing, draw to themselves the silica of the sea [Silica], and form concretions around them of inorganic flint. The organic portion of flint pebbles consists of diatoms, seaweeds of low organization, the minute infusorial animals called polycistina, the spicules of sponges, with echinoderms, &c. They are the same as those in agate and chalk.

B. *As adj.:* Made or composed of flints, or in any way pertaining to flints.

"Rough *flint* walls are decked with shells and ores."
Scott: Epistle i.; *The Garden.*

(I) *Liquor of flints:*

2. *Fig.:* Having an exceedingly hard edge.

flint-flake, *s.*

Geol. & Archæol. (*Generally pl.*): The name given by Mr. Evans, F.R.S., to one class of flint implements made by man in the Stone Age. They are flat pieces of flint broken off artificially. The larger ones were intended apparently for knives, and the smaller ones for arrow-heads. [Flake, Flint-implements.]

"My quest" [in the Langley cutting, near West Drayton station, on the Great Western Railway] "was for relics of primæval man, and I was rewarded by finding not only several *flint-flakes*, but the butt end of a massive implement broken in palæolithic times."—*Worthington G. Smith*, in *Nature*, July 27, 1882.

flint-glass, *s.* [Flintglass.]

* **flint-heart,** * **flint-hearted,** *a.* Having an exceedingly hard or cruel heart; hard-hearted.

"Oh pity, 'gan she cry, *flint-hearted* boy."
Shakesp.: Venus & Adonis, 95.

flint-implements, *s. pl.*

Geol. & Archæol.: A generic term used for any implements of flint obtained from pleistocene or more recent deposits, each being afterwards named more specifically as its exact nature becomes understood. Mr. Evans, F.R.S., &c., divides the implements into three classes—spear-heads, oval or almond-shaped flint implements, and flint-flakes (q.v.). Such relics of early man had been found with the bones of an elephant, in 1715, in the gravel of London. Similar remains were exhumed at Hoxne, near Diss, in 1797, by Mr. John Frere, who described them in a paper read in 1801 before the Society of Antiquaries. About A.D. 1833 or 1834, the Rev. Mr. McEnery, a Roman Catholic priest, discovered similar ones in Kent's Hole, Torquay, of which he was the first scientific explorer, and Dr. Schmerling others in the Engis, the Engihoul, and other caves near Liège, in Belgium. From about A.D. 1841, M. Boucher de Perthes, of Abbeville, collected flint implements from the valley of the Somme, publishing the result in his *Antiquités Celtiques*, in 1847. He asserted the antiquity of the implements which McEnery had suspected and Schmerling maintained. No attention was paid to his views till 1858, when Dr. Falconer visited him at Abbeville, just after he had become satisfied that similar relics which he had examined in connection with the scientific exploration of Brixham Cave, in Devonshire, carried back the antiquity of man to a period when the *Hyæna spelæa*, the *Elephas primigenius*, the *Rhinoceros tichorinus*, &c., inhabited Britain. Mr. Prestwich, with Mr. John Evans, in June, 1858, and the former naturalist again with Mr. Flower, in 1859, examined the Valley of the Somme, and procured for the views of Perthes the assent of the scientific world. These discoveries of flint implements in Europe instigated research in the United States, in which great numbers of them have been found, very many being of modern Indian manufacture, others being ascribable to the Mound Builders, while some have been exhumed which are believed to be of the greatest antiquity. Many museum collections of them exist. Of the flint implements the older are simply chipped, the later have been carefully polished. The former belong to what is known as the Palæolithic or Old Stone Age, the latter to the Neolithic or New Stone Age. Their age is indicated not only by their character, but by their situation, the palæolithic implements being found under conditions which indicate a very remote period for their formation. The implements from the Somme are of the older kind, and are believed by most scientists to have been buried many thousands, if not hundreds of thousands, of years ago. Some writers believe that man began at a very early period in a more ape-like form than is found in any existing man.

flint-lock, *s.* The old-fashioned lock for fire-arms, in which the cock held a piece of flint, and came glancing down upon the steel cap of the pan which contained the priming. Flint-locks were invented early in the seventeenth century, and gradually superseded the match-lock. Pyrites or marcasite was also used.

flint-mill, *s.*

1. *Pottery:* A mill in which burnt flints, having been previously stamped to reduce them below a certain size, are ground to powder for mixing with clay to form slip for porcelain. The flint-mill is a strong circular pan ten or twelve feet in diameter, having a bottom of quartz or felspar blocks, and a runner or runners of hard siliceous stone, called chert, lime in any form being inadmissible, as it forms a flux for the other material which would vitrify in the seggars or become blistered by the escape of carbonic acid.

2. *Mining:* A mode formerly adopted for lighting mines, in which flints studded on the surface of a wheel were made to strike against a steel, and give a quick succession of sparks to light the miner at his work. Sparks will not inflame the fire-damp.

flint-rope, *s.*

Zool.: A popular name for the stem of the sponge called *Hyalonema Sieboldii.*

flint-stone, *s.* A stone composed of flint or as hard as that mineral.

"And the earth becomes as *flint-stone*."
Longfellow: Song of Hiawatha, xii.

flint-ware, *s.*

Pottery: A superior kind of earthenware into whose composition ground flint largely enters. [Porcelain.]

flint-worker, *s.*

Anthropology:

1. A term applied to those men of the palæo-

lithic period, who fashioned the flint implements found in the drift.

"Such an operation would be called into use in many operations of the old *flint-workers*."—*Wilson: Prehistoric Man*, ch. iii.

2. A man of any savage race that has not yet emerged from the Stone period and attained a knowledge of the use of metals.

"Certain classes of implements common to all the Stone periods of which we have any trace, from the palæolithic era of the drift and cave men to that of the *flint-workers* among savage tribes of our own day."—*Wilson: Prehistoric Man*, ch. iii.

flint'-glass, *s.* [Eng. *flint*, and *glass*.] A species of glass made of white sand, 52; carbonate of potash, 14; oxide of lead, 33; alumina, 1; with metallic additions to neutralize colour. Pure white sand free from oxide of iron is required for flint-glass, as iron imparts a green colour. The articles are made by the agency of the blow-pipe, or ponty, the mould and press, and frequently by a combination of blowing and pressing. The silica for its manufacture was formerly derived from pulverised flints, and hence its name. The presence of lead gives it a peculiar property of refracting light, which causes it to be used for lenses, and it forms one of the parts in achromatic compound lenses. Flintglass fuses at a lower temperature than ordinary glass, such as crown, plate, or window glass. It has also less colour, owing to the use of the alkali potash, instead of soda, the latter imparting a greenish tinge to glass. Flintglass is softer than some other varieties, and is the kind which is cut. It is much used for tumblers and other drinking-vessels, fine table-ware, and bottles, and various articles of decorative furniture and fittings.

flint'-ĭ-nĕss, *s.* [Eng. *flinty*; *-ness*.] The quality or state of being flinty: hard-heartedness, cruelty.

flint'-ў, *a.* [Eng. *flint*; *-y*.]

I. *Literally:*

Sudden his steed the leader reined."
Scott: Lady of the Lake, v. 19.

II. *Fig.:* Hard like flint; hard-hearted, cruel, inexorable, pitiless.

"The *flinty* heart and griping hand of base self-interest."—*Burke: Thoughts & Details on Scarcity.*

flinty-slate, † **flinty-rock,** *s.*

Petrol.: Siliceous schist. A hard, slaty, metamorphic rock; grey, bluish grey, or red, of dull or glimmering lustre, and translucent on the edges. It contains about 75 per cent. of silica, the remaining 25 being lime, magnesia, and oxide of iron. It is more or less translucent, and passes by insensible gradations into clay slate, with which it is often intimately connected. [Basanite, Lydian stone.]

flip, *v.t.* [An attenuated form of *flap* (q.v.).]

1. To flick.

2. To jerk, to throw with a jerk.

"Doe 'twixt their fingers *flip* their cherry stones."

I. *Ordinary Language:*

1. The act of floating or swimming.

"God tagte lle fla on water his *fleters* mugt."
Genesis & Exodus, 161.

2. The act of flowing; flux; flow.

"There is some disposition of bodies to rotation, particularly from East to West; of which kind was conceive the main *float* and reflost of the sea is, which is by consent of the universe, as part of the diurnal motion."—*Bacon: Natural History.*

3. Any thing or body designed or constructed so as to float.

* (1) A ship.

"There he made a litel cote
To him and to his *flote.*" *Havelok,* 737.

* (2) Ships collectively; a fleet.

"Hamber king and al his *flote.*" *Layamon,* i. 91.

(3) In angling, the quill or cork from which the bait line is suspended, and whose motion indicates the bite of a fish.

(4) An inflated bag or pillow to sustain a person in the water.

(5) The small piece of ivory on the surface of the mercury in the basin of a barometer.

(6) The hollow, metallic ball of a self-acting faucet, which floats upon the water in the cistern or boiler. [Ball-cock.]

(7) A raft, or collection of timber fastened together for conveyance down a river.

* 4. A wave; the sea.

"They are upon the Mediterranean *float.*"
Shakesp.: Tempest, i. 2.

* 5. A quantity of earth.

6. A sort of dray, for the conveyance of heavy goods, having the body hung below the axle.

7. A platform mounted on wheels for the display of tableaux, &c., in a street parade.

II. *Technically:*

1. *Hydr. Eng.:* One of the boards or paddles attached to the radial arms of a paddle-wheel or water-wheel.

2. *Mach.:* A single-cut file, or one in which the teeth are parallel and unbroken by a second row of crossing teeth. The usual horizontal obliquity of the teeth relatively to the central line of files is 55°, but single-cut files are much less inclined, and the teeth of floats are sometimes square across the face of the file.

3. *Plastering:* A plasterer's trowel used in spreading or floating the plaster on to a wall or other surface. The long-float is of such a length as to require two men to use it. The hand-float is that in ordinary use. The quirk-float is used in finishing mouldings. An angle-float is shaped to fit the angle formed by the walls of a room.

4. *Mason.:* A polishing-block used in marble-working; a runner.

5. *Shoe-making:* The serrated plate used by shoemakers for rasping off the ends of the pegs inside the boot or shoe.

6. *Tempering:* A contrivance for affording a copious stream of water to the heated steel surface of an object of large bulk, such as an anvil or die in the process of tempering. The rapid production of steam prevents the constant contact of cold water when the object is merely dipped, as a body of steam intervenes. The dashing stream of water constantly exposes a new body of water to the hot surface, and makes the hardening more complete.

7. *Theat.:* A stage-name for the footlights, derived from the use of a row of oil-pans, with floating wicks, along the stage-front, previous to the invention of gas.

* ¶ (1) *On* or *upon the float:* In motion; not fixed; on the move.

"Our ideas being perpetually *upon the float.*"—*Search: Light of Nature:* vol. i., pt. ii., ch. xvi.

float-board, *s.* One of the boards of an undershot water-wheel or of a paddle-wheel.

float-case, *s.*

Hydr. Eng.: A caisson to be attached to a submerged ship or other body, to float it by the expulsion of water and substitution of air in the case.

float-copper, *s.*

Min.: Fine scales of metallic copper (especially produced by abrasion in stamping), which do not readily settle in water.

float-gold, *s.*

Min.: Gold, so finely crushed, that it remains in suspension in the water, and hence is liable to be lost in the ordinary stamp-mill process.

"Compels the *float-gold* and other finely divided gold to enter into a created vortex of water."—*Daily Telegraph,* Sept. 15, 1882.

float-grass, *s.* [Flote-grass.]

float-ore, *s.*

Min.: Water-worn particles of ore; fragments of vein-material found on the surface away from the vein outcrop.

float-stone, *s.*

Min.: A variety of opal. It is of spongy texture, and it is in consequence so light that it floats on water.

float-valve, *s.* A valve actuated by a float so as to open or close the port, according to the level of the liquid in the chamber where the float is placed. It is the equivalent of a Ball-cock (q.v.).

flōat, * **flote,** * **flotie,** *v.i. & t.* [A.S. *flotian;* Dut. *vlotten;* O. H. Ger. *flozzan;* Icel. *flota.*] [Float, *s.*]

A. *Intransitive:*

1. To swim on the surface of a liquid; to rest upon the surface without sinking.

"Was graceful, when it pleased him, smooth and still
As the mute swan that *floats* down the stream."
Wordsworth: Excursion, bk. vi.

* 2. To swim in a liquid.

3. To move or glide without apparent effort, as if buoyed up in a fluid.

4. To pass or flow over, as a liquid.

"The river Atax, springing out of Pyrenæus, runneth through the lake Rubrensis, and *floteth* over it."—*P. Holland: Pliny,* bk. iii., ch. iv.

5. To remain suspended.

"The sound still *floated* near."
Scott: Lay of the Last Minstrel, i. 18.

* 6. To pass away; to be transient.

C. *As subst. :* The act of furnishing with flounces ; a flounce.

flŏun'-dĕr, * flown dur, *s.* [Sw. *flundra ;* cogn. with Dan. *flynder ;* Icel. *flyndhra ;* the name is probably derived from its floundering or flapping about.]

1. *Zool. : Platessa flesus,* a flat fish belonging to the family Pleuronectidæ. It resembles the plaice, but has paler spots : there are only small grains at the salient line of the head ; there is a rough button all along its dorsal and anal fins, and the lateral line has bristling scales. It occurs in the seas of the United States, of Europe, &c. It occurs also in the brackish water at the mouths of rivers, and even ascends to where the water is fresh. The flounder is eaten, but is much inferior in taste to the plaice. It is called also the Fluke or Flook.

"*Flounders* inhabit every part of the British sea."—*Pennant : Zoology ; The Flounder.*

2. *Boot-making :* A slicking tool whose edge is used to stretch leather for a boot-front in a blocking or crimping board

1. *Lit. :* To struggle or make violent movements with the limbs, as when stuck in mire ; to roll, toss, or tumble about.

"His steed now *floundersin* the brake ;
Now sinks his barge upon the lake."
Scott : Lady of the Lake, i. 33.

2. *Fig. :* To struggle along with difficulty, as though walking through a bog.

"He plunged for sense, but found no bottom there,
Yet wrote and *floundered* on in mere despair."
Pope : Dunciad, i. 120.

flŏur, * floure, * flowre. *s.* [The same word as *flower* (q.v.) ; Fr. *fleur ;* Sp. *flor.*]

1. The finely ground meal of wheat or other grain ; specif. the finer part of wheat meal separated by bolting.

"Then studious she prepares the choicest *flour.*"
Pope : Homer ; Odyssey ii. 426.

2. The fine soft powder of any substance : as, *flour* of emery.

flour-beetlo, *s.*

Entom. : A beetle, *Tenebrio molitor.*

flour-bolt, *s.*

Mill. : A gauze-covered revolving, cylindrical frame or reel, into which meal or chop from the stones is fed, in order to have the flour sifted through and separated from the offal. The cylinder is large and long, and its axis is usually inclined ; the bolting-cloth with which it is covered is of different grades of fineness, the meshes at the reception end being closer than towards the discharge. The matters passing through at the different portions of the length are of different grades, and are kept separate.

flour-box, *s.* A dredging or dredge-box.

flour-cooler, *s.*

Mill. : A chamber, trunk, or machine in which meal from the stones is placed to cool, or is stirred by a blast before arriving at the bolt.

flour-dredge, flour-dredger, *s.* A flour-box or dredge-box.

flour-dresser, *s.* A hollow, stationary, inclined cylinder or frame covered with wire-cloth of different degrees of fineness, 64, 60, 38, and 16 meshes to the inch, the finest being at the upper end. Within the cylinder is a reel whose rails are covered with brushes, which, in their revolution, act against the interior wire surface of the cylinder. The meal is conducted within the cylinder by a spout or hopper, and is thus rubbed through the wire meshes, the finest at the top, the next at the succeeding grade, and so on. The various qualities are collected in the separate partitions of the box.

flour-mill, *s.* A mill for grinding and sifting flour. Explosions in flour-mills are due either to the rapid combustion of finely divided flour diffused through the air, caused by a spark given off by the too close contact of the stones, or to the ignition of a mixture of air with gases produced by the decomposition of flour.

flour of mustard, *s.* The seeds of mustard, dried, powdered, and sifted.

flour-packer, *s.* A machine for compactly filling barrels or bags with flour. It is usually a follower or piston which presses upon the flour, but in some cases the flour as it falls into the barrel is continuously packed by a spiral.

flour-sifter, *s.* A domestic sieve for separating lumps or accidental impurities from the flour of the bin or barrel.

flŏur, *v.t. & i.* [FLOUR, *s.*]

"My sword, I say, old Montague is come,
And *flourishes* his blade in spite of me."
Shakesp. : Romeo & Juliet, i. 1.

* 8. To embellish or adorn with flowers of rhetoric or highly-flown language.

"The labours of Hercules, though *flourished* with such fabulous matter, yet notably set forth the consent of all nations and ages in the approbation of the extirpating and debellating monsters and tyrants."—*Bacon.* (*Johnson.*)

* 9. To colour ; to varnish or gloss over.

"To bring you thus together, 'tis no sin
Sith that the justice of your title to him
Doth *flourish* the deceit."
Shakesp. : Measure for Measure, iv. 1.

¶ Crabb thus discriminates between to *flourish,* to *thrive,* and to *prosper :* "To *flourish* expresses the state of being that which is desirable ; to *thrive* the process of becoming so. In the proper sense *flourish* and *thrive* are applied to the vegetation : the former to that which is full grown ; the latter to that which is in the act of growing : the oldest trees are said to *flourish,* which put forth their leaves and fruits in full vigour ; young trees *thrive* when they increase rapidly towards their full growth. *Flourish* and *thrive* are taken likewise in the moral sense ; *prosper* is employed only in this sense : *flourish* is said either of individuals or communities of men ; *thrive* and *prosper* only of individuals. To *flourish* is to be in full possession of the powers, physical, intellectual, and incidental ; an author *flourishes* at a certain period ; an institution *flourishes ;* literature or trade *flourishes ;* a nation *flourishes.* To *thrive* is to carry on one's concerns to the advantage of one's circumstances ; it is a term of familiar use for those who gain by positive labour : the industrious tradesman *thrives.* To *prosper* is to be already in advantageous circumstances : men *prosper* who accumulate wealth agreeably to their wishes and beyond their expectations." (*Crabb : Eng. Synon.*)

flŏur'-ĭsh, *s.* [FLOURISH, *v.*]

the organs of reproduction by seed. The earlier botanists limited it to the corolla of a

plant, but Linnæus extented it to include the calyx, corolla, stamens, and pistil. The two last are the only essential parts. This is the modern sense of the term. The manner in which its parts are arranged is called their æstivation, and the calyx, corolla, and other parts are generally believed to be transformed leaves arranged upon a branchlet; but many writers consider the petals to be transformed stamens. The arrangement of flowers upon a branch or stem is called Inflorescence (q.v.).

¶ The term Flower of Constantinople, or Flower Constantinople, is a translation of the old name *Flos constantinopolitanus*, given to the plant now called *Lychnis Chalcedonica*. It is named also Flower of Bristowe. (*Prior, in Britten & Holland.*) The Flower of the Axe is *Lobelia urens*, found in England only near Axminster in Devon; the Flower of Crete is *Mesembryanthemum Tripolium*; and Flower of Jove, *Lychnis Flos Jovis*; Flower of Four Hours, *Mirabilis dichotoma*; Flowers of Heaven, a fungal, *Nostoc cæruleum*; and Flowers of Tan, *Ethalium*, a gasteromycetous fungal. It is so called from its growing upon tan. It can creep to the distance or height of several feet, as if endowed with will.

C. *As substantive:*
1. The act or state of bearing flowers.
¶ As a rule plants flower in a ratio inverse to that of their luxuriance of growth. When a plant flowers it exhausts itself. If an annual or biennial it tends to die, if a perennial it requires some time to recover itself.
*2. The act or state of fermenting or frothing; fermentation.
"They become dull, and the drink dead, which ought to have a little *flowring*."—*Bacon: Natural Hist.*, § 312.

flowering-ash, *s.*
Bot.: The genus Ornus. The European species is *Ornus europæa*.

flowering-fern, flowery-fern, *s.*
Bot.: Osmunda regalis, formerly called *Filix florida* or *F. florescens*.

flowering-flags, *s. pl.*
Bot.: A name for the Iridaceæ

flowering-plants, *s. pl.*
Bot.: Plants bearing flowers of the normal type—viz., having a calyx, a corolla, stamens, and one or more pistils, or at least the last two; phanerogamous plants, sexual plants. The assemblage contains the Rhizogens, Endogens, Dictyogens, Gymnogens, and Exogens.

flowering-rush, *s.*
Bot.: Butomus umbellatus.

flŏw'-ĕr-lĕss, *a.* [Eng. *flower; -less.*]
Ord. Lang. & Bot.: Destitute of or without flowers.
"An herbe he thought *floureleze*, all greene."
Chaucer: Dream, 1,862.

flowerless-plants, *s. pl.*
Bot.: Plants of comparatively low organization not possessing flowers but only fructification; cryptogamic plants, asexual plants. The assemblage contains the Thallogens and Aerogens (q.v.).

flŏw'-ĕr-lĕss-nĕss, *s.* [Eng. *flowerless; -ness.*] The quality or state of being flowerless, or without flowers.

2. *Steam-eng.:* A pipe for the conveyance of the caloric current through a boiler, to heat the surrounding water. It is usually secured in the sheets of the fire-box and smoke-box respectively, as in the locomotive.

flue-boiler, *s.* A steam-boiler whose water space is traversed by flues, that is, a tube in which the heated gases are conveyed. There are several varieties, as drop-flue, multiple-flue, return-flue, &c.

flue-brush, *s.* A cylindrical brush of wire or steel strips used to clean the scale and soot from the interior of a flue, to lay bare the metallic surface.

flue-cleaner, *s.*

1. A brush of wire or steel slips, or a scraper to clean the surfaces of steam-boilers.

2. A device by which a jet of steam may occasionally be projected along a boiler flue to blow out the scale of soot.

flue-hammer, *s.*

Coopering: One whose peen has a working edge, the length of which is in the plane of the sweep of the hammer. It is used in flaring one edge of each iron hoop to enable it to fit the bulge of the cask. [PEEN.]

flue-plate, *s.* A plate into which the ends of the flues are set.

flue-scraper, *s.* An implement having circular or spiral blades to scrape the soot and scale from the fire-surface of flues of steam-boilers.

flue-surface, *s.*

Steam-eng.: The area of surface of the boiler which is exposed to the action of the flame and heated gases after they have left the fire-chamber or surface. The heating-surface of a boiler is made up of the fire-surface and flue-surface.

flŭo (2), *s.* [Etym. doubtful, perhaps only a variant of *flock* (2) (q.v.).] Soft down or fur, such as may float in the air; fluff.

flŭe, *v.i.* [FLUE (1), *s.*]

Carp.: To expand or splay, as the jambs of a window.

flŭ-ĕl'-lĕn, flŭ-ĕl'-lĭn, flŭ-ĕl'-lўn, *s.* [Wel. *fluellen*, from *lysiau Llewellyn* = Llewellyn's flower; Prior derives it from Dut. *fluweelen* = downy, velvety.]

Bot.: *Veronica officinalis*, and some other species of the genus.

¶ *Linaria spuria* and *L. Elatine* are both popularly known as Female Fluellin.

flŭ'-ĕl-lītc, *s.* [Eng., &c. *fluorine; aluminium*, and suff. *-ite* (*Min.*) (q.v.).]

Min.: A transparent mineral, composed of fluorine and aluminium. It is white in colour, vitreous in lustre, and has a hardness of 3. It is found at Stennagwyn in Cornwall, but is rare. (*Dana.*)

* **flŭ'-ençe,** *s.* [Fr., from Lat. *fluens*, pr. par. of *fluo* = to flow.]

1. A stream.

"With *fluences* of sweetest water rinse."
Chapman: Homer; Iliad xvi. 224.

fŭf'-fy, *a.* [Eng. *fluff* (2); *-y.*] Like fluff; composed of fluff or light flocculent matter; fluey.

"And she seemed, in her white *fluffy* dress,
Like a bud I must stroke and caress."
Hilda among the Broken Gods (1878), 126.

* **flû-gel-măn,** *s.* [Fugleman.]

flŭg'-gĕ-a, *s.* [Named by Willdenow after John Flügge, a German cryptogamic botanist.]

Bot.: A genus of Euphorbiaceæ. The bark of *Flugea virosus* intoxicates fish. The berries of *F. leucopyrus*, an Indian, and *F. abyssinica*, an Abyssinian species, are eaten by the natives.

flŭght (*gh* guttural), *v.i.* [Flight.] To flutter, to flaunt. (*Scotch.*)

flû'-ĭd, *a.* & *s.* [Fr. *fluide*, from Lat. *fluidus* = flowing, liquid, from *fluo* = to flow; Sp. & Ital. *fluido.*]

A. *As adj.:* Having the parts easily separable; consisting of particles which move and change their relative positions very readily; capable of flowing; liquid, gaseous.

"The earth being a mixed mass, somewhat *fluid*."—*Paley: Natural Theology*, ch. xxii.

B. *As substantive:*

I. *Ord. Lang.:* Any body not solid.

"Were it not for the presence of heat or for a certain degree of it, all *fluids* would be frozen."—*Paley: Natural Theology*, ch. xxi.

II. *Physics:* The fundamental property of fluids, viewed as forces, is their equality of pressure in all directions. The term includes both liquids and gases.

"Steam boilers or Bramah's presses, or other engines in which *fluids* are in a state of violent compression."—*Prof. Airy: Popular Astronomy* (6th ed.), p. 246.

¶ (1) *Condy's Fluid:* [Permanganate of Potash.]

(2) *Elastic fluids:*

Physics: Gases.

(3) *Electric* or *Electrical fluid:*

Elect.: A fluid composed, in the opinion of Symmer, now generally accepted, of two fluids, the positive and the negative. [Electricity.]

(4) *Imponderable fluids:*

Physics: A name sometimes given to heat, light, magnetism, and electricity. They are mobile and yet, if consisting of matter, are in such a state of tennity that they posseas no perceptible weight.

(5) *Magnetic fluids:*

Magnetism: Two fluids assumed to exist. They are called respectively the north or boreal fluid and the south or austral fluid, the former predominating at the North, and the latter at the South pole of the magnet. Sometimes the north fluid is called the Positive, and the south fluid the Negative one.

(6) *Ponderable fluids:*

Physics: Those possesaed of weight; as water and hydrogen gas.

fluid-compass, *s.*

Naut.: That in which the card revolves in its bowl floated in water or alcobol.

fluid-lens, *s.*

Optics: A lens in which a liquid is impriaoned betweea circular glass discs of the required curvatures. Attempts to obtain achromatism have been made by using metallic solutions and other liquids having a higher dispersive power than flint glass. Though several of these liquids appear to bave given excellent results experimentally, they have never been brought into general use.

fluid meter, *s.* A device to ascertain the quantity of fluid passing a selected point. Some are driven by clock-work or other motor, others by the pressure of the fluid.

flû-ĭd-ĭ-ty, *s.* [Fr. *fluidité*, from *fluide* (*a.* & *s.*) = fluid.] The state of being fluid—*i. e.*, of being either in the liquid or the gaseous state. In the former the body haa molecules so mobile in their relative positions that it will take the form of any vessel in which it is placed; in the latter the molecules are mutually repellent, and the body tends to diffuse itself in all directions through the adjacent atmosphere.

"Keeping things in a state of solution, that is to say, in a state of *fluidity*."—*Paley: Nat. Theology*, ch. xxi.

* **flû-ĭd-ize,** *v.t.* [Eng. *fluid*; *-ize.*] To make fluid; to convert into a fluid.

flû-ĭd-nĕss, *s.* [Eng. *fluid*; *-ness.*] The quality or state of being fluid: fluidity.

"Its *fluidness* may not proceed from the agitation of the ambient air."—*Boyle: Works*, ii. 571.

flû'-ĭng, *s.* [Etym. doubtful.] Expanding or splaying as the jambs of a window. (*Ogilvie*, 1st ed.)

flû'-kan, *s.* [Flucan.]

flûke (1), *s.* [A.S. *flóc*; cogn. with Icel. *flóki.*]

Ordinary Language & Zoology:

1. A flounder; a kind of flat-fish.

2. An hydatid resembling a flounder

"A little *fluke*, in general appearance much like a miniature flounder, lives steeped in gall in the biliary vessels."—*Watson: Principles & Practice of Physic*, let. lxxiii.

¶ Flukes are suctorial worms, parasitic in birds, fishes, and other animals. They are arranged in the order Trematoda (q.v.).

fluke-worm, *s.*

Zool.: An entozoon, *Distoma hepaticum*, resembling a melon seed, found in the gall bladder and ducts of the sheep and other ruminants, and tending to produce in them the disease called rot.

flûke (2), * **flook,** *s.* [A non-nasalized form, from Low Ger. *flunk* = a wing, the palm of an anchor; Dan. *ankerfliig*; Sw. *ankarfly* = the fluke of an anchor.]

1. *Naut.:* The palm of an anchor. The broad, holding portion which penetrates the ground. [Anchor.]

2. *Mining:* The head of a charger; an instrument used for cleansing the hole previous to blasting.

3. *Zool.:* One of the two triangular divisions of the tail of a whale; so called from their resemblance to the fluke of an anchor.

flûke (3), *s.* [Etym. doubtful.] In billiards an accidentally successful stroke; a stroke by which the player accidentally gains a score or an advantage which he did not play for: hence the word is used for any lucky chance; a piece of luck.

"It is a happy *fluke*."—*Black: Princess of Thule*, ch. xix.

flûke (4), *s.* [See def.] A kind of potato, probably so called from its shape. [Fluke, (1).]

flûk'-y (1), * **flook-y,** *a.* [Eng. *fluk(e)* (2); *-y.*] Formed like a fluke; having a fluke.

"To heave the *flooky* anchors from the sand."
Rowe: Lucan; Pharsalia ii. 1,076.

flûk'-y (2), * **fluk-ey,** *a.* [Eng. *fluke* (3) *-y.*]

1. Distinguished by flukes; of the nature of a fluke; obtained by chance rather than by skill.

2. *Naut.:* Changeable or inconstant; said of the wind.

flûme, flum, flumm, *s.* [A.S. *flum*; Icel. *flum, flómr*; M. H. Ger. *phlúm, phloum, vlúm*; Ital. *fiume*; Lat. *flumen.*]

* 1. A river.

* Quen Crist com to *flum* Jordan.
Metrical Homilies, p. 45.

2. A chute or penstock, open or covered, for the passage of water to a wheel or washer. Used with water-wheels and gold-washers of various kinds.

flume-bridge, flume-stop, *s.* A fire-bridge (q.v.).

* **flû'-mĭn-oŭs,** *a.* [Lat. *flumineus*, from *flumen* (genit. *fluminis*) = a river; *fluo* = to flow.] Pertaining to rivers; abounding in rivers; well-watered.

flŭm'-mĕr-y, * **flum-ar-y,** *s.* [Wel. *llymm, llymruwd*, from *llymriq* = raw, sharp; *llymn* = to sharpen or whet; *llym* = sharp, severe.]

1. *Lit.:* A kind of food made of flour or meal; pap.

"There was a farmer of my parish who used to sup upon wild ducks and *flummery*."—*Goldsmith: Citizen of the World*, lvii.

2. *Fig.:* Anything insipid or out of place; nonsense, humbug.

† **flump,** *v.t.* [Onomatopœtic; cf. *plump.*] To put or set down with violence.

"Chairs were *flumped* down on the floor."—*Thackeray: Paris Sketch-book*, ch. v.

flŭm'-mŏx, flŭm-mŭx, *v.t.* [Etym. doubtful.] To puzzle, to embarrass, to hinder, to defeat.

"He'll be what the Italians call regularly *flummoxed*."—*Dickens: Pickwick*, ch. xxxiii.

flŭng, *pret.* & *pa. par. of v.* [Fling, *v.*]

flŭnk, *s.* [Etym. doubtful.]

1. A lazy, lounging fellow.

2. A failure in or backing out of any undertaking.

flŭnk, *v.i.* [Flunk, *s.*] To fail, aa in a lesson; to retire through fear; to back out. (*Amer.*)

flŭn'-key, flŭn'-ky, *s.* [According to Skeat the origin is clearly due to Fr *flanquer* = to flank; hence it is equivalent to *flanker* (q.v.)]

1. A male servant in livery, as a footman.

2. A mean-spirited, cringing fellow; a toady.

3. One who from inexperience is easily deceived in buying stocks or shares; an inexperienced jobber. (*Amer.*)

flŭn'-key-dŏm, flŭn'-ky-dŏm, *s.* [Eng. *flunkey*; *-dom.*]

1. Flunkeys collectively.

2. The position or condition of flunkeys; the domain or circle of flunkeys.

"You've been off and on lately between *flunkeydom* and the cause."—*C. Kingsley: Alton Locke*, ch. xxvii

flŭn'-key-ĭsm, flun'-ky-ĭsm, *s.* [Eng. *flunkey*; *-ism.*] The quality of characteristics of a flunkey; cringing servility, toadyism.

flû-ō-, *pref.* [Abbrev. of Eng., &c. *fluorine.*] Having fluorine in its composition.

flû-ō-bor'-āte, *s.* [Pref. *fluo-*, and Eng., &c. *borate* (q.v.).]

Chem.: A compound of Fluoboric acid (q.v.), with a base.

flû-ō-bor'-ĭc, *a.* [Pref. *fluo-*, and Eng. *boric* (q.v.).]

fluoboric-acid, *s.*

Chem.: A compound of boric acid with hydrofluoric acid. $H_4BO_2F_3$ or HBO_2+3HF. Obtained by saturating water with boron fluoride BF_3; the end of the tube conveying the gas being placed under mercury, and cooled with ice, and then distilling, when an oily fluid comes over, which chars organic substances, and converts ethyl alcohol into ethyl ether. The potassium salt can be obtained by melting boric acid with potassium fluoride, and the sodium salt by crystallizing a mixture of sodium borate with sodium fluoride.

flû-ŏç'-ĕr-īne, *s.* [Pref. *fluo-*, and Eng., &c. *cerine* (q.v.).]

Min.: A yellow, reddish-yellow, or brownish yellow mineral, supposed to be distinct from fluocerite, to which it is akin. Compos.: cerium 17·6; fluorine 10·9; sesquioxide of cerium 66·4; water 4 = 100. Found with Fluocerite at Finbo, near Fahlun, in Sweden. (*Dana.*)

flû-ŏç'-ĕr-ite, *s.* [Pref. *fluo-*, and Eng., &c. *cerite* (q.v.).]

Min.: A tile-red or yellow translucent or opaque mineral, occurring in hexagonal prisma and plates, or massive. Hardness 4 to 5; sp. gr. 4·7; compos. cerium and fluorine. Found near Fahlun, in Sweden. The *Brit. Mus. Cat* unites Fluocerine and Fluocerite.

flû'-ō-chlōre, *s.* [Pref. *fluo-*, and Gr. χλωρος (*chlōros*) = pale green.]

Min.: The same as Pyrochlore (q.v.).

flû-ō-chrōm'-ĭc, *a.* [Pref. *fluo*, and Eng *chromic* (q.v.).] See the compound.

fluochromic-acid, *s.*

Chem.: The potassium salt of fluochromic acid is obtained by heating powdered potassium dichromate $K_2Cr_2O_7$ with excess of con-

centrated hydrofluoric acid in a platinum dish. It forms red octohedra, having the formula $CrO_2F{\cdot}OK$.

flū-ō-phŏs'-phāte, *s.* [Pref. *fluo,* and Eng., &c. *phosphate* (q.v.).]

Chem.: A compound containing a phosphate and a fluoride, as Apatite, which is phosphate of calcium, containing also fluoride of calcium.

flū'-or, *s.* [Lat. = a flowing, a flow (in *Med.* a flux).]

* **I.** *Ord. Lang.:* A fluid state.

"The particles of fluids, which do not cohere too strongly, and are of such a smallness as renders them most susceptible of those agitations which keep liquors in a *fluor*, are most easily separated and rarified into vapours."—*Newton: Opticks.*

II. *Technically:*

1. *Med.:* Menstrual discharge. [FLUOR ALBUS.]

2. *Min.:* The same as FLUORITE (q.v.).

* **fluor-albus,** *s.*

Pathol.: An old name for the disease called Leucorrhœa (q.v.).

fluor-apatite, *s.*

Min.: A variety of apatite containing an abnormally large amount of fluorine. The *Brit. Mus. Catal.* makes it the same as Francolite (q.v.).

fluor-spar, *s.*

Min.: The same as FLUORITE (q.v.).

flū-or-ăn'-thēne, *s.* [Eng. *fluor(ene),* and *(phen)anthene* (q.v.).]

Chem.: $C_{15}H_{10}$. An aromatic hydrocarbon which occurs in the last portion of the solid hydrocarbon distillate from coal tar along with Pyrene, $C_{16}H_{10}$, and Chrysene, $C_{18}H_{12}$. They can be separated by converting them into picrate compounds, by melting them and gradually adding picric acid, or by dissolving them in alcohol. Chrysene is only slightly soluble, and mixing the solution with an alcoholic solution of picric acid, $C_6H_2(NO_2)_3OH$), the fluoranthene remains in the mother liquid and allows the mixed solution to crystallize. The picrates are decomposed by ammonia. Fluoranthene crystallizes out of alcohol in needles, which melt at 109°. The compounds with picric acid, $C_{15}H_{10}{\cdot}C_6H_2(NO_2)_3{\cdot}OH$, form orange needles which melt at 182°.

flū'-or-āt-ĕd, *a.* [Eng., &c. *fluor; -ated.*]

Chem.: Combined with hydrofluoric acid (q.v.).

flū-or-bĕn'-zēne, *s.* [Eng., &c. *fluor(ine),* and *benzene* (q.v.).]

Chem.: C_6H_5F. Obtained by heating calcium fluobenzoate with 4·3 parts of calcium hydrate. It melts at 40°, and boils at 180°. It is insoluble in water, but soluble in alcohol and in ether.

flū-or-bĕn-zō'-ĭc, *s.* [Eng. *fluor(ine),* and *benzoic* (q.v.).] See the compound.

fluorbenzoic-acid, *s.*

Chem.: $C_6H_4F{\cdot}CO{\cdot}OH$-(1—3). Obtained by warming diazoamido-benzoic acid with fuming hydrofluoric acid. It crystallizes out of hot water in rhombic prisms which melt at 182°. It can be distilled over with steam. It is slightly soluble in cold water, easily soluble in alcohol and in ether. By long boiling with concentrated nitric acid it is converted into nitrofluorbenzoic acid. It forms crystalline salts.

flū-or-ēne, *s.* [Eng. *fluor (escence); -ene.*]

Chem.: $C_{13}H_{10}$, or $H_2C\begin{cases}C_6H_4\\|\\C_6H_4.\end{cases}$ Diphenylene methane. It occurs in the solid hydrocarbon, which distils between 300° and 305° in the distillation of coal-tar. It can be prepared by passing diphenyl-methane, $CH_2(C_6H_5)_2$, through a red-hot tube, also by heating diphenylene-ketone with zinc dust. Fluorene crystallizes from hot alcohol in colorless plates which have a faint blue fluorescence, hence its name. They melt at 113°, and boil at 295°.

flū-or-ĕs'-çençe, *s.* [Eng. *fluor; -escence.*]

Optics: A quality which exists in the rays of light by which, in certain circumstances, they undergo a change of refrangibility. Hence certain solutions which, when viewed by transmitted light, are colorless, become bluish under reflected light. Fluorescence was discovered by Prof. Stokes in 1852.

flū-or-ĕs'-çent, *a.* [Eng. *fluor; -escent.*] Having the quality of fluorescence; pertaining to fluorescence.

flū-or-ĕs'-çein, *s.* [Eng. *fluoresc(ence); -ein.*]

Chem.: Resorcinol, phthalein anhydride, $C_{20}H_{12}O_5$, or $C_6H_4\begin{cases}CO{\cdot}C_6H_3(OH)\\CO{\cdot}C_6H_3(OH)\end{cases}O$. Obtained by heating five parts of phthalic anhydride with seven parts of resorcin to 200°, till it forms a solid mass, which is boiled with water, the undissolved part washed with alcohol, then dissolved in dilute caustic soda, precipitated by dilute sulphuric acid and extracted with ether. It is crystallized from alcohol as a red powder, which is decomposed at 290°. It forms an orange solution in alcohol, which, when diluted with water, gives a green fluorescence. Its soda solution, when dilute, shows a beautiful yellow-green fluorescence. When dissolved in acetic acid, fluorescein is converted by bromine into Eosin (q.v.). By the action of zinc dust on its soda solution, it is reduced to fluorescin.

flū-or-ĕs'-çĭn, *s.* [Eng. *fluores(cence); -in.*] (*Chem.*)

Chem.: Obtained by acting on a solution of fluorescein in soda with zinc dust. On heating, the solution becomes colorless; it is then acidified and shaken with ether, which on evaporation deposits fluorescin as a colorless substance, which in an alkaline solution oxidizes fluorescein.

flū-or-hȳ'-drĭc, *a.* [Eng. *fluor(ine); hydr(ogen); -ic.*] See the compound.

fluorhydric-acid, *s.*

Chem.: Hydrofluoric acid, hydrogen fluoride, fluoride of hydrogen, hydric fluoride, HF. The anhydrous acid is obtained by neutralizing in a platinum dish the aqueous solution of hydrofluoric acid with caustic potash, and evaporating the solution. The salt, KF, crystallizes in cubes; when dissolved in water and evaporated quadratic tables of an acid, fluoride $KF{\cdot}HF$, crystallize out, these, when perfectly dry, are heated to redness in a platinum tube, and decomposed into $KFHF=KF+HF$. The anhydrous HF is an extremely dangerous substance; its vapor is very poisonous, and produces painful sores when it comes in contact with the skin. It is a colorless liquid which boils at 19·4°. If free from moisture it does not attack glass. Its vapor density is ten, that of hydrogen being one, showing that it contains one volume of fluorine and one volume of hydrogen in two volumes of hydrofluoric acid. It chars organic matter, and explodes when mixed with turpentine. It has a very great affinity for water, combining with a hissing noise. The hydrated acid is prepared by acting on fluorspar, CaF_2, with concentrated sulphuric acid in lead or platinum vessels. It is heated, and the vapor condensed by a freezing mixture, or, if required dilute, is passed into water. It dissolves most metals except platinum, gold, silver, and lead. It can be kept in gutta percha bottles. It attacks silicates and etches glass. It is detected by powdering the mineral, and placing it in a small lead dish, and adding concentrated sulphuric acid; the vessel is then covered with a plate of glass, which is coated with wax on the under side, on which letters are written by removing some of the wax. On heating the vessel the hydrofluoric acid is liberated, and attacks the glass where the wax has been removed.

flū-ŏr'-ĭc, *a* [Eng., &c. *fluor(ine),* & suff. *-ic. (Chem.)*]

Chem.: Containing more or less of fluorine, chiefly in the compound Hydrofluoric-acid.

flū'-or-īde, *s.* [Eng. *fluor(ine); -ide.*]

Chem.: A compound of fluorine with an element or radical. Fluorides give no precipitate with argentic nitrate, as argentic fluoride is soluble in water.

¶ The following are the principal *Fluorides: Fluoride of Ammonium,* NH_4F. Obtained by saturating hydrofluoric acid with ammonia, and allowing the solution to evaporate over quicklime. It forms hexagonal laminæ, and crystallizes also with one molecule of HF, forming rhombic crystals of $NH_4F{\cdot}HF$. *Fluoride of Calcium:* Fluorspar, CaF_2, occurs in the bones and teeth of animals in small quantities. *Fluoride of Boron,* BF_3, is a gas. *Fluoride of Silicon,* SiF_4, is a heavy colorless fuming gas, obtained by heating a mixture of fluorspar and sand with concentrated sulphuric acid. It is absorbed by water, forming silicofluoric acid, H_2SiF_6, and gelatinous silica is deposited; the tube should dip into mercury to prevent it being blocked up. Fluorides are decomposed by chlorine, and converted into chlorides. Soluble fluorides give a gelatinous precipitate with calcium chloride. Many double fluorides have been prepared.

flū'-or-ĭn, flū'-or-ĭne, *s.* [Eng. *fluor; -in, -ine* (*Chem.*) (q.v.).]

Chem.: Symbol F, at. wt. 19. Fluorine occurs in Fluorspar, CaF_2; in cryolite, $6NaF{\cdot}Al_2F_6$, and in topaz and apatite. It has been detected in the bones, teeth, blood, and milk. It has not been isolated. A gas was obtained by the action of iodine on silver fluoride, AgF, but it was probably an iodide of fluorine. Fluorine in a free state combines readily with silicon and metals, therefore it attacks the tube in which the experiment is performed; it decomposes water, forming hydrofluoric acid, HF. Experiments with the action of chlorine on AgF in tubes made of CaF_2, yielded HF, as the silver fluoride could not be sufficiently dried. Fluorine does not combine with oxygen.

flū'-or-īte, flū'-or, *s.* [Lat. *fluor* (q.v.), and suff. *-ite* (*Min.*) (q.v.).]

Min.: An isometric, transparent, or subtranslucent brittle mineral, having many shades of color, some specimens being white, others yellow, yet others blue or green, or more rarely red; streak white. Compos.: Fluoride of calcium—*i.e.*, fluorine, 48·7, and calcium, 51·3 = 100. Mineral phosphoresces when heated. There are two leading varieties: (1) Ordinary Fluorite—(*a*) cleavable or crystallized, (*b*) coarse to fine granular, (*c*) earthy, dull, and sometimes very soft, (*d*) chlorophane; (2) Antozonite. No. (1) includes Ratofskite (q.v.). It occurs in veins, or more rarely in beds, in metamorphic rocks, or as the gangue of metallic ores. It is found in cannel coal in Illinois and Indiana, and is abundant in England.

¶ Dana has a fluorite group of minerals, comprehending Fluorite, Yttrocerite, Fluocerite, and Fluocerine.

flū'-or-ō-īd, *s.* [Lat. *fluor,* and Gr. εἶδος (*eidos*) = form.]

Crystall.: A crystal, the superficies of which is contained by twenty-four triangles. The name Fluoride has been adopted because this form of crystal is common in fluorite.

flū-or'-ō-scōpe, *s.* A form of skiascope (q.v.) designed and so termed by Edison in March, 1896.

flū'-or-ō-tȳpe, *s.* [Eng. *fluor;* o connective, & Eng. *type.*]

Photog.: A process into which fluoric acid enters in the shape of fluorate of soda.

flū'-or-oŭs, *a.* [Lat. *fluor,* and Eng., &c. suff. *-ous.*]

Min., &c.: Containing fluorite.

flū-ō-sĭl'-ĭ-cāte, *s.* [HYDROFLUOSILICATE.]

flū-ō-sĭl-ĭç'-ĭc, *a.* [Pref. *fluo-,* and Eng. *silicic.*] [HYDROFLUOSILICIC.]

* **flŭr'-bird,** *s.* [Etym of first element doubtful, and Eng. *bird.*] A decoy-bird. (*Goldsmith.*)

flŭr'-ry, *s.* [Etym. doubtful; probably of Scandinavian origin; cf. Norw. dial. *furalt* = rough, shaggy; Sw. dial. *flur* = disordered hair, a whim; *flurig* = disordered, dissolute.]

* **1.** A sudden gust, blast, or storm of wind.

"The boat was overset by a sudden *flurry* from the north."—*Swift: Voyage to Lilliput.*

2. A sudden and violent shower.

"Like a *flurry* of snow on the whistling wind of December." *Longfellow: Miles Standish,* vii.

3. Agitation, bustle, confusion; nervous excitement.

"One is kept in perpetuall alarm and *flurry* of spirits."—*Swinburne: Travels in Spain,* let. 40.

4. (*Spec.*): When a whale which has received a fatal wound rises to the surface, spouts blood, and lashes the sea with its tail, it is said to be in its *flurry.*

flŭr'-rȳ, *v.t.* [FLURRY, *s.*] To put in agitation; to excite, to alarm.

flŭr'-rȳ, *a.* [FLEURY.]

flŭsh (1), *v.i. & t.* [Sw. dial. *flossa* = to burn furiously; Norweg. dial. *flosa* = passion, vehemence, eagerness. (*Skeat.*)]

A. *Intransitive:*

1. To become suffused; to redden up; to blush; to glow.

"The King said not a word, but his pale cheek *flushed*."—*Macaulay: Hist. Eng.*, ch. xxv.

* 2. To be elated or excited.

* 3. To become gay or splendid.

"At once, arrayed
In all the colours of the *flushing* year,
The garden glows." *Thomson: Spring*, 98-7.

B. *Transitive:*

1. To cause to become red or flushed; to redden.

"The soft hues
That stain the wild bird's wing, and *flush* the clouds."
Longfellow: The Spirit of Poetry.

2. To elate, to excite.

"Men are apt, especially when *flushed* with victory, to grow both warmer and bolder." — *Waterland: Works*, x 119.

flŭsh (2), *v.i. & t.* [Fr. *flux* = a flowing, running, a flux, a flush at cards, from Lat. *fluxus* = a flowing; *fluo* = to flow.]

A. *Intransitive:*

1. To flow swiftly, to rush.

"By the swift recourse of *flushing* blood."
Spenser: F. Q., IV. vi. 29.

2. To start with haste.

"I make 'em to *flush*,
Each owl out of his bush."
Ben Jonson: Owls.

3. To turn on a sudden rush of water for cleansing purposes.

B. *Transitive:*

1. To cause to start up or fly off: as, To *flush* a covey of birds.

"*Flushing* numbers of ptarmigan."—*Metcalfe: The Oxonian in Iceland*, p. 130.

2. To cleanse by turning on a sudden rush of water: as, To *flush* a drain.

* 3. To overwhelm by a sudden rush of water.

"A great tempestuous rage and furious storm enclosed *flushed* and drowned xii. of his great shippes."—*Hall: Henry IV.* (an. 1).

* 4. To excite.

"Such things as can only feed his pride and *flush* his ambition."—*South: Sermons*, ii. 104.

flŭsh, *a., s., & adv.* [Flush, *v.*]

A. *As adjective:*

I. *Ordinary Language:*

* 1. Fresh, glowing, vigorous.

"All his crimes broad blown, as *flush* as May."
Shakesp.: Hamlet, iii. 3.

* 2. Full of or rich with bloom or blossoms.

3. Well-supplied; abounding. (Followed by *of*.)

"You have a passion for her pin-money; no, no, country ladies are not so *flush* of it."—*Vanbrugh: Provoked Husband*, ii. 1.

* 4. Confident: flushed.

"Both appeared quite *flush* and confident of victory."
—*H. Brooke: Fool of Quality*, i. 143.

II. *Technically:*

1. *Carp.:* Having the surface unbroken or even; on the same plane or level with the adjacent surface.

2. *Cards:* In cribbage, applied to a hand consisting of cards of the same suit; holding a flush.

B. *As substantive:*

I. *Ordinary Language:*

1. A sudden flow of water.

"The pulse of the arteries is not only caused by the pulsation of the heart, driving the blood through them in manner of a wave or *flush*, but by the coats of the arteries themselves."—*Ray: On the Creation.*

2. A sudden flow or rush of blood to the face, causing a redness.

3. Any warm colouring or glow.

4. A sudden rush or impulse; a thrill or shock as of feeling.

"Success may give him a present *flush* of joy; but when the short transport is over, the apprehension of losing succeeds to the care of acquiring."—*Rogers: Sermons.*

* 5. Bloom, vigour, freshness.

"All the blooming *flush* of life is dead."
Goldsmith: Deserted Village.

6. A flock of birds suddenly started or flushed.

"Flowne at a *flush* of ducks forehy the brooke"
Spenser: F. Q., V. ii. 54.

7. Abundance.

"I thought o' the bonny bit thorn that our father rooted out o' the yard last May, when it had a' the *flush* o' blossoms on it."—*Scott: Heart of Mid-Lothian*, ch. xx.

8. A piece of moist ground; a place where water frequently lies; a morass, a bog.

II. *Cards:* In cribbage a hand consisting of cards all of the same suit.

"There was nothing silly in it [what] like the nob in cribbage—nothing superfluous. No *flushes*, that most irrational of all pleas."—*Lamb: Elia; Mrs Battle.*

C. *As adv.:* So as to be level, even, or flush with the adjacent surfaces.

flush-bolt, *s.*

1. A screw bolt the head of which is countersunk so that it shall not protrude from the surface of the object.

2. A sliding bolt let into the face or edge of a door so as to make an even surface therewith.

flush-deck, *s.*

Naut.: A deck running the whole length of the vessel, from stem to stern, without forecastle or poop, as in a frigate.

flush-joint, *s.*

Carp.: A joint in which the abutting parts make no projection beyond the general face of the object.

flush-panel, *s.*

Joinery: A panel whose surface comes out even with the face of the stile.

flush-wheel, *s.* A wheel used in raising water from a drain; it is shaped like a breast-wheel, but is driven by power to raise water.

flŭsh'-ĕr (1), *s.* [Ger. *fleischer* = a butcher.] A name given to *Lanius collurio*, the red-backed shrike or lesser butcher-bird.

flŭsh'-ĕr (2), *s.* [Eng. *flush* (2), *v.*; *-er.*] One who flushes or cleanses out, as a drain, by turning in a sudden and copious flow of water.

flŭsh'-ĭng, *s.* [Named from the place of its manufacture.] A kind of woollen material made at Flushing.

"As some stout skipper paces his deck in a suit of *flushing*."—*Reade: Cloister & Hearth*, ch. xliii.

flŭsh'-ĭng (1), *pr. par., a., & s.* [Flush (1), *v.*]

A. & **B.** *As pr. par. & particip. adj.:* (See the verb).

C. *As subst.:* The act or state of becoming flushed; a flush; a redness.

"Ere yet the salt of most unrighteous tears
Had left the *flushing* in her galled eyes."
Shakesp.: Hamlet, i. 22.

flŭsh'-ĭng (2), *pr. par., a., & s.* [Flush (2), *v.*]

A. & **B.** *As pr. par. & particip. adj.:* (See the verb).

C. *As substantive:*

1. *Ord. Lang.:* The act or process of cleansing a drain by turning in a sudden and copious flow of water.

2. *Weaving:* A term applied to a thread which spans a number of other threads without intersection. Usually called Floating (q.v.). [Twill.]

* **flŭsh'-ĭng-lȳ,** *adv.* [Eng. *flushing* (1); *-ly.*] In a flushing, reddening, or blushing manner.

flŭsh'-nĕss, *s.* [Eng. *flush; -ness.*] The quality or state of being flush or flushed.

flŭs'-tĕr, *v.t. & i.* [Icel. *flaustra* = to be flustered; *flaustr* = fluster, hurry.]

A. *Trans.:* To make hot or red in the face, as with drinking; to heat, to confuse, to muddle.

"His practice of *flustering* himself daily with claret was hardly considered as a fault by his contemporaries."
—*Macaulay: Hist. Eng.*, ch. xx.

B. *Intrans.:* To become heated or flustered; to be in a state of heat or excitement.

flŭs'-tĕr, *s.* [Fluster, *v.*] Heat, excitement, bustle, confusion.

"The priest need not have been in such a *fluster* with Molly."—*Fielding: Tom Jones*, bk. iv., ch. ix.

flŭs'-tra, *s.* [Lat. = the sea in its quiet state, a calm.]

Zool.: Sea-mat. A genus of Molluscoida, class Polyzoa, order Infundibulata, and family Escharidæ, if not itself the type of one (Flustridæ). The species, and especially the common one, *Flustra foliacea*, are regarded by visitors to the coast as sea-weeds, which they somewhat resemble, but the frond, which is mat-like in colour, is all dotted over with holes, each of which is inhabited by a polypide, or its offspring by gemmation, in one sense distinct yet still connected with the parent, like branches with the roots of a tree. They are found on our rocky shores abundantly.

* **flŭs'-trā-tĕd,** *a.* [Fluster, *v.*] Tipsy, intoxicated.

"We were coming down Essex Street one night, a little *flustrated*."—*Steele: Spectator*, No. 496.

flŭs-trā'-tion, *s.* [Flusten, *v.*] Confusion, flurry.

"Then was this pretty little actress whom he admired in a great state of *flustration*."—*Mortimer Collins: Two Plunges for a Pearl*, vol. ii., ch. vii.

flŭs'-trĭ-dæ, flŭs-tra-dæ, *s. pl.* [Mod. Lat. *flustr(a)*, and Lat. fem. pl. adj. suff. *-idæ.*]

Zool.: A family of Infundibulate Polyzoa, type Flustra (q.v.).

flûte (1), ***floyt,"** **floyte,** ***flowte,** *s.* [O. Fr. *flaute, fleute;* Fr. *flûte*, from Low Lat. *flauta* = a flute, from Lat. *flatus* = a blowing; *flo* = to blow; Ital. *flauto;* M. H. Ger. *floite;* Dut. *fluit;* Sw. *flöjt;* Dan. *fløite;* Ger. *flote, flaute.*]

I. *Ordinary Language:*

1. In the same sense as II. 2.

"Anon they move
In perfect phalanx to the Dorian mood
Of *flutes* and soft recorders." *Milton: P. L.*, i. 551.

2. A long, thin, French roll, eaten at breakfast.

3. In the same sense as II. 1.

4. A groove or channel in any material, as in a dress; a species of ruffle.

II. *Technically:*

1. *Architecture:*

(1) A long vertical groove in the shaft of a column. It is usually circular in section, but, when angular, the shaft is called a canted column. The Doric column has twenty flutes; the Corinthian, Ionic, and composite have each twenty-four flutes; the Tuscan is without them.

"According to the compass and station of the column, the *flutes* may be augmented to thirty and above."—*Evelyn: Architecture.*

(2) A hollow, concave chamfer, gutter, groove, or channel; the receding member of a compound moulding.

2. *Music:*

(1) One of the most widely used of ancient musical instruments, and at this day one of the most important instruments in an orchestra. Of tubes without reeds there are only two kinds—the flute played by a mouth-piece, and that played by placing the lips close

against a hole on one side. The former kind was formerly called *flûte à bec*; the latter, *flûte traversière*, or *flauto traverso*, the cross-flute. The flageolet, which still is in use, is a familiar example of a *flûte à bec*, but it is the smallest of its kind, for these instruments were at one time made sufficiently large to be called "tenor" and "bass" flutes; and complete four-part harmony could be obtained from a set. The larger kinds only exist now as curiosities.

(2) A stop on an organ. They are of two kinds, open and stopped, and are equally common in metal and wood. (*Stainer & Barrett.*)

flute-bit, *s.* A wood-boring tool adapted to be used in a brace, and used in boring ebony, rosewood, and other hard woods.

flute-like, *a.* Resembling a flute in tone; clear and mellow.

flute-organ, *s.*

Music: An organ in which the sound is produced by the action of wind on a cutting edge, in contradistinction to the reed-organ, in which the sound is produced by a vibrating tongue of metal. It is also called the mouth organ, and the mouth or flute-pipes are technically known as flues; a contraction of flutes.

flute-pipe, *s.*

Music: An organ-pipe having a sharp lip or wind-cutter which imparts vibrations to the column of air in the pipe, producing a musical note. [Mouth-pipe.]

flute-player, *s.* A flutist or flautist.

flute-stop, *s.* [FLUTE, *s.*, II. 2 (2).]

¶ *Armed en flûte:* Having the guns in part taken out, as when used as a transport. (Said of a vessel of war.)

flûte (2), *s.* [A corruption of *float* or *flote* (q.v.).] A long vessel or boat, having flat ribs or floor timbers, round behind and swelled in the middle.

***flûte,** ***floit-en,** ***floyt-en,** ***flowt-yn,** *v.i. & t.* [O. Fr. *flauter, fleuter;* M. H. Ger. *floiten, flöuten;* Dut. *fluiten;* Low Ger. *floiten, fleiten;* Ger. *flöten.*]

A. *Intransitive:*

1. To play upon a flute or pipe.

"Syngynge he was, or *floytynge,* al the day."
Chaucer: C. T., 91.

2. To whistle with a flute-like note.

B. *Transitive:*

1. To play on a flute; to play or sing with flute-like notes.

"*Fluting* a wild carol ere her death."
Tennyson: Passing of Arthur.

2. To form flutes or channels in; as in a column.

flût'-ĕd, *pa. par. & a.* [FLUTE, *v.*]

1. *Arch.:* Having channels or flutes in it; channelled, furrowed: as, a *fluted* column.

2. *Music:* Clear and mellow; flute-like: as, *fluted* notes.

flût'-en-ĭst, *s.* [Eng. *flute; -n* connective, and suff. *-ist.*] A flute player; a fluter.

"There sometimes *flutenists*
Bear office now." *Stapyltoa: Juvenal,* III. 42.

flût'-ĕr, *s.* [Eng. *flute* (1); *-er.*]

1. One who plays upon a flute; a flautist.

2. One who makes flutes or grooves.

*** flût'-ĕr-ĕss,** *** flût'-ĕr-ĕsse,** *s.* [Eng. *fluter; -ess.*] A woman who plays on the flute. (*Sherwood.*)

flû-tî'-nạ, *s.* [Ital. *flautino* = a small flute, dimin. of *flauto* = a flute.]

Music: A kind of accordeon resembling the concertina. A form of melodeon. An instrument worked by a bellows and keys in bank, and having one set of reeds.

flût'-ĭng, *pr. par., a., & s.* [FLUTE, *v.*]

A. & **B.** *As pr. par. & particip. adj.:* (See the verb).

C. *As substantive:*

1. The act of forming flutes or grooves in.

2. A flute; a groove; a channel; fluted work.

"The caulicull . . . fall exactly with the hollow of the *flutings.*"—*Evelyn: Architecture.*

3. A species of ruffle.

4. One of the longitudinal grooves in a screw-tap, giving cutting-edges to the thread.

fluting-cylinder, *s.* A cylinder having longitudinal grooves to corrugate, crimp, or flute thin sheet-metal plates or fabrics. [FLUTING-MACHINE.]

fluting-iron, *s.* A species of laundry-iron which flutes the clothes; an Italian-iron; a gauffering-iron.

fluting-lathe, *s.* A kind of lathe for cutting flutes or scrolls upon columns or balusters. The flute proper is the vertical groove in a column or pillar, but the flute of the lathe is a spiral.

fluting-machine, *s.* A machine for corrugating or crimping metals. It has a pair of rollers, each one having projections which enter the interdental spaces of the other. By turning the operating screw, the bent bar, and with it the upper roller, can be adjusted up or down at will to regulate the distance between the two rollers.

fluting-plane, *s.*

Joinery: A plane adapted to cut grooves.

flût'-ĭst, *s.* [Eng. *flut(e); -ist.*] One who plays upon the flute; a flautist.

flŭt'-tĕr, *v.i. & t.* [A.S. *floterian, flotorian* = to float about; *flot* = the sea; cogn. with Low Ger. *fluttern* = to flutter about; Ger. *flattern;* Dut. *fladderen* = to hover.] [FLOAT, *v.*]

A. *Intransitive:*

1. To flap the wings rapidly; to hover.

"As an eagle stirreth up her nest, *fluttereth* over her young, and spreadeth abroad her wings, so the Lord alone did lead him."—*Deuteronomy* xxxii. 11.

2. To move about with a show of great bustle, but without much result.

3. To be moved with quick vibrations; to flap about.

"The yards are all hoisted,
The sails *flutter* out."
Longfellow: Musician's Tale.

4. To be in a state of agitation, doubt, or uncertainty; to hesitate; to wander.

"His thoughts are very *fluttering* and wandering, and cannot be fixed attentively to a few ideas successively."—*Watts.*

5. To act the beau or a frivolous character.

"No rag, no scrap of all the beau or wit,
That once so *fluttered,* and that once so writ."
Pope: Dunciad, ii. 119, 120.

B. *Transitive:*

1. To move about with quick vibrations; to flap: as, A bird *flutters* its wings.

* 2. To disturb, to drive in disorder, to confound.

"Like an eagle in a dovecote, I
Fluttered your Volscians in Corioli."
Shakesp.: Coriolanus, v. 5.

3. To put into a state of agitation, alarm, or anxiety.

"This place is so haunted with batts that their perpetual *fluttering* endangered the putting out our linkes."—*Evelyn: Memoirs,* vol. i.

flŭt'-tĕr, *s.* [FLUTTER, *v.*]

1. Quick, short, and irregular vibrations; a flapping or moving rapidly.

"An infinite variety of motions are to be made use of in the *flutter* of a fan: there is the angry *flutter,* the modest *flutter,* and the timorous *flutter.*"—*Addison: Spectator,* No. 102.

2. A state of excitement, anxiety, or agitation; disorder, confusion.

"Lest their various and jangling opinions put their leaves into a *flutter.*"—*Milton: Remonstrant's Defence.*

flutter-wheel, *s.* A water-wheel of moderate diameter, placed at the bottom of a chute so as to receive the impact of the head of water in the chute and penstock. Its name is derived from its rapid motion.

flŭt'-tĕr-ẽr, *s.* [Eng. *flutter; -er.*] One who flutters.

flŭt'-tĕr'-ĭng, *pr. par., a., & s.* [FLUTTER, *v.*]

A. & **B.** *As pr. par. & particip. adj.:* (See the verb).

C. *As subst.:* The act of shaking or moving rapidly; a flapping about; a putting into a state of agitation, anxiety, or excitement.

* **flŭt'-tĕr-ĭng-lў,** *adv.* [Eng. *fluttering; -ly.*] In a fluttering manner.

flût'-ў, *a.* [Eng. *flut(e)* (1); *-y.*] Resembling a flute in tone; flute-like.

flû'-vĭ-ạl, *a.* [Fr. *fluvial;* Lat. *fluvialis,* from *fluvius* = a river.] The same as FLUVIATILE (q.v.).

flû-vĭ-ā'-lēş, *s. pl.* [M. or f. pl. of Lat. *fluvialis* = pertaining to a river.]

Bot.: The name given by Ventinat and Richard to an order of Endogens since merged in Naiadaceæ (q.v.). The old genus Fluvialis is now made a synonym of Najas.

† **flû'-vĭ-ạl-ĭst,** *s.* [Lat. *fluvial(is),* pertaining to a river, and Eng., &c. suff. *-ist.*]

Geol.: One who in explaining certain phenomena attributes nearly everything to the action of existing rivers.

flû-vĭ-ăt'-ĭc, *a.* [Lat. *fluviaticus* = pertaining to a river.] The same as FLUVIATILE (q.v.).

flû'-vĭ-ạ-tĭle, *a.* [Lat. *fluviatilis* = pertaining to rivers.]

1. *Geog. & Geol.:* Belonging to a river.

2. *Zool.:* Living in a river: as, *fluviatile* shells.

flû-vĭ-cō-lĭ'-næ, *s. pl.* [Lat. *fluvius* = a river, and *colo* = to inhabit.]

Ornith.: The same as ALECTRURINÆ (q.v.).

flû'-vĭ-ō-mạ-rîne, *a.* [Lat. *fluvius* = a river, and *marinus* = marine, from *mare* = the sea.] Related to both a river and the sea.

fluviomarine strata, *s. pl.*

Geol.: Strata laid down in the bed of the sea by an adjacent river.

flŭx, *** flĭx,** *s.* & *a.* [Fr. *flux,* from Lat. *fluxus* = a flowing, from *fluo* = to flow; Sp. & Port. *fluxo;* Ital. *flusso.*]

A. *As substantive:*

I. *Ordinary Language:*

1. The act or state of flowing; the motion of a liquid.

"Still and calm; no noise, no *flux* of waters."
Beaum. & Flet.: Pilgrim, III. 4.

2. Any flow or issue of matter.

"Civet is the very uncleanly *flux* of a cat."
Shakesp.: As You Like It, III. 2.

3. Fusion; a liquid state caused by the application of heat.

* 4. A passing away, and giving place to others.

"Amid the *flux* of many thousand years."
Thomson: Summer, 35.

* 5. A coming together, concourse, or confluence.

"Left and abandoned of his velvet friends;
'Tis right, quoth he; thus misery doth part
The *flux* of company."
Shakesp.: As You Like It, II. 1.

II. *Technically:*

1. *Hydrog.:* The flow of the tide, as opposed to the ebb or reflux.

"To mark the *flux* and reflux of its waters."—*Louth: Lectures,* vol. i., lect. 2.

2. *Med.:* An extraordinary issue or discharge from the bowels, &c.; as, the bloody *flux,* &c.; dysentery.

"The next year was calamitous, bringing strange *fluxes* upon men and murrain upon cattle."—*Milton: Hist. Eng.,* bk. vi.

3. *Metall.:* A name given to any substance which assists the fusion of minerals. Crude flux is a mixture of nitrate of potassium and tartar, which is put into the crucible with the substance intended to be fused. White flux is formed by projecting equal parts of a mixture of nitre and tartar, in small portions at a time, into an ignited crucible. Black flux is prepared in the same manner, but with double the amount of tartar, so that carbon is contained in the mixture; it is used to reduce metallic ores. Cyanide of potassium is used as a fusing and reducing agent. Minerals are fused with a mixture of potassium and sodium carbonates, which melts more easily than either of them alone.

* **B.** *As adjective:*

1. Unconstant; not durable, variable; maintained by a constant succession of parts.

"One argument for such a translation is the *flux* nature of living languages."—*Abp. Newcombe: Essay on Translation of the Bible,* p. 233.

2. Transient; not of permanent importance.

"Written upon a subject *flux* and transitory."—*Johnson: Life of Sprat.*

flux-spoon, *s.*

Metall.: A small ladle for dipping out a sample of molten metal to be tested.

* **flŭx,** *v.t.* [FLUX, *s.*]

I. *Ordinary Language:*

1. To melt, to fuse.

"*Fluxing* ores, running glass, and assisting us in many of our operations."—*Paley: Natural Theology,* ch. xxi.

2. To kill or get rid of by a flux.

"He might fashionably and genteelly have been duelled or *fluxed* into another world."—*South.*

3. To purge, to clear.

"'Twas he that gave one Senate purges,
And *fluxt* the House of many a burgess."
Butler: Hudibras, pt. ii., c. 1.

II. *Med.:* To cause a flux or evacuation; to salivate.

"But what can salivation do?
It has been *fluxt* and refluxt too."
Byrom: Verses on an Old Bob-wig.

* **flŭx-ā'-tion,** *s.* [Eng. *flux; -ation.*] A flowing or passing away, and giving place to others.

"They believe a continual *fluxation* and transmigration of souls from eternity."—*Leslie: Short Method with the Deists.*

* **flŭx-ĭ-bĭl'-ĭ-tў,** *s.* [Low Lat. *fluxibilitas,* from *fluxibilis.*]

1. The quality of being fluxible or capable of fusion.

2. Changeableness, variableness, inconstancy, mutability.

"The *fluxibility* of human nature is too great."—*Hammond: Works,* ii. 693.

* **flŭx'-ĭ-ble,** *a.* [Low Lat. *fluxibilis,* from Lat. *fluxus*]

1. Capable of being fused or melted, as a mineral.

2. Changeable, variable, inconstant, mutable.

"The matter is variable, mutable, alterable, and *fluxible*."—*P. Holland: Plutarch*, p. 666.

***flŭx-ĭ-ble-nĕss,** *s.* [Eng. *fluxible*; *-ness.*] The quality of being fluxible; fluxibility.

***flŭx'-ĭle,** *a.* [Low Lat. *fluxilis*, from Lat. *fluxus* = a glowing.] Fluxible; capable of being fused or melted.

***flŭx-ĭl'-ĭ-tў,** *s.* [Eng. *fluxil(e)*; *-ity.*] Fluxibility; capability of being fused or melted.

"The weight and fluidity, or at least *fluxility* of the bodies here below."—*Boyle: Works.*

fluxion (as **flŭk'-shŭn**), *s.* [Lat. *fluxio*, from *fluxus*, pa. par. of *fluo* = to flow.]

*** I.** *Ordinary Language:*

1. The act or state of flowing.

"By the *fluxion* of the odour coming from the beast."—*P. Holland: Plutarch*, p. 788.

2. That which flows.

"The *fluxion* increased, and abscesses were raised."—*Wiseman.*

3. The fusion or running of metals into a fluid state.

4. A constantly varying indication.

II. *Technically:*

1. *Med.:* An unnatural flow or determination of blood or other humour towards any organ; a catarrh.

* *Math.:* A method of calculation resulting from the operation of fluents, or flowing numbers. Thus a mathematical line may be considered as produced by the fluxion or flowing of a point; a surface by the fluxion of a line, and a solid by the fluxion of a surface. A mathematical point in motion will really make a line; a revolving radius which is a line will make a circle which is a surface, and its revolution about its diameter will generate a sphere which is a solid. The same principle may be applied to purely numerical calculations, like the formulæ of algebra. If of two quantities, x and y, the increase of x at a uniform and given rate produces an increase or decrease of y; and if x' and y' represent the velocities of x and y respectively, then y' is equal to the function of x and y depending on the equation connecting them, the whole multiplied by x'. In this formula x and y were called by Newton fluents, and x' and y' their fluxions. This branch of the higher mathematics was invented by Newton in A.D. 1665. On October 24, 1676, he communicated his method to Oldenburg in a sentence with all the letters disarranged so that his correspondent could not possibly have put them in order. If he had succeeded in doing this the sentence would have been "Data æquatione quotcunque fluentes quantitates involvente fluxiones invenire et vice versâ." Leibnitz received this letter in 1677, and in 1684 explained a discovery which he had made. It was that of the differential calculus, which was essentially the same as that of fluxions. What Newton called fluxions, Leibnitz called differences. An angry controversy subsequently arose between Newton and Leibnitz as to priority of discovery, the Royal Society of London taking the part of the former, who was then its president, and the scientific men of Germany that of the latter, who was their countryman. Both appear to have made the discovery independently. In the slight differences of method which exist, the advantage lay with Leibnitz, and while the term fluxions is now scarcely ever used, that of differential calculus is in common use. The first elementary treatise on fluxions published in England was by John Harris, in A.D. 1702. A description of the process by Newton himself followed in 1704, in his *Quadrature of Curves.*

fluxional, fluxionary (as **flŭk'-shŭn-ăl, flŭk-shŭn-ăr-ў**), *a.* [Eng. *fluxion*; *-ary.*] Pertaining to fluxions.

"You may apply the rules of the *fluxionary* method."—*Berkeley: Analyst*, § 32.

fluxionary calculus, *s.*

Math.: The calculus by the method of fluxions.

fluxional or **fluxionary analysis,** *s.*

Math.: The analysis of flowing quantities and fluxions.

fluxionist (as **flŭk'-shŭn-ĭst**), *** flŭc'-tion-ĭst,** *s.* [Eng. *fluxion*; *-ist.*] One skilled in fluxions.

"An algebraist *fluctionist*, geometrician, or demonstrator of any kind."—*Berkeley: Analyst*, § 33.

*** flŭx'-ĭve,** *a.* [Eng. *flux*; *-ive.*]

1. Flowing, running, as with tears.

"These often bathed she in her *fluxive* eyes."
Shakesp.: Lover's Complaint, 50.

2. Variable, changeable, inconstant.

"Their arguments are as *fluxive* as liquor spilt upon a table."—*Ben Jonson: Discoveries.*

*** flŭx'-ūre,** *s.* [Lat. *fluxura* = a flowing.]

1. The quality of flowing or of being fluid.

"In itself holds these two properties
Moisture and *fluxure*."
Fielding: Covent-Garden Journal, No. 55.

2. A fluid matter.

flў, * flog-en, * fleghe, * flee, * fle-on, * flie, * fligh, * flye, * flyghe, flyyn (pa. t. * *fleigh*, * *fleyghe*, *flew*, * *floghe*, * *flughe*, * *fluwe*; pa. par. * *flogen*, * *flone*, * *flowen*, *flown*), *v.i.* & *t.* [A.S. *flēogan* (pt. t. *flēáh*); cogn. with Dut. *vliegen*; Icel. *flýgja*; Dan. *flyve*; Sw. *flya*; O. H. Ger. *fliogan*; M. H. Ger. *vliegen*; Low Ger. *fleigen*; Ger. *fliegen.*]

A. *Intransitive:*

1. To move or pass through the air with wings.

"Doth the hawk *fly* by thy wisdom?"—*Job* xxxix. 26.

2. To pass or be driven through the air by any impulse: as, An arrow *flies* through the air.

3. To rise in the air; to mount upwards, as smoke in the air.

"Man is born unto trouble, as the sparks *fly* upwards."—*Job* v. 7.

4. To flutter or wave in the air.

"Bells were ringing, flags were *flying*, candles were arranged in the windows for an illumination."—*Macaulay: Hist. Eng.*, ch. xv.

5. To move with rapidity: as, A wheel *flies* round.

6. To flee, to run away.

"Ah, whither shall I *fly* to 'scape their hands."
Shakesp.: 3 Henry VI., i. 3.

7. To pass or move swiftly; to hasten; to hurry.

"In the morning early will we both *fly* towards Belmont." *Shakesp.: Merchant of Venice*, iv. 1.

8. To pass away quickly: as, Time *flies.*

9. To be spread rapidly: as, The report *flew* through the city.

10. To break, to shiver, to burst in asunder: as, A bottle *flies* in pieces.

* 11. To travel by a fly.

"We then *flied* to Stogursey."—*Southey: Letters*, iii. 478.

B. *Transitive:*

1. To cause to fly or float in the air: as, To *fly* a kite.

2. To flee from; to run away from; to avoid; to shun.

"Pursuing that which flies, and *flying* what pursues."
Shakesp.: Merry Wives of Windsor, ii. 2.

3. To quit or escape from by flight.

"Dedalus, to *fly* the Cretan shore,
His heavy limbs on jointed pinions bore."
Dryden: Virgil; Æneid vi. 18.

* 4. To attack or hunt with a hawk.

"If a man can tame this monster, and with her *fly* other raveuing fowl, and kill them, it is somewhat worth."—*Bacon.*

* 5. To carry or convey in a fly.

"Poole *flied* us all the way."—*Southey: Letters*, iii. 478.

¶ (1) *To fly about:* To change or shift frequently; said of the wind.

(2) *To fly at:* To rush with violence or fierceness at; to attack suddenly.

(3) *To fly in the face of:*

(*a*) To insult.

"This would discourage any man from doing you good, when you will either neglect him, or *fly in his face*."—*Swift: Drapier's Letters.*

(*b*) To act in direct opposition to; to set at defiance.

(4) *To fly off:*

(*a*) To become suddenly detached or separated.

* (*b*) To revolt; to fall away; to desert.

"The images of revolt and *flying off*."
Shakesp.: Lear, ii. 2.

(5) *To fly open:* To open suddenly and violently: as, The doors *flew open.*

(6) *To fly out:*

(*a*) To burst into passion.

"Passion is apt to ruffle, and pride will *fly out* into contumely and neglect."—*Collier: Of Friendship.*

(*b*) To break out into licence.

(*c*) To start violently from any direction.

"All bodies, moved circularly, have a perpetual endeavour to recede from the centre, and every moment would *fly out* in right lines, if they were not restrained."—*Bentley: Sermons.*

7. *To let fly:*

(1) *Transitive:*

(*a*) *Ord. Lang.:* To discharge, to shoot or throw out.

"A quarelle *lete he flie*." *Langtoft*, p. 206.

(*b*) *Naut.:* To let go suddenly: as, To *let fly* the sheets.

(2) *Intrans.:* To direct a violent blow.

8. *To fly a kite:* To obtain money or accommodation bills. (*Comm. Slang.*)

flў, * flo, * flee, * fleh, * flei, * fley, * fleye, * flyc, *s.* [A.S. *flēoge*; cogn. with Dut. *vlieg*; Low Ger. *fleige*; O. H. Ger. *flioga*; M. H. Ger *vliege*; Icel. & Sw. *fluga*; Dan. *flue.*]

I. *Ordinary Language:*

1. *Literally:*

(1) In the same sense as **II. 1.**

(2) A disease in turnips, hops, &c.

"To prevent the *fly*, some propose to sow ashes with the seed."—*Mortimer: Husbandry.*

(3) An artificial fly or insect used as a bait for fishes.

2. *Figuratively:*

(1) That part of a vane which shows the direction in which the wind blows.

(2) The length of a flag from the staff to the outer edge; the perpendicular height is the Hoist.

(3) The part of a flag beyond the Jack, which occupies the upper left-hand corner.

(4) A kind of open or close carriage drawn by one horse; a hackney coach.

* (5) A familiar spirit.

"In casting figures, telling fortunes, news,
Selling of *flies*." *Ben Jonson: Alchemist.* (Argum.)

¶ In the seventeenth century familiar spirits in the shape of fleas or lice were supposed to attend witches and wizards, who also professed to be able to sell imps of this kind, whose power varied in proportion to the price paid for them. Thus Dapper in the *Alchemist*, having little money to spare, wants only

"A rifling *fly*, none of your great familiars."

Sidrophel's "talismanic louse," is a well-known example of more repulsive insects being supposed to entertain demoniac guests.

* (6) A thing of the slightest importance or value.

II. *Technically:*

1. *Zoology:*

(1) *Specially:*

(*a*) (*Sing.*): The genus Musca, of which the House-fly, *Musca domestica*, is the type.

(*b*) (*Pl.* flies): (i) The family Muscidæ, of which the genus Musca is the type; (ii) the order Diptera (two-winged insects).

(2) *Gen.* (Chiefly as the second word in a compound): Almost any flying insect, especially if with membraneous transparent wings. Thus butterflies are Lepidoptera, gall-flies chiefly Hymenoptera, dragon-flies Orthoptera, crane-flies Diptera, and Spanish-flies and turnip-flies Coleoptera. It is, however, only a small number of species in the last-named order that are called flies.

2. *Hor.:* A regulating device used formerly in clocks, and latterly in musical boxes, to control the rate of speed

3. *Knitting-machine:* Another name for the Latch (q.v.).

4. *Mach.:* A fly-wheel (q.v.).

5. *Naut.:* A compass-card having marked upon it the points or rhumbs, thirty-two in number. The card is moved by a magnet-needle beneath. The angle of the ship's course with the magnetic meridian is shown on the marginal plate by a line called the lubber's line.

6. *Print.:* A vibrating frame with fingers, taking a printed sheet from the tapes, and delivering it on to the heap.

7. *Spin.:* The arms which revolve around the bobbin in a spinning-frame, to twist the roving or yarn which is wound on the bobbin. [FLYER.]

8. *Theat.:* A gallery running along the side of the stage at a high level, where the ropes for drawing up parts of the scenes, &c., are worked.

9. *Weaving:* A shuttle driven through the shed by a blow or jerk.

10. *Baseball:* A ball batted upward at any angle; a fly-ball (q.v.). If caught by a fielder before touching the ground the batsman is retired.

fly-agaric, *s.*

Bot.: *Agaricus muscarius*, a scarlet fungal covered with white or yellow warts. It grows in birch woods, and is used to poison flies.

fly-block, *s.*

Naut.: A large flat block, double or single. The double block sometimes has two sheaves at one part and one sheave in the other portion. Used in the hoisting-tackle of yards.

fly-board, *s.*

Print.: The board upon which the printed sheets are laid by the fly.

fly-boat, *s.*

1. A vessel used for rapid transport of goods, &c. [FILIBUSTER.]

2. A rapid passenger boat on canals.

3. A large, flat-bottomed Dutch coasting-vessel.

fly-book, *s.* A case in the form of a book consisting of small pieces of flannel, used by anglers to keep artificial flies in.

fly-boy, *s.*

Print.: The boy who lifts the printed sheets off the press, catching them as they fly from the tympan.

fly-bug, *s.*

Entom.: *Reduvius personatus*, a kind of winged bug which devours the bed-bug.

fly-cap, *s.* A cap or head-dress formerly worn by elderly ladies. It was formed of two crescents conjoined, and by means of wires made to stand out from the cushion on which the head was dressed. The name is taken from the resemblance of the sides to wings.

† **fly-case,** *s.*

Entom.: The wing-cases of a "fly," a beetle for example.

fly-drill, *s.* A kind of drill having a reciprocating fly-wheel which gives it a steady momentum. The driving power consists of a cord winding in reverse directions upon the spindle as it rotates, first in one direction and then in the other.

fly-fungus, s.

Bot.: *Empusa muscæ.*

fly-governor, *s.* A kind of governor which regulates speed by the impact of vanes upon the air; a fly.

fly-honeysuckle, *s.*

Bot.: A modern book-name for *Lonicera Xylosteum.*

fly-leaf, *s.* A blank leaf at the beginning or end of a book, or of a circular, &c.

fly-maggot, *s.* A maggot bred from the eggs of the blow-fly.

fly-man, *s.* The driver of a fly.

fly-net, *s.*

1. *Ord. Lang.:* A net in an open window to prevent entrance of flies and other insects.

2. *Manège:* A net of meshes, or a fringe of leather strips, to protect a horse from flies.

fly-nut, *s.* A nut with wings, to be twisted by the hand; as the screw-nut of a hand-vice.

fly-orchis, flie-orchis, *s.*

Botany:

* 1. *Gen.:* Various species of Habenaria and Ophrys.

2. *Spec.:* *Ophrys muscifera.*

fly-paper, *s.* Prepared paper for poisoning flies or simply for catching them with an adhesive coating.

fly-poison, *s.*

Bot.: *Amianthium muscatoxicum.*

fly-powder, *s.* A powder consisting of arsenic mixed with sugar and water, used to kill flies.

fly-press, *s.* A screw-press in which the power is derived from a weighted arm, swinging in a horizontal plane, as in embossing and die presses. Presses of this kind are used for making buttons, washers, flat links for chains, cutting and gumming saw-teeth, making percussion-caps, steel-pens, &c.

fly punching-press, *s.* A press for cutting teeth on saws, and for other purposes.

fly-rail, *s.* A hinged cleat or bracket, attached to the frame of a table, and turned out to support the leaf.

fly-sheet, *s.*

1. *Gen.:* A paper broadside or bill.

2. *Spec.* (*Pl.*): Certain publications of this sort advocating changes in the Wesleyan Methodist constitution and practice. Those who were suspected of having them issued were expelled in 1849, and taking the name of Methodist Reformers laid the foundation of a new denomination, which has, however, since been amalgamated with others, the designation of the collective body being the United Free Church Methodists.

fly-shuttle, *s.* A shuttle driven by a picker, in contradistinction to one thrown by hand.

* **fly-slow,** *a.* Moving slowly.

"The *fly-slow* hours shall not determinate
The dateless limit of thy dear exile."
Shakesp.: Richard II., i. 3.

fly-speck, *s.* A speck or stain on glass, &c., caused by the excrement of the common house-fly.

fly-water, *s.* A liquid composed of a solution of arsenic, quassia bark, &c., used for killing flies.

fly-wheel, *s.*

Mach.: A heavy wheel attached to machinery to equalize the movement. By its inertia it opposes any sudden acceleration of speed, and by its momentum it prevents sudden diminution of speed; in the latter case it acts as a store of power to continue the movement when the motor temporarily flags, or in passing dead centres when the motor is inoperative. Fly-wheels are also used to accumulate power.

flȳ, *a.* [Etym. doubtful.] Sharp, wide awake.

flȳ′-bāne, *s.* [Eng. *fly*, and *bane.*]

Bot.: *Agaricus muscarius.*

flȳ-bĭt-ten, *a.* [Eng. *fly*, and *bitten.*] Marked by the bites of flies.

flȳ-blōw, *v.t. & i.* [Eng. *fly*, and *blow.*]

A. *Transitive:*

1. *Lit.:* To deposit eggs in, as the blowfly in meat.

* 2. *Fig.:* To corrupt, to taint.

"I am unwilling to believe that he designs to play tricks, and to *flyblow* my words, to make others distaste them."—*Stillingfleet.*

B. *Intrans.:* To deposit eggs on meat, as the blowfly.

flȳ′-blōw, *s.* [FLYBLOW, *v.*] The egg of a blowfly.

flȳ′-blōwn, *a.* [FLYBLOW, *v.*] Tainted with maggots; stained by flies; impure, putrid.

flȳ′-cătch-ĕr, *s.* [Eng. *fly*, and *catcher.*]

1. *Ord. Lang.:* One that hunts or catches flies.

"The swallow was a *flycatcher* well as the spider."—*L'Estrange.*

2. *Ornithology:*

(1) *Sing.:* The genus Muscicapa, the typical one of the family Muscicapidæ (q.v.). This family is a large one, including over 40 genera and 280 species. They are usually of small size, and are often brightly colored. They are abundant in the Eastern Hemisphere, but are absent from the United States, or any part of America, being replaced here by the Tyrant Fly-catchers, or Shrikes. The common Fly-catcher of Europe (*Muscicapa griscola*) is a tiny brownish gray bird, which winters in Africa and returns in early spring.

(2) *Pl.:* The Muscicapidæ, a family of Insessorial Birds of the tribe Dentirostres. They have a wide gape of mouth, which is bordered with bristles, and short, feeble legs. [MUSCICAPIDÆ.]

¶ *Tyrant fly-catchers:* [TYRANNINÆ].

flȳ′-ĕr, *s.* [FLIER.]

flȳ′-fĭsh, *v.i.* [Eng. *fly*, and *fish*, v.] To angle with a hook baited with a natural or an artificial fly.

flȳ′-fĭsh-ĭng, *s.* [Eng. *fly*, and *fishing.*] The act or art of angling with flies, natural or artificial.

"I shall next give you some other directions for *fly-fishing*."—*Walton: Angler*, pt. i., ch. ii.

C. *As substantive:*

1. The act or power of moving through the air with wings.

2. The act of fleeing or running away.

flying-army, *s.*

Milit.: A body of soldiers, not lying in a fixed camp, but constantly moving about, either to protect their own garrisons and posts, or to harass the enemy; a flying-camp.

flying-artillery, *s.*

Milit.: Field artillery when the gunners are all mounted; either on horses, or on the limbers.

flying-birds, *s. pl.*

Ornith.: The sub-class Carinatæ.

flying-bridge, *s.* A temporary bridge, suspended or floating. A military, pontoon, or boat bridge.

flying-buttress, *s.*

Arch.: A structure in the form of an arch, spanning the roof of an aisle between an outer buttress and the wall of the nave. It assists in resisting the thrust of the roof.

FLYING-BUTTRESS.

flying-camp, *s.* [FLYING-ARMY.]

flying-dragon, *s.*

1. *Ord. Lang.:* A paper kite.

"*Flying-dragons*, very common in Edinburgh in harvest. They are generally guided by very young boys, with a chain no stronger than a piece of slight packing twine."—*Blackwood's Magazine*, Aug., 1821, p. 35.

2. *Zool.:* The same as FLYING-LIZARD (q.v.).

Flying-Dutchman, *s.*

1. *Mythol.:* A phantom Dutch ship supposed to be encountered off the Cape of Good Hope. The origin of the myth is doubtful. The popular explanation is that, on account of a murder committed on board his vessel, or a boastful exclamation of his own, a captain was doomed to beat in a phantom ship against storms till the day of judgment. Another explanation is that a Dutch vessel with all hands was lost off the Cape of Good Hope, of old called the Cape of Storms; but, if the apparition be seen at all, it is probably due to refraction.

2. A nickname applied, on account of its speed, to the express train running from London to Exeter.

¶ Two other very fast trains are nicknamed the Flying Scotchman (q.v.), and, not the Flying, but the Wild Irishman. A number of fast trains in the United States have popular titles, mainly expressive of great speed.

flying-fish, *s.*

Ichthy. & Ord. Lang.: The name given to more than one fish which, having extended fins, leaps from the water, and after a more or less lengthened flight, drops into it again. The fins seem to act as parachutes rather than as wings. The Common Flying-fish is *Exocœtus volitans.* It belongs to the family Esocidæ. Another closely allied species is *E. exiliens*, the Greater Flying-fish. They are common in the Atlantic, their flight being to escape the dolphin and other enemies. Another flying-fish is the Flying-gurnard (q.v.).

flying-fox, *s.* *Pteropus rubricollis,* a large frugivorous bat, occurring in the East Indies, where it commits great depredations in gardens. Its head somewhat resembles that of the fox.

flying-frog, *s.*

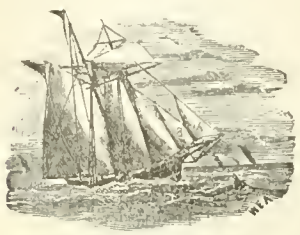
Zool.: The genus Rhacophorus. It has large webbed feet with adhesive discs.

flying-gurnard, *s.*

Ichthy.: A fish, *Dactylopterus volitans,* inhabiting the Mediterranean. There is another species of the genus, *D. orientalis,* from the Eastern seas. The genus is spiny-finned and of the family Triglidæ. [Dactylopterus.]

flying-jib, *s.*

Naut.: A sail extended by the flying jib-boom beyond the standing jib.



Flying-jib.
a. Flying-jib. a. Standing-jib.

flying jib-boom, *s.*

Naut.: An extension of the jib-boom. It is sometimes in one piece with the latter, and sometimes connected therewith by means of a boom-iron, in a manner analogous to that of the jib-boom on the bowsprit.

flying-lemur, *s.*

Zool.: The genus Galeopithecus, and especially *G. volans,* found in Malacca, Sumatra, and Borneo. It is so called from having a membrane which enables it to take long leaps through the air. [Galeopithecus.]

flying-levels, *s. pl.*

Civ. Eng.: Trial levels taken over the line of a projected road, railway, &c.

flying-lizard, *s.* Various species of the genus Draco (q.v.). [Pterosauria.]

flying-man, *s.* The name taken by a Belgian, M. Von Groof, who, attempting to descend from a balloon by wings designed to act as a parachute, found his apparatus fail, and was killed by the fall, on July 9, 1874. [Flying.]

flying-party, *s.*

Mil.: A detachment of men employed in skirmishing round an enemy.

flying-phalanger, *s.*

Zool.: The marsupial genus Petaurus, belonging to the family Phalangastidæ (Phalangers). A fold of skin connects the fore and hind limbs with the sides. This enables them to take long flying leaps.

flying-pinion, *s.*

Horol.: The fly of a clock. [Fly, *s.*, B. 2.]

flying-sap, *s.*

Mil.: The rapid excavation of the trenches of an attack, when each man advances under cover of two gabions.

Flying-Scotchman, *s.* A nickname for the express train running between London and Edinburgh.

"The King's Tracts in the British Museum abound in chap-books and *flying-sheets.*" —*Athenæum,* Sept. 2, 1882.

flying-shot, *s.* A shot fired at something in motion, as a bird on the wing; one who fires such a shot.

flying-squid, *s.*

Zool.: An appellation given by sailors to the cephalopodous molluscs belonging to the genus Ommastrephes, of which fourteen recent species are known. Their English book-name is Sagittated Calamary. They can leap out of the water so high as often to fall on the decks of vessels. This is why they are called flying-squids, or sometimes sea-arrows. They are gregarious, inhabit the open sea, leaving their eggs floating in long clusters on the surface, are used as bait in the Newfoundland cod fishery, and are the principal food of the dolphins and cachalots, as well as of the albatross and the larger petrels. (*S. P. Woodward.*) [Ommastrephes.]

flying-squirrel, *s*

Zool.: A name given to such of the Sciuridæ (Squirrels) as have the skin of the sides very much extended between the fore and hind legs, so as, to a certain extent, to sustain the animal in the air when taking long leaps. *Sciuopterus volans* is the only European species.

flying-switch, *s.* The act of switching a car or train by its own momentum, the locomotive having been detached and driven past the switch (q.v.).

*** flying-worm,** *s.* The tetter, the ring worm. (*Ash.*)

flȳsch, *s.* [A Swiss provincial word.]

Geol.: A series of rocks in the Central Alps. They are composed of fucoidal grit and shale overlying the nummulitic rocks. They are believed to be Upper Eocene. Some have been changed into saccharoid marble, quartz rock, and mica-schist.

flȳ'-trăp, *s.* [Eng. *fly,* and *trap.*]

Bot.: *Apocynum androsæmifolium.*

¶ *Venus's fly-trap:*

Bot.: *Dionæa muscipula.* [Dionæa.]

flȳ'-wŏrt, *s.* [Eng. *fly,* and *wort* (q.v.).]

Bot.: A name applied to the genus Myanthus, now merged in Catasetum.

*** fnast,** *s.* [A.S. *fnæst.*] Breath, breathing.

"Hire horte was so gret
That wel negh hire *fnast* atschet."
Owl & Nightingale, 43.

*** fnast, * fnaste,** *v.i.* [A.S. *fnæstian.*]

1. To breathe.

"He ne mouthe speke ne *fnaste.*" *Havelok,* 548.

2. To break or burst out.

"Fyre out *fnast* with a fuerse lowe."
Destruction of Troy, 874.

*** fō** (1), *s.* [Foe.]

Fō (2), *s.* [Chinese. See def.]

Religions: The spelling of the word Booddh intended to indicate the pronunciation of the name of that god in China, where his adherents are numbered by hundreds of millions. It is the nearest approach which the Chinese are capable of making to the correct pronunciation, but a Hindoo would regard it as far from accurate.

fōal, * foale, * fole, *s.* [A.S. *fola*=a foal, a colt; Icel. *foli;* Sw. *föle, fol;* Dan. *föl;* Dut. *veulen;* Ger. *fohlen, füllen;* Goth. *fula,* cogn. with Gr. πῶλος (*pōlos*) = a foal; Lat. *pullus* = a young animal. focal-distance, *s.*

1. *Optics*: The distance between a concave mirror and the focus or point at which its rays are most concentrated.

2. *Conic Sections*:

(1) *Of the parabola*: The distance between the focus and the vertex.

(2) *Of the ellipse and the hyperbola*: The distance between the foci and the centre.

¶ *Principal focal distance*:

Optics: The distance between the principal focus and a concave mirror.

***fō'-cal-īze,** *v.t.* [Eng. *focal*; *-ize.*] To bring to a focus; to focus.

"Light is *focalized* in the eye, sound in the ear."—*De Quincey.* (*Webster.*)

***fō'-çile, *fō'-çĭl,** *s.* [Fr. *focile.*]

Anat.: A bone of the forearm and leg; the greater focile being the ulna or tibia, the lesser the radius or fibula.

"The fracture was of both the *focils* of the left leg."—*Wiseman: Surgery*, bk. vii., ch. i.

***fō'-çĭl-lāte,** *v.t.* [Lat. *focillatus*, pa. par. of *focillatus*, pa. par. of *focillo* = to revive a benumbed person by means of fire or heat; *focus* = fire, a hearth.] To cherish, to warm.

***fō-çĭl-lā'-tion,** *s.* [Focillate.] Cherishing, comfort, support.

fō-çĭm'-ĕ-tĕr, *s.* [Eng. *focus*, and Gr. *μέτρον* (*metron*) = a measure.]

Phot.: An instrument for assisting in focussing an object in or before a camera. This consists usually of a lens of small magnifying power.

fō'-cŭs, *s.* [Lat. = a fireplace, a hearth, a fire-pan, a brazier.]

I. *Ord. Lang.*: Any place from which an influence emanates, or where that influence exists in very concentrated form. (*Lit. & fig.*)

"Whitehall, when he dwelt there, was the *focus* of political intrigue and of fashionable gaiety."—*Macaulay: Hist. Eng.*, ch. iii.

II. *Technically*:

1. *Optics*: A point at which the rays of light refracted from a convex lens, or reflected from a concave mirror, are most concentrated; a point in which such rays meet, or tend to meet, if produced either backwards or forwards.

2. *Conic sections*:

(1) *Sing* (*Of a parabola*): A point so situated that if from it there be drawn a line to any point in the curve, and another from the latter perpendicular to a straight line given in position, these two straight lines will always be equal to one another.

(2) *Plural*:

(*a*) *Of an ellipse*: Two points so situated that if two straight lines be drawn from them to any point in the curve, the sum of these straight lines will always be the same.

(*b*) *Of an hyperbola*: Two points so situated that if two straight lines be drawn from them to any point in the curve, the excess of the straight line drawn to one of the points above the other will always be the same.

3. *Astron.*: The term foci is often used in connection with the orbit of the earth, which is an ellipse, with the sun in one of the foci.

4. *Acoustics*: The point of convergence of sound rays, these following the same laws as those of light and heat. [¶ (1).]

¶ (1) *Acoustic focus*:

Acoustics: The focus of sound rays. [II. 4.]

(2) *Calorific focus*:

Heat: The focus of heat rays.

(3) *Conjugate foci*:

Optics: Two foci so situated that, if rays of light diverging from one strike a concave mirror, they will be reflected and meet in the other.

(4) *Luminous focus*:

Optics: The focus of light rays.

(5) *Principal focus*:

Optics: The focus of parallel rays striking a concave mirror.

(6) *Vertical focus*:

Optics: A radiant point behind a mirror, from which rays may be held to diverge more and more, and in which, looking at them now as coming from the opposite direction, and consequently as convergent, they would tend to meet.

fō'-cŭs, *v.t.* [Focus, *s.*] To bring to a focus: to focalize.

fō'-cŭs-ĭng, *pr. par.* or *a.* [Focus, *v.*]

focusing-glass, *s.*

Phot.: A glass used for magnifying the image on the ground glass in the camera, to enable the operator to get it into better focus.

fŏg (I), *s.* [Dan. (*snee*)*fog* = a snowstorm, from *fyge* = to drift; Icel. *fok* = spray; *fjúk* = a snowstorm.]

1. *Lit.*: A very thick mist; small hollow vesicles of water suspended in the air, but so low as to be but a short distance from the earth in place of rising high above it and becoming so illuminated by the sun as to constitute clouds of varied hue. Fogs often arise when the air above warm, moist soil is colder than the soil itself. The hot vapours from the ground are then condensed by coming in contact with the colder air above, as the warm steam of a kettle is by the comparatively cold air of a room. But no fog arises till the cold air has absorbed vapour enough to bring it to the point of saturation. Fogs often hang over rivers. Their cause is the condensation, by contact with the cold water, of the vapour in a hot and moist air current passing over the river. The "pea-soup" fogs of London life are produced by the carbon of the smoky atmosphere colouring the fog vesicles: a fog which is brown in London is generally white at Loughton, a few miles off, and wanting altogether at the top of High Beech hill. On hills and mountains of any size it is easy to rise above a fog, and see it like an ocean beneath one's feet.

"Infect her beauty,
You fensucked *fogs* drawn by the powerful sun,
To fall and blast her pride." *Shakesp.: Lear*, ii. 4.

2. *Fig.*: A state of confusion, doubt, or perplexity.

fog-alarm, *s.*

Naut.: An audible signal, warning vessels from shoals or other dangerous places. Fog-alarms are various in their kind, their operation, and their construction. As to kind, they consist of bells, whistles, and trumpets. As to operation, they are sounded by the current, by the ebbing and flowing tide, by the sway-

ing of the waves, by the wind, by bellows, by clock-work impelled by weight or spring. As to construction, they are adapted for headlands, light-ships, buoys, or to be anchored by piles on spits, sand-bars, or shoals.

fog-bell, *s.*

Naut.: A bell upon a vessel, buoy, or spit of land, and rung by the motion of the waves, or force of the wind, as a warning to mariners.

fog-horn, *s.*

Nautical:

1. A kind of horn kept on board ships to be sounded as a warning in foggy weather.

2. An instrument resembling a trumpet in shape, through which air or steam is made to pass at a high pressure, causing a blast which can be heard to a considerable distance out at sea, thus in foggy weather warning sailors of their proximity to land.

fog-ring, *s.*

Meteorol.: A bank of fog occurring in a ring or circular form. It is not unfrequently observed off the coasts of Newfoundland.

fog-signal, *s.*

1. *Nautical:*

(1) A signal made on board ships in foggy weather by the sounding of a whistle, ringing of a bell, &c., in order to prevent collisions.

(2) A fog-alarm (q.v.).

2. *Rail.:* A detonating ball, placed on the rails to indicate danger to the driver of a passing train.

fog-smoke, *s.* Fog-mist.

"Rises the *fog-smoke* white as snow."
Scott: Marmion, ii. (Introd.)

fog-trumpet, *s.* A horn or trumpet placed on a projecting headland, a vessel, or a spar, and blown by mechanical means or by the wind, as a warning to mariners. A fog-horn (q.v.).

fog-whistle, *s.*

Naut.: A signal of warning for vessels off a coast. A sounder on the principle of the steam-whistle is exposed to a blast of air or of steam. Usually, motion derived from the waves, the tide, the wind, or clock-work, makes it automatic.

* **Folke-stone,** *s.* [Folkstone.]

* **folk'-lănd** (**folk** as **fōk**), *s.* [A.S. *folcland.*]

Feudal law: The land of the folk or people, as distinguished from book-land, or land held by charter or deed. It was held by no assurance in writing, but distributed among the common folk at the pleasure of the lord, and resumed at his discretion. It could not be devised by will.

"Now, with regard to the *folkland,* this was a species of tenure neither strictly feudal, Norman, nor Saxon ;

but mixed and compounded of them all; and which also, on account of the heriots that usually attend it, may seem to have something Danish in its composition. Under the Saxon government there were a sort of people in a condition of downright servitude, belonging to the lord of the soil, like the rest of the cattle or stock upon it. These seem to have been those who held what was called the *folkland*, from which they were removable at the lord's pleasure."—*Blackstone: Comment.*, bk. ii., ch. 4.

folk'-lōre (folk as **fōk)**, *s.* [Eng. *folk*, and *lore*.] Popular superstitions, tales, traditions, or legends. Of late years the importance of the study of folklore has met with increasing recognition from students of anthropology and of comparative religion. It is worthy of note that many myths are found in a somewhat similar form among peoples widely divergent in race and locality. By some writers this fact is claimed in support of the Mosaic cosmogony; while others see in it a strong proof in favour of the theory of Evolution, and a means of tracing the steps by which man has advanced to his present position. The term *Folklore* was first introduced by Mr. W. J. Thom in A.D. 1846.

"Modern *folklore* holds either that a knocking or rumbling on the floor is an omen of a death about to happen; that dying persons themselves announce their dissolution to their friends in such strange sounds."—*Tylor: Primitive Culture* (1873), i. 145.

folk'-lōr-ĭst (folk as **fōk)**, *s.* [Eng. *folklor(e)*; *-ist*.] One skilled in or devoted to the study of Folklore (q.v.).

"There can be no doubt of the value of such a collection to *folklorists* and authropologists."—*Athenæum*, May 12, 1884, p. 603.

* **folk'-mōte, * folk'-moôt (folk** as **fōk)**, *s.* [Eng. *folk*; *-mote*; A.S. *folc-gemót*.]

1. An assembly of the people to consider matters affecting the commonwealth; answering in some measure to a parliament.

"It is not a *folkmote*, although it represents the people."—*Stubbs: Select Charters*, p. 4.

2. A court-leet or local court.

"These held a court every fortnight, which they called the *folkmote*, or leet, and there became reciprocally bound for each other, and to the publick for their own peaceable behaviour, and that of their families and dependants."—*Burke: An Abridgment of English History*, bk. ii., ch. vii.

folk'-mōt-ēr, * folk'-moôt-ĕr (folk as **fōk)**, *s.* [Eng. *folkmot(e)*; *-er*.] One who frequents or attends a folkmoot; a democrat.

"The professional made four fours in quick succession, and the *follow on* was soon saved."—*Standard*, Sept. 3, 1882.

(2) *To follow suit*:

Cards: To play a card of the same suit as that first played; hence, generally, to follow the same line or course of action as that taken by a predecessor.

¶ (1) Crabb thus discriminates between to *follow*, to *succeed*, and to *ensue*: "*Follow* and *succeed* are said of persons and things; *ensue* of things only: *follow* denotes the going in order, in a trace or line; *succeed* denotes the going or being in the same place immediately after another; many persons may *follow* each other at the same time; but only one individual properly succeeds another. To *follow* in relation to things is said either simply of the order in which they go, or of such as go by a connexion between them; to *succeed* implies simply to take the place after another; to *ensue* is to *follow* by a necessary connexion."

(2) He thus discriminates between to *follow* and to *pursue*: "The idea of going after anything in order to reach or obtain it is common in these terms, but under different circumstances: one *follows* a person mostly with a friendly intention; one *pursues* with a hostile intention. In application to things, *follow* is taken more in the passive, and *pursue* more in the active sense: a man *follows* the plan of

another, and *pursues* his own plan; he *follows* his inclinations, and *pursues* an object."

(3) He thus discriminates between to *follow* and to *imitate*: "Both these terms denote the regulating of our actions by something that offers itself to us, or is set before us; but we *follow* that which is either internal or external; we *imitate* that only which is external. To *follow* and to *imitate* may both be applied to that which is good or bad: the former to all the actions, but the latter only to the behaviour or the external manners." (*Crabb: Eng. Synon.*)

follow-board, *s.*

Found.: A board beneath the pattern, and on which it lies while the loam is being rammed.

fŏl'-lō-ẽr, * **fol-ew-er,** * **fol-ware,** * **fol-wer,** *s.* [Eng. *follow*; *-er.*]

I. *Ordinary Language:*

1. One who comes or goes after another in the same direction.

2. One who pursues after another.

3. One who follows another as his leader or guide.

"Be ye *followers* of God, as dear children."—*Ephesians* v. 1.

4. One who seeks after or tries to attain anything.

"If ye be *followers* of that which is good."—1 *Peter* iii. 13.

5. One who follows another as an attendant or dependant.

"No Indian prince has to his palace
More *followers* than a thief to the gallows."
Butler: Hudibras, pt. ii., c. 1.

6. An associate, a companion.

"How accompanied, can'st thou tell that?
With Poins, and other his continual *followers*."
Shakesp.: 2 Henry IV., iv. 4.

7. One under the command of another.

"Little gallant, you were wont to be a *follower*, but now you are a leader."—*Shakesp.: Merry Wives*, iii. 2.

8. A servant, a retainer.

"What, fifty of my *followers* at a clap!"
Shakesp.: Lear, i. 4

9. One of the same party or faction.

10. A male sweetheart, a beau. (*Colloquial.*)

II. *Technically:*

1. *Law-stat.:* A sheet of parchment added on to the first sheet of an indenture or other deed.

2. *Mach.:* A portion of a machine, usually sliding in guides, and moved by another portion; as the reciprocating punch-stock in a fly-press, which is moved by the screw to which it is swivelled. It is analogous to the platen of many presses.

3. *Steam-engin.:* The cover or plug of a stuffing-box, which rests upon and compresses the packing; a gland.

4. *Scots Law:* One who pursues or sues another at law.

"Gif he be absent & contumace at the secunde anmmondis, he salbe condampnit be the Juge in the expensis of the *folowar*, & in xl s. for the kingis vnlaw."—*Parl. Jas. II.* (1449), *Acts* (ed. 1815), p. 37.

¶ Crabb thus discriminates between *follower*, *adherent*, and *partisan*: "A *follower* is one who follows a person generally; an *adherent* is one who adheres to his cause; a *partisan* is the follower of a party: the *follower* follows either the person, interests, or the principles of any one; thus the retinue of a nobleman, or the friends of a statesman, or the friends of any man's opinions, may be styled his *followers*; but the *adherent* is that kind of *follower* who espouses the interests of another: a *follower* follows near or at a distance; but the *adherent* is always near at hand; the *partisan* hangs on or keeps at a certain distance." (*Crabb: Eng. Synon.*)

follower-wheel, *s.*

Mach.: The wheel, in geared machinery, which is driven, as distinguished from the driver, or the wheel which impels.

fŏl'-lō-ĭng, *pr. par.*, *a.*, & *s.* [Follow.]

A. *As pr. par.:* (See the verb).

B. *As adj.:* Coming after or next; succeeding; next after, next described: as, The story is related in the *following* pages, or in the *following* manner.

C. *As substantive:*

1. The act or state of coming or going after or succeeding.

2. A body or party of adherents or followers; a sect or party under one leader or guide.

*3. The vocation, business, or profession which one follows.

fŏl'-lў, * **fol-i,** * **fol-ie,** * **fol-y,** * **fol-yo,** *s.* [O. Fr. *folie*, from *fol* = a fool; Port. *folia*; Ital. *follia.*]

1. Weakness of intellect; want of understanding; foolishness; imbecility.

"Despised by thee, what more can he expect
From youthful *folly* than the same neglect?"
Cowper: Tirocinium, 713.

2. An act of foolishness or thoughtlessness; weak, thoughtless, or unbecoming conduct.

"I was young, a single man,
And after youthful *follies* ran."
Wordsworth: Last of the Flock.

3. An act of criminal weakness; depravity; wickedness.

"Achan wrought *folly* in Israel."—*Joshua* vii. 15.

4. A term frequently applied to a building or work begun by its projector on a scale too large for his resources, and consequently abandoned before completed.

¶ Crabb thus discriminates between *folly* and *foolery*: "*Folly* is the abstract of foolish, and characterizes the thing; *foolery* the abstract of fool, and characterizes the person; we may commit an act of folly without being chargeable with weakness or *folly*; but none are guilty of *fooleries* who are not themselves fools, either habitually or temporarily." (*Crabb: Eng. Synon.*)

* **folly-fallen,** *a.* Grown foolish.

* **fŏl'-lў-ĭng,** *s.* [As if a pr. par. form of a v.i. to *folly* = to play the fool.] An act of folly, a piece of foolery; the act of playing the fool.

* 1. A fountain, a spring.

"From her native *font*, as proudly she doth flow."
Drayton Poly-Olbion, s. 10.

2. The vessel which contains the water for the purposes of baptism. The font is the only relic of our ancient architecture which in its form is at all analogous to the Grecian and Roman vases. The shape which has at different periods been given to it is a subject of some interest. Norman fonts are generally square or circular; the first frequently placed on five legs; but which may be the older form, the square or circle, is not yet known. The circular form continued to be much used during the Early English period; so, occasionally, was the square. Throughout the continuance of the Decorated style, the octagon was generally employed, sometimes the hexagon. During the Perpendicular style, the octagon was almost always used. Until the Reformation, and occasionally after, dipping was practised in this country. Pouring

FONT.

or sprinkling was not unusual previous to the Reformation; for as early as the year 754, pouring, in cases of necessity, was declared by Pope Stephen III. to be lawful; and in the year 1311, the Council of Ravenna declared dipping or sprinkling indifferent; yet dipping appears to have been in this country the more usual mode. Fonts were required to be covered and locked: originally their covers were simple flat movable lids, but they were subsequently very highly ornamented, assuming the form of spires, and enriched with various decorations in carved wood, taking the form of pinnacles, buttresses, &c.

"Entwine the cold baptismal *font*."
Tennyson: In Memoriam, xxix. 10.

* **font-name,** *s.* A baptismal or Christian name.

FONTANGE.
From a French Print of the Period.

"The commode called by the French *fontange*, worn on their heads by ladies at the beginning of the eighteenth century was a structure of wire, which bore up the hair and the forepart of the lace cap to a great height."—*Spectator*, No. 98. (Note by Prof. H. Morley.)

Fŏn-tĕ-vraud', Fŏn-tĕ-vrault' (aud, ault, as **ō),** *s.* [Fr., from Lat. *fontis Ebraldi*, so named from the place where the first monastery of the sect was erected on the confines of Angers and Tours.]

Ch. Hist.: A branch of the Benedictine order of monks which was instituted in the twelfth century by Robert of Abrissel, who brought monks and nuns under one roof, and placed them under the government of a female, because Jesus placed John in subjection to the Virgin Mary, saying "Woman, behold thy son" (John xix. 26). The founder of the monastery was suspected of immorality, a charge which his followers strenuously denied. In 1106 the order received the sanction of Pope Pascal II.; in 1113 it was exempted from episcopal jurisdiction. In 1177 some monks connected with it came over to England by invitation of Henry II. It was remodelled in 1507 by the Abbess Renée of Bourbon.

fŏnt-ĭc'-u-lŭs, *s.* [Lat., = a little fountain, dimin. of *fons* = a fountain.]

Surg.: A small ulcer produced, either by aid of caustics or by incisions, the discharge from which is kept up with a view to fulfil certain therapeutical indications. [ISSUE.]

fŏnt-ĭ-nā'-lē-ī, *s.* [Lat. *fontinal(is)* (q.v.), and masc. pl. suff. *-ei.*]

Bot.: A section of Bryaceæ (True Mosses); type Fontinalis (q.v.).

fŏnt-ĭn-ā'-lĭs, *s.* [Lat. = of or from an opening or fountain; *fons* (genit. *fontis*) = a spring or fountain.]

Bot.: A genus of mosses; the typical one of the section Fontinalei. The leaves are compressed, so as to make the stem look triquetrous. *Fontinalis antipyretica* is common in running streams. Its specific name is derived from the fact that, as it does not easily ignite, the Laplanders stuff the space between their chimneys and their walls with it as a precaution against fire.

foŏd (1), * **fode,** * **foode,** * **fude,** *s.* [A.S. *fóda*: cogn. with Icel. *fœdhi*, *fœdha*; Dut *föde*; Sw. *född.*]

I. *Ordinary Language:*

1. *Lit.:* In the same sense as II. 1.

"And wine and *food* were brought."
Tennyson: Enid & Geraint, 1,128.

2. *Figuratively:*

(1) Anything which nourishes, sustains, supports, or augments.

"Give us some music: music, moody *food*
Of us that trade in love."
Shakesp.: Antony & Cleopatra, ii. 5.

* (2) That which is fed, nourished, or brought up; a child.

"Wher that he sat or stode
She hiheld opon that frely *fode*."
Amis & Amiloun, 715.

II. *Technically:*

1. *Phys.:* Any substance which, taken into the body, is capable of sustaining or nourishing, or which assists in sustaining or nourishing the living being. Foods may be classed under three heads, gaseous, liquid, and solid, the first two consisting of the air we breathe—the oxygen of which is so essential to life—and the water we drink. Milk, tea, coffee, cocoa, &c., are popularly called liquid foods, but each of these is simply water in which various solid substances are dissolved, or held in suspension. The solid foods are of three kinds—viz., nitrogenous, non-nitrogenous, and mineral. Nitrogen compounds, or flesh-formers, are essentially composed of carbon, hydrogen, oxygen, and nitrogen. They possess the only ingredients capable of building up and repairing the nitrogenous tissues of the body. They also furnish a limited supply of heat, especially when heat-giving compounds are deficient in the body. Nitrogenous compounds are found both in the animal and vegetable kingdoms under the forms of albumen, fibrin, casein, gelatine, and chondrin. Non-nitrogenous compounds, or heat-givers, sometimes called carbonaceous compounds, are composed of carbon, hydrogen, and oxygen. They serve to keep up the heat of the body, and so produce energy or force. The chief heat-givers are starch, so abundant in the cereal grains, sugar, and fat. None of these substances will of itself sustain life. The mineral foods are the salts of soda and potash, the phosphates of lime and magnesia, iron, &c. Common salt is the only mineral substance purposely added to food, the other mineral substances being found in nearly all parts of plants and animals used as food. As the daily waste of the body must be met by a daily supply of nourishment, it becomes of the utmost importance that such supply should consist of both flesh-formers and heat-givers, and in the proportion of two parts of the former to six of the latter. Milk is a model food, as it furnishes all the nourishment required, and in due proportion. Scotch oatmeal may also be called a model food, as it contains one part of flesh-formers and 5½ parts of heat-givers. In fine wheaten flour the proportion is as one to eight, a part of the flesh-forming body having been removed in its preparation. The adulteration of any article of food reduces one or both of its essential constituents, hence such practices should be strongly condemned, and the adulterator severely punished.

2. *Zool.:* The food of animals is not directly derived from inorganic nature, but mediately through the agency of plants.

3. *Bot.:* Plants can feed upon and assimilate inorganic matter, in this respect differing from animals. A few plants, however, such as fungi, the Sun-dew (Drosera), and Venus's Fly-trap require animal food. The ordinary food of plants consists of carbon, water, and nitrogen.

¶ Crabb thus discriminates between *food, diet,* and *regimen:* "All these terms refer to our living, or that by which we live: *food* is here the general term; the others are specific. *Food* specifies no circumstance; whatever is taken to maintain life is *food; diet* is properly prescribed or regular *food. Food* is a term applicable to all living creatures; *diet* is employed only with regard to human beings who make choice of their *food. Diet* and *regimen* are both particular modes of living; but the former respects the quality of *food*; the latter the quantity as well as quality: *diet* is confined to modes of taking nourishment; *regimen* often respects the abstinence from *food,* bodily exercise, and whatever may conduce to health." (*Crabb: Eng. Synon.*)

And into well-sewed sacks poured *foodie* meale."
Chapman: Homer; Odyssey ii.

2. Fruitful; furnishing food; fertile.

"And all obseru'd for preseruation
Through all their *foodie,* and delicious fen."
Chapman: Homer; A Hymne to Hermes.

foôl (1) * **fol,** * **fole,** * **foole,** * **fule,** *a.* & *s.* [O. Fr. *fol* (Fr. *fou*), from Lat. *follis* = a pair of bellows, a windbag; pl. *folles* = puffed cheeks; hence transferred to a buffoon; Ital. *folle.*]

* **A.** *As adjective:*

1. Foolish, silly, stupid; wanting in intellect or sense.

"His moder was Sibriht sister, that was a *fole* kyng."
Robert de Brunne, p. 14.

2. Wicked, depraved.

"Bituene a king and a *fol* womman in spousbreche
Ibore." *Pilate,* 2.

B. *As substantive:*

I. *Ordinary Language:*

1. One who is destitute of reason or understanding; an idiot; a natural.

"'Tis time to leave this fooling now
Which none but *fools* call wit."
Browne: Songs; Palinode.

2. One who is deficient in reasoning power; one who acts or behaves stupidly, or irrationally, or absurdly.

"Some take him for a tool
Which knaves do work with called a *fool.*"
Butler: Hudibras, pt. i., c. i.

3. One who counterfeits folly; a buffoon, a jester; a retainer kept formerly by persons of rank, to make sport for his master and his guests. These fools were dressed in motley, wore a pointed cap and bells, and carried a mock sceptre or bauble in the hand.

"Where's my knave, my *fool?* Go you, and call my *fool* hither."—*Shakesp.: Lear,* i. 4.

* 4. A depraved person.

"He was a *fole* of lif, and vsed lichorie."
Robert de Brunne, p. 210.

II. *Scrip.:* In some passages *fool* is used in its ordinary English sense—viz., B. I. 2 (Prov. xii. 16, xvii. 28, xx. 3, xxix. 11; Eccl. v. 3; 1 Cor. xv. 36). In many others a fool is synonymous with a wicked man (2 Sam. xiii. 13; Ps. cvii. 17; Prov. xxxiii. 19, xxvi. 10; Matt. v. 22). According to Scripture teaching, it is not deficiency of intellect which makes a man a fool, but misuse of that which is possessed, and as responsibility is proportionate to the talents received, the higher the intellect of the man who misuses his endowments, the more he deserves the name of fool.

¶ (1) *To play the fool:*

(*a*) To act like a fool or one destitute of reason.

"If apostolic gravity he free
To play the fool on Sundays, why not we?"
Cowper: Progress of Error, 147.

(*b*) To act the part of a jester or buffoon.

"I returning where I left his armour, found another instead thereof, and armed myself therein to *play the fool.*"—*Sidney: Arcadia.*

"To be thought knowing, you must first *put the fool upon* all mankind."—*Dryden: Juvenal.* (Pref.)

(3) *To make a fool of:* To cause to appear ridiculous; to deceive, to disappoint.

"To challenge him to the field, and then to break promise with him, and *make a fool of* him."—*Shakesp.: Twelfth Night,* ii. 3.

(4) *Feast of fools:*

Eccles. & Ch. Hist.: A feast which was formerly held in some churches and monasteries in France on New Year's Day. Much licence of folly and even of indecency was tolerated, whence the name of the festival. It flourished from about the year 1198. In 1435 the Council of Basle censured it, and the Parliament of Dijon in 1532 suppressed it in that part of France. It reached England in 1240, and was abolished about A.D. 1400. It was probably a Christianised relic of the Roman Saturnalia.

(5) *Order of Fools:*

Hist.: A benevolent association founded by Adolphus, Count of Cleves, in 1381. It continued till the sixteenth century.

¶ Crabb thus discriminates between *fool, idiot,* and *buffoon:* "The *fool* is either naturally or artificially a *fool; the idiot* is a natural *fool; the buffoon* is an artificial *fool:* whoever violates common sense in his actions is a *fool;* whoever is unable to act according to common sense is an *idiot;* whoever intentionally violates common sense is a *buffoon.*" (*Crabb: Eng. Synon.*)

* **fool-begged,** *a.* Foolishly or absurdly begged; idiotic, absurd.

"If thou live to see like right bereft
This *fool-begged* patience in thee will be left."
Shakesp.: Comedy of Errors, ii. 1.

* **fool-hold,** *a.* Foolishly bold; rash; foolhardy.

"Some in corners have been *fool-bold.*"—*Leland.*

* **fool-born,** * **fool-borne,** *a.* Produced by a fool; tolerated by none but fools.

"To *fool* the crowd with glorious lies."
Tennyson: In Memoriam, cxxvii. 14.

* **2.** To infatuate; to make foolish.

"If it be you that stir these daughters' hearts
Against their father, *fool* me not so much
To bear it tamely." *Shakesp.: Lear*, ii. 4.

3. To cheat, to defraud.

"Ah! let me not be *fooled*, sweet saints."
Tennyson: St. Simeon Stylites, 209.

¶ *To fool away:*

(1) To waste on objects of little or no value; to fritter away.

"It must be an industrious youth that provides against age; and he that *fools away* the one, must either beg or starve in the other."—*L'Estrange.*

* (2) To cause or induce to act foolishly; to lead astray.

fo͝ol'-ĕr-ў, *s.* [Eng. *fool*; *-ery.*]

1. The actions, manners, or characteristics of a fool; habitual folly; the act of playing the fool; folly.

"They to the vulgar sort now pipe and sing,
And make them merrie with their *fooleries.*"
Spenser: Tears of the Muses.

2. An act of folly; an absurdity.

"All such *fooleries* are quite inconsistent with that manly simplicity of manners, which is so honourable to the rational character."—*Beattie: Moral Science*, pt. i., ch. ii., § 5.

3. An object of folly or weakness; an absurdity.

"That Pythagoras, Plato, or Orpheus believed in any of these *fooleries*, it cannot be suspected."—*Raleigh: History.*

¶ For the difference between *foolery* and *folly*, see FOLLY.

* **fo͝ol'-har-dĭ-hoo̍d,** *s.* [Eng. *foolhardy*; *-hood.*] Foolhardiness.

"Open the door, secure, *foolhardy* king."
Shakesp.: Richard II., ii. 17.

¶ Crabb thus discriminates between *foolhardy*, *adventurous*, and *rash*: "The *foolhardy* expresses more than the *adventurous*; and the *adventurous* than the *rash*. The *foolhardy* man ventures in defiance of consequences: the *adventurous* man ventures from a love of the ardnous and the bold; the *rash* man ventures for want of thought: courage and boldness become foolhardihood when they lead a person to run a fruitless risk; an *adventurous* spirit sometimes leads a man into unnecessary difficulties; but it is a necessary accompaniment of greatness. There is not so much design, but there is more violence and impetnosity in rashness than in foolhardihood: the former is the consequence of an ardent temper which will admit of correction by the influence of the judgment; but the latter comprehends the perversion of both the will and the judgment." (*Crabb: Eng. Synon.*)

* **fo͝ol'-ĭ-fў,** *v.t.* [Eng. *fool*; *i* connective; suff. *-fy.*] To make a fool of, to fool.

"They being throughly taught how with excessive flatterie to bear him up, *foolified* and guiled the man."—*P. Holland: Ammianus Marcellinus*, p. 43.

1. A ball, consisting of an inflated bladder, or globe of india-rubber encased in leather, and used in the game of football.

"The inglorious *football* mounted to the pitch
Of the lark's flight."
Wordsworth: Excursion, bk. vii.

2. A game played with a football by two parties, generally consisting of fifteen players on each side. At each end of the ground is a goal formed by two upright posts or bars, six to eight yards apart with a bar extended between them at a height of eight or ten feet. The object of each side is to drive or force the ball through their adversaries' goal. This game, of early English origin, was very little played in the United States until about twenty-five years ago, but is now the favorite intercollegiate game. There are two ways of playing it: in one it must be kicked with the foot, in the other the player is allowed to take the ball in his hands and run with it. The latter is the common United States method, and the mode of play is rough and dangerous. The rules have recently been modified in order to make it less injurious.

II. *Technically:*

1. *Palæont.:* The footmarks or imprints left at inconceivably remote periods by the feet of various animals on the wet clay or sand of sea-beaches or similar localities, and which are now found at various levels in the solid strata of the earth. The footprints in the Silurian and other very antique rocks, are mostly those produced by the claws of crustaceans. In the Triassic rocks of the State of Connecticut, the footprints of thirty-two or more species of bipeds, and twelve of quadrupeds, have been found. In rocks of nearly the same age in Europe, footprints, so like those of the human hand that the animal making them was called at first Chirotherium (q.v.), were at last skilfully assigned by Prof. Owen to the genus of amphibians called by him, from its teeth, Labyrinthodon. It is in allusion to this phenomenon that Longfellow speaks of a hero leaving "footprints on the sands of time."

2. *Comp. Mythol.:* The first mention in history of gigantic footprints is by Herodotus (iv. 82), where he says he was shown a footprint of Hercules impressed on a rock, in the shape of a man's foot, but two cubits in length, and (ii. 91) he attributes sandals of the same size to Perseus. Traditions as to such footprints are found in all religions, the most common being that they were made when some god or hero ascended to heaven. Brahmans, Buddhists, Moslems, and Oriental Christians agree in reverencing the cavity in the rock, five feet long by two and a-half feet wide, at the top of Adam's Peak, though their reasons for so doing are, of course, different. Like legends are also found in the islands of the Pacific, in the United States, and in Mexico. The myth probably arose from rude peoples first investing chiefs or leaders of a bygone age with gigantic size; the next step was deification; then to imagine either fossil footmarks of some huge beast, or hollows naturally formed, or rudely sculptured rocks were the last impress of the foot of such hero as he ascended, was by no means difficult.

"The typical case is the sacred *footprint* of Ceylon." —*Tylor: Early Hist. Mankind*, ch. vi.

footprint-myth, *s.*

Comp. Mythol.: A myth by which any cavities in rocks are marked out as being the footprints of some god or hero.

for- (1), *pref.* [A.S. *for-*; Icel. *for-*; Dan. *for-*; Sw. *för-*; Dut. & Ger. *ver-*; Goth. *fra-*; Sansc. *parâ-*.]

For- as a prefix to verbs has three forces:

1. An intensive force; equivalent to utterly, extremely, completely, very greatly: as in *for*lorn = utterly lorn or lonely; *for*wearied = wearied out; *for*drunken = very druuk, &c.

2. A negative or privative force: as in *for*bid = to bid away from, to prohibit; *for*fend = to keep or fend off, to avert, &c.

3. The force of amiss or badly: as *for*shapen = badly shapen, misshapen.

for- (2), *pref.* [O. Fr. *for-*, from Lat. *foris* = outside.] A prefix with the force of outside, without: as in *for*eclose (properly *for*close) = to shut out, to exclude; *for*feit = done beyond or outside.

fŏr'-age (age as **ĭj), * for-rage,** *s.* [O. Fr. *fourage* (Fr. *forerrage*), from *forrer* = to forage, from *forre, fuerre* (Fr. *feurre*) = fodder, straw, from Low Lat. *fodium;* from O. Dan. *föder* = fodder (q.v.); Sp. *forrage;* Port. *forragem;* Ital. *foraggio.*]

1. Fodder, provisions; especially such as are obtained by pillage.

"Cæsar sent forth all his men of arms for *forrage*."—*Goldinge: Cæsar*, p. 118.

2. The act of seeking for or providing provisions; the act of foraging.

3. A pasture or feeding place.

"One way a band select from *forage* drives
A herd of beeves." *Milton: P. L.*, xi. 646.

* 4. The act of preying; ravage; destructive fury.

"He [the lion] from *forage* will incline to play."
Shakesp.: Love's Labour's Lost, iv. 1.

* 5. Food of any kind.

"With greens and flowers recruit their empty hives,
And seek fresh *forage* to sustain their lives."
Dryden: Virgil; Georgic iv. 364, 365.

fŏr'-age (age as **ĭj), * for-rage, * fonr-rage,** *v.i.* & *t.* [Fr. *fourrager;* Ital. *foragiare;* Sp. *forragear.*] [FORAGE, *s.*]

A. *Intransitive:*

1. To wander in search of forage or provisions; to seek for forage.

"They would not permit the Romans, no, not so much as to go a *foraging* into their territorie."—*P. Holland: Livius*, p. 375.

2. To seek for food or provisions of any kind.

"One night, a *foraging* for prey,
He found a store-house in his way."
Valden: Fox & Weasel.

* 3. To prey; to ravage.

"His most mighty father on a hill
Stood smiling, to behold his lion's whelp
Foraging in blood of French nobility."
Shakesp.: Henry V., i. 2.

* 4. To reconnoitre; to act as a vidette.

"Ten thousand horse shall *forage* up and down,
That no relief or succour come by land."
Marlowe: 1 Tamburlaine, iii. 2.

B. *Transitive:*

* 1. To plunder; to ravage; to strip; to spoil of forage.

"To pillage and *fourrage* all your townes and cyties of Peloponese."—*Nicoll: Thucydides*, fo. 30.

2. To supply with forage or fodder: as, To *forage* horses.

Zool.: An individual belonging to the order Foraminifera (q.v.).

fŏr-ă-mĭn-ĭf'-ĕr-ạ, *s. pl.* [Lat. *foramen* (genit. *foraminis*) = a hole, an opening, an aperture, and *fero* = to bear. So named from their perforated shells. (See def.).]

1. *Zool.:* An order of animals belonging to the sub-kingdom Protozoa, and the class Rhizopoda (q.v.). The body is contained within a calcareous test or shell, which is polythalamous (many chambered). It may be cylindrical or spiral, or it may tend to the pyramidal form. The outer surface presents a punctate or dotted appearance, produced by the presence of very numerous foramina. [See def.] The chambers in some are perfectly distinct from others, though so aggregated as to form a compound shell; in others they are connected with a funnel-like tube. The inside of the shell has an extensile and contractile sarcode of a reddish or yellow colour, a thin film of which also invests its outside. Foraminifers are always of small size, and often indeed microscopic. With the exception of Gromia, which occurs both in fresh and salt water, they are exclusively marine. Sometimes their shells constitute sea-sand. In the Atlantic, at a depth of 3,000 fathoms, there is an ooze composed almost entirely of Globigerinæ, which belong to this order; the stratum thus formed is a direct continuation of the white chalk deposit, having gone on apparently through the whole Tertiary period. Drs. Carpenter and Parker, and Prof. T. Rupert Jones have divided the Foraminifera thus:—

Sub-order I.—Imperforata. Families: (1) Gromida, (2) Miliolida, (3) Lituolida.
Sub-order II.—Perforata. Families: (1) Lagenida, (2) Globigerinida, and (3) Nummulinida.

2. *Palæont.:* The exceedingly antique Eozoon of the Laurentian rocks, if organic, as it is generally believed to be, was apparently a Foraminifer. Forms more unequivocal, some of them very like recent species, occur in the Silurian, the Carboniferous, and other strata.

They occur through all the Secondary period, chalk being almost entirely composed of their cases. [1.] They increase in number and importance in the Tertiary. The Nummulites of the Middle Eocene are foraminiferous animals. The type of the order has remained wonderfully constant from the earliest times till now.

fŏr-ă-mĭn-ĭf'-ĕr-al, *a.* [Eng. &c. *foraminifer*; *-al.*] The same as FORAMINIFEROUS (q.v.).

fŏr-ă-mĭn-ĭf'-ĕr-ous, *a.* [Eng. &c. *foraminifer*; *-ous.*]

"Now the gods *forbid*
That our renowned Rome
Should now eat up her own."
Shakesp.: Coriolanus, iii. 1.

¶ Crabb thus discriminates between to *forbid*, to *prohibit*, and to *interdict*: "*Forbid* is the ordinary term; *prohibit* is the judicial term; *interdict* the moral term. To *forbid* is a direct and personal act; to *prohibit* is an indirect action that operates by means of extended influence: both imply the exercise of power or authority of an individual; but the former is more applicable to the power of an individual, and the latter to the authority of government. *Interdict* is a species of *forbidding* applied to more serious concerns. A thing is *forbidden* by a word; it is *prohibited* by a law: hence that which is immoral is *forbidden* by the express word of God; that which is illegal is *prohibited* by the laws of man. . . . To *forbid* or *interdict* are opposed to command; to *prohibit*, to allow. *Forbid* and *interdict*, as personal acts, are properly applicable to persons only, but by an improper application are extended to things; *prohibit*, however, in the general sense of restraining, is applied with equal propriety to things as to persons; shame *forbids* us doing a thing; law, authority, and the like, *prohibit.*" (*Crabb: Eng. Synon.*)

* **for-bĭd'-ąnce,** *s.* [Eng. *forbid*; *-ance.*] The act of forbidding, prohibiting, or interdicting; a prohibition, an interdiction.

"How hast thou yielded to transgress
The strict *forbiddance*, how to violate
The strictest fruit forbiddeu?"
Milton: P. L., ix. 963.

for-bĭd'-dеn, * **for-bid,** *pa. par.* or *a.* [FORBID, *v.*] Prohibited, interdicted.

"A monarch's errors are *forbidden* game."
Cowper: Table Talk, 114.

forbidden-fruit, *s.*

1. *Ord. Lang.:* The fruit of the tree of the knowledge of good and evil, which our first parents were commanded not to eat. What fruit it was is wholly unknown. (Gen. ii. 9; iii. 3–6, 11, 17.)

2. *Bot.:* Various species of Citrus (q.v.). In the West Indies, the London markets, and other parts of the British empire, it is *Citrus Paradisi*, a small-fruited variety of the Shaddock (*Citrus decumana*). The Forbidden-fruit of the French is the Sweet-skinned orange (a variety of the common orange (*C. Aurantium*); that of Italy a variety of the Lime (*C. Limetta*).

* **for-bĭd'-dеn-lў,** *adv.* [Eng. *forbidden*; *-ly.*] In a forbidden manner; against commands.

"With all confidence he swears, as he had seen it,
That you have touched his queen *forbiddenly*."
Shakesp.: Winter's Tale, i. 2.

* **for-bĭd'-dеn-nĕss,** *s.* [Eng. *forbidden*; *-ness.*] The quality or state of being forbidden, prohibited, or interdicted.

"Nothing but *forbiddenness* of self-dispatch hindered his acting it."—*Boyle: Works*, i. 23.

†**for-bĭd'-dĕr,** *s.* [Eng. *forbid; -er.*] One who or that which forbids, prohibits, or interdicts anything; one who issues a prohibition or interdiction.

"Other care, perhaps,
May have diverted from continual watch
Our great *forbidder.*" *Milton: P. L.*, ix. 815.

for-bĭd'-dĭng, *pr. par., a., & s.* [FORBID, *v.*]

A. *As pr. par.:* (See the verb).

B. *As adjective:*

1. Issuing or uttering a prohibition or interdiction.

2. Repelling, repulsive, disagreeable; giving rise to abhorrence, aversion, or dislike.

"Towards the cottage: homely was the spot,
And to my feeling, ere we reached the door,
Had almost a *forbidding* nakedness."
Wordsworth: Excursion, bk. ii.

C. *As subst.:* The act of prohibiting or interdicting; a prohibition or interdiction.

"The *forbidding* of the Bible to be read in any vulgare tong."—*Sir T. More: Wales*, p. 243.

for-bĭd'-dĭng-lȳ, *adv.* [Eng. *forbidding; -ly.*] In a forbidding, repulsive, or disagreeable manner; repulsively.

for-bĭd'-dĭng-nĕss, *s.* [Eng. *forbidding; -ness.*] A forbidding or repulsive quality; something which repels.

"There may be a *forbiddingness* in the person."—*Richardson: Sir C. Grandison*, iii. 264.

***for-bīnd',** *v.t.* [A.S. *forbindan*; O. H. Ger. *farbindan.*] To bind strongly.

"Himm that in cwarrterne lith
Forrbindenn and forrthrungenn." *Ormulum*, 6,168.

***for'-bĭsh,** *v.t.* [FURBISH.]

***for-bis-en,** ***for-bisne,** *s.* [A.S. *forebysn.*] An example.

"He gaf us *forbisne* of admodnesse." — *Old Eng. Homilies*, ii. 89.

***for-bis-en-ing,** *s.* [FORBISEN.] A parable, an allegory.

"I sal open mi mouth in *forbiseninges.*"
E. Eng. Psalter, Ps. lxxii. 2.

***for-bī'te,** *v.t.* [Dut. *verbijten*; L. Ger. *verbiten.*] To bite or eat away utterly.

"*Forbiteth* the blosmes right to the hare leves."
Piers Plowman, 10,857.

***for-bled,** ***for-bledd,** *a.* [L. Lat. *verblöden*; Sw. *förblöda*; Dan. *forblöde.*] Covered with blood.

"Thi hlyssyd bodye alle *forbled.*"
Legends of Holy Rood, p. 191.

***for-blīnd',** ***for-blend,** *v.t.* [M. H. Ger. *verblenden*; Sw. *förblanda.*] To make quite blind.

"Sinne *forrblendeth* all thin heorrte."
Ormulum, 2,984.

***for-blōw',** *v.t.* [A.S. *forblawan.*] To drive or toss about with the wind.

"The ship which is . . . forstormed and *forblowe.*"
Gower, i. 160.

***for-bod,** ***for-bode,** ***for-bot,** *s.* [A.S. *forbod*; Dut. *verbod*; Dan. *forbut*; Sw. *förbud.*] A prohibition, an interdiction.

"Again the kinges *forbode.*"
Legend of St. Katherine, 2,230.

***for-bod-en,** *pa. par.* or *a.* [FORBID, *v.*]

for-bō're, *pret. & pa. par.* [FORBEAR, *v.*]

for-bōr'ne, *pa. par.* [FORBEAR, *v.*]

***for-bow,** ***for-buw-en,** ***for-bugh-en,** *v.t.* [A.S. *forbýgan.*] To avoid, to shun.

"Heo . . . forbereth ham and *forbuweth* ham."—*Ancren Riwle*, p. 380.

for-brēāk', ***for-broke,** *v.t.* [A.S. *forbrecan*; O. H. Ger. *farbrechan*; M. H. Ger. *verbrechen*; Dut. *verbreken.*] To break utterly or to pieces; to destroy utterly.

"The snare *forbreken* is in al
And we lesed ere awal."
Early Eng. Psalter, Ps. cxxiii. 7.

***for-brū'ĭse,** * **for-brose,** * **for-bruse,** *v.t.* [Pref. *for-* (1), and Eng. *bruise* (q.v.).] To bruise exceedingly.

"Al *forbrosed* bothe bak and syde."
Chaucer: C. T., 16,099.

***for-buȳ',** * **for-bigge,** * **for-bugge,** *v.t.* [Pref. *for-* (1), and Eng. *buy* (q.v.).]

1. To buy off.

"He which . . . for no gold may be *forbought*
The deth." *Gower*, i. 312.

2. To deliver, to release.

"Y the Lord that shal lede you out and *forbigge* in an onerpassing arm."—*Wyclife: Exodus* vi. 6.

***for-buȳ'-ĕr,** * **for-bi-er,** * **for-big-ger,** *s.* [Eng. *forbuy*; *-er.*] One who releases or redeems; a redeemer.

"I wote, he seith, that my *forbier* lyueth."—*Wyclife: Epistle* (Pref.), p. 66.

for-bȳe', * **for-by,** * **for-bi,** *prep. & adv.* [Dut. *voorbij*; Low Ger. *vorbi, vörbi*; Sw. *förbi*; Dan. *forbi.*]

A. *As preposition:*

* 1. Through, along.

"Alisaunder . . . flyngeth gode showr hem *forby.*"
Alisaunder, 5,487.

* 2. Beyond, above.

"I helded mi hert to do, *forbi* all thinge, thi right-wisenesse." *E. Eng. Psalter, Ps.* cxviii. 112.

3. Besides, over and above, in addition to.

* 4. Near to, beside, hard by.

"To rest him selfe *forby* a fountain side."
Spenser: F. Q., I. vii. 2.

* 5. According to.

"*Forbi* min red quath thu non dei.'
Genesis & Exodus, 3,987.

* 6. With, by.

"He tooke her up *forby* the lilly hand."
Spenser: F. Q., V. xi. 17.

* **B.** *As adv.:* By, past, along.

"As sche cam *forby* ther the juge stood."
Chaucer: C. T., 13,640.

***for-car've,** * **for-cerve,** *v.t.* [A.S. *forceorfan.*] To cut to pieces.

"A . . . *forcarf* ys cappe of maille."
Sir Ferumbras, 731.

***for-cat,** * **foir-chet,** *s.* [Fr. *fourchette.*] A rest for a musket.

"That euerie ane of thair nychtbouris burgessis he furnist with ane pik, ane halbert or tua handit suorde, or ells ane muscat with *forcat*, beadrole, and heidpece."—*Acts Jas. VI.*, 1598 (ed. 1814), p. 196.

fôrçe (1), * **fors,** *s.* [Fr. *force*, from Low Lat. *fortia* = strength, from Lat. *fortis* = strong; O. Sp. *forza*; Sp. *fuerza*; Ital. *forza*; Port. *força.*]

I. *Ordinary Language:*

1. Strength, vigour, might, active power.

"Withoute whom al *force* is feblnesse."
Lydgate: Minor Poems, p. 247.

2. Violence; power exerted against the will or consent; coercion.

"For *force* or fraud, resistance or escape"
Scott: The Poacher.

3. Necessity. [PERFORCE.]

"Then of *force* must your oblations be."
Shakesp.: Lover's Complaint, 223.

4. The power or energy exerted by a moving body: as, the *force* of the wind or waves.

5. Virtue; efficacy.

"This flower's *force* in stirring love."
Shakesp.: Midsummer Night's Dream, ii. 2.

6. Full intent; meaning.

"I understand very clearly the *force* of the term."—*Burke: Sublime & Beautiful*, pt. iii., § 2.

7. Validity; legality.

"A testament is of *force* after men are dead."—*Hebrews* ix. 17.

8. Moral power or efficacy to convince the mind; persuasive or convincing power.

"No definitions, no suppositions of any sect, are of *force* enough to destroy constant experience."—*Locke.*

* 9. Matter, importance; ground for care or anxiety.

"What *fors* were it though al the town biheide?"
Chaucer: Troilus & Cressida, ii. 378.

10. Power or strength in war; an armament; troops; naval or military array, with their equipment and appurtenances. (Frequently in the plural.)

"O Thou! whose captain I account myself,
Look on my *forces* with a gracious eye."
Shakesp.: Richard III., v. 3.

11. A body of men trained for action in any way: as, a police *force.*

II. *Technically:*

1. *Law:* Unlawful violence done or offered to person or property.

2. *Physics:* An influence or exertion which, if made to act on a body, has a tendency to move it when at rest, or to affect or stop its progress if it be already in motion. The strength of man's arms is a force, so is the power of a horse or ox to pull a vehicle, or turn a wheel, or set in action an agricultural machine. Gravity, friction, elasticity of springs or gases, electrical or magnetical attraction or repulsion are forces.

3. *Mental Philos., &c.:* [MORAL FORCE].

¶ (1) *Accelerated force:*

Physics: The increased force which a body exerts in consequence of the acceleration of its motion.

(2) *Active force:*

Physics: Force which tends to move another body from a state of rest.

(3) *Animal force:*

Physics: The muscular strength of man, horses, asses, cattle, or other animals viewed as a moving power.

(4) *Centrifugal force:* [CENTRIFUGAL].

(5) *Centripetal force:* [CENTRIPETAL].

(6) *Composition of forces:*

Physics: A force produced by two other ones acting on a body. If they operate in the same direction the resultant or the resulting force will be the sum of both. If the two forces act in opposite directions and are equal, they will make the body remain at rest; if they be unequal, they will move in the direction of the greater one, and with a force equivalent to their difference. If the lines of direction make an angle with each other, the resultant will be a mean force in an intermediate direction. If many forces act, the resultant is the line of motion or state of rest produced by their conjoint action. [*Resolution of Forces*; PARALLELOGRAM.]

(7) *Conservation of force,* or *of energy,* or *of vis viva:*

Physics: The doctrine or principle that in all cases force is conserved—i.e., kept in existence even when it appears to perish. Just as a certain definite amount of matter exists in the universe, to which man cannot add, and from which he cannot subtract an atom, so a definite amount of force, incapable of being increased or diminished, exists like the former, in the universe. It can, however, be transformed so as to look quite unlike its former self; but in every case the force or energy communicated to a body or system of bodies is withdrawn from some fund or energy previously existing. [*Correlation of force.*]

(8) *Correlation of force, energy,* or *vis viva:*

Physics: The doctrine or principle that the different kinds of force in the universe are so correlated together that any one can be transformed into an exactly equivalent amount of another. There is equality when one can do precisely the same amount of work as any other. It has long been known that in a machine, the screw for example, what is gained in power is lost in velocity, and *vice versâ.* At first sight motion and heat seem to have no relation to each other; but if a moving body be suddenly arrested in its career, as, for instance, a bullet by a target, heat will be generated, and the same number of units of the work which the motion was capable of effecting can be achieved also by the heat. Conversely, a certain amount of heat can produce an equivalent one of motion; thus the working energy communicated to the piston of a steam-engine is withdrawn from the heat of the steam, and exactly balances the latter. Similarly, when the form of a body is changed by the action of forces, in the way that a spring may be coiled up, the exact amount of force requisite to roll it into form will exist as potential energy in the spring.

(9) *Effective force:* [VERTICAL].

(10) *Equilibrium of forces:*

Physics: The action of forces which, balancing each other, produce an equilibrium or state of balance, or rest in the body or bodies on which they operate.

(11) *Impressed force:* [VERTICAL].

(12) *Impulsive force:*

Nat. Phil.: A force which acts on a body for an unappreciably short time, as when one body strikes another. It is called also an Instantaneous force (q.v).

(13) *Instantaneous force:* [*Impulsive force*].

(14) *Kinetic force:*

Physics: The actual force excited by a moving body as distinguished from the potential force which it is capable of creating.

(15) *Measure of force:*

Physics: The measurement of the magnitude of a force, which is done by noting the momentum which it communicates to a body in a unit of time. [*Unit of force.*]

(16) *Mechanical force:*

Physics: Force of a mechanical nature acting on material bodies. It may be either that of the active force of a body in motion, or the tension or resistance opposed by a body at rest.

(17) *Molecular forces:*

Nat. Phil.: Forces which by means of certain attractions and repulsions, retain the atoms of matter side by side without their touching each other. [Atom; Molecules.]

(18) *Moments of force:* [Moment.]

(19) *Moral force:*

Mental Phil.: Force operating on the human mind as distinguished from Physical force (q.v.). A threat is the exertion of moral force, a blow is the application of physical force.

(20) *Natural forces:*

Nat. Phil.: The physical agents which act upon matter. Specif. gravitation, heat, light, magnetism, and electricity.

(21) *Parallelogram of forces:* [Parallelogram.]

(22) *Physical force:*

Ord. Lang. & Physics: The operation of any thing physical or mechanical on a material body. It is opposed to Moral force (q.v.).

(23) *Polar forces:*

Magnetism, Elect., &c.: Forces acting at the two opposite poles of a body.

(24) *Polygon of forces:* [Polygon].

(25) *Potential force:*

Physics: The whole force which a body in motion can exert, as distinguished from the kinetic force which it is exerting at the specific moment of time.

(26) *Resisting & retarding forces:*

Physics: Forces which tend to resist or retard the progress of a moving body.

(27) *Resolution of forces:*

Physics: The resolution or decomposition of a force into the forces which by their conjoint action produced it.

(28) *Retarding forces:* [*Resisting forces*].

(29) *Triangle of forces:* [Trianole].

(30) *Unit of force:*

Physics: The force which, acting on a pound of matter, would in one second produce a velocity of a foot per second.

¶ (1) *Of force:* Of necessity; necessarily.

"We must, *of force*, dispense with this decree;
She must lie here of mere necessity."
Shakesp.: Love's Labour's Lost, I. 1.

* (2) *No force:* No matter.

"*No force*, I wote wheder I shalle."
Towneley Mysteries, p. 16.

* (3) *To make force,* * *To give force:* To care, to be concerned.

"Thereof *mad* thal no *force*."
Robert de Brunne, p. 204.

(4) *To come into force:* To be enforced; to be carried out.

¶ (1) Crabb thus discriminates between *force*, and *violence:* "Both these terms imply an exertion of strength; but the former in a much less degree than the latter. *Force* is ordinarily employed to supply the want of a proper will, *violence* is used to counteract an opposing will. *Force* is mostly conformable to reason and equity; *violence* is always resorted to for the attainment of that which is unattainable by law. In an extended and figurative application to things, these terms convey the same general idea of exerting strength." (*Crabb: Eng. Synon.*)

(2) For the difference between *force* and *energy*, see Energy.

force-pièce, s.

Min.: A piece of timber placed in a level shaft to keep the ground open.

force-pump, s.

1. *Mech.:* A pump which delivers the water under pressure, so as to eject it forcibly or deliver it at an elevation. The term is used in contradistinction to a lift-pump, in which the water is lifted, and simply runs out of the spout. The single-acting force-pump is that in which the lift and delivery are alternate. The double-acting is that in which the passages are duplicated, so that a lift and delivery are obtained by each motion of the plunger; the pump has a distinct water-way both above and below the piston, so as both to draw and force water at each stroke, and thus cause a continuous stream, which is rendered more uniform by an air-chamber.

2. *Steam-eng.:* The boiler-supply pump sometimes connected to the piston-rod of the cylinder of a locomotive.

fŏrçe (2), *s.* [Dan. *fos*; Icel. *foss, fors.*] A waterfall.

"After dinner I went along the Milthrope turnpike four miles to see the falls or *force* of the river Keut."—*Gray: Lett. to Dr. Wharton.*

fŏrçe (1), * **forso,** *v.t. & i.* [Fr. *forcer*, from *force* = strength; Sp. *forzar*; Port. *forçar*; Ital. *forzare.*]

A. *Transitive:*

1. To compel or constrain by force or superior power to do or to forbear from any act.

"I have been *forced* to use the cant words of Whig and Tory."—*Swift: Examiner.*

* 2. To enforce, to urge, to exert.

"High on a mounting wave my head I bore,
Forcing my strength, and gathering to the shore."
Dryden: Virgil; Æneid vi. 487.

3. To drive, impel, push, or press by main strength.

"Thou shalt not destroy the trees by *forcing* an axe against them."—*Deut.* xx. 19.

4. To drive or drag away by violence or might.

"*Forced* from home and all its pleasures,
Afric's coast I left forlorn."
Cowper: Negro's Complaint.

5. To gain or draw by violence or power; to extort. (Followed by *from.*)

"If they *forced* from me one kind look or word."
Dryden. (*Johnson.*)

6. To compel by strength of evidence; to compel morally: as, To *force* conviction upon a person.

7. To press with force or energy.

"*Forcing* our own opinions upon others."—*Clarke: Sermons*, vol. i., ser. 48.

* 8. To storm; to take or enter by violence.

"Troy walled so high,
Th' Atrides might as well have *forced* the sky."
Waller: His Majesty's Repairing of St. Paul's, 60.

9. To ravish; to violate by force.

"To do a murderous deed, to rob a man,
To *force* a spotless virgin's chastity."
Shakesp.: 2 Henry VI., v. 1.

10. To excogitate or extort, not naturally, but by wresting straining, or distorting of ideas; to strain, to distort.

"Our general taste in England is for epigram, turns of wit, and *forced* conceits."—*Addison: Spectator.*

11. To compel oneself to give utterance or expansion to; to assume: as, To *force* a smile, To *force* a show of interest.

12. To bring to maturity before the natural or ordinary time; to cause to ripen or produce fruit prematurely; to cause to grow or ripen by artificial heat.

13. To endeavour to produce intellectual results at a premature age: as, To *force* a child's mental faculties.

* 14. To man; to garrison; to strengthen or furnish with soldiers; to reinforce.

"Were they not *forced* with those that should be ours,
We might have met them dareful, beard to beard."
Shakesp.: Macbeth, v. 5.

* 15. To put in force; to enact; to enforce; to make binding.

"What can the church *force* more?"
J. Webster. (*Webster.*)

* 16. To care for, to regard, to value.

"I *force* not argument a straw."
Shakesp.: Rape of Lucrece, 1,021.

* **B.** *Intransitive:*

1. To lay any stress; to care; to be concerned; to hesitate.

"Your oath once broke, you *force* not to forswear."
Shakesp.: Love's Labour's Lost, v. 2.

2. To think of importance.

"I *force* not of such fooleries."—*Camden; Remains: Wise Speeches.*

3. (*Impersonally*): To be of importance; to signify.

"It little *forceth* how long a man live, but how wel and vertuously."—*Udal: Mark* v.

4. To use force or violence; to strive, to endeavour.

"Howbeit in the ende, perceiving those men did more fiercely *force* to gette up the hill."—*North: Plutarch.*

¶ For the difference between to *force* and to *strain*, see Strain.

* **fŏrçe** (2), *v.t.* [Fr. *farcer* = to stuff.]

1. To stuff.

"Malice *forced* with wit."
Shakesp.: Troilus & Cressida, v. 1.

2. To exaggerate.

"With fables vaine my historie to fill,
Forcing my good, excusing of my ill."
Mirrour for Magistrates, p. 52.

* **force-a-ble,** *a.* [Forcible.]

fŏrçed, *pa. par. & a.* [Force, *v.*]

A. *As pa. par.:* (See the verb).

B. *As adjective:*

1. Compelled, constrained.

2. Strained, affected, unnatural: as, a *forced* style, a *forced* metaphor.

* **fŏrç'-ĕd-lў,** *adv.* [Eng. *forced; -ly.*] In a forced, strained, or unnatural manner; constrainedly; unnaturally.

* **fŏrç'-ĕd-nĕss,** *s.* [Eng. *forced; -ness.*] The quality or state of being forced, strained, or unnatural.

"Against the *forcedness* and incongruity of this sense much might be said."—*Worthington: On the Millennium*, p. 2.

* **fŏr'çe-fûl,** *a.* [Eng. *force; -ful(l).*]

1. Full of or possessing force, power, or violence; forcible.

"Were it by chance, or *forceful* destiny."
Dryden: Palamon & Arcite, ii. 11.

2. Impelled with force or violence.

"Against the steed he threw
His *forceful* spear."
Dryden: Virgil; Æneid ii. 65.

3. Violent, impetuous.

"Why, what need we'
Commune with you of this? but rather follow
Our *forceful* instigation?"
Shakesp.: Winter's Tale, ii. 1.

* **fŏr'çe-fûl-lў,** *adv.* [Eng. *forceful; -ly.*] In a forcible, violent, or impetuous manner; with force or violence.

* **fŏr'çe-lĕss,** *a.* [Eng. *force; -less.*] Having little or no force or power; feeble, weak, impotent.

"For feeble heart and *forceless* hand."
Scott: Rokeby, i. 24.

* **fŏr'çe-lĕt,** * **force-lette,** * **forse-let,** * **fors-let,** *s.* [O. Fr. *forcelet*, from Low Lat. *forcelletum.*] A little fort or fortress; a castle.

"In Egypt there ben hut fewe *forcelettes* or castelles."—*Maundeville*, p. 47.

* **fŏr'çe-lў,** *adv.* [Eng. *force; -ly.*] Vehemently, violently.

"Quhen thay war maist *forcely* given to the execucion thairof, tithingis come that the Volschis war cummand."—*Bellendene: Livius*, p. 202.

fŏr'çe-mĕat, * **farce-meat,** *s.* [Eng. *force* (2), v., and *meat.*]

Cook.: Meat chopped fine, seasoned, and served up alone, or used as stuffing.

* **fŏr'çe-mĕnt,** * **forse-men,** *s.* [Eng. *force; -ment.*]

1. The act of forcing or straining.

"Without meere *forcement* of lawe."—*Fox: Martyrs*, p. 157.

2. A fort, a strong place.

"*Forsemens* or strengthis of thin heghe walles shul togiderr fallen."—*Wycliffe: Isaiah* xxv. 12.

for'-çĕps, *s.* [Lat. = pincers, tongs, from *formus* = hot, and *capio* = to take.]

1. A tool applied to grasping, and consisting of two portions pivoted together, the ends forming respectively handles and jaws. A forceps is used by dentists in extracting teeth; by accoucheurs in steadying the head of the fœtus in delivery; by surgeons for extracting anything from a wound, &c. Forceps, the arms of which are automatically locked when closed, are known as Locking-forceps (q.v.).

"*Forceps* properly signifies a pair of tongs; but is used for an instrument in chirurgery, to extract anything out of wounds, and the like occasions."—*Quincey.*

2. *Zool.:* Anything shaped like a pair of scissors, as the two projecting movable bodies which terminate the abdomen of an Earwig (q.v.).

"It is furnished with a *forceps* above the mouth."—*Goldsmith: The Bee*, No. 4.

fŏrç'-ĕr (1), *s.* [Eng. *forc(e); -er.*]

I. *Ord. Lang.:* One who or that which forces, compels, or constrains.

"To be the *forcer* of a herd."
Chapman: Homer; Hymn to Hermes, pt. iii.

II. *Technically:*

1. *Mech.:* A solid piston applied to pumps for the purpose of producing a constant flow of water, or of raising water to a greater height than is possible by the pressure of the atmosphere.

2. *Min.:* A small pump worked by hand; used in sinking pits, draining cellars, &c.

"The usual means for the ascent of water is either by suckers or *forcers*."—*Wilkins: Dædalus*, vol. ii., ch. xv.

***fôrç'-ẽr** (2), ***fors-er,** *s.* [O. Fr. *forcier, forsier;* Ital. *forziere,* from Low Lat. *forsarius.*] A chest, a box, a casket.

"Of a *forcer* a fair hok sche raught."
William of Palerne, 4,432.

forçh'-ẽr-īte, *s.* [*Forcher,* prob. name of a person (*Weiner Zeitung,* July 11, 1860); *-ite* (Min.).]

Min.: A variety of opal. (*Brit. Mus. Cat.*)

***forch-ure,** *s.* [O. Fr. *forcheure;* Port. *forcadura;* Ital. *forcatura.*] The fork, or point of division of the legs. (*Sir Ferumbras,* 549.)

fôrç'-ĭ-ble, *force-a-ble, *a.* [Eng. *force* (1); *-able.*]

1. Having force, power, or might; powerful, strong, forceful.

"There is no desire more strong and *forcible* in man."—*Bp. Bull,* vol. ii., disc. 5.

II. *Naut.:* A piece of red bunting on a log-line at a certain distance, say twelve or fifteen fathoms, from the log-chip; the fathoms begin to count at the forerunner, and the non-counting portion is called the strayline. The latter is an allowance to allow the log to be out of the ship's dead-water. [LOG.]

¶ Crabb thus discriminates between *forerunner, precursor, messenger*, and *harbinger*: "*Forerunner* and *precursor* signify literally the same thing, namely, one *running before*; but the *forerunner* is properly applied only to one who runs before to any spot to communicate intelligence; and it is figuratively applied to things which in their nature, or from a natural connection, precede others; *precursor* is only employed in this figurative sense: thus imprudent speculations are said to be the *forerunners* of a man's ruin; the ferment which took place in men's minds was the *precursor* of the revolution. *Messenger* and *harbinger* are employed for persons: but the *messenger* states what has been or is; the *harbinger* announces what is to be." (*Crabb: Eng. Synon.*)

fō're-said (said as sĕd), *a.* [Pref. *fore-*, and Eng. *said.*] Already or previously spoken or mentioned.

1. *Ord. Lang.*: The part of land immediately in front of the shore; the part lying between high and low-water marks.

2. *Hydraulic Engineering*:

(1) A bank a little distance from a sea-wall to break the force of the surf. [Foreland.]

(2) The seaward projecting, slightly inclined portion of a breakwater.

fōre-short'-ĕn (or as **short'n**), *v.t.* [Pref. *fore-*, and Eng *shorten* (q.v.).]

Persp.: To represent objects on a plane surface as they appear to the eye, by means of foreshortening.

"'Tis a greater mystery in the art
Of painting, to *foreshorten* any part
Than draw it out."
Butler: Miscellaneous Thoughts.

fōre-short'-en-ĭng (or as **short'n**), *s.* [Pref. *fore-*, and Eng. *shortening* (q.v.).]

Persp.: The art of representing objects on a plane surface as they appear to the eye, depending upon a correct knowledge of form, perspective, and chiaroscuro. It is one of the most difficult studies in the art of design, and, when executed with skill, constitutes the excellence of the master.

"The greatest parts of the body ought to appear foremost: and he forbids the *foreshortenings*, because they make the parts appear little."—*Dryden: Du-fresnoy.*

fō're-shŏuts, *s. pl.* [Etym. doubtful.]

Naut.: The double ropes which fasten the mainsail of a ship. (*Palsgrave.*)

fōre-shōw', *v.t.* [Pref. *fore-*, and Eng. show (q.v.).]

1. To discover a thing before it happens; to predict, to anticipate, to forebode, to prognosticate.

"Did he not desperate impulse feel,
Headlong to plunge himself below,
And meet the worst his fears *foreshow*?"
Scott: Lady of the Lake, ii. 31.

2. To represent before it comes: to typify; to foreshadow.

***fōre-shōw'**, *s.* [Foreshow, *v.*] A sign or token given beforehand; a prognostication; a foreboding.

fōre-shōw'-ĕr, *s.* [Eng. *foreshow*; *-er.*] One who or that which foreshadows, foretells, or predicts.

Naut.: [Shrouds

***fō're-sīde**, *s.* [Pref. *fore-*, and Eng. *side* (q.v.).]

1. The front side, the front.

2. A specious outside or show.

"Now when these counterfeits were thus uncased
Out of the *foreside* of their forgerie."
Spenser: F. Q., V. iii. 39.

fō're-sīght (*gh* silent), *s.* [Pref. *fore-*, and Eng. *sight* (q.v.).]

I. *Ordinary Language*:

1. The act or faculty of foreseeing; prescience; perspicacity.

"Let Eve, for I have drenched her eyes,
Here sleep below, while thou to *foresight* wakest."
Milton: P. L., xi. 358.

2. A provident care for futurity; forethought; care in guarding against evil.

"Make a random expense without plan or *foresight*."
—*Burke: Letter to a Noble Lord.*

II. *Tech.*: [Fore-sight].

¶ Crabb thus discriminates between *foresight*, *forecast*, and *premeditation*: "*Foresight*, from seeing before, denotes the simple act of the mind in seeing a thing before it happens: *forecast*, from casting the thoughts onward, signifies coming at the knowledge of a thing beforehand by means of calculation; *premeditation*, from *meditate*, signifies obtaining the same knowledge by force of meditating or reflecting deeply. *Foresight* is the general and indefinite term; we employ it either on ordinary or extraordinary occasions; *forecast* and *premeditation* mostly in the latter case: all business requires *foresight*; state concerns require *forecast*: *foresight* and *forecast* respect what is to happen; they are the operations of the mind in calculating futurity: *premeditation* respects what is to be said or done: it is a preparation of the thoughts and designs for action; by *foresight* and *forecast* we guard against evils and provide for contingencies; by *premeditation* we guard against errors of conduct." (*Crabb: Eng. Synon.*)

***fō're-sīght-ĕd** (*gh* silent), *a.* [Eng. *foresight*; *-ed.*] Possessing or acting with foresight or forethought; provident, prudent, foreseeing.

***fōre-sīght'-fŭl** (*gh* silent), *a.* [Eng. *foresight*; *-ful(l).*] Full of foresight or forethought; prescient, provident.

"Give us *foresightful* minds; give us minds to obey
What foresight tells." *Sidney: Arcadia*, bk. ii.

***fō're-sīgn** (*g* silent), *s.* [Pref. *fore-*, and Eng. *sign* (q.v.).] Divination.

***fōre-sĭg'-nĭ-fȳ**, *v.t.* [Pref. *fore-*, and Eng. *signify* (q.v.).] To betoken beforehand; to foreshow; to typify; to adumbrate.

fō're-skĭn, *s.* [Pref. *fore-*, and Eng. *skin* (q.v.).] The skin which covers the *glans penis*; the prepuce.

"Thine own hand
An hundred of the faithless foe shall slay
And for a dower their hundred *foreskins* pay."
Cowley: Davideis, iii.

***fō're-skĭrt**, *s.* [Pref. *fore-*, and Eng. *skirt* (q.v.).] The loose hanging portion of a coat in front.

"Honour's train
Is longer than his *foreskirt*."
Shakesp.: Henry VIII., ii. 3.

***fōre-slăck'**, *v.t.* [Pref. *fore-* = for, and Eng. *slack* (q.v.).]

1. To lose or neglect through idleness; to omit.

"It is a great pity that so good an opportunity was omitted, and so happy an occasion *foreslacked*, that might have been the eternal good of the land."—*Spenser: State of Ireland.*

2. To delay, to hinder, to put off.

"Through other great adventures bethertoo
Had it *forslackt*." *Spenser: F. Q.*, V. xii. 3.

fō're-slēēve, ***fore-sleve**, *s.* [Pref. *fore-*, and Eng. *sleeve* (q.v.).] That part of a sleeve between the wrist and the elbow.

"Of a freres frokke
Were the *foresleves*." *P. Plowman*, 2,635.

***fōre-slĭp'**, *v.t.* [Pref. *fore-*, and Eng. *slip* (q.v.).] To lose before.

"Amends of the former time *foreslipt*."—*P. Holland. Pliny*, bk. xix., ch. vi.

***fōre-slō'w**, ***for-slowe**, ***for-sloe**, *v.t.* & *i.* [Pref. *fore-* = for, and Eng. *slow* (q.v.).]

A. *Transitive*:

1. To delay; to hinder; to impede; to obstruct.

"His journeys to *foreslow*."
Drayton: Poly-Olbion, p. 34.

2. To neglect; to omit.

"Why she did her wonted course *forslowe*."
Spenser: F. Q., VII. vi. 16.

3. To render slow; to delay.

"By no meanes my way I would *forslowe*."
Spenser: F. Q., IV. x. 15.

B. *Intrans*: To be dilatory or slow; to delay; to loiter.

"*Foreslow* no longer, make we hence amain."
Shakesp.: 3 *Henry VI.*, ii. 3.

***fōre-snāf-fle**, *v.t.* [Pref. *fore-*, and Eng. *snaffle* (q.v.).] To restrain by anticipation.

"Had not I *foresnaffled* my mynde by votarye promise
Not toe yoke in wedlock?"
Stanyhurst: Virgil; Æneid iv. 17.

***fōre-spēak'** (1), *v.t.* [Pref. *fore-*, and Eng. *speak* (q.v.).] To speak, tell, or declare beforehand; to predict; to foretell; to foresay.

***fōre-spēak'** (2), *v.t.* [Forspeak.]

1. To bring bad luck upon by the use of evil words; to damn.

"She threatens me wi' mischiefs and *forespeaks* me."
—*Scott: Bride of Lammermoor*, ch. xxxiv.

2. To forbid; to gainsay.

***fōre-spēak'-ĕr**, *s.* [Eng. *forespeak* (1); *-er.*]

1. *Ord. Lang.*: One who speaks on behalf of another; an introducer.

"Be, as it were, *forespeakers* for his entertainment."—*Breton: Grimello's Fortunes*, p. 10.

2. *Scots Law*: The foreman of a jury.

***fōre-spēak'-ĭng**, *s.* [Pref. *fore-*, and Eng. *speaking* (q.v.).]

1. A prediction; a prophecy; a prognostication.

"Old Godfrey of Winchester thinketh no ominous *forespeaking* to lie in names."—*Camden: Remains.*

2. A preface.

fō're-spēēch, ***vore-speche**, *s.* [Pref. *fore-*, and Eng. *speech* (q.v.).] A preface.

"The *vorespeche* of thise boc uolyynde."—*Ayenbite*, p. 2.

***fōre-spēed'**, *v.t.* [Pref. *fore-*, and Eng. *speed* (q.v.).] To surpass in speed; to outrun.

***fōre-spĕnd'**, *v.t.* [Pref. *fore-* = for, and Eng. *spend* (q.v.).] To weary out; to exhaust.

"After him came spurring hard,
A gentleman, almost *forespent* with speed."
Shakesp.: 2 *Henry IV.*, i. 1.

***fōre-spĕnt'**, *a.* [Pref. *fore-*, and Eng. *spent* (q.v.).]

1. Bestowed before.

"Towards himself, his goodness *forespent* on us,
We must extend our notice."
Shakesp.: Cymbeline, iii. 6.

2. Past, foregone, previous.

"You shall find his vanities *forespent*
Were but the outside of the Roman Brutus."
Shakesp.: Henry V., ii. 4.

***fōre-spōk'-ĕn** (or as **spōk'n**), *a.* [Pref. *fore-*, and Eng. *spoken* (q.v.).] Previously spoken, uttered or said.

***fōre-spŭr'-rĕr**, *s.* [Pref. *fore-*, and Eng. *spurrer* (q.v.).] One who rides before; a messenger; a harbinger.

"This *forespurrer* comes before his lord."
Shakesp.: Merchant of Venice, ii. 9.

fŏr'-ĕst, *s.* & *a.* [O. Fr., from Low Lat. *foresta* = a forest; *forestis* = an open space of ground over which the right of the chase were reserved, from Lat. *foris* = out of doors; Fr. *forêt*; Ital. *foresta*; O. H. Ger. *forst.*]

A. *As substantive*:

I. *Ord. Lang.*: An extensive wood, or tract of wooded country; a wild uncultivated tract of ground interspersed with wood.

"Hys *forest* and hys wodes, and mest the nywe *forest*
That ys in Southhamtessyre."
Robert of Gloucester, p. 375.

II. *Technically*:

1. *Botanical Geog.*: Of the United States, once in many parts a continuous wilderness of trees, 25 per cent. or less of the surface is now covered with forests. The trees have been in great measure destroyed with ruthless heed-

lessness, no effort to replace them being made, while fires, carelessly started, have been still more destructive than the axe. Vigorous efforts are now being made to inaugurate a new state of affairs, associations for forest preservation having been formed in many of the states, while the government has been aroused to the necessity of caring for the timber on the the public domain. The government still owned, few years ago, about 85,000,000 acres of forest land, but this is being steadily reduced. Many of the states have placed a reward on trees planted, the open prairies are gradually becoming tree-bearing, while in some of the older states, as in Maine, the destruction of the forests has been checked. There is, therefore, a much better promise for the future of American forestry.

The British Empire has of wood-land 340,000,000 acres, an extent unequalled by the forests of any other country. England has about 2,500,000 acres in wood, while Europe possesses still a large extent of forest land 42½ per cent. of Russia being forested.

2. *Meteor.:* The clearing of forests in America, France, &c., has made the climate less extreme than formerly—that is, the winters have been less cold and the summers less hot. Forests do not increase the rainfall, but they prevent it from easily running to waste. The destruction of the forests in the once fertile Palestine, Syria, and Cyprus has made those countries comparatively barren.

3. *Geol.:* The influence of forests in the economy of nature is conservative. A covering of herbage and shrubs tends to protect a loose soil from being carried away by rain or even by the ordinary action of a river, and to prevent hills of loose sand from being blown away by the wind. When trees, in a cold climate, on their fall obstruct the drainage of a forest, peat is in many cases generated, and peat-bogs now mark the site of some old forests. Sometimes a depression of the land, a landslip, or some other cause, places a forest under the water. It is then said said to be Submerged (q.v.). If the waters are those of the ocean, it is said to be Submarine (q.v.). In certain cases insects can destroy a forest by killing the trees of which it is composed. At certain spots a fossil or buried forest exists: thus there is one in Southern New Jersey, another near New Orleans, and elsewhere. In England there is one in Norfolk and another in the Portland Purbeck: it is locally called the Dirt-bed (q.v.). Fossil forests are occasionally found in the coal measures.

* 4. *Law:*

(1) A certain territory of woody grounds and fruitful pastures, privileged for wild beasts, and fowls of forest, chase, and warren, to rest and abide in, in the safe protection of the king for his pleasure. Cowel, writing in A.D. 1724, said, "The properties of a forest are these: a forest, as it is strictly taken, cannot be in the hands of any but the king, who hath power to grant commission to a justice in eyre for the forest; the courts; the officers for preserving the vert and venison, as the justices of the forest, the warden or keeper, the verders, the foresters, agistors, regarders, bailiffs, and beadles. The chief property of a forest is the swainmote, which is no less incident to it than the court of pye-powder to a fair." Now, a forest, though properly the king's, can be vested in a subject; and such forest courts as the swainmote are obsolete. [Forest-court, Forest-laws.]

(2) The right or franchise of keeping, for the purpose of hunting, all animals pursued in field sport in a certain territory or precinct of woody ground and pasture.

B. *As adj.:* Of or pertaining to a forest; as, *forest* trees; sylvan, rustic.

"Like crowded *forest* trees we stand,
And some are marked to fall."
Cowper: Bill of Mortality. (1787.)

¶ Crabb thus discriminates between *forest*, *chace*, and *park*: "*Forest*, *chace*, and *park* are all habitations for animals of venery; but the *forest* is of the first magnitude and importance, it being a franchise and the property of the king; the *chace* and *park* may be either public or private property. The *forest* is so formed of wood, and covers such an extent of ground, that it may be the haunt of wild beasts; of this description are the *forests* in Germany: the *chace* is an indefinite and open space that is allotted expressly for the *chace* of particular animals, such as deer; the *park* is an enclosed space that serves for the preservation of domestic animals." (*Crabb: Eng. Synon.*)

¶ Obvious compounds: *forest-bower* (*Scott*), *forest-cave*, *forest-crowned* and *forest-walk* (*Thomson*), *forest-glade*, *forest-path*, *forest-tree* (*Cowper*).

forest-bed, Cromer forest-bed, *s.*

Geol.: A bed at Cromer, in Norfolk, intervening between certain glacial strata and the subjacent chalk. (*Lyell.*)

* **forest-born,** *a.* Born in a forest or wild.

"This boy is *forest-born*,
And hath been tutored in the rudiments
Of desperate studies."
Shakesp.: As You Like It, v. 4.

forest-bug, *s.*

Entom.: A name given to more than one species of Pentatoma.

forest-court, *s.*

Old Law: A court instituted for the government of the royal forests, and for the punishment of all injuries done to the royal deer or venison, to the vert or greensward, and to the covert in which such deer are lodged. These are the courts of Attachments, of Regard, of Swainmote, and of Justice-seat. (*Blackstone: Comment.*, bk. iii., ch. 3.) No meeting of any of these courts, except one *pro forma*, has been held since the Revolution of 1688. An effort to revive them in connection with the Epping Forest litigation was stopped by the Court of Chancery, but the institution of verderers was perpetuated. [Forest, II. 4; Verderer.]

forest-fly, *s.*

Entom. (*Pl.*): A popular name for the insects belonging to the family Hippoboscidæ (q.v.). The name is given because one species, *Hippobosca equina*, parasitic upon the horse, is exceedingly abundant in the New Forest.

forest-food, *s.* Food derived from a forest; subsistance on the branches or woody fibres of trees.

"The *forest-food* of such a species—*Elephas primigenius*—becomes as perennial as the lichens that flourish beneath the winter snows of Lapland."—*Owen: Brit. Fos. Rem.*, 262, 263.

forest-laws, *s. pl.*

Law: Laws for the regulation of the English forests, instituted under the Conqueror. They were so severe that the *Saxon Chronicle* said he loved a deer as if he were its father. A man killing one might be mutilated and put to death. This was abolished by the Carta de Foresta (Forest Charter), granted by Henry III. in A.D. 1224. Gradually the forest laws fell nearly into desuetude. Charles I. attempted to revive them, and the Forest Court of Justice Seat fined certain persons heavily for encroachments on the forests committed three or four centuries previously. The Long Parliament put an end to these extortions. [Forest-court.]

forest-marble, *s.*

Geol.: A stratum of lower oolitic age. The typical rock is generally an argillaceous limestone abounding in marine fossils. At Bradford, in England, however, this is replaced by a mass of clay. In other places, again, there are rippled sandstones. From Bradford in Wilts to Tetbury in Gloucestershire there are rippled slaba of fissile oolite. The name Forest-marble is from Wichwood Forest, in Oxfordshire, where the finer kinds of the calcareous rock are quarried for marble.

forest-oak, *s.*

Bot.: A commercial name for a species of Casuarina, the timber of which is brought from Australia. In that country oak is the general name for the Casuarina genus which has no close affinity to the genuine Quercus (q.v.).

forest-science, *s.* The same as Forestry. (*Pen. Cyclo.*, x. 350.)

forest-sheriff, *s.* The guardian or keeper of a forest; a verderer.

"No youthful baron's left to grace
The *forest-sheriff's* lonely chase."
Scott: Marmion, iii. (Introd.)

forest-spirits, *s.pl.*

Comp. Mythol.: Certain spirits said to haunt forests. In the Australian bush, according to the belief of the natives, demons whistle in the branches, and sneak among the trunks to seize the wayfarer; the same belief is found in Brazil, among the Karens, the negroes of Senegambia, and the Indians of North and South America; and the baleful shapes of terror that glide through our own woodlands are familiar still to peasant and poet. All these imaginary beings have been devised to account for the mysterious influences that beset the wanderer in the forest. In some cases the belief is that spirits do not roam through the forest at large, but inhabit particular trees, growing with their growth and losing power with their decay. A similar conception belonged to the mythology of Greece and Rome, and in all cases the spirit inhabitant was supposed to have supernatural power, and sometimes to utter oracles. (*Tylor.*) [Serpent-worship, Tree-worship.]

* **fŏr'-ĕst,** *v.t.* [Forest, *s.*] To cover or plant with trees; to convert into a forest.

* **fō're-staff,** *s.* [Pref. *fore-*, and Eng. *staff* (q.v.).]

Optics: An instrument formerly used at sea for taking the altitude of heavenly bodies, and also known as a cross-staff. The observer faces the object, the position being the reverse of that assumed in using the back-staff for a similar purpose. The forestaff has a straight square staff, graduated like a line of tangents, and four crosses or vanes which slide thereon. The first and shortest of these vanes is called the ten-cross, and belongs to that side of the instrument whereon the divisions begin at 3° and end at 10°. The next longer vane, called the thirty-cross, belongs to the side of the staff graduated from 10° to 30°. The sixty-cross belongs to the side graduated from 20° to 60°. The ninety-cross belongs to the side of the staff graduated from 30° to 90°.

B. *Intrans.* : To prophesy ; to utter a prophecy or prediction.

"One greater, of whose day he shall *foretell*." *Milton : P. L.*, xii. 242.

¶ Crabb thus discriminates between to *foretell*, to *predict*, to *prophesy*, and to *prognosticate* : "*Foretell* is the most general in its sense, and familiar in its application ; we may *foretell* common events, although we cannot *predict* or *prophesy* anything important ; to *foretell* is an ordinary gift ; one *foretells* by a simple calculation or guess ; to *predict* and to *prophesy* are extraordinary gifts ; one *predicts* by a supernatural power real or supposed ; one *prophesies* by means of inspiration. *Prediction* as a noun is employed for both the verbs *foretell* and *predict* ; it is therefore a term of less value than *prophesy*. We speak of a *prediction* being verified, and a *prophecy* fulfilled. To *prognosticate* is an act of the understanding ; it is guided by outward symptoms as a rule ; it is only stimulated and not guided by outward objects ; a physician *prognosticates* the crisis of a disorder by the symptoms discoverable in the patient." (*Crabb : Eng. Synon.*)

fōre-tĕll'-ēr, *s.* [Eng. *foretell* ; *-er.*] One who or that which foretells ; a predicter ; a prognosticator.

"Sir Thomas Lovel, I as free *forgive* you,
As I would be *forgiven.*"
Shakesp.: Henry VIII., ii. 1.

B. *Intrans.:* To pardon or overlook any injury, fault, crime, or thing due.

¶ Crabb thus discriminates between to *forgive,* to *pardon,* to *remit,* and to *absolve:* "*Forgive* and *pardon* both signify not to give the punishment that is due: to relax from the rigour of justice in demanding retribution. *Forgive* is the familiar term; *pardon* is adapted to the serious style. Individuals *forgive* each other personal offences; they *pardon* offences against law and morals: the former is an act of Christian charity, the latter an act of clemency. . . . *Pardon,* when compared with *remission,* is the consequence of offence; it respects principally the person offending; it depends upon him who is offended; it produces reconciliation when it is sincerely granted and sincerely demanded. *Remission* is the consequence of the crime; it has more particular regard to the punishment; it is granted either by the prince or magistrates; it arrests the execution of justice. *Absolution* is taken in no other sense; it is the consequence of the fault or the sin, and properly concerns the state of the culprit." (*Crabb: Eng. Synon.*)

for-gĭv'-ĕn, *pa. par.* or *a.* [FORGIVE.]

for-gĭve'-nĕss, * **for-gefe nesse,** * **for-yev-en-esse,** * **for-gif-ness,** * **for-gife-nesse,** * **for-gyf-nes,** *s.* [A.S. *forgifenness, forgifnes;* Dut. *vergiffenis.*]

4. A shape or mould; that by which things are fashioned or arranged; a pattern, a model.

* **5.** A picture, a model, a likeness.

"That thou no *form* of thee hast left behind."
Shakesp.: Sonnet 9.

6. A formula; an established or prescribed mode or arrangement.

"Hold fast the *form* of sound words, which thou hast heard of me."—2 *Timothy* i. 13.

7. Regularity, method, order, system, arrangement.

"What he spoke, though it lacked *form* a little,
Was not like madness." *Shakesp.: Hamlet*, iii. 1.

8. Beauty; elegance of appearance or figure; comeliness.

"He hath no *form* nor comeliness."—*Isaiah* liii. 2.

9. External appearance without the essential qualities; empty show.

"Dwellers on *form* and favour."
Shakesp.: Sonnet 125.

10. Ceremony; external rites; established practice or mode: as, the *form* of consecration of bishops.

"Nor are constant *forms* of prayer more likely to fiat and hinder the spirit of prayer and devotion, than unpremeditated and confused variety to distract and lose it."—*King Charles Eikon Basilike.*

* **11.** An outline or plan.

"The *form* of my intent."—*Shakesp.: Twelfth Night*, i. 2.

* **12.** Manner of behaving; deportment.

"Can no way change you to a milder *form*?"

21. A state or condition of being; a mode of acting or manifestation to the senses or intellect: as, Water assumes the *form* of ice.

II. *Technically:*

1. *Bot.:* The shape of a body itself, as distinguished from the figure made by its outline; the nature of its apex, that of its divisions, &c.

2. *Cook.:* A shape or mould for jellies.

3. *Foundry:* A mould.

4. *Math.:* The mode of algebraic expression. Two expressions are said to be of the same form, when they indicate the same relation between the quantities which enter them.

5. *Metaphysics:*

(1) *Objectively:*

(*a*) The assemblage of qualities which make a body, a substance, or anything be what it is. Whatever is accidental or adventitious in the individual examined or specimen of the substance examined is excluded from examination, and only what is essential taken into account; hence in place of the simple word *form*, the compound one *essential-form* or *substantial-form* is generally employed.

(*b*) The mode in which any object is manifested to the senses, or the intellect. Thus the clouds manifest themselves to the perceptive powers as occupying a certain position, as having a certain shape, and as coloured with certain hues. The forms of immaterial things are called categories.

(2) *Subjectively:* The idea or concept which the mind forms of an object as distinguished from the object itself. According to the philosophy of Kant, it was the province of the sensitive faculty to communicate to the mind the matter of a notion, and that of the understanding to give it form.

6. *Printing* (*Generally as* forme):

(1) A body of type, composed and made ready for printing.

(2) A stereotype in the like condition of readiness. The one containing the first page is the outer forme. The forme for the opposite side of the sheet is the inner forme.

7. *Zool.:* A distinction sometimes used for those minute variations which are not constant enough to be called varieties.

¶ (1) Crabb thus discriminates between *form, figure,* and *conformation:* "*Form* is the generic term; *figure* and *conformation* are special terms. The *form* is the work either of nature or art; it results from the arrangement of the parts; the *figure* is the work of design; it includes the general contour or outline; the *conformation* includes such a disposition of the parts of a body as is adapted for performing certain functions. *Form* is the property of every substance; and the artificial *form* approaches nearest to perfection, as it is most natural; the *figure* is the fruit of the imagination; it is the representation of the actual *form* that belongs to things; it is more or less just as it approaches to the *form* of the thing itself; the *conformation* is said only with regard to animal bodies. *Form* and *figure* are used in a moral application, although *conformation* is not."

(2) He thus discriminates between *form, ceremony, rite* and *observance:* "*Form* is the most general in its sense and application; *ceremony, rite,* and *observance* are particular kinds of *form*, suited to particular occasions. *Form*, in its distinct application, respects all modes of acting and speaking, that is adopted by society at large, in every transaction of life; *ceremony* respects those *forms* of outward behaviour which are made the expressions of respect and deference; *rite* and *observance* are applied to national *ceremonies* in matters of religion." (*Crabb: Eng. Synon.*)

form, *form-en, form-yn, *fourme, *v.t. & i.* [Fr. *former*, from Lat. *formo*, from *forma* = form, shape; Sp. & Port. *formar*; Ital. *formare*; Dut. *vormen*; Icel. & Sw. *forma*; Dan. *forme*; Ger. *formen.*]

A. *Transitive:*

I. *Ordinary Language:*

1. To make, shape, or mould ont of materials; to give form or shape to.

"And the Lord God *formed* man out of the dust of the ground."—*Genesis* ii. 7.

2. To arrange in any particular manner; as, To *form* troops.

"Other troops should not be *formed* behind them."
—*Macdougall: Modern Warfare*, ch. vi.

3. To give existence to; to create.

"Creature in whom excelled
Whatever can to sight or thought be *formed*,
Holy, divine, good, amiable, or sweet."
Milton: P. L., ix. 897.

* **B.** *Intransitive:*

1. To take or assume a particular form or shape.

2. To squat down as a hare.

¶ (1) Crabb thus discriminates between to *form*, to *fashion*, to *mould*, and to *shape:* "To

form is to put into a *form*, which is the generic term : to *fashion* is to put into a particular or distinct *form:* to *mould* is to put into a set *form:* to *shape* is to *form* simply as it respects the exterior. As everything receives a *form* when it receives existence, to *form* conveys the idea of producing. When we wish to represent a thing as *formed* in any distinct or remarkable way, we may speak of it as *fashioned.*"

(2) He thus discriminates between to *form*, to *compose*, and to *constitute:* "*Form* is a generic and indefinite term. To *compose* and *constitute* are modes of forming. These words may be employed either to designate modes of action or to characterize things. Things may be *formed* either by persons or things ; they are *composed* and *constituted* only by conscious agents." (*Crabb : Eng. Synon.*)

(3) For the difference between to *form* and to *make*, see MAKE.

-form, *suff.* [Lat. *forma* = form.] A suffix largely used to denote in the form or shape of, like, resembling : as, *ovi-form* = in the form of or like an egg ; *ensi-form* = in the shape of or like a sword, &c.

3. Done according to established rules or forms ; regular ; done in due form : as, a *formal* reception of an ambassador by a king.

* 4. Acting according to established rule ; regular ; methodical.

"The *formal* stars do travel so."
Waller : To the Mutable Fair, 21.

5. External ; having outward appearance only, without the essence.

"Of *formal* duty make no more thy boast ;
Thou disobey'st where it concerns me most."
Dryden : Aurungzebe, i. 1.

6. Depending upon customary forms ; conventional.

"Still in constraint your suffering sex remains,
Or bound in *formal* or in real chains."
Pope : Epistle iv. 42.

7. Having the power of making anything what it is ; formative ; constituent ; essential. [CAUSE, *s.*, III. 5.]

"The *formal* essence and nature of man, is wholly owing to the power of God."—*Bentley : Boyle Lectures.*

8. Retaining the proper and essential characteristics ; regular, orderly, proper.

"Thou shouldst come like a fury covered with snakes,
Not like a *formal* man."
Shakesp. : Antony & Cleopatra, ii. 5.

II. *Metaph. :* Connected with conditions rather than causes.

¶ Crabb thus discriminates between *formal* and *ceremonious:* "*Formal* and *ceremonious* are either taken in an indifferent sense with respect to what contains *form* and *ceremony*, or in a bad sense, as expressing the excess of *form* and *ceremony*. A person expects to have a *formal* dismissal before he considers himself as dismissed ; people of fashion pay each other *ceremonious* visits, by way of keeping up a distant intercourse. . . *Formal*, in the bad sense, is opposed to easy ; *ceremonious* to the cordial. A *formal* carriage prevents a person from indulging himself in the innocent familiarities of friendly intercourse ; a *ceremonious* carriage puts a stop to all hospitality and kindness." (*Crabb : Eng. Synon.*)

form-ăl'-dĕ-hȳde, *s.* [Eng. *form(ic)*, and *aldehyde* (q.v.).]

form'-āte, *s.* [Eng. *form(ic) ; -ate* (*Chem.*) (q.v.).]

Chem. : A salt of formic acid.

¶ The principal formates are : *formate of ammonium*, $H·CO·OH·NH_3$, a soluble deliquescent salt, crystallizing in needles ; it has a pungent taste ; when heated to 180° it is decomposed into hydrocyanic acid, HCN, and water ; the *formates of barium*, *strontium*, and *calcium*, which are soluble in water, but insoluble in alcohol and ether ; the *formates of potassium*, $H·CO·O·K$, and sodium, $H·CO·ONa$, which crystallize out of formic acid, with another molecule of acid, as $(H·CO·OK + H·CO·OH)$; the *formate of lead* $(H·CO·O)_2 Pb$ crystallizes in shining needles, soluble in thirty-six parts of cold water.

for-mā'-tion, *s.* [Fr., from Lat. *formatio*, from *formatus*, pa. par. of *forma* = to form, shape ; Sp. *formacion ;* Ital. *formazione.*]

I. *Ordinary Language :*

1. The act of forming, creating, or bringing into existence ; a creation, generation or production.

"Nature continues in this labour, until a perfect shape be introduced : and this is called *formation.*"—*Howell : Letters*, bk. i., lett. 30.

2. The state of being formed, created or brought into existence.

3. The manner in which anything is formed ; conformation, form, figure.

II. *Technically :*

1. *Geol. :* A group, whether of alluvial deposits, sedimentary strata, or igneous rocks, referred to a common origin or period. Thus there are stratified and unstratified, fresh water and marine, aqueous and volcanic, with many other formations. (*Lyell.*)

2. *Mil. :* An arrangement of troops, as in a square, column, &c.

3. *Philol. :* The forming of a word, as by derivation, or the uses of affixes or prefixes.

"Accent is related to music or song ; as appears in the *formation* of the Latin word, from *ad* and *cantus.*"—*Beattie : Moral Science*, pt. i., cb. i., § ii.

form'-ą-tĭve, *a.* & *s.* [Lat. *formatif ;* Sp. & Ital. *formativo*, from Lat. *formatus*, pa. par. of *formo.*]

A. *As adjective :*

1. *Ord. Lang. :* Having the power or quality of giving form ; plastic.

"You feel the desolateness of the *formative* thought as well as the root of its bitterness."—*Brit. Quarterly Review*, vol. lvii., p. 408.

2. *Philol. :* Serving to form ; derivate ; not radical : as, a *formative* termination.

B. *As substantive :*

Philology :

1. That which serves to form, and is no part of the root ; as the suff. *-en* in such words as brighten, wooden, &c.

2. A word formed in accordance with some rule or usage, as from a root.

formative-arts, *s. pl.*

Art : Those arts which, independently of external wants and aims, yet, on the other hand, bound to the imitation of nature, represent life by means of the forms naturally connected. The general style of the formative arts is the result of a principle of selection which necessarily limits imitation. Such general style consists, therefore, in qualities which distinguish those arts from nature. The specific style of any one of the arts consists in the effective use of those particular means of imitation which distinguish it from the other arts. Style is complete when the spectator is not reminded of any want which another art or which nature could supply. (*Fairholt.*)

formative-tissue, *s.*

Bot. : A tissue capable of forming new cells. It is called also generating tissue and Meristem (q.v.). It is distinguished from permanent tissue.

***for-maylle,** *s.* [Formel.]

for-mē (1), *a.* [Fr. pa. par. of *former* = to form, to shape.]

Her.: A term applied to a cross having the arms expanding towards the ends and flat at the outer edges; also called *patée* or *pattée*.

***forme (2), furme,** *a.* [A.S. *forma*; O. Sax. *formo*; O. Fris. *forma*.] First. [Foremost.]

"The *forme* man the corn in this middenerd that was Adam."—*O. Eng. Homilies*, ii. 131.

***forme-fadcr, forme-father,** *s.* An ancestor.

***formc,** *s.* [Form, *s.*]

formed, *pa. par.* & *a.* [Fonm, *v.*]

A. *As pa. par.:* (See the verb).

B. *As adjective:*

1. Shaped or moulded into form; created, produced, brought into existence.

2. Arranged; as stars into a constellation.

***for'-mĕ-dŏn,** *s.* [Lat. *forma doni* = the form of the gift.]

Law: A writ of right, which lay for him who had right to lands or tenements by virtue of an entail. It was abolished by the statute 3 and 4 William IV., c. 27.

*** for-mel, * for-maylle, * for-mell,** *s.* [Etymol. doubtful; cf. O. Fr. *forme* = a hawk or falcon.] Properly a female hawk, but also applied to the females of other birds.

"Who loveth best this gentil *formel* here."
Chaucer: Assembly of Foules, 534.

***for-melt,** *v.t.* [A.S. *formeltan*.] To melt away.

"He hit *formelteth* to watere."
O. Eng. Homilies, ii. 151.

***for'-mēne,** *s.* [Eng. *form(ic)*; *-ene* (*Chem.*) (q.v.).]

Chem.: A name formerly given to Methane CH_4.

form'-ĕr, * for-mere, *a.* & *s.* [Formed from A.S. *forma* = early by the addition of *-er*. It is a word of false formation, due to the mistaken idea that *formest* (*foremost*), was a simple and not a double superlative form.] [Foremost.]

A. *As adjective:*

1. Before or preceding something else in time.

"Daniel saw this vision by the floud whose waters lyke as the later waues thruste forth the *former* sources."—*Joye: Exposicion of Daniel*, ch. viii.

2. Near the beginning; early; preceding.

3. Earlier, as of two things mentioned at the same time; first mentioned.

"The most obvious division of society is into rich and poor; and it is no less obvious that the number of the *former* bear a great disproportion to those of the latter."—*Burke: A Vindication of Natural Society.*

4. Past; gone by; ancient; as, in *former* times.

"Inquire, I pray thee of the *former* age."—*Job* viii. 8.

*** B.** *As subst.:* A predecessor.

! "To use the terms of our *formers*."—*W. Patten: Exped. to Scotland*, 1547.

*** former-ward, * former-warde,** *s.* A vanguard; an advanced guard.

form'-ĕr, * form-our, * formyour, *s.* [Eng. *form*; *-er.*]

1. One who or that which forms; a creator.

"Fader and *formour* of al that euere was maked."
P. Ploughman, 5,204.

2. *Specif.:* A shape around which an article is moulded, woven, wrapped, pasted, or otherwise constructed. A templet, pattern, or gauge by which an article is shaped, as pottery, or an object in the lathe. A cutter by which patterns, blanks, wads, or pieces are cut from sheets for various purposes.

for-mĕr-ĕt', *s.* [Fr.]

Arch.: The arch rib, which, in Gothic groining, lies next the wall, and is consequently less than the other ribs which divide the vaulting.

form'-ĕr-lў, * for-mer-lle, *adv.* [Eng. *former*; *-ly.*]

***** 1. First; first of all; beforehand.

"Prevented him before his stroke could light,
And on the helmet smote him *formerlie*."
Spenser: F. Q., VI. i. 38.

2. In former times; in times past; of old; anciently.

"It was enacted that they should pay no more than had been *formerly* wont to be paid."—*Burnet: Hist. of the Reformation* (an. 1531).

3. Previously, heretofore.

"And her faire lockes which *formerly* were bound
Up in one knott, she low adowne did lose."
Spenser: F. Q., II. xii. 67.

¶ Crabb thus discriminates between *formerly*, *in times past*, *in days of yore*, and *anciently*: "*Formerly* supposes a less remote period than *in times past*, and that less remote than *in days of yore* and *anciently*. The two first may be said of what happens within the age of man; the last two are extended to many generations and ages. Any individual may use the word *formerly* with regard to himself: thus, we enjoyed our health better *formerly* than now. An old man may speak of *times past*, as when he says he does not enjoy himself as he did *in times past*. *Old times*, *days of yore*, and *anciently*, are more applicable to nations than to individuals; and all these express different degrees of remoteness." (*Crabb: Eng. Synon.*)

*** for-mest,** *a.* [Foremost.]

form'-fŭl, *a.* [Eng. *form*; *-ful(l).*] Ready or quick to form; creative, imaginative, fanciful.

"As fleets the vision o'er the *formful* brain."
Thomson: Summer, 1,632.

form'-ĭc, *a.* [Lat. *form* (*ica*) = an ant; *-ic.*] Pertaining to or produced by ants.

"We should borrow *from* them *formic* laws or agrarian policy."—*Southey: The Doctor*, ch. xcvi.

formic acid, *s.*

Chem.: $HCHO_2$ or $H{\cdot}CO{\cdot}OH$. A monobasic fatty acid, which derives its name from the circumstance that it was first obtained by distilling ants. It occurs in the animal and vegetable kingdoms, especially in the red ant, *Formica rufa*. When an ant walks over moistened blue litmus it turns it red. It exists also in certain caterpillars, in several secretions of the human body, as in blood, in urine, in the flesh-juice and in perspiration. It also occurs in the juice of the stinging-nettle, and in commercial oil of turpentine that has been exposed to the air, and in certain mineral springs. Formic acid can be obtained by the oxidation of methyl alcohol $CH_3{\cdot}OH$, and by boiling hydrocyanic acid HCN with hydrochloric acid. Formic acid is obtained by distilling sugar, gum, and starch with strong sulphuric acid, but it is best prepared by heating equal quantities of oxalic acid, $H_2C_2O_4$, and glycerine, $C_3H_5(OH)_3$; in a retort on a water-bath; it gives off CO_2 and dilute formic acid distils over. When no more gas is given off, more oxalic acid is added; it is again heated, and a more concentrated formic acid comes over. In this reaction a mono-formic ether of glycerine is first formed. Thus—

$$C_3H_5\begin{Bmatrix}OH\\OH\\OH\end{Bmatrix} + H_2C_2O_4 = C_3H_5\begin{Bmatrix}OH\\OH\\O{\cdot}COH\end{Bmatrix} + CO_2 + H_2O$$

& $$C_3H_5\begin{Bmatrix}OH\\OH\\O{\cdot}COH\end{Bmatrix} + H_2O = C_3H_5(OH)_2 + H{\cdot}CO{\cdot}OH.$$

The anhydrous acid is obtained by heating to 100°C lead formate $(H{\cdot}CO{\cdot}O)_2Pb$ in a stream of sulphuretted hydrogen gas. Pure formic acid is a colourless, transparent liquid, which slightly fumes in the air. It has a pungent, sour taste, and corrodes the skin, forming painful ulcers. Formic acid solidifies at −1° and boils at 99°. It mixes with water and with alcohol in all proportions; its vapour is inflammable, and burns with a blue flame. Formic acid, heated with concentrated sulphuric acid, is decomposed into carbon monoxide, CO, and water. Formic acid reduces salts of gold, silver, and mercury, being converted into carbon dioxide and water. By the action of chlorine, formic acid is converted into hydrochloric acid and CO_2. All salts of formic acid are soluble in water; their aqueous solutions are turned red by the addition of ferric chloride.

formic-ethers, *s. pl.*

Chem.: Chemical substances in which the basic hydrogen of formic acid has been replaced by an alcohol radical.

for-mĭ'-ca, *s.* [Lat. = an ant.]

1. *Entom.:* The typical genus of the family Formicidæ (q.v.). It has the foot-stalk of the abdomen composed of a single joint; the mandibles are triangular, and denticulated at the edge. The females are destitute of a sting. There are numerous American species. One very interesting species makes its nest in wood, and is a slave-holder, carrying off the young of other species such as those of *F. cuniculuria* and *F. fusca*. Of the foreign species, *F. saccharivora* makes its nest at the foot of sugar canes, so loosening the land that they are blown down by gales. *F. indefessa*, an Indian species, is a great devourer of sweets. [Ant.]

2. *Falconry:* A disease in a hawk's bill.

for'-mĭc-ănt, *a.* [Lat. *formica* = an ant.]

Pathol.: Pulsus formicans—an epithet given to the pulse when extremely small, scarcely perceptible, unequal, and communicating a sensation like that of the motion of an ant felt through a thin textme. (*Dunglison.*)

for-mĭ-căr-ĭ'-ĭ-dæ, *s. pl.* [Mod. Lat. *formicari(us)*, and Lat. fem. pl. adj. suff. *-idæ.*]

Ornith.: Ant-thrushes: a family of birds by some called Formicarinæ, allowed only the position of a subfamily of Turdidæ (Thrushes). They have the wings and tail much shorter than those of the true thrushes, the tip of their bill also is often slightly hooked. They for the most part inhabit the tropical regions of both hemispheres, frequenting forests and thickets, flying badly from the shortness of their wings and consequently feeling most at home on the ground, where they devour ants, coleoptera, &c. The typical genus Formicarius is of sober tints; Pitta, on the contrary, is of a brilliant azure blue. The Dipper or Water Ouzel (*Cinclus aquaticus*), is an aberrant form of the family or sub-family. (*Dallas*, &c.)

for-mĭ-căr-ĭ'-næ, *s. pl.* [Mod. Lat. *formicar(ius)*, and Lat. fem. pl. adj. suff. *-inæ.*]

Ornith.: A sub-family of Turdidæ, by some elevated into a family, Formicariidæ (q.v.).

for-mĭ-căr'-ĭ-ŭs, *s.* [Lat. *formic(a)*, and mas. sing. adj. suff. *-arius.*]

Ornith.: The typical genus of the sub-family Formicarinæ or the family Formicariidæ (q.v.).

for'-mĭ-cāte, *a.* [Lat. *formic(a)* = an ant; *-ate.*] Resembling an ant; pertaining to or in any way connected with the genus Formica (q.v.).

for-mĭ-cā'-tion, *s.* [Lat., from *formico* = to creep or crawl like ants.]

Pathol.: An irritation of the skin, resembling the crawling of ants, produced by pustules.

for-mĭç'-ĭc, *a.* [Lat. *formic(a)* = an ant; *-ic.*]

Chem.: The same as Formic (q.v.).

for-mĭç'-ĭ-dæ, *s. pl.* [Lat. *formic(a)* = an ant, and fem. pl. adj. suff. *-idæ.*]

Entom.: A family of Aculeate Hymenoptera, tribe or subtribe Heterogyna. The abortive females are wingless, the basal joint of the antennæ in the females and neuters is long and elbowed; the upper lip of the neuters large, horny, and perpendicular, the first or second joint of the abdomen knotted. In many species the females and neuters have stings. They are generally social insects living in communities, consisting of males, females, and neuters. The chief genera are Formica, Polyergus, Ponera, Myrmica, and Atta. They are everywhere well known by their common name of Ants.

for-mĭ-çĭ-nạ, *s.* [Lat. *formicinus* = of or like ants.]

Entom.: A genus of Formicidæ. *Formicina rufa* is the Horse ant. It forms large nests of dry leaves and sticks, here and abroad, in woods. Onisci frequent the nests, and Lomechusa and Pella, two species of Staphylini, are found there also as parasites. (*Shuckard.*)

*** for-mĭd-a-bĭl'-ĭ-tў,** *s.* [Eng. *formidable*; *-ity.*] The quality of being formidable; formidableness.

"Who reduces their *formidability* by being sent to raise two clans."—*Walpole: To Mann*, ii. 93.

for'-mĭd-a-ble, *a.* [Fr., from Lat. *formidabilis*, from *formido* (v.) = to fear, dread, (*s.*), fear, dread.] Causing or calculated to cause fear or dread; terrible, dreadful, fearful, deterrent.

"But it was well known that he could be as useful a friend and as *formidable* an enemy as any member of the cabinet."—*Macaulay: Hist. Eng.*, ch. xiii.

¶ Crabb thus discriminates between *formidable*, *dreadful*, *terrible*, and *shocking*: "*Formidable* is applied to that which is apt to excite fear; *dreadful* is applied to what is calculated to excite dread; *terrible* is applied to that which excites terror; *shocking*, from

shake, is applied to that which violently shakes or agitates. The *formidable* acts neither suddenly nor violently; the *dreadful* may act violently, but not suddenly; thus the appearance of an army may be *formidable*; that of a field of battle is *dreadful*. The *terrible* and *shocking* act both suddenly and violently; but the former acts both on the senses and the imagination, the latter on the moral feelings." (*Crabb: Eng. Synon.*)

for'-mĭd-a-ble-nĕss, *s.* [Eng. *formidable*; *-ness.*] The quality of being formidable or to be dreaded.

"Who could not be deterred by the *formidableness* of destructive flames."—*Boyle: Works*, ii. 6.

for'-mĭd-a-blў, *adv.* [Eng. *formidabl(e)*; *-ly.*] In a formidable manner.

"The British cannon *formidably* roars."
Dryden: Threnodia Augustalis, 512.

* **for-mĭd'-ō-lose,** *a.* [Lat. *formidolosus*, from *formido* = dread, fear.] Dreading greatly; very much afraid.

form'-ĭng, *pr. par.*, *a.*, & *s.* [Form, *v.*]

A. & **B.** *As pr. par. & particip. adj.:* (See the verb).

C. *As substantive:*

1. *Ord. Lang.:* The act or process of giving form, shape, or figure to; creation.

2. *Ship-build.:* Shaping exactly the converted (partially shaped) timbers, so as to give them the required figure. This consists in:—(*a*) Siding; giving them the correct breadth; (*b*) Moulding: giving the correct outline and depth; (*c*) Bevelling: giving the faying surface the proper shape to meet the planking or iron skin.

forming-cylinder, *s.*

Paper-making: That cylinder in a paper-making machine on which the film of pulp is gathered, and which delivers it as a soft and weak web to the machines for hardening and drying.

* **form'-lĕss,** *a.* [Eng. *form*; *-less.*] Wanting form or shape; shapeless; without regularity of form.

"Like that great Spirit, who, with plastic sweep,
Moved on the darkness of the *formless* deep."
Coleridge: To Rev. W. L. Bowles.

† **form'-lĕss-nĕss,** *s.* [Eng. *formless*; *-ness.*] The quality or state of being formless; shapelessness. (*Athenæum*, May 31, 1884, p. 691.)

for-mō-mĕth'-ў-lăl, *s.* [Methylal.]

for-mō-nĭt'-rĭl, *s.* [Eng. *form(ic)*, *o* connective, and *nitril* (q.v.).]

Chem.: H·CN. A name sometimes given to hydrocyanic acid, as it may be regarded as the nitril of formic acid.

* **for-mŏs'-ĭ-tў,** * **for-mos-i-tie,** *s.* [Lat. *formositas*, from *formosus* = beautiful, handsome, from *forma* = shape, beauty.] Beauty, grace, gracefulness.

"Into your excellent *formositie*."—*Sidney: Wanstead Play*, p. 619.

* **form'-ŏŭs,** *a.* [Lat. *formosus*, from *forma*.] Beautiful, graceful.

'O pulchrior sole in beautie lucident
Of all femine most *formous* flour."
Balade, The Nine Ladies Worthie.

for'-mu-la (pl. **for'-mu-læ** or **for'-mu-las),** * **for'-mūle** (1) *s.* [Lat. *formula*, dimn. of *forma* = a form; Fr. *formule.*]

I. *Ord. Lang.:* A prescribed set or special form of words in which anything is stated or declared.

"I think I have seen all of them [papers], except the *formula* of association."—*Burke: Letter to Sir H. Langrishe.*

II. *Technically:*

1. *Chem.:* An expression by means of symbols, specially letters and numbers, of the chemical elements contained in a compound. [Empirical formulæ, Graphic formulæ, Rational formulæ.]

2. *Eccles.:* A formal enunciation or declaration of faith or doctrine.

3. *Math.:* The expression of a general rule or principle in algebraic symbols. For example, the equation—

$$(a + b)(a - b) = a^2 - b^2$$

is a formula, being the algebraic expression of the fact that the sum of two quantities multiplied by their difference is equal to the difference of their squares. If a rule or principle is translated into algebraic expressions, the result is a formula; conversely, if a formula is translated into ordinary language, the result is a rule or principle.

4. *Med.:* A prescription.

¶ (1) *Dental formula:* [Dental formula].

(2) *Formula of Concord:*

Ch. Hist.: A confession of faith upon the points on which the Lutherans differed from the Calvinists, especially in connection with the Eucharist. The issue of such a document was suggested by Augustus, Elector of Saxony, who employed James Andreæ to ascertain opinions on the subject, and draw it out. His chief assistants were first and last Martin Chemnitz, Nicholas Selnecker, Andrew Musculus, Christopher Cörner, and David Chytæus. The formula was published in 1580, all clergymen and schoolmasters being required by the Elector to subscribe to it. It endorsed the opinions of Luther, and widened the breach with the Swiss and other "reformed" churches. (*Mosheim*, &c.)

(3) *Formula Consensus:*

Ch. Hist.: A formula drawn up in 1675, by John Henry Heidegger, a celebrated divine, of Zurich, at the instance of his clerical brethren, to preserve the Calvinistic doctrine from the slight modifications of it introduced by the French divine Amyraut, and others. It was annexed by the magistrates to the common Helvetic formulas of religion. Its effect was found adverse rather than favourable to peace. It was abolished in the canton of Berne and the republic of Geneva in 1686, and ultimately became incapable of enforcement anywhere. (*Mosheim.*)

for'-mu-læ, *s. pl.* [Formula.]

for-mu-lā'-ĭc, *a.* [Lat. *formula*, and Eng., &c. suff. *-ic.*]

Math.: Presenting or containing a formula; relating to a formula.

formulaic equations, *s. pl.*

Math.: Equations one member of which is obviously the same in value as the other, though the two are for the moment differently expressed. Thus, $(x-y)(x+y) = x^2-y^2$ is a formulaic equation for $(x-y) \times (x+y) = x^2-y^2$. [Formula, II. 3; Identity.]

* **for'-mu-lar,** *a.* [Fr. *formulaire*, from Lat. *formula.*] Of or pertaining to a formula or formulæ; formulary.

* **for-mu-la-rĭs'-tĭc,** *a.* [Eng. *formulariz(e)*; *-tic.*] Pertaining to or exhibiting formularization (q.v.).

* **for-mu-lar-ĭ-zā'-tion,** *s.* [Eng. *formulariz(e)*; *-ation.*]

1. The act of formularizing or formulating.

2. A formularized or formulated statement or exhibition.

* **for'-mu-lar-īze,** *v.t.* [Eng. *formular*; *-ize.*] To formulate or reduce to a formula; to express or set down in a systematic and clear form.

for'-mu-lar-ў, *a.* & *s.* [Fr. *formulaire*, from Lat. *formula*; Sp. *formulario.*]

A. *As adj.:* According to a set form; stated; prescribed; ritual; formal.

"To have here mended the *formulary* part."—*North: Reflections on Le Clerc*, p. 675.

B. *As substantive:*

1. A book containing stated and prescribed forms; a book of precedents or set models, as of declarations, prayers, &c.

2. A prescribed or set form or model; a formula.

"I believe every one hath some mode and model or *formulary* of his own specially for his private cubicular devotions."—*Howell: Letters*, bk. i., let. 32.

for'-mu-lāte, *v.t.* [Lat. *formula.*] To reduce to or express in a formula; to put or set down in a systematic and comprehensive form; to declare or set forth clearly and distinctly.

"The General Synthesis . . . proceeds to *formulate* in such terms the successive phases of progressing life."—*Herbert Spencer: Psychology* (1870), i., p. viii.

* **form'-ūle** (1), *s.* [Fr.] [Formula.]

form'-ūle (2), *s.* [Formyl.]

* **for-mu-līz-ā'-tion,** *s.* [Eng. *formuliz(e)*; *-ation.*] The act of formulizing or formulating; reducing to a formula.

* **for'-mu-līze,** *v.t.* [Eng. *formul(a)*; *-ize.*] To reduce to or explain in a formula; to formulate.

"To *formulize* and impress the uncertain tenant-right custom with the authority of law was the chief object of the Land Act of 1870."—*F. Dun*, in *Times*, April 14, 1881.

for'-mўl, form'-ūlo (2), *s.* [Eng. *form(ic)*; *-yle* = Gr. ὕλη (*hulē*) = matter.]

Chem.: (II·CO)'. A monad fatty acid radical, contained in formic acid. This name was formerly given to the triad radical (CH)‴, which is contained in chloroform, $CH'''Cl_3$.

* **for-nais,** * **for-nays,** *s.* [Furnace.]

for-năx, *s.* [Lat. = a furnace.]

Fornax-chemica,

Astron.: (The Chemist's Furnace.) One of Lacaille's Southern Constellations. It is situated immediately below Cetus.

for-nĕnt', fō'rc-a-nĕnt. *prep.* [Eng. *fore.*, and *anent.*]

1. Directly opposite to.

2. Concerning.

* **fornicaric,** * **fornycary,** *a.* [Lat. *fornicarius.*] Fornicating, lewd.

"Thes shulen hnate the *fornicarie* womman."—*Wycliffe: Apocalypse* xvii. 16.

for'-nĭ-cāte, *v.i.* [Eccles. Lat. *fornicatus*, pa. par. of *fornicor*, from Class. Lat. *fornix* (genit. *fornicis*) = (1) a vault, an arch, (2) a brothel.] To commit fornication; to be lewd; to have unlawful sexual intercourse.

"With whom, lest they should *fornicate* or worse,
A tutor's sent by way of a dry nurse."
Churchill: The Farewell.

for'-nĭ-cāte, for'-nĭ-cāt-ĕd, *a.* [Lat. *fornicatus* = arched, vaulted; *fornix* (genit. *fornicis*) = an arch, a vault.]

I. *Arch.:* Vaulted like an oven or furnace; arched; concave within and convex without.

2. *Bot.:* Arching over, as a *fornicate* leaf.

for-nĭ-cā'-tion (1), *s.* [Lat. *fornicatio* = a vaulting, an arching over.

Arch.: The forming of a vault or arch; an arching. [Fornicate, *a.*]

for-nĭ-cā'-tion (2), * **for-ni-ca-cion,** * **for-ni-ca-tioun,** * **for-ny-ca-cioun,** *s.* [Fr., from Eccles. Lat. *fornicatio*, from *fornicatus*, pa. par. of *fornicor*; Sp. *fornicacion*; Port. *fornicação*; Ital. *fornicazione.*]

I. *Ord. Lang.:* Unlawful sexual intercourse of unmarried persons; incontinence; lewdness.

"This is the will of God . . . that ye should abstain from *fornication*."—*1 Thess.* iv. 3.

II. *Scripture:*

1. Idolatry.

"Thou didst trust in thine own beauty, and playedst the harlot, because of thy renown, and pouredst out thy *fornications* on every one."—*Ezekiel* xvi. 15.

2. Adultery.

3. Incest.

for'-nĭ-cā-tŏr, * **for-ni-ca-tour,** *s.* [Fr. *fornicateur*, from Eccles. Lat. *fornicator*; Sp. *fornicador*; Ital. *fornicatore.*]

I. *Ord. Lang.:* One who commits fornication; an unmarried person who has criminal intercourse with one of the other sex, also unmarried.

"Lest there be any *fornicator* or profane person."—*Hebrews* xii. 16.

2. *Scrip.:* An idolater.

* **for'-nĭ-cā-trĕss,** * **for-ni-ca-tresse,** *s.* [Eng. *fornicator*; *-ess.*] A woman who commits fornication.

"See you the *fornicatress* be removed."
Shakesp.: Measure for Measure, ii. 2.

for-nĭç'-ĭ-form, *a.* [Lat. *fornix* (genit. *fornicis*) = a vault, an arch, and *forma* = form.]

Bot.: Vaulted or arched. (The term is applied to the nectary of some plants.)

Romaunt of the Rose, 668.

for-sooth', *for-sothe, *adv.* [Eng. *for*, and *sooth.*] In truth, certainly, of a truth, in fact, very well. It is frequently used ironically.

"*Forsooth*, only her maid had stuck a pin wrong in her gown."—*Arbuthnot: History of John Bull.*

¶ It was formerly used as a word of honour in address to women. It is probable that an inferior, being called, showed his attention by answering in the words yes, *forsooth*, which latter in time lost its true meaning; and instead of a mere exclamatory interjection, was supposed a compellation.

"Carry not too much under-thought betwixte your selfe and them, nor your city mannerly word (*forsooth*), use it not too often in any case; but plain I, madam, and no, madam."—*B. Jonson: Poetaster*, iv. 1.

***for-sooth',** *v.t.* [Forsooth, *adv.*] To address with the word *forsooth*; hence, to address in a polite and ceremonious manner.

"The captain . . . had *forsoothed* her."—*Pepys. Diary*, Jan. 1661.

***for-sooth',** *s.* [Forsooth, *adv.*] One who is very polite and ceremonious to ladies; a ladies' man; a coxcomb.

for'-tu-nāte, *for-tu-nat, *a.* [Lat. *fortunatus,* pa. par. of *fortuno* = to make fortunate; *fortuna* = fortune; Ital. *fortunato;* Sp. *fortunado;* Prov. *fortunat.*]

1. Coming or happening by some good luck or favourable chance; bringing or presaging good fortune; auspicious (said of things): as, a *fortunate* occurrence, a *fortunate* stroke.

"The haruspex proclaiming it to be a *fortunate* omen."—*Middleton: Life of Cicero,* vol. i., § 1.

2. Receiving or meeting with good fortune; lucky, successful, prosperous; not liable to miscarriage or misfortune. (Said of persons.)

"I am most *fortunate* thus accidentally to encounter you."—*Shakesp.: Coriolanus,* iv. 3.

¶ (1) Crabb thus discriminates between *fortunate, lucky, prosperous,* and *successful:* "The *fortunate* and *lucky* are both applied to that which happens without the control of man; but the latter, which is a collateral term, describes the capricious goddess Fortune in her most freakish humours, and *fortunate* represents her in her most sober mood: in other words, the *fortunate* is more according to the ordinary course of things; the *lucky* is something sudden, unaccountable, and singular. *Prosperous* and *successful* seem to exclude the idea of what is *fortuitous,* although *prosperity* and *success* are both greatly aided by good *fortune. Fortunate* and *lucky* are applied as much to the removal of evil as to the attainment of good; *prosperous* and *successful* are concerned only in what is good, or esteemed as such: we may be *fortunate* in making our escape; we are *prosperous* in the acquirement of wealth. *Fortunate* is employed for single circumstances, *prosperous* only for a train of circumstances. The *fortunate* and *lucky* man can lay no claim to merit, because they preclude the idea of exertion; *prosperous* and *successful* may claim a share of merit proportioned to the exertion." (*Crabb: Eng. Synon.*)

(2) For the difference between *fortunate* and *happy,* see Happy.

for'-tu-nāte-lȳ, *adv.* [Eng. *fortunate; -ly.*] In a fortunate manner; by good fortune or luck; luckily, happily, successfully.

II. *Fig.*: Antiquated, belonging to a bygone age.

"Language is *fossil* poetry."—*Emerson: Essays: The Poet.*

B. *As substantive*:

I. *Literally*:

1. *Originally*: Anything dug up.

"*Fossils*, all bodies whatever that are dug out of the earth are by naturalists commonly called by the general name of *fossils*."—*Glossog. Nov.* (1719.)

¶ Johnson (1776) gives no other meaning to the word *fossil* than "that which is dug out of the earth." Prof. Robt. Jamieson, in his mineralogical and geological works, published early in this century, used the word *fossil* in this obsolete sense, often calling minerals fossils.

2. *Now*: Any body, or the traces of the existence of any body, whether animal or vegetable, which has been buried in the earth by natural causes; one of the bodies called organic remains. Even the cast of a fossil shell, that is the impression which it has left on the rock, is deemed a fossil. (Used often in the plural.)

¶ In the early part of the sixteenth century fossils were supposed by some Italians to have been formed in the hills by the action of the stars, a view which, prior to 1579, Leonardo da Vinci combated. Then the hypothesis arose of a plastic force, or, according to Andrea Mattioli, a fatty matter capable of fashioning stones into organic forms. But the hypothesis which held its place longer than any other, and is not yet extinct among the unscientific, is that they were relics of the Mosaic deluge. It is now thoroughly proved that the relics are really those of plants and animals, that they were nearly all of them in existence ages before the Mosaic deluge, that they are not nearly contemporaneous with each other, but differ in age by untold millions of years, that there is at least a progression among them, if not even the evolution of the last from the more antique. There are breaks or gaps in the series of fossiliferous strata, especially one between the palæozoic and the secondary strata, and another between the secondary and the tertiary. Once it was supposed that

there had been in the earth's geological history alternate periods of repose and convulsion; now it is believed that there would be no breaks if all lands were geologically explored, if all strata now submerged were accessible for investigation, and if local causes acting during bygone ages had been less effective in destroying portions of the record. Mr. Darwin shows that it is almost exclusively strata deposited in seas or lakes which at the time were slowly sinking that have been preserved; those formed when land was rising have, as a rule, been washed away. In the older strata, and sometimes in those not so ancient, fossils have been destroyed by metamorphic action, and when any rock is called non-fossiliferous or azoic, the cautious geologist means by the term only that fossils have not been found in it up to the present time. What coins are to the numismatologist and the historian, that fossils are to the palæontologist and the geologist: they enable him to recover forgotten chapters of history. Fossils are, however, more valuable than coins, they cannot any of them be so easily forged, and few of them can be forged at all.

II. *Fig.:* A contemptuous appellation for a person greatly behind the age.

1. *Palæont.:* Wood found fossil. In many cases the medullary rays in exogens and the ends of ducts in endogens are at least as clearly visible as in recent wood.

2. *Min.:* A popular name for some woody-looking specimens of asbestos.

fŏs-sĭl-ĭf′-ĕr-oŭs, *a.* [Lat. *fossilis* = dug out, fossil; *fero* = to produce, to yield, and suff. *-ous.*] Containing or producing fossils.

¶ Tabular view of the Fossiliferous Strata in the order of their superposition, which is also that of their chronological succession. The lower—*i.e.*, the older ones—are placed first:—

I. PRIMARY OR PALÆOZOIC ROCKS.

1. Laurentian	(1) Lower (2) Upper	4. Devonian or Old Red Sandstone	(7) Lower (8) Middle (9) Upper
2. Cambrian	(3) Lower (4) Upper	5. Carbonif-erous	(10) Lower (11) Upper
3. Silurian	(5) Lower (6) Upper	6. Permian	(12) Permian

II. SECONDARY OR MESOZOIC ROCKS.

7. Trias	(13) Lower (14) Middle (15) Upper	10. Cretaceous	(20) Lower Cretaceous or Neocomian (21) Upper
8. Lias	(16) Lias		
9. Oolite	(17) Lower (18) Middle (19) Upper		

III. TERTIARY OR CAINOZOIC ROCKS.

11. Eocene	(22) Lower (23) Middle (24) Upper	12. Miocene	(25) Lower (26) Upper
		13. Pliocene	(27) Older (28) Newer

IV. POST-TERTIARY ROCKS.

14. Post-Tertiary (29) Post Pliocene (30) Recent.

The foregoing table is from Sir Charles Lyell's *Student's Elements of Geology* (1871); but with the order reversed. For subdivisions of the several formations, see Laurentian, Silurian, &c., &c. Various other divisions have been made, among them some referring specially to the geology of this country, but the divisions above given have the precedence, and are those ordinarily used by geologists.

fŏs-sĭl-ĭ-fĭ-cā′-tion, *s.* [Eng. *fossilify*; *c* connect., and suff. *-ation.*] Fossilization (q.v.).

fŏs-sĭl′-ĭ-fȳ, *v.t.* & *i.* [Lat. *fossilis* = dug out, fossil, and *fio* (pass. of *facio*) = to become.]

A. *Trans.:* To render fossil, to convert into a fossil, to fossilize.

B. *Intrans.:* To become fossil; to be converted into a fossil.

fŏs′-sĭl-ĭsm, *s.* [Eng. *fossil*; *-ism.*] The science of fossils; that branch of palæontology which treats of fossil substances.

fŏs′-sĭl-ĭst, *s.* [Eng. *fossil*; *-ist.*] One versed in Fossilism (q.v.); a person who studies the nature and character of fossil substances.

"A species, as Mr. Janes the *fossilist* informed me, uncommonly valuable."—*Johnson: Journey to Western Islands.*

fŏs′-sĭl-ĭ-tȳ, *s.* [Eng. *fossil*; *i* connective; suff. *-ty* (q.v.).] The state or condition of a fossil.

fŏs sĭl-īz-ā′-tion, *s.* [Eng. *fossiliz(e)*; *-ation.*] The act or process of converting animal remains or vegetable substances into fossils; fossilizing.

¶ The burying of animal or vegetable remains—the first step towards their fossilization—can take place on land by the growth of peat, by their being covered by blown sand, by the ejections and alluvinms of volcanoes, in alluviums generally, in the ruins of landslips, or in the mud an stalagmite of caves and fissures. They are also constantly imbedded in subaqueons deposits, whether these be marine, lacustrine, or fluviatile. Peat is an antiseptic, and preserves organized bodies well. They are better kept in shale or any other fissile stratum than in sandstone: the latter is too porous. Some are silicified, some preserved from obliteration by the influence of calcareous matter, some by being made ferruginous, &c. Plants are often carbonized.

fŏs′-sĭl-īze, *v.t.* & *i.* [Eng. *fossil*; *-ize.*]

A. *Transitive:*

1. *Lit.:* To convert into a fossil.

"A small number of plants . . . will be *fossilized.*"—*Lyell: Geology,* ch. xlvii.

2. *Fig.:* To check the natural development by rendering fixed and immutable; to render permanently antiquated.

"Whereas Sanscrit remained fixed and *fossilized* for ever."—*Beames: Compar. Gram. Aryan Lang. of India,* vol. i. (1872) (Introd.), p. 5.

B. *Intransitive:*

1. *Lit.:* To become fossil; to be changed or converted into a fossil.

2. *Fig.:* To become antiquated and incapable of being influenced or affected by present circumstances.

fŏs-sĭl′-ŏ-ġȳ, *s.* [Eng. *fossil,* and Gr. λόγος (*logos*) = a discourse.] The same as FOSSILOLOGY (q.v.).

fŏs-sĭl-ŏl′-ŏ-ġĭst, *s.* [Eng. *fossilolog(y)*; *-ist.*] A person versed in Fossilology (q.v.); a fossilist.

fŏs-sĭl-ŏl′-ŏ-ġȳ, *s.* [Eng. *fossil*; *o* connective, and Gr. λογος (*logos*) = a discourse.] The science of fossils.

fŏs-sŏr′-ēș, fŏs-sŏr′-ĭ-a, *s. pl.* [Lat. *fossor* = a digger, a delver; *fodio* = to dig, to delve.]

Entom.: Burrowing Hymenoptera. A subtribe of the hymenopterous tribe Aculeata. Sexes two, the individuals in both of which are furnished with wings, legs formed for burrowing or for running, tongue not elongated, but widened at the extremity. Habits not social. The females of the fossores construct holes in the ground, where they form their nests. Depositing their eggs, they next lay up for the future larvæ a supply of food consisting of spiders and caterpillars rendered half dead by being stung. Many of the fossores are called sandwasps. The subtribe is divided into eight families: (1) Scoliadæ, (2) Sapygidæ, (3) Pompilidæ, (4) Sphecidæ, (5) Bembicidæ, (6) Larridæ, (7) Nyssonidæ, and (8) Crabronidæ (q.v.).

fŏs-sŏr′-ĭ-al, *a.* [Lat. *fossorii(a)* = digging (as an occupation); Eng. suff. *-al.*]

1. *Ord. Lang.:* Adapted for digging.

"The first is characterized . . . by the feet being *fossorial.*"—*Wright: Animal Life,* p. 70.

2. *Zoology:*

(1) Adapted for digging: as, *fossorial* feet.

(2) Having the power of digging; pertaining or relating to the Fossores (q.v.).

fŏss′-rōad, *s.* [Eng. *foss,* and *road.*] A fosse-way (q.v.).

fŏs′-su-lāte, *a.* [Lat. *fossul(a)* = a little trench; Eng. suff. *-ate.*]

Comp. Anat.: A term applied to long, narrow depressions in any surface, which is said to be *fossulate* when the hollows are not sufficiently deep to be termed fossæ. [FOSSA.]

fŏs′-tĕr, *v.t.* & *i.* [A.S. *fóstrian,* from *fóstor, fóstur* = nourishment, from *fóda* = food: cogn. with Dan. *fostre* = to bring up; *foster* = offspring; Icel. *fóstr* = nursing; *fóstra* = to nurse; Sw. *foster* = embryo; *fostra* = to foater.]

Eng.*), * **fou-mart,** * **fow-marte** (*Scotch*), *s.* [From A.S. *ful* = foul, and Eng. *marten,* from O. Fr. *marte, martre* = a martin. So called from its offensive smell.]

Zool.: The polecat (q.v.). (*Lit. & fig.*)

"Was ever such a *fulmart* for an huisher? . . . Martin Polecat . . . a stinking name, and not to be pronounced
In any lady's presence without a reverence."
Ben Jonson: Tale of a Tub, I. 1.

* **foun,** *s.* [O. Fr. *faon.*] A fawn.

"Be thou pulled out as a *foun.*"—*Wycliffe: Prov.* vi. 5.

* **founce,** *s.* [Prov. Fr. *fons;* Lat. *fundus.*] A foundation, a base.

"In the *founce* ther stonden stoure stepe."
E. Eng. Allit. Poems; Pearl, 113.

found, *pret. & pa. par. of v.* [FIND, *v.*]

* **found** (1), *s.* [FOUND (1), *v.*] Casting of metals.

"Item in the first on the foirwall foure new cannonis of *found* mountit upoun thair stokis."—*Inventories* (1566), *p.* 166.

* **found** (2), *s.* [FOUND (2), *v.*]

1. Foundation. (Applied to a building of any kind.)

"Our milkhouse had wa's sae dooms strang that ane waud has thocht it micht hae stude to the last day; but its *found* had been onnerminit by the last Lammas spait."—*Edinburgh Magazine,* Dec. 1818, p. 503.

2. Foundation, grounds; reason or basis.

found (3), *s.* [Etym. doubtful.] A three-square, single-cut file or float, with one very acute angle, used by comb-makers.

found (1), *v.t.* [Fr. *fondre,* from Lat. *fundo* = to pour.] To cast or form a metal by melting it and pouring it into a mould.

found (2), *v.t. & i.* [Fr. *fonder,* from Lat. *fundo,* from *fundus* = a foundation, a base.]

A. *Transitive:*

1. To lay the foundation or basis of; to fix or set firmly upon a foundation.

"It fell not, for it was *founded* upon a rock."—*Matt.* vii. 25.

2. To fix firmly.

"Then comes my fit again: I had else been perfect,
Whole as the marble, *founded* as the rock."
Shakesp.: Macbeth, III. 4.

3. To begin to raise or build.

"This cytee *founded* Helizeus Damascus."—*Maundeville,* p. 123.

4. To establish, to originate, to endow: as, To *found* a college.

"He *founded* a library, gathered together the acts of the kings and prophets."—2 *Maccabees* ii. 13.

5. To give birth or origin to: as, He *founded* a family.

6. To raise or base upon, as upon a principle or ground; to ground.

"The religion and the transaction upon which it was *founded,* were too obscure to engage the attention of Josephus."—*Paley: Evidences,* vol. i., ch. vii.

B. *Intrans.:* To rest, to rely, to defend. (Followed by *on* or *upon.*)

¶ (1) Crabb thus discriminates between to *found,* to *ground,* to *rest,* and to *build:* "To *found* implies the exercise of art and contrivance in making a support; to *ground* signifies to lay so deep that it may not totter; it is merely in the moral sense that they are here considered, as the verb to *ground* with this signification is never used otherwise. *Found* is applied to outward circumstances; *ground* to what passes inwardly . . . To *found* and *ground* are said of things which demand the full exercise of the mental powers; to *rest* is an action of less importance: whatever is *founded* requires and has the utmost support; whatever is *rested* is more by the will of the individual: a man *founds* his reasoning upon some unequivocal fact; he *rests* his assertion upon mere hearsay. To *found, ground,* and *rest* have always an immediate reference to the thing that supports; to *build* has an especial reference to that which is supported, to the superstructure that is raised." (*Crabb: Eng. Synon.*)

(2) For the difference between to *found* and to *institute,* see INSTITUTE.

fŏun-dā'-tion, * **foun-da-ci-oun,** *s.* [Fr. *fondation,* from Lat. *fundatio,* from *fundo* = to found; Sp. *fundacion;* Port. *fundação;* Ital. *fondazione.*]

I. *Ordinary Language:*

1. The act of founding, fixing, or beginning to build.

"He began the *foundacioun* of the tour of Babyloyne."—*Maunderille,* 223.

2. The basis of a building; the solid ground on which a structure rests.

"That is the way to make the city flat,
To bring the roof to the *foundation,*
To bury all." *Shakesp.: Coriolanus,* III. 1.

3. That part of a structure which is below the surface of the ground.

4. The act of establishing, originating, or founding; establishment.

"That was the *foundacioun* of here ordre."—*Maundeville,* p. 88.

5. The principles, basis, or grounds on which anything stands, rests, or is supported.

"Having laid down as my *foundation,* that the Scripture is a rule that in all things needful to salvation, is clear, sufficient, and ordained by God Almighty for that purpose."—*Dryden: Religio Laici.* (Pref.)

6. The grounds or reasons on which an opinion, notion, or belief is founded.

"[I] can never prevail on myself to make complaints which have no cause, in order to raise hopes which have no *foundation.*"—*Burke: Observations on a late State of the Nation.*

7. A donation, legacy, or revenue appropriated to endow an institution, and constituting a permanent fund for its support; an endowment.

"He had an opportunity of going to school on a *foundation.*"—*Swift.*

8. That which is founded, instituted, or endowed; an institution founded or supported by an endowment.

II. *Hat-making:* The body of a hat or bonnet, of wool or inferior fur, upon which the napping of superior fur is laid and united at the battery.

¶ Crabb thus discriminates between *foundation, ground,* and *basis:* "A report is said to be without any *foundation,* which has taken its rise in mere conjecture, or in some arbitrary cause independent of all fact; a man's suspicion is said to be without *ground,* which is not supported by the shadow of external evidence: *unfounded* clamours are frequently raised against the measures of government; *groundless* jealousies frequently arise between families, to disturb the harmony of their intercourse. *Foundation* and *basis* may be compared with each other, either in the proper or in the improper significations: both *foundation* and *basis* are the lowest parts of any structure; but the former lies under *ground,* the latter stands above: the *foundation* supports some large and artificially erected pile; the *basis* supports a simple pillar: hence we speak of the *foundation* of St. Paul's, and the *base* or *basis* of the Monument." (*Crabb: Eng. Synon.*)

foundation-bolt, *s.* A bolt which keeps a bed-plate—of an engine, for instance—down to its substructure.

foundation-muslin, *s.*

Fabric: An open-worked, gummed fabric, used for stiffening dresses and bonnets.

foundation-pile, *s.*

Hydr. Eng.: A pile driven into soft or treacherous ground to form, with others, an unyielding basis for a structure.

foundation-sacrifice, *s.*

Comp. Mythol.: A sacrifice common to races of low culture, who sought to render buildings firm and stable by drenching the foundation-stones with blood, by burying a human victim beneath them, or by immuring some unfortunate wretch in the structure itself. Tradition asserts that such sacrifices were

practised in the Middle Ages in some form or other, at the castle of Liebenstein in Thuringia, at the walls of Copenhagen, and at Scutari, and Tylor states that so late as 1843, when a new bridge was built at Halle, a notion was abroad among people that a child was wanted to be built into the foundations. The idea underlying these sacrifices was the propitiation of evil spirits, or an endeavour to render them, in some sort, guardians of the structure. Hugh Miller (in his *My Schools and Schoolmasters*, ch. xi.), relates a conversation he had with a herd-boy on the subject of ghosts. The boy said: "It's the spirit of the man who was killed on the foundation-stone, just after it was laid, and then built into the wa' by the masons, that he might *keep* the castle by coming back again; and they're saying that a' the verra ould houses in the kintra had murdered men builded intil them in that way, and that they have a' o' them their bogle." The buccaneers of the Spanish Main are said to have killed and buried a negro or a Spaniard with their treasures, that his spirit might haunt the spot and drive away intruders. In this case, of course, the dominant idea was that of guardianship. There seems to be an allusion to some such rite in the book of Joshua: "He shall lay the foundation thereof in his firstborn, and in his youngest son shall he set up the gates of it" (vi. 26). The custom still lingers in some parts of Asia and Africa, and in Polynesia and Borneo.

"More cultured nations of Southern Asia have carried on into modern ages the rite of *foundation-sacrifice*."—*Tylor: Primitive Culture*, i. 97.

foundation-plate, *s.*

1. *Bookbind.:* The base plate on which ornaments are arranged in the stamping or embossing press.

2. *Steam-eng.:* The bed-plate of a steam-engine.

foundation-school, *s.* A school supported by an endowment; an endowed school.

foundation-stone, *s.*

1. A stone in a public building laid publicly with ceremony: it is not necessarily any part of the foundation.

2. The foundations.

"My castles are my king's alone,
From turret to *foundation-stone*."
Scott: Marmion, vi. 13.

‡ **fŏun-dā'-tion,** *v.t.* [FOUNDATION, *s.*] To found, to settle, to ground.

fŏun'-dẽr (1), *s.* [Eng. *found* (1); *-er.*] One who casts metal in various forms; principally used in composition, as, a bell-*founder*, a type-*founder*, &c.

founders' cleansing-mill, *s.* A tumbling-box in which small castings are cleansed from adhering sand. In a similar box articles may be polished or rounded by mutual attrition, assisted, if need be, by an abradant, as sand or emery.

founders'-dust, *s.* Charcoal powder and coal and coke dust, ground fine, and sifted for casting purposes.

founders'-lathe, *s.* A lathe used in preparing the cores for loam-moulding, such as those for iron pipes. A central spindle, being prepared, is placed on centres or on V's, and the clay loam covering is plastered on and regulated by a templet or pattern.

founders'-sand, *s.* A species of sand used for making founding-moulds.

fŏun'-dẽr (2), * **foun-dour,** * **fown-der,** *s.* [Eng. *found* (2); *-er.*]

1. One who founds or lays the foundation of; a builder; an erecter.

"Of famous cities we the *founders* know."
Waller: On St. James's Park, 9

2. One from whom anything has its original or beginning; an author.

"Marchol they*r founder*, patron, and precident."
Lydgate: Minor Poems, p. 164.

3. One who endows or establishes a permanent fund for the support of an institution.

"This hath been experimentally proved by the honourable *founder* of this lecture in his treatise of the air."—*Bentley: Boyle Lectures.*

founders'-shares, *s. pl.* Shares issued to the founders of (or vendors to) a public company, as a part of the consideration for the business, or concession, &c., taken over, and not forming a part of the ordinary capital. As a rule, such shares only participate in profits after the payment of a fixed minimum dividend on paid-up capital.

fôu'-rĭ-ĕr-ĭşm, *s.* [Named from the founder, Charles Fourier (Def.); Eng. suff. *-ism.*]

Polit. Econ. & Hist.: A system partly of co-operation, partly of socialism, advocated, and to a certain extent carried out, by Charles Fourier, a Frenchman, born at Besançon, April 7, 1772. He was for some considerable time in a merchant's office, and was at a susceptible age when the ferment produced by the first French Revolution was continually bringing new views as to the reorganization of society before men's minds. A benevolent man, he for years attempted to devise a scheme for the benefit of society, and in a series of publications, which both the reviewers and the public, as a rule, ignored, made known the opinions since called by his name. He was a devout but liberal Roman Catholic, and a student of prophecy, and believed that he was acting in conformity with scripture principles in proposing his scheme. He died in Paris on Oct. 10, 1837, in his 66th year, too early to foresee the extent to which his views on the relations of capital and labour were destined ultimately to spread.

Fourier's scheme was that what he called from the word phalanx, a phalanstery, consisting of about 400 families, or 1,800 persons, should live together, combining their labour, upon a district about a square league in extent. The buying and selling transactions requisite for the support of the community, were to be managed by a single person, which would save a multitude of peddling operations. If any brought capital into the concern, it was not confiscated, but he was allowed interest upon it. The labour being carried on in common, the profits were apportioned on the following system. First a minimum of mere subsistence money was assigned to every member of the society, including those incapable of labour. The remainder of the profits were then divided in proportions agreed on beforehand, to remunerate labour and talent, and pay interest on the capital received. The profits divided thus were then expended by the individual recipients as they pleased. An effort was made about 1852 to form an industrial colony on Fourier's plan, but the attempt was unsuccessful.

fŏx, *s.* [A.S.; cogn. with Dut. *vos:* Icel. *fox, fóa;* Goth. *fawho;* O. H. Ger. *foha;* M. H. Ger. *vohe, vuhs;* Ger. *fuchs.*]

I. *Ordinary Language:*

1. *Lit.:* In the same sense as II. 3 (1).

"*Foxes* have holes, and the birds of the air have nests."—*Luke* ix. 58.

2. *Figuratively:*

(1) A sly, cunning fellow; a knave.

"It [metaphor] may be founded on comparison, first, of the qualities of a man with those of a beast; as when we call a crafty and cruel man a *fox*."—*Beattie: Moral Science*, pt. iv., ch. i., § 1.

(2) A sword (from the figure of a fox being frequently engraved on the blades; but perhaps from Lat. *falx*).

"Thou diest on point of *fox*."
Shakesp.: Henry V., iv. 4.

II. *Technically:*

1. *Zoology:*

(1) *Spec.:* *Vulpes vulgaris*, formerly and still by many called, after the example of Linnæus, *Canis vulpes.* Its cunning is proverbial. It is an inhabitant of nearly all Europe, as well as of Western Asia and Northern Africa. It would probably be extinct in Britain, were it not preserved to be hunted. Its English book-name is the Common fox.

(2) *Gen.:* The genus Vulpes. The foxes differ from the dogs in having a long bushy tail, and the pupil of the eye elliptical or nearly linear by day, but becoming circular or nearly so by night. This fits them to be nocturnal animals. The American or Red Fox is *Canis fulvus.* Many skins are annually exported from America. *Vulpes lagopus* is the Arctic fox. The Deccan fox is *V. bengalensis*, though Bengal and the Deccan are some distance apart.

(3) *Callionymus lyra*, the Gemmeous Dragonet, a British fish, so called from its yellow colour.

2. *Naut.:* A small strand of rope made by twisting several rope-yarns together. Used for seizings, mats, sennits, and gaskets.

3. *Mach.:* A wedge driven into the split end of a bolt to tighten it. [Fox-bolt.]

fox-bats, *s. pl.*

Zool.: The bats with fox-like heads, constituting the family Pteropidæ. They are of large size, the Kalong (*Pteropus edulis*) measuring four to five feet between the tips of the expanded wings, and inhabit the Eastern Islands, Southern Asia, and Africa. [Flying-fox, Pteropidæ.]

fox-bitch, *s.* A female foxhound.

"When my *fox-bitch*, Beauty, grows proud, I'll borrow him." *Beaum & Flet.: Philaster*, iv., 1.

fox-bolt, *s.* A description of bolt which is made tight by a fox or wedge driven into a split in the end.

fox-brush, *s.* The brush or tail of a fox.

fox-chop, *s.*

Bot.: *Mesembryanthemum vulpinum.*

fox-fish, *s.*

Zool.: [Fox, *s.*, II. 3 (3).].

fox-grape, *s.*

Bot.: *Vitis vulpina*, so called because its fruit has a foxy taste. It is a native of the United States, where it is common. The fruit of various improved varieties of it has been sent to Europe under the names of the Bland, the Isabella, the Oswego Tokay, &c.; all, however, are much inferior to that of the European grape, *Vitis vinifera.* Some other species of the genus with a foxy taste have also been called fox-grapes.

fox-grass, *s.*

Bot.: *Geranium Robertianum*, from the smell resembling that of a fox. (*Ency. of Agric.; Britten & Holland.*)

fox-key, *s.*

Mach.: A split cotter with a thin wedge of steel driven into the end to prevent its working back.

fox-shark, *s.*

Ichthy.: A shark, *Alopias*, or *Alopecias vulpes;* called also the Sea-fox, the Thresher, and the Sea-ape. It attains a length of about fifteen feet, and is found occasionally in the British seas. The resemblance to a fox is in the length and roughness of the tail.

* **fox-sleep,** *s.* A feigned sleep.

fox-tail, *s.* [Foxtail.]

* **fox-whelp,** *s.* Some kind of liquor.

"*Fox-whelp*, a beverage as much better than champagne, as it is honester, wholesomer, and cheaper."—*Southey: The Doctor*, Interchapt. xvi.

fox's-claws, *s. pl.*

Bot.: *Lycopodium clavatum.*

fox's-foot, *s.*

Bot.: A grass, *Dactylis glomerata.*

fŏx, *v.t. & i.* [Fox, *s.*]

A. *Transitive:*

* **I.** *Ordinary Language:*

1. To deceive; to cheat; to entrap; to swindle.

"'Fore Jove, the captain *foxed* him rarely."
Mayne: City Match, iii. 1.

2. To intoxicate; to stupefy with drink.

Bot.: The genus Digitalis, and specially the British species, *D. purpurea*, the Purple Foxglove. It grows to the height of three or four feet, with very long spikes of numerous drooping flowers, which are generally purple, though occasionally white. It is common in Scotland, and in parts of England; rare in the eastern counties, but occurring sparingly in Epping Forest.

"Pan through the pastures often times hath runne
To plucke the speckled *fox-gloves* from their stem."
Browne: Britannia's Pastorals, bk. ii., s. 4.

¶ The Canary foxglove is *Digitalis canariensis;* the Downy false foxglove is an American name for *Gerardia flava;* and the Ladies' foxglove is *Verbascum Thapsus.*

foxglove-shaped, *a.*

Bot.: Shaped like the corolla of Digitalis. Nearly the same as Campanulate, but longer and irregular.

fŏx'-hŏund, *s.* [Eng. *fox*, and *hound.*] A hound kept and trained for hunting foxes. They are smaller than the staghound, averaging twenty-two to twenty-four inches in height. They vary very much in colour. They possess a very fine scent, great fleetness, and endurance.

fŏx'-hŭnt, *s.* [Eng. *fox*, and *hunt.*] The chasing or pursuing of a fox with hounds; a foxchase.

fŏx'-hŭnt-ĕr, *s.* [Eng. *fox*, and *hunter.*] One who hunts or chases foxes with hounds; one given to foxhunting.

"Such absurdity must have shocked even the roughest and plainest *foxhunter* in the House."—*Macaulay: Hist. Eng.*, ch. xviii.

fŏx'-hŭnt-ĭng, *a.* & *s.* [Eng. *fox*, and *hunting.*]

A. *As adj.:* Given to or fond of the hunting of foxes with hounds.

2. *Gen.:* The genus Alopecurus (q.v.).

foxtail-wedging, *s.*

Joinery: A mode of spreading the end of a tenon in the mortise, so as to give it a dovetail character to resist withdrawal. The same is applied to wooden pins which occupy holes not bored through. In the point of the pin is inserted a thin wedge of hard woad. When this reaches the bottom of the hole, it sinks into and spreads the end of the pin so as to bind it very firmly in the hole. With a tenon, it is usual to insert a number of small wedges, so that it may not be split much at any one point.

fŏx'-trăp, *s.* [Eng. *fox*, and *trap.*] A gin or trap set to catch foxes.

"Answer a question, at what hour of the night to set a *foxtrap*?"—*Tatler.*

fŏx'-ў, *a.* [Eng. *fox; -y.*]

* 1. Of or pertaining to a fox or foxes.

* 2. Resembling a fox in character or nature; fox-like, cunning.

"Oh *foxy* Pharisay, that is thy leuen, of which Christ so diligently had ya beware."—*Tyndall: Workes*, p. 148.

3. A term applied to prints, books, &c., which are discoloured with light-brown or yellow spots; foxed.

"That [style] of Titian, which may be called the Golden manner, when unskilfully managed becomes what the painters call *foxy*."—*Sir J. Reynolds: Notes on Dufresnoy.*

4. A term applied to grapes which have the sour flavour of the fox-grape.

5. Sour, acid; said of wine, beer, &c. which has become sour in the process of fermentation.

* **fŏy** (1), *s.* [Fr. *foi.*]

1. Faith.

1. To lose flavour; to become mouldy.

2. To spit, to salivate.

"He freathes (froths) and *foxes* ower muckle at the mou' for me: The head's aye dry where the mou's fozy."—*Tennant: Card. Beaton*, p. 116.

* **fōz'-ĭ-nĕss,** *s.* [Eng. *fozy; -ness.*]

1. The state of being fozy or spongy; sponginess, softness.

2. Mental obtuseness or softness.

"The weak and young Whigs have become middle-aged, and their *foziness* can no longer be concealed, so we have no satisfaction now in playing with them at foot-ball."—*Blackwood's Magazine*, Dec., 1821, p. 753.

* **fōz'-ў,** *a.* [Etym. doubtful; cf. A.S. *wosig* = juicy; Dut. *voos* = spongy.] Spongy; soft; fat and puffy.

* **fra,** *prep.* [From.]

fra, *s.* [Ital., for *frate* = brother, monk.] See etymology.

fra de diavolo, *s.*

Ecclesiol.: The devil's advocate (*Advocatus diaboli*), the advocate who, when the canonization of a saint by the pope is proposed, is appointed to urge all that he justly can against the character of the person whom it is contemplated to honour, and give reasons why the canonization should not be carried out. The analogy between this functionary and the devil is that both are accusers of the brethren (cf. Rev. xii. 10), and that διάβολος (*diabolos*) in Greek properly means a slanderer; the difference lies in their motives.

frăb, *v.t.* [Etym. doubtful.] To worry, to harass.

"*I frabbed* you and plagued you from the first."—*Mrs. Gaskell: Ruth*, ch. xxxvi.

frăb'-bit, *s.* [Frab, *v.*] Peevish.

1. *Ord. Lang.:* Over-ripe; rotten from over-ripeness.

2. *Bot.:* Pasty, between fleshy and pulpy.

frăck, *a.* [A.S. *frec* = bold, rash; Sw. *frāch* = bold, impudent; Icel. *frekr* = voracious; Dan. *frak* = audacious; Ger. *frech* = saucy; O. H. Ger. *freh* = greedy.] [Freak.]

1. Ready; eager; forward.

2. Stout in body.

3. Stout, firm in mind.

* **frăct,** *v.t.* [Lat. *fractus*, pa. par. of *frango* = to break.] To break; to violate; to infringe.

"My reliance on his *fracted* dates
Has smit my credit."
Shakesp.: Timon of Athens, ii. 1.

frăct'-a-blc, *s.* [Lat. *fractus* = broken, pa. par. of *frango* = to break.]

Arch.: A gable coping, when the coping follows the outline of the gable, and is broken into steps, crenelles, ogees, &c.

frăct'-ĕd, *a.* [Lat. *fractus*, pa. par. of *frango* = to break.]

1. *Ord. Lang.:* Broken.

"Nym, thou hast spoke the right, his heart is *fracted* and corroborate."—*Shakesp.: Henry V.*, ii. 1.

2. *Her.:* Having a part displaced as if broken: as, a chevron *fracted.*

frăc'-tion, * **frac-cion,** *s.* [Fr., *fraction*, from Lat. *fractio*, from *fractus*, pa. par. of *frango* = to break; Sp. *fraccion*; Ital. *frazione.*]

I. *Ordinary Language:*

1. The act of breaking; especially by violence; fracture; rupture.

"The surface of the earth hath been broke, and the parts of it dislocated; several parcels of nature retain still the evident marks of *fraction* and ruin."—*Burnet: Theory of the Earth.*

2. The state of being broken or fractured.

"Neither can the natural body of Christ be subiect to any *fraction* or breaking vp by yt Scripture, which saith: And ye shall break no bone of him."—*Foxe: Martyrs*, p. 1,050.

3. A fragment; a portion; a bit; a broken part.

"But understand well, that these degrees of signes, ben enerich of hem considered of lx. minutes, and euery minute of lx. secondes, and so forth into smal *fractions* infinite, as saieth Alcabucius."—*Chaucer: Of the Astrolabe.*

4. In the same sense as II. 1.

"I know we often proceed to *fractions* supposed to express less than unit, but in this notion we impose upon ourselves by shifting our ideas and considering that as a multitude which before we consider as one: therefore we cannot make a *fraction* without multiplying first before we divide."—*Search: Light of Nature*, vol. ii., pt. i., ch. ii.

* 5. A schism.

"The present *fractions* are from the same cause."—*Taylor: Liberty of Prophesying*, p. 403.

II. *Technically:*

1. *Arith.:* A broken number, the representation of one or more parts of a whole. Fractions are divided into Common or Vulgar, and Decimal. [Decimal fractions.] In the former, one number is placed above the other with a short line between, as $\frac{5}{9}$. The lower number is called the denominator, and shows into how many equal parts a unit is divided; the upper number, or numerator, shows how many of these parts are expressed by the fraction. Vulgar fractions may be Proper, having the numerator less than the denominator ($\frac{3}{4}$); Improper, having the numerator either equal to ($\frac{7}{7}$) or greater than the denominator ($\frac{9}{7}$): in the former case the fraction = unity, in the latter it may be reduced to an integer and a proper fraction ($1\frac{2}{7}$); Simple, consisting of a single expression ($\frac{1}{2}$); Compound, consisting of a fraction of a fraction ($\frac{3}{4} \times \frac{1}{5}$); or Mixed, composed of an integer and a whole number ($6\frac{3}{4}$).

* 2. *Eccles.:* The act or rite of breaking the bread in the celebration of the Holy Communion.

"The distributing the bread to the company, after the benediction and *fraction*, was customary among the Jews."—*Waterland: Works*, vii. 51.

¶ For the difference between *fraction* and *rupture*, see Rupture.

¶ (1) *Continued fractions:* [Continued, ¶ (3)].

(2) *Vanishing fractions:*

Alg.: Fractions which, if a certain supposition be carried out, will have their numerator and denominator destroyed at the same time by being made equivalent to $\frac{0}{0}$.

frăc'-tion-ăl, *a.* [Eng. *fraction; -al.*] Of or pertaining to fractions; constituting a fraction; comprising a part or parts of a unit; forming but a small part; insignificant.

"We make a cypher the medium between increasing and decreasing numbers, commonly called absolute or whole numbers, and negative or *fractional* numbers."—*Cocker: Arithmetick.*

* **frăc'-tion-ą-rў,** *a.* [Eng. *fraction; -ary.*] Fractional.

frăc'-tious, *a.* [Prov. Eng. *fratch* = to squabble, to quarrel, to chide.] [Fracchen.] Peevish, fretful, snappish, apt to quarrel, cross.

"You will not find him *fractious*."—*Morton: School of Reform.*

frăc'-tious-lў, *adv.* [Eng. *fractious; -ly.*] In a fractious, peevish, or fretful manner; peevishly, crossly.

frăc'-tious-nĕss, *s.* [Eng. *fractious; -ness.*] The quality or state of being fractious; peevishness; fretfulness.

Pope: Temple of Fame, 508.

II. *Law:*

1. In the same sense as I. 4.

* 2. In feudal law a final agreement between persons concerning lands or rents, or between the lord and his vassal, prescribing the conditions on which the latter shall hold his lands.

"A *fine*, which was till quite recently a very usual method of transferring an estate of freehold, was neither more or less than an amicable agreement of a suit, actual or fictitious, by leave of the king or his justices, whereby the lands which were the subject of the action became, or were acknowledged to be, the right of one of the parties."—*Blackstone: Comment.*, bk. ii., ch. 18.

* 3. A sum of money paid by a tenant on entering into possession, or for admission to a copyhold; also, a sum paid for the renewal of a lease.

"Some landlords, instead of raising the rent, take a *fine* for the renewal of the lease."—*Smith: Wealth of Nations*, bk. v., ch. ii.

¶ Crabb thus discriminates between *fine*, *forfeiture*, *mulct*, and *penalty*: "The *fine* and *mulct* are always pecuniary; the *penalty* may be pecuniary; a *forfeiture* consists of any personal property: the *fine* and *mulct* are imposed; the *penalty* is inflicted or incurred; the *forfeiture* is incurred. The violation of a rule or law is attended with a *fine* or *mulct*, but the former is a term of general use; the latter is rather a technical term in law: a criminal offence incurs a *penalty*; negligence of duty occasions the *forfeiture*." (*Crabb: Eng. Synon.*)

¶ (1) *Fine of alienation:* A fine or sum of money paid to the lord by a tenant, whenever he had occasion to alienate, or make over his land to another.

"For, when everything came in process of time to be bought and sold, the lords would not grant a licence to their tenant, to alien, without a *fine* being paid."—*Blackstone: Comment.*, bk. ii., ch. 3.

(2) *Fine of lands:* [FINE, s, II. 2].

(3) *In fine:* In conclusion, in short, finally; to sum up.

fĭn'-grọmş, *s.* [Etym. doubtful; perhaps connected with *fingering*, C. II. 2.] A kind of woollen cloth made in Aberdeenshire, denominated, as it would seem, from the quality of the worsted of which it is wrought.

"In the beginning of this century, the woollen manufactures of Aberdeenshire were chiefly coarse slight cloths, called plaidens and *fingroms*."—*Statist. Acc. (Aberd.)*, xix. 203.

fĭn'-ĭ-al, *s.* [Lat. *finis* = an end; *finio* = to finish.]

Arch.: A pointed ornament or pinnacle surmounting the apex of a Gothic gable. It is properly confined to the bunch of foliage which terminates a pinnacle, canopy, pediment, &c.

*** fĭn'-ĭc**, *** fĭn'-ĭck**, *a.* [FINICAL.] The same as FINICAL (q.v.).

fĭn'-ĭ-cal, *a.* [From *fine*, a. (q.v.).] Affecting great nicety or delicacy; over-nice; fastidious; particular; crotchetty; foppish.

"Be not too *finical*: but yet be clean,
And wear well-fashioned clothes like other men."
Dryden: Ovid; Art of Love.

¶ Crabb thus discriminates between *finical*, *spruce*, and *foppish*: "These epithets are applied to such as attempt at finery by improper means. The *finical* is insignificantly fine; the *spruce* is laboriously and artfully fine; the *foppish* is fantastically and affectedly fine. The *finical* is said mostly of manners and speech; the *spruce* is said of the dress; the *foppish* of dress and manners." (*Crabb.: Eng. Synon.*)

fin-ĭ-căl'-ĭ-tў, *s.* [Eng. *finical*; *-ity.*]

1. The quality or state of being finical, finicalness.

frănc, * frănk (1), *s.* [Fr. *franc.*] [Frank, *a.*]

* 1. A name given to two coins current formerly in France, the one of gold, and worth about half-a-guinea, the other of silver and worth about three shillings and sixpence.

2. The modern French coin, the unit of value and the unit of account in France. It

FRANC.

is of silver, ·835 fine, and weighs 5 grammes; its value in sterling is strictly 8·8496568 pence, but it is usually reckoned at about 9¼d. It is divided into 100 centimes.

*** frănc,** *a.* [Frank.]

franc-tireur, *s.*

Fr. Mil.: A sharpshooter or free-shooter; one of a body of men raised in France during the Franco-German war of 1870, and employed in guerilla warfare.

*** frănc** (2), *** frank** (2), *s.* [Frank (2), *s.*]

frăn'-çhīsc, * fraun-chise, * fran-chyse, * fraun-chyse, *s.* & *a.* [Fr., from *franchissant*, pr. par. of *franchir* = to make free; *franc* = free.]

A. *As substantive:*

* **I.** *Ordinary Language:*

1. Freedom; liberty.

"We wolleth for oure *franchise* fieghti,
And for our lond." *Robert of Gloucester*, p. 47.

2. A privilege; a right granted by the sovereign to an individual or to a body; an immunity or exemption from ordinary jurisdiction.

"*Franchise* and liberty are used as synonymous terms; and their definition is a royal privilege or branch of the sovereign's prerogative, subsisting in the hands of a subject; the kinds of them are various, and almost infinite. To be a county palatine is a *franchise*, vested in a number of persons. It is likewise a *franchise* for a number of persons to be incorporated and subsist as a body politic. Other *franchises* are to have a manor or lordship; to have wails, estrays, royal fish; to have a fair or market; or to have a forest, warren, or fishery, endowed with privileges of royalty."—*Blackstone: Comment.*, bk. ii., ch. 2.

3. The district or extent of jurisdiction to which a certain privilege or right extends; the limit of a privilege or immunity.

"In the great *franchises* of the latter . . . the king's writ had no course."—*Hallam.*

4. A sanctuary or asylum for persons liable to be arrested.

"The king's sheriffs are empowered to enter all *franchises* for the apprehension of felons or traitors."—*Hallam.*

5. Frankness; generosity; nobility.

"Here may ye seen, how excellent *franchise*
In woman is whan they hem narwe avise."
Chaucer: C. T., 9,861.

II. *Technically:*

1. *Law:* An incorporeal hereditament, the same as liberty; a royal privilege or branch of the crown's prerogative subsisting in the hands of a subject. It arises either from royal grant or from prescription assumed to have been founded originally on such a grant. For different kinds of franchise see extract from Blackstone under I. 2.

2. *Elective Franchise:* In the United States the word Franchise is commonly used as signifying the Elective Franchise, and indicates the right to vote at elections on matters of national, state, or municipal government. The Constitution of the United States contains no provisions as to who shall possess the franchise privilege, leaving this to be settled by the states themselves. Equally it belongs to all citizens, but the rights of franchise and of citizenship are separate and distinct, and the guarantee of the one does not necessarily convey that of the other. There have been at various times religious and property qualifications to the right of franchise, but at present all male citizens, white and black alike, possess this privilege, while the full franchise has been conferred upon women in the State of Wyoming, and partial franchise in many other states, in some of which the full franchise is likely to be conferred at an early day. There is little doubt that women will, eventually, have partial or full franchise in all of the states, as there is a growing demand for the proper recognition of their rights. There are certain requirements as to residence, and in some states the right to vote is taken for a certain period from those convicted of some classes of crime.

In Britain the right to the elective franchise has passed through many mutations. In 1429 it was limited to those who had freehold land, or tenement to the value of forty shillings, and, soon after, residence in the country was made essential. In 1832 county franchise was given to those who paid £50 rent, and borough franchise to those living in premises of the value of £10. In 1867, in consequence of a vigorous popular demand, borough franchise was greatly extended, and county franchise given to those who owned land to the value of £5, or tenements paying £12 annual rent. More recently a much greater extension of the franchise has been granted, and it is now almost as universal as in the United States. It has been given in a considerable measure to women, and they are advancing toward equal rights with men in this particular.

* **B.** *As adj.:* Enjoying a franchise or privilege; privileged.

"Yet he was fayne to departe and to go to Trecte, a *fraunches* towne for all maner of people, payeng for that they take."—*Berners: Froissart; Cronicle*, vol. ii., ch. clx.

*** frăn'-çhīse, * fraun-chise,** *v.t.* [Franchise, *s.*] To make free; to enfranchise; to give freedom or liberty to.

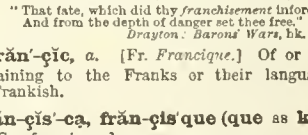
"Which suffredist passioun
Oonly to *fraunchise* our mortalite."
Lydgate: Minor Poems, p. 249.

*** frăn'-çhīse-ment,** *s.* [Eng. *franchise*; *-ment.*] A release or setting free from any burden or restriction; freedom; liberty.

"That fate, which did thy *franchisement* inforce,
And from the depth of danger set thee free."
Drayton: Barons' Wars, bk. iii.

*** frăn'-çĭc,** *a.* [Fr. *Francique.*] Of or pertaining to the Franks or their language; Frankish.

frăn-çĭs'-ca, frăn-çĭs'que (que as k), *s.* [Fr. *francisque.*]



FRANCISCA

Archæol.: The ancient Frankish battle-axe. It differed from the modern axe in the axe in that it was joined with the handle.

"Their weapons were a long sword, a two-edged axe, called a *francisca*, and a javelin."—*H. B. Stuart: Hist. of Infantry*, ch iv.

Frăn-çĭs'-cạn, *a.* & *s.* [Fr. *Franciscain*; Ital. *Franciscano*; Lat. *Franciscanus* = pertaining to St. Francis of Assisi. (See def.)]

A. *As adj.:* Pertaining or relating to St Francis. [B.]

B. *As substantive:*

1. *Sing.:* A member of the order described under 2.

2. *Pl.:* The followers of St. Francis, who was born in 1182, at Assisi, in Umbria, and spent his youth in dissoluteness; but being affected with serious sickness in his twenty-fourth year, and repenting of his sins, devoted himself to a religious and ascetic life. Hearing accidentally, in 1208, in a church the words of the Saviour (Matt. x. 9, 10), he considered that the essence of the Gospel was absolute poverty, and founded an order on this basis, which ultimately became one of the four, nay, even one of the two, great fraternities of mendicant friars. To manifest his humility he would not allow his followers to be called brethren (in Latin *fratres*), but only little brothers (Italian *fratricelli*; in Latin *fraterculi* or *fratres minores*), a designation which they still retain. Pope Innocent III., in 1210, and a council of Lateran, in 1215, approved of his rules for the government of his order, which enjoined poverty, chastity, and obedience, and in 1223 Pope Honorius III. issued a bull in his favour. He died, at Assisi, in 1226, and in 1230 was canonized by Pope Gregory IX., the anniversary of his death, October 4, being fixed as his festival. Even while he lived his order had become very powerful, and spread over the whole Western Church. In 1219 it is stated that 5,000 friars were present at a chapter which he held. In that year, or more probably in 1224, Franciscans came over to England. From 1228 till 1259 they contended with the Dominicans about precedency. When in 1274 Gregory X. reduced the mendicants to four orders the Franciscans were one of the four. At the suppression of the monasteries in England under Henry VIII., A.D. 1536 to 1538, the Franciscans had sixty-six abbeys or other religious houses. Their dress was a loose garment of a grey colour, reaching to their ankles, and a grey cowl, covered when they went into the streets with a cloak. From the prevalence of grey in their dress they were called Greyfriars. The order, in the course of its history, split into various branches.

FRANCISCAN FRIAR.

frăn-çĭs'-çĕ-ạ, *s.* [Named after Francis, Emperor of Austria, a patron of botany.]

Bot.: A genus of Scrophulariaceæ, tribe Salpiglossideæ. By some it is made a synonym of Brunsfelsia, or is merged in that genus. The root, leaves, &c., of *Franciscea uniflora* are used in syphilitic complaints, hence the plant is called by the Portuguese *Mercurio vegetal* (Vegetable Mercury). Its inner bark and herbaceous parts are very bitter. In small doses it is a purgative, emetic, and alexipharmic; in large ones it is an acrid poison. (*Martius.*)

*** frănc'-ĭse,** *v.t.* [Eng. *franc* = frank; *-ise.*] To Frenchify.

"He was an Englishman *francised*."—*Fuller: Worthies: Hertford*, i. 435.

*** frănck,** *v.t.* [Etym. doubtful.] To feed. [Franke.]

frănck'-lĭn, *s.* [Franklin.]

Frăn'-cō-, *pref.* [Lat. *Franc(us)* = a Frank; o connective.] French; as, the *Franco*-Prussian or *Franco*-German war of 1870-1.

frăn-cō'-a, *s.* [Named by Cavanilles, after F. Franco, of Valentia, a promoter of botany in the sixteenth century.]

Bot.: The typical genus of the order Francoaceæ (q.v.). It consists of herbaceous plants with lyrately pinnatifid, mostly radical leaves, and racemes of fine flowers. Four or five species are known. Their juice is said to be cooling and sedative. Their roots are used for dyeing black.

frăn-cō-ā'-çē-æ, *s. pl.* [Mod. Lat. *francoa*, and Lat. fem. pl. adj. suff. *-aceæ*.]

Bot.: An order of Hypogynous Exogens, alliance Ericales. It consists of stemless herbaceous plants, with lobed or pinnate exstipulate leaves. Stems, scape-like; inflorescence, a raceme; calyx, deeply four-cleft; petals, four, long persistent; stigma, four-lobed sessile; ovary, superior four-celled; ovules many, seeds minute. In 1845, Lindley enumerated two genera, and estimated the known species at five, all from Chili. They are used in medicine and for dyes.

frăn'-cō-lĭn, *s.* [Dimin. of Port. *frango* = a hen.]

Ornithology:

1. *Gen.:* The genus Francolinus (q.v.).

2. *Spec.:* The Common Francolin (*Francolinus vulgaris*). It is found in the south of Europe, in Malta and Sicily, in Asia, and in the north of Africa, feeding, like the common partridges, on insects and seeds. Its flesh is highly esteemed for food. It has a peculiarly loud whistle.

frăn-cō-lī'-nŭs, *s.* [Francolin.]

Ornith.: A genus of Perdicidæ (Partridges). [Francolin.]

frăn'-cō-līte, *s.* [From Wheal Franco (def.), and Gr. λίθος (*lithos*) = a stone.]

Min.: A variety of Apatite. It occurs in greyish-green or brown stalactitic matter, or in cubed crystals, at Wheal Franco, near Tavistock, in Devonshire. (*Dana.*)

***frăn'-ġent,** *a.* [Lat. *frangens*, pr. par of *frango* = to break.] Causing fractures.

frăn-ġĭ-bĭl'-ĭ-tў, *s.* [Fr. *frangibilité*, from Low Lat. *frangibilis* = frangible (q.v.); Ital. *frangibilità*.] The quality or state of being frangible; liableness to be easily broken frangility.

frăn'-ġĭ-ble, ***fran-ge-byll,** *a.* [Low Lat. *frangibilis*, from Lat. *frango* = to break; Fr. & Eng. *frangible*; Ital. *frangibile*.] That may be easily broken; fragile, brittle.

"This was no doubt partly due to the *frangible* character of much of the material in which they wrought."—*Wilson: Prehistoric Man*, ch. vii.

***frăn'-ġĭ-ble-nĕss,** *s.* [Eng. *frangible*; *-ness*.] The quality or state of being frangible; frangibility.

frăn'-ġĭ-pāne, *s.* [Frangipani.]

1. A species of pastry made with cream, almonds, and sugar.

2. Frangipani (q.v.).

frăn-ġĭ-pa'-nĭ, *s.* [Named after the Italian Marquis Frangipani.] A species of perfume prepared from or in imitation of the scent of flowers of the *Plumiera rubra*, or Red Jasmine, a West Indian tree.

frăn'-gu-lĭc, *a.* [Eng., &c. *frangul(in)*; *-ic* (*Chem.*).] Contained in or in any way connected with the bark of the berry-bearing Alder, *Rhamnus frangula*.

frangulic acid, *s.*

Chem.: $C_{14}H_8O_4$. It is obtained by boiling the bark of *Rhamnus frangula* with water for an hour, then adding caustic soda, and again boiling for several hours. The liquid is rendered acid with hydrochloric acid, and, boiled again for some hours. The frangulic acid separates out and is purified. It melts at 254°, is slightly soluble in hot, and insoluble in cold water; heated with zinc-dust it yields small quantities of anthracene. It is isomeric with alizarin.

frăn'-gu-lĭn, *s.* [(*Rhamnus*) *frangul(a)*; *-in* (*Chem.*).]

Chem.: $C_{20}H_{20}O_{10}$. A glucoside obtained by digesting the bark of *Rhamnus frangula* with alcohol, precipitating with lead acetate, and decomposing the precipitate with H_2S gas. The solution is filtered boiling, and deposits a lemon yellow crystalline mass, which dissolves in alkalies, forming a deep cherry-red solution. Frangulin boiled with hydrochloric acid yields glucose and frangulic acid.

***frăn'-ion (ion as yŭn),** *s.* [Prob. a corruption of Fr. *fainéant*.] A boon companion; a paramour; a woman of loose character. (*Spenser: F. Q.*, II. ii. 37.) [Faineant.]

frănk (1), *a., s., & adv.* [Fr. *franc* = free, from Low Lat. *francus* = free, from O. H. Ger. *franko* = a freeman, a Frank.]

A. *As adjective:*

* 1. Free, unrestrained; unconstrained.

"Thy *frank* election made,
Thou hast power to choose, and they none to forsake."
Shakesp.: All's Well that Ends Well, ii. 3.

* 2. Liberal, free, generous; not niggardly.

"'Tis the ordinary practice of the world to be *frank* of civilities that cost them nothing."—*L'Estrange.*

3. Open, ingenuous, candid, sincere.

"Have not your *frank* and dutiful expressions, that cheerfulness and vivacity in your looks, rendered it much more acceptable?"—*Parl. Hist. Chas. II.* (an. 1660), *Lord Chancellor's Speech.*

* 4. Licentious, forward, bold, without restraint.

* 5. Free; without payment or conditions.

"Thou hast it won; for it is of *frank* gift,
And he will care for all the rest to shift."
Spenser: Mother Hubberds Tale, 531.

B. *As substantive:*

I. (*Of the form* Frank):

1. One of the ancient German tribe or tribes, natives of Franconia, from whom the country of France received its name.

2. A name given by the Turks, Greeks, and Arabs to the English, French, Italians, &c., inhabitants of Western Europe.

"Trust not for freedom to the *Franks*,
They have a king who buys and sells."
Byron: Don Juan, iii. 86.

* **II.** (*Of the form* frank):

1. A franc; a French coin.

2. A letter privileged to pass through the post free of payment.

"You'll have immediately, by several *franks*, my epistle to Lord Cobham."—*Pope: To Swift.*

3. A signature placed on a letter, and entitling it to pass through the post free of payment. The privilege of *franking* letters, or sending them through the mails free of postage, is enjoyed by all the Departments of the Government of the United States.

C. *As adv.:* Freely, frankly, ungrudgingly.

"But, as he got it freely, so
He spent it *frank* and freely too."
Butler: Hudibras, pt. i., c. i.

¶ Crabb thus discriminates between *frank*, *candid*, *ingenuous*, *free*, *open*, and *plain*: "All these terms convey the idea of a readiness to communicate and to be communicated with; they are all opposed to concealment, but under different circumstances. The *frank* man is under no constraint; his thoughts and feelings are both set at ease, and his lips are ever ready to give utterance to the dictates of his heart; he has no reserve; the *candid* man has nothing to conceal; he speaks without regard to self-interest or any partial motive; he speaks nothing but the truth: the *ingenuous* man throws off all disguise; he scorns all artifice, and brings every thing to light; he speaks the whole truth. *Free*, *open*, and *plain* have not so high an office as the first three: *free* and *open* may be taken either in a good, bad, or indifferent sense; but seldomer in the first than in the two last senses. The *frank*, the *free*, and the *open* man all speak without constraint; but the *frank* man is not impertinent like the *free* man, nor indiscreet like the *open* man. The *frank* man speaks only of what concerns himself; the *free* man speaks of what concerns others." (*Crabb: Eng. Synon.*)

* **frank-bank,** * **frank-bench,** *s.* The same as Free-bench (q.v.).

* **frank-ferm,** *s.*

Old Law: Lands or tenements changed in the nature of the fee, by feoffment, &c., out of knight service for certain yearly service.

* **frank-fold,** *s.*

Old Law: Foldage; the right or liberty of folding sheep upon any lands.

* **frank-service,** *s.* Service performed by freemen.

* **frănk** (2), * **franc,** *s.* & *a.* [O. Fr. *franc* = a pigsty.]

I. *As substantive:*

1. A pigsty.

"Where sups he? Doth the old boar feed in the old *frank*?"—*Shakesp.: 2 Henry IV.*, ii. 2.

2. An inclosure in which animals are fed to fatten.

"*Frank*, kepynge of fowlys to make fatte. *Saginarium.*"—*Prompt. Parv.*

II. *As adj.:* Fat, puffed up.

"And when they were ones *franke* and fatte, they stode up together proudelye agaynst the Lorde and his worde."—*Bale: Image*, pt. i.

* **frank-fed,** * **franke-fed,** *a.* Fattened up; fatted as in a frank.

"Whereas they that be kept up and crammed in coupes, cages, mewes, and bartons, or otherwise *franke-fed* and fatted, are in greater danger to fall into diseases."—*P. Holland: Plutarch*, p. 574.

frănk (1), *v.t.* [Frank, *a.*]

1. *Ord. Lang.:* To send or get carried free of expense: as, To *frank* a letter.

"My lord Orrery writes to you to-morrow; and you see I send this under his cover, or at least *franked* by him."—*Swift.*

2. *Carp.:* To form a joint in by franking (q.v.).

* **frănk** (2), * **franke,** *v.t.* [Frank (2), *s.*]

1. To shut up in a frank or sty.

"He is *franked* up to fatting for his pains."
Shakesp.: Richard III., i. 3.

Ecclesiol. & Church History:

1. *Gen.*: Originally a name assumed in the thirteenth century by the Franciscans by direction of their founder to mark the humble character of their claims.

2. *Spec.*: One of the names claimed in the fourteenth century as a monopoly by the section of the Franciscans who remained true to the rigid rules of their founder when the majority of the order gradually welcomed some relaxation of their stringency. In A.D. 1317 Pope John XXII. ordered their extirpation, and many of them were cruelly put to death. The grievous offence in John's eyes was that they believed that the Pope had no right to relax the rule of St. Francis, thus prescribing limits to the papal authority. They are said to have continued to the Reformation, and embraced its doctrines. (*Mosheim*, &c.)

frăt'-rĭ-çĭd-al, *a.* [Eng. *fratricid(e)*; *-al*.] Pertaining to or of the nature of fratricide.

Milton: P. R., i. 372.

¶ For the difference between *fraud* and *deceit*, see DECEIT.

¶ (1) *Constructive fraud:*

Law: (See extract).

"Besides cases of actual and intentional fraud, the courts of equity recognize what are called *constructive frauds*, or such acts or contracts as, although not originating in any evil design to defraud or injure another, yet have a tendency to deceive, or to violate public or private confidence, and are therefore deemed worthy of repression equally with frauds of the more gross and palpable sort."—*Blackstone: Comment.*, bk. iii., ch. 17.

(2) *Pious fraud:*

Ch. Hist.: A fraud considered to be "pious" because it was planned and carried out for some pious object. From the first to the fifteenth century believers in such frauds existed, if, indeed, they are even yet extinct. Sound ethics, whether distinctively Christian or simply philanthropic, declares that there are no "pious" frauds: all are impious.

(3) *Statute of frauds:*

Law: A statute, 29 Charles II., c. 3, passed in A.D. 1676. It is believed that it was framed by Sir Matthew Hale, Lord Keeper Guilford, and Sir Leoline Jenkins. Among its complex provisions several enacted that important contracts about land, &c., should be in writing, so as to prevent the perjury which occurred when they had to be proved by parole evidence.

***fråud, *fraud-en,** *v.t.* [O. Fr. *frauder*, from Lat. *fraudo*, from *fraus* (genit. *fraudis*) = deceit, fraud; Ital. *fraudare*.] To defraud, to cheat.

***fråught** (*gh* silent), *v.t.* [FRAUGHT, *a.*; Sw. *frukta* = to load; *frakt* = a load; Dan. *fragte* = to load; *fragt* = a load; Dut. *bevrachten* = to load, to freight; *vracht* = a load; Ger. *frachten* = to freight, to load; *fracht* = a load, a cargo.] [FREIGHT, *v.*]

1. To load, to freight.

"Ships are *fraighted* for Genoa, Messina, and Ancona."—*Hacklayt: Voyages*, vol. ii., pt. i., p. 115.

2. To burden; to load.

"If after this command thou *fraught* the court
With thy unworthiness, thou dy'st."
Shakesp.: Cymbeline, i. 1.

***fråught-age** (as frât-iğ), *** fraut-age,** *s.* [Eng. *fraught*; *-age*.] A freight; a cargo; a load.

"Our *fraughtage*, sir,
I have conveyed aboard."
Shakesp.: Comedy of Errors, iv. 2.

Fraun'-hō-fẽr (au as ōw), *s.* [A distinguished optician of Munich.] See the compound.

Fraunhofer's lines, *s. pl.*

Optics: Certain dark lines discovered by Wollaston, in 1802, in the solar spectrum, but first described in detail by Fraunhofer. If a pencil of solar rays be admitted through a narrow slit into a dark room, and then the slit be looked at through a prism of flint glass very

free from flaws, the lines will be seen delicately traced in large numbers parallel to the edge of the prism, and at very unequal intervals. Fraunhofer names the most remarkable of them A, *a*, B, C, D, E, *b*, F, G, and H. A is at the beginning of the red ray, B in the middle, and C at the boundary between it and the orange, D in the orange, E in the green, F in the blue, G in the indigo, and H in the violet: *a* is in the red and *b* in the green. About 3,000 lines have since been discriminated: some are fixed in position, others are variable. The latter are sometimes called atmospheric or telluric lines, being considered by certain physicists to be due to the absorption of the air. The study of these lines has since led to the introduction of the method of analysis called spectral analysis. (*Ganot.*)

frăx'-ĕ-tĭn, *s.* [Lat. *frax(inus)* = an ash tree; *-etin* (*Chem.*).]

Chem.: $C_{10}H_9O_5$. A substance obtained along with glucose by digesting fraxin with dilute sulphuric acid. It crystallizes in colourless needles, soluble in alcohol, and slightly soluble in water. It is soluble in sulphuric acid, forming a yellow solution, dissolves in nitric acid, colouring it purple, which turns red, then yellow, and ultimately becomes colourless. (*Watts: Dict. Chem.*)

frăx'-ĭn, *s.* [Lat. = *frax(inus)* = an ash tree; *-in* (*Chem.*).]

Chem.: $C_{16}H_{18}O_{10}$. Paviin, a glucoside of Fraxetin, which occurs in the bark of *Fraxinus excelsior*, the common ash, also along with Æsculin, in the bark of the horse-chestnut, *Æsculus hippocastanum*. Its dilute aqueous solution has a bluish-green fluorescence. It is identical with paviin. It crystallizes in yellowish needles, easily soluble in hot water.

frăx-ĭn-ĕ-æ, *s. pl.* [Lat. *fraxinus*, and fem. pl. adj. suff. *-eæ*.]

Bot.: A tribe of Oleaceæ, distinguished by having the fruit samaroid.

frăx'-ĭ-nĕll, *s.* [Fr. *fraxinelle*.] [Fraxinella.]

Bot.: Polygonatum multiflorum.

frăx'-ĭ-nĕl-la, *s.* [Dimin. of Lat. *fraxinus* = an ash tree; Fr. *fraxinelle* = the Dittany (*Dictamnus*).]

Bot.: A name given to two rutaceous plants, *Dictamnus fraxinella* and *D. albus*, cultivated in gardens for their fragrant leaves and flowers. [Dictamnus.]

frăx'-ĭn-ŭs, *s.* [Lat. = an ash tree.]

1. *Bot.:* A genus of plants belonging to the order Oleaceæ (Oliveworts). The calyx is wanting, or four-cleft; cor absent, or of four petals. The stamina are two; the ovary two-celled and two-seeded; the fruit two-celled and two-seeded. *Fraxinus excelsior* is the common ash. [Ash.] It has pinnate leaves. There is a variety *β heterophylla*, or Simple-leaved Ash, with the leaves simple or pinnate.

2. *Chem.:* The leaves of *Fraxinus excelsior*, the common ash, are used on the continent in the form of decoction, half-ounce of leaves to a pint of water, in cases of chronic gout. (*Garrod.*) Its bark is said to be tonic and febrifugal. [Manna.]

frāy (1), * **fraye,** *s.* [A shortened form of *affray*, s. (q.v.).]

* **1.** Fear; alarm; anxiety.

"Whenne Jacob was moost in *fray*
God him coumfortide, that al do may."
Cursor Mundi, 4,775.

2. A disturbance; an affray; a broil; a quarrel; a riot.

"So shall we 'scape the western bay,
The hostile fleet, the unequal *fray*."
Scott: Lord of the Isles, i. 20.

3. A contest; a combat.

"He had also a sore combat; but that *fray* was the fruit of those slips which he got in his going down the hill."—*Bunyan: Pilgrim's Progress*, pt. ii.

* **fray-maker,** *s.* One who creates a disturbance; a disorderly person.

"Constables may by the law disarme and imprison house-breakers, *fray-makers*, rioters, and others, to prevent bloodshed, quarrels, and preserve the public peace."—*Prynne: Treachery & Disloyalty*, pt. iv., p. 28.

frāy (2), *s.* [Fray (2), *v.*] A fret or chafe in cloth; a sore place caused by rubbing.

"Dispossest of either *fray* or fret."
Herrick: Hesperides, p. 86.

A. *Transitive:*

1. To frighten; to terrify; to make afraid.

"The troubled ghost of my father Anchises
So oft in sleepe doth *fray* me, and adulse."
Surrey: Virgil; Æneis iv.

2. To drive or frighten away.

"This one word ought to *fraie* and wtdraw vs fro al congregation & feloship of idolatours." — *Caluine: Foure Godlye Sermons*, ser. i.

3. To fight against; to attack.

"There casteles to *fray*." *Degrevant*, 481.

B. *Intrans.:* To fight, to contend.

"Dayly with Diane eke to fight and *fraye*."
Chaucer: Court of Loue, 680.

frāy (2), *v.t.* [O. Fr. *frayer*, *froier*, *frier*, from Lat. *frico* = to rub.]

* **1.** To rub: as, a deer was said to *fray* its head when it rubbed it against a tree, to renew it.

2. To wear away by rubbing; to fret, to chafe, to tear.

"The Ivy twigs were torn and *frayed*."
Scott: Lord of the Isles, v. 8.

* **frāy** (3), *v.t.* [A shortened form of *defray* (q.v.).] To bear the expense of; to defray.

"The charge of my most curious and costly ingredients *frayed*, I shall acknowledge myself amply gratified."—*Massinger.* (*Webster.*)

* **frāy'-bŭg,** *v.t.* [Eng. *fray* (1), v., and *bug* (q.v.).] To frighten with hobgoblins or scares.

"They *fraybugged* them with the thunderbolts of their excommunycacyons."—*Bale: English Votaries*, pt. ii. *The Conclusion.*

* **frāy'-ĭng** (1), *pr. par., a., & s.* [Fray (1), *v.*]

A. & **B.** *As pr. par. & particip. adj.:* (See the verb.)

C. *As subst.:* A disturbance; a fray.

"They doe their endeuoure to mayntaine their tyranny with deceipts, *frayinges*, wiles, traynes, thretninges, and wicked conspiracies."—*Udal: John* x.

* **frāy'-ĭng** (2), *pr. par., a., & s.* [Fray (2), *v.*]

A. & **B.** *As pr. par. & particip. adj.:* (See the verb).

C. *As substantive:*

1. The act of rubbing or wearing away by friction.

2. The peel or parts rubbed off a deer's horns.

"For by his slot, his entries, and his port,
His *frayings*, fewmets, he doth promise sport."
Ben Jonson: Sad Shepherd, i. 2.

* **frāyne,** *v.t.* [Fraine.]

* **fray-or,** *s.* [Fr. *frayeur*.] That which causes terror.

"A fyre burst out in Mr. John Buchan's closet-window. It continued whill eleven o'clock of the day with the greatest *fravor* and vehemency that ever I saw fyre do."—*Culloden Papers*, p. 27.

frāz'-ĕr-a, *s.* [Frasera.]

* **frē,** *a.* [Free, a.]

frēak, *s.* [A.S. *frec* = bold, rash; cogn. with Icel. *frekr* = greedy, voracious; Sw. *fräck* = impudent; Dan. *fræk* = audacious; Ger. *frech* = saucy.] A sudden wanton whim or caprice; a fancy, a humour, a vagary.

"For many of their actions and opinions were very wild *freaks* of fancy and humour."—*Glanvill: Essay* 2.

¶ Crabb thus discriminates between *freak* and *whim:* "A *freak* has more of childishness and humour than boldness in it: a *whim* has more of eccentricity than childishness in it. Fancy and fortune are both said to have their *freaks*, as they both deviate most widely in their movements from all rule: but *whims* are at most but singular deviations of the mind from its ordinary and even course." (*Crabb: Eng. Synon.*)

frēak, *v.t.* [From the same root as *freckle* (q.v.).] To variegate; to streak.

"Sables of glossy black, and dark embrowned,
Or beauteous, *freaked* with many a mingled hue."
Thomson: Winter, 814.

* **frēak'-ĭsh,** *a.* [Eng. *freak*; *-ish.*] Addicted to freaks; capricious, whimsical, fanciful, humoursome, grotesque.

"Tis not enough, that Greek or Roman page,
At stated hours, his *freakish* thoughts engage."
Cowper: Tirocinium, 606.

* **frēak'-ĭsh-lў,** *adv.* [Eng. *freakish*; *-ly.*] In a freakish or capricious manner; capriciously.

* **frēak'-ĭsh-nĕss,** *s.* [Eng. *freakish*; *-ness.*] The quality or state of being freakish; capriciousness, caprice, whimsicalness.

"All *freakishness* of mind is checked."
Wordsworth: Rob Roy's Grave.

* **frēak-sŏme,** *a.* [Eng. *freak*; *-some.*] Given to freaks; freakish, capricious.

* **frēam,** *v.t.* [Lat. *fremo.*] To growl or grunt as a boar. (*Bailey.*)

"Hee *freams* and skrawling to the skye brays terribli noyacth." *Stanyhurst: Virgil; Æneid* ii. 214.

* **frēathe,** *v.i.* [Etym. doubtful.] To foam and seethe.

"A flood of pale green foam that hissed and *freathed*."
Alex. Smith: City Poems, p. 139.

frĕc'-kle, * **free-kel,** * **frek-ell,** *s.* [Icel. *freknur* = freckles: Sw. *fräkne*, pl. *fräknar*; Dan. *fregne*, pl. *fregner*; Ger. *fleck*, *flechen* = a spot; Gael. *breac* = spotted, variegated. Cf. *fleck.*]

1. A yellowish or light-brownish spot on the skin, particularly on the parts exposed, as the face, neck, and hands, caused by the sun.

"Women desire to be rid of the *freckles*, spots, and morphew that do injurie to their beautie."—*P. Holland: Plinie*, bk. xxxii., ch. vii.

2. Any small spot or discoloration.

"The farewel frosts and easterly winds now spot your tulips: therefore cover such with mats, to prevent *freckles*." — *Evelyn: Kalendarium Hortense: April.*

frĕc'-kle, *v.t. & i.* [Freckle, *s.*]

A. *Trans.:* To cover or mark with freckles.

B. *Intrans.:* To become covered or marked with freckles.

frĕc'-kled (kled as **kĕld),** *a.* [Eng. *freckl(e)*; *-ed.*]

1. Marked or covered with freckles.

"Lost to the world, yourself, and me,
And more despised than *freckled* Lalage."
Cotton: Old Tityrus to Eugenia.

2. Spotted; marked with small spots.

"The *freckled* cowslip, and green clover."
Shakesp.: Henry V., v. 2.

frĕc'-kled-nĕss (kled as **kĕld),** *a.* [Eng. *freckled*; *-ness.*] The state of being freckled.

frĕc'-kle-fāçed, *a.* [Eng. *freckle*, and *faced.*] Having a face marked or spotted with freckles.

* **frĕc'-klў,** *a.* [Eng. *freck(le)*; *-ly.*] Full of or marked with freckles; freckled.

"Plumps his *freckly* cheeks with stinking weed."
T. Brown: Wales, i. 117.

* **frede,** *v.t.* [A.S. *gefrédan*; O. H. Ger. *fruotjan.*] To understand, to feel.

"That a man may right wel *frede*." *Gower*, ii. 119.

* **fred-stole,** * **freed-stool,** *s.* [A.S. *frithstol*, from *frith*, Dan. *fred*, Ger. *friede* = peace, and *stól* = stool.] The seat of peace, a name given to a seat or chair near the altar, to which all fled who sought to obtain the privilege of sanctuary.

"He bestowed a *freed-stool* with large privilidges belonging thereunto."—*Fuller: Church Hist.*, II. v. 9.

freē, * **fre,** * **fred,** *a., adv., & s.* [A.S. *freó*; cogn. with Dut. *vrij*; Icel. *frí*; Sw. & Dan. *fri*; Goth. *freis*; Ger. *frei.*]

A. *As adjective:*

I. *Ordinary Language:*

1. At liberty; not subject as a vassal or slave to another; not a prisoner.

"Tho folwed bond and *fre*." *Tristram*, iii. 78.

2. Not subject to the military or despotic power of any person or government; living under just and equal laws.

* 3. Noble; high-minded; gracious.

"He was ffayre mane and *free*." *Degrevant*, 33.

4. At liberty or with power to make choice for oneself.

"Not *free*, what proof could they have given sincere
Of true allegiance, constant faith, or love."
Milton: P. L., iii. 104.

* 5. Unconcerned; without care.

"Fly whilst thou art blest and *free*."
Shakesp.: Timon of Athens, iv. 3.

6. Not arbitrary or despotic; equal and just to all alike: as, a *free* government.

7. That may or can be used, enjoyed, or taken advantage of by all without charge; open and accessible to all; unappropriated: as, a *free* school; *free* seats.

"Why, sir, I pray, are not the streets as *free*
For me as for you."
Shakesp.: Taming of the Shrew, i. 2.

8. Gratuitous, voluntary; done or given freely, readily, or without importunity or purchase: as, a *free* gift.

9. Exempt, clear.

"Crist was all thwerrt nt of sinne *fre*."
Ormulum, 16,818.

* **10.** Innocent, guiltless, harmless.

"Make mad the guilty, and appal the *free*,
Confound the ignorant." *Shakesp.: Hamlet*, ii. 2.

11. Clear from, not encumbered or affected with. (Followed by *from*, but *of* was formerly used.)

"Infirmities that honesty is never *free of*."
Shakesp.: Winter's Tale, i. 2.

12. Not obstructed; having a clear passage or channel.

"I breathe *free* breath."
Shakesp.: Love's Labour's Lost, v. 2.

* **13.** Ready, willing.

"Montano with his *free* duty recommends you thus."
Shakesp.: Othello, i. 3.

14. Unrestrained, licentious, immoderate, excessive; going beyond bounds or to excess.

"Being one day very *free* at a great feast, he suddenly broke forth into a great laughter."—*Hakewill.*

15. Open, candid, ingenuous, frank, unreserved; communicative.

"Will you be *free* and candid to your friend?"
Otway: Orphan, i. 2.

16. Liberal, bounteous, open-handed, not parsimonious or niggardly.

"Alexandrian verses, of twelve syllables, should never be allowed . . . Mr. Dryden has been too *free* of these."—*Pope.*

17. Ready, eager, willing, spirited: as, a *free* horse.

18. Admitted to or invested with certain privileges or immunities. (With *of*.)

"Art thou *of* Bethlem's noble college *free*?"
Dryden: Persius, sat. v.

19. Not stiff; spirited.

"Having played a much *freer* innings than usual."
—*Daily Telegraph*, Sept. 22, 1882.

II. *Technically:*

1. *Botany:*

(1) *Of one organ or structure:* Not adhering to anything else; not adnate to any other body.

(2) *Of two organs or structures:* Apart; not connected.

2. *Chem.:* Not chemically combined with any other body: as, *free* carbonic acid.

¶ *Free* is much used in compounds, the meanings of which are obvious.

* **B.** *As adv.:* Freely, readily, willingly.

"I as *free* forgive you as I would be forgiven."
Shakesp.: Henry VIII., iii. 1.

* **C.** *As subst.:* A noble, high-minded man or woman.

"The knyght speakes to that *free*
Maydame, wytes nat me." *Degrevant*, 418.

¶ (1) Crabb thus discriminates between *free* and *liberal:* "In all its acceptations *free* is a term of dispraise, and *liberal* that of commendation. To be *free* signifies to act or think at will; to be *liberal* is to act according to the dictates of an enlarged heart and an enlightened mind."

(2) He thus discriminates between *free* and *exempt:* "The condition and not the conduct of men is here considered. *Freedom* is either accidental or intentional; the *exemption* is always intentional: we may be *free* from disorders, or *free* from troubles; we are *exempt*, that is *exempted* by government, from serving in the militia. *Free* is applied to everything from which any one may wish to be *free*; but *exempt*, on the contrary, to those burdens which we should share with others."

(3) He thus discriminates between *free* and *familiar:* "To be *free* is to be disengaged from all the constraints which the ceremonies of social intercourse impose; to be *familiar* is to be upon the footing of a *familiar*, of a relative, or one of the same family." (*Crabb: Eng. Synon.*)

(4) For the difference between *free* and *communicative*, see COMMUNICATIVE: for that between *free* and *frank*, see FRANK.

¶ (1) *To sail free, to go free*, or *to have a free wind:*

Naut.: To sail somewhat further from the wind than when close-hauled.

(2) *To make free:* To take liberties; to go beyond proper bounds; to help oneself.

free-and-easy, *a. & s*

A. *As adj.:* Unconstrained; easy in manners

B. *As subst.:* A sort of club or social meeting, at which the members smoke, drink, sing, &c., and enjoy themselves without being bound to any rules.

"Clubs of all ranks, from those which have lined Pall Mall and St. James's Street with their palaces, down to the *free-and-easy* which meets in the shabby parlour of a village inn."—*Macaulay Essays; Gladstone on Church & State.*"

free-board, *s.*

1. *Naut.:* So much of the vessel's side as is included between the plank-sheer and the water-line.

"It would be wrong to assume that a low *free-board* alone was the cause of disaster."—*British Quarterly Review* (1873), vol. lvii., p. 115.

2. *Agric.:* Land claimed in some places beyond or without a fence. It is said to be 2½ ft. in extent.

* **free-borough men,** *s. pl.*

Old Law: Such great men as did not engage, like the frankpledge men, to become sureties for the good behaviour of themselves and others. [FRANKPLEDGE.]

free-calyx, *s.*

Bot.: A superior calyx. One adherent to the ovary which it renders inferior. (*Lindley.*)

free-central, *a.*

Bot.: Free and in the centre.

Free-central Placentation:

Bot.: Placentation in which one placenta stands in the centre of the ovary like a column. Example, the fruit of Primulaceæ.

free-chant, *s.*

Mus.: A form of recitative music for the Psalms and Canticles, in which a phrase, consisting of two chords only, is applied to each hemistich of the words. The author of the form, Mr. John Crowdy, in his *Free Chant Cadences*, claims for it that it removes all difficulties in dividing the words, and enables the unskilled worshipper to join confidently in the chanting, without the assistance of any marks beyond the colons provided for the purpose in the Prayer Book.

free-charge, *s.*

Elect.: That part of an induced current of electricity which is free to escape through the medium of the atmosphere to surrounding conductors. [FREE-ELECTRICITY.]

free-chase, *s.* [FRANK-CHASE.]

free church, *s.*

Ecclesiol. & Church History:

1. *Pl.* (*Free Churches*)*:* A name often given by English Nonconformists to the Christian denominations in that country free from state patronage and control.

2. *Singular:*

(1) A church free from state control. [1, also ¶ 2, 3.]

(2) A church in which there are no enforced payments. [¶ 1.]

3. *Sing.* (*Spec.*)*:* The Free Church of Scotland (q.v.).

¶ (1) *Free and Open Church Association:*

Ecclesiol. & Ch. Hist.: An association which has for one object to abolish in the Church of England pew rents as well as pews, allowing no ownership in the latter to be claimed by individual members of the congregation, but maintaining the equal right of all parishioners to the free use of seats in churches. It is believed that this will tend to remove one of the causes which seriously diminish the attendance of the working classes at church. To meet the financial loss produced by the abolition of pew rents, the revival of the weekly offertory is advocated. The other object is to have arrangements made to open the churches from morning to night, not simply on Sundays, but on every day, that those who have no privacy for prayer and meditation at home, may have a place of refuge to which they may have recourse at any time. The Society was founded in 1866, has among its patrons two archbishops and many bishops, besides a long list of distinguished vice-patrons. It at times aids churches with pecuniary grants, but only if they are "free."

(2) *Free Church of England:*

Ecclesiol. & Ch. Hist.: An evangelical Protestant denomination founded on the basis of recognising only two orders—the first being presbyters, and the second deacons. "Nevertheless, the first order is divided into two distinct offices—viz., bishops and presbyters. This church maintains the ecclesiastical parity of presbyters, whether episcopally or otherwise ordained." (*Declaration by Convocation of F. C. of England*, 1846.) The governing body is the Convocation, consisting of all the clergy and laity in the several churches. The impulse which gave the church birth was communicated by the Tractarian movement of 1832, a reaction against which created a few "free churches" in the West of England; the Shore controversy (1843 to 1849) and the Gorham case (1849-50) promoted its development. It was enrolled in Chancery by a deed poll in 1863. A primus was consecrated in 1876 by a Bishop of the Reformed Church in America. The bishops are in the Canterbury line of Episcopal succession. (*Bishop Meyers.*)

(3) *Free Church of Scotland; Free Church:*

Ecclesiol. & Ch. Hist.: The name assumed by the large number of ministers and their adherents who left the Scottish Establishment at the "Disruption" of May 18, 1843. [DISRUPTION.] They had seceded in vindication of what they called the "Headship of Christ," i.e., to gain liberty to obey what they deemed the will of their Divine Lord in all Church arrangements. To a large extent they obtained the freedom they sought. Whilst they were established, the first collision with the secular law courts had been in connection with a proposed modification of lay patronage. The Church now constituted itself on the basis of ignoring lay patronage altogether, and giving the communicants of each congregation the right to elect their own pastor. A second collision had arisen through the Church—it appeared illegally—claiming the power to subdivide over-populous parishes, build chapels-of-ease, and give votes in the Church courts to their ministers. Disevered from the state, it found itself free to do what it pleased in the matter. The "Cardross case," litigated between 1858 and 1861, was important, as raising the question how far the liberty claimed by the Church in its disestablished condition is recognised by the courts. The Court of Law found that in certain circumstances it will entertain a writ for damages against the Church, on the allegation that the Church has violated its own rules, in a case of discipline, to the prejudice of the civil interests of the party dealt with. They found, however, that with a view to damages, the party in this case must aver and establish malice on the part of the Church. The judges based their decision on the ground that the Church's rules constitute a contract between the members of the body. They did not appear to contemplate the idea of interfering with the Church's discipline otherwise than by enforcing damages when found to be due. The case was ultimately abandoned by the pursuer or plaintiff.

When the Disruption took place, the financial difficulties which the secessionists had to face were very formidable. Wherever the Free Church had adherents, which was in nearly every parish, fresh places of worship had to be built in lieu of those lost; at least small stipends to be provided for the ministers whose stipends (whether provided by the State or their parishioners) were gone. All the Scottish established missionaries to the Jews or the Gentiles, having joined the seceding party, had to be provided for. After a certain breathing-time, theological colleges had also to be built, day schools and manses (in English, parsonages) provided in connection with the several churches. All was at last successfully accomplished, and great advance made, both at home and abroad. One part of the financial arrangements which has attracted most notice, was the Sustentation Fund (q.v.).

From 1863 to 1873 negotiations were carried on for an amalgamation with the United Presbyterians, most of whom were opposed (which the Free Churchmen theoretically were not) to the principle of establishments, but these were brought to an end by the action of a resolute minority opposed to union. In 1876, the Reformed Presbyterians, or Cameronians, joined the Free Church. The idea being entertained by some statesmen and others that the abolition of patronage would lead to the return of many Free Churchmen to the Scottish Establishment, a Bill for the purpose was introduced into Parliament by the Duke of Richmond, and, strongly supported by the Duke of Argyle, received the Royal assent in 1874. Its effects on the Free Church have hitherto (till 1883) been but trifling.

On March 31, 1844, ten and a half months after the disruption, the Free Church had 722 congregations and sanctioned stations. It had raised for all purposes £366,719 14s. 3d. On March 31, 1883, it had 1,861 congregations

or sanctioned stations, with 314,027 communicants. From March 18, 1882, to March 31, 1883, it raised £580,659 13s. 0½d., of which there was subscribed to the Sustentation Fund £170,858 4s. 7d.

free-city, *s.* A city or town of the German Empire, independent in its government and franchise, and virtually forming an independent state by itself. They were formerly many in number, but only three now exist—viz., Hamburg, Lübeck, and Bremen.

free-companies, *s. pl.*

Hist.: The name given to bodies of disbanded soldiers who ravaged France after the Peace of Bretigny, concluded on May 8, 1360. They were called also Free Lances and Condottieri.

free-course, *s.*

Maritime law: The state of having the wind from a favourable quarter.

free-electricity, *s.*

Elect.: The portion or amount of electricity which, to restore disturbed equilibrium, can pass from a battery to an adjacent conductor, or from one conductor to another. [FREE-CHARGE.]

free-fugue, *s.*

Mus.: A fugue in which the answer and general treatment are not according to strict rules. [FUGUE.]

free-gills or **lamellæ,** *s. pl.*

Bot.: The lamellæ or gills of an agaricus, when they do not adhere to the stipes. (*Lindley.*)

free-grace, *s.*

Theol.: The exact expression, "free grace," does not occur in Scripture, but a near approach to it does in the words "being justified freely by his grace" (Rom. iii. 24). Its import is a gift conferred, not on account of merit in the recipient, but simply of grace—*i.e.*, of free favour, with unmerited kindness. The gift specially referred to is the gift of salvation through the merits of the Saviour.

* **free-lance,** *s.*

1. *Lit.:* A member of one of those companies of knights who, after the Crusades, wandered about offering their services to the highest bidder. The name was specially applied to those belonging to the Free Companies (q.v.).

2. *Fig.:* A controversialist whose pen is used independently, so that no party can calculate on his aid; or one who sells his pen to the highest bidder, careless of the views he advocates; one who pays little regard to the conventionalities of society.

free-love, *s.* The doctrine that the affections should be free to fix on any object to which they are drawn (advocated and put in practice by certain parties in the United States). In its extreme form, it sets aside marriage, and all vows of sexual fidelity for life, or even for a limited period, giving free scope to every passing caprice of inclination or passion. It is in conflict with the Bible, with the generally accepted canons of ethics, and with the laws of every civilized country in the world.

free-lover, *s.* An advocate of the doctrines and practices of free-love.

free-milling, *a.*

Mining: Easily reduced (said of auriferous and argentiferous ores which are reducible without previous roasting).

free-parts, *s. pl.*

Music: Additional parts to a canon or fugue, having independent melodies, in order to strengthen or complete the harmony.

free-pass, *s.* A pass or ticket entitling the holder to travel or to enter an exhibition, theatre, &c., free of charge.

free-port, *s.*

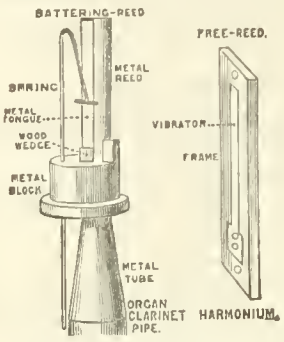
Commerce:

1. A port where ships of all nations may load or discharge cargo free of duty, provided the goods are not carried into the adjoining countries.

2. A port where all kinds of goods are received from ships of all nations at equal rates.

free-reed, *s.*

Music: An elastic tongue, usually of brass, and playing in a long rectangular opening in a plate to which one end of it is riveted. The name is given to distinguish it from the



FREE-REED.

reed which batters against the seat, as in the clarinet, some organ-pipes, the bassoon, and oboe. These battering-reeds are usually of wood. The free-reed is used in the accordeon, and similar instruments, and in most of the reed-pipes of organs.

* **free-services,** *s. pl.*

Feud. Syst.: Such services which it was not derogatory to a freeman to perform—*e.g.*, serving under his lord in war.

free-ship, *s.* A neutral ship, or (*U. S.*) a ship which, although built abroad, receives U. S. registry, because owned by a citizen or citizens of this country.

free-shooter, *s.* A franc-tireur (q.v.).

free-soil, *a.* A term applied to the principles of a party in the United States who advocated the non-extension of slavery.

free-soiler, *s.* A member or supporter of the free-soil party.

free-soilism, *s.* The principles of the free-soil party.

free-spirits, *s. pl.*

Ecclesiol. & Ch. Hist.: The same as BRETHREN OF THE FREE SPIRIT (q.v.).

free-states, *s. pl.* Those states of the Union in which slavery never existed, or in which it was abolished before the Civil War.

free-stuff, *s.*

Carp.: Timber free from knots; clear-stuff.

free-style, *s.*

Music: Composition not absolutely according to the strict rules of counterpoint.

free-templar, *s.* A member of a temperance organization which broke off from the Good Templars, its distinctive tenet being that each lodge should be free and independent, and not subordinate to a grand lodge.

free templary, free templarism, *s.* The distinctive views held by the Free-Templars. [FREE TEMPLAR.]

free-trade, *s.*

Political Econ., Comm., Hist., & Ord. Lang.: Trade exempt from all artificial restraints, the free exchange of commodities at home and abroad. Its great principle or aim is to buy in the cheapest market and sell in the dearest one; and it seeks the removal of all legislative impediments, whatever may be their character, to the realization of its programme. Even those who denounce the cardinal principle of free-trade on account of its apparent selfishness, habitually carry it out in practice. Other things being equal, they buy at a shop where the article they require is priced lower than at the shops adjacent; in other words, they buy in the cheapest market. When they put an article of their own up to auction, they direct that it shall be knocked down to the highest bidder, in other words they sell in the dearest market. It is a moot point whether it is expedient to protect a new manufacture in a colony into which it has just been introduced, and then strike off all protection when it has passed its infancy. Some free-traders have also thought that, in the case of a foreign bounty, so large as to enable one receiving it to sell an article absolutely below prime cost, some temporary protection might be given to a home manufacturer whom this was designed to ruin; the majority would carry out rigid free-trade, and all who hold the doctrine believe that the exceptions to its operation should be as few as possible.

The departure from free trade most difficult, nay, hopeless to avoid, is that which arises from the necessity of apportioning taxation to the resources of the several classes of society. Theoretically there should be no indirect taxes. Every one should be free to export or import whatever he likes, and then pay by an income tax levied on the resources which he has made during the year; but, practically speaking, an income tax cannot be levied on the great mass of people, who, if they do not pay indirect taxes, will be exempt from public financial burdens altogether. Every such tax more or less violates free trade.

Taxes for the purpose of protecting native industry once abounded. Each was really a pauper dole; nor were the recipients of the gift benefited by the ill-judged liberality.

Early in 1776, Adam Smith, formerly a Glasgow professor, but then living in his native town of Kirkcaldy, published his celebrated work, *Inquiry into the Nature and Causes of the Wealth of Nations.* In this comprehensive treatise, free-trade is clearly advocated. These views gradually affected English opinion, and after the Corn Law Abolition Act of 1846, free trade was established. In this country there has, for many years, existed a strong party in its favor, the national political parties of to-day being mainly divided on the question of Protection to Home Industries and Free Trade so far as revenue demands will permit. At present in the United States there is a great diversity of opinion on this subject, the sentiment ranging from extreme Free Trade to extreme Protection, through every intermediate grade. [BOUNTY, CORN-LAWS, EXPORT, IMPORT, NAVIGATION-LAWS.]

Free Trade and Sailors' Rights: A popular cry in this country immediately before and during the war of 1812.

free-will, *s. & a.*

A. *As substantive:*

I. *Ordinary Language:*

1. The power of directing our own actions without any restraining or constraining influence or power.

"We have a power to suspend the prosecution of this or that desire; this seems to me the source of all liberty; in this seems to consist that which is improperly called *free-will.*"—*Locke.*

2. Voluntariness, spontaneity.

II. *Technically:*

1. *Metaph.:* The power which the will has, or is supposed to have, to adopt either of two courses open to it, just as it pleases. From the philosophical point of view, however, this does not make the will really free. If it be under the control of intellect so clear, and so much preponderating over passion, that of two courses open to it, it uniformly chooses the more eligible, then it is compelled by its very constitution so to act, and can that which is compelled be called free? If differently constituted, with feeble intellect and dominant passion, it cannot resist a certain temptation in its path, and therefore is what is popularly called the "slave" of a certain vice, the question may be asked, "Is a slave free?" From the philosophic view, there is a scheme of causation as perfect in the moral as in the material world, the wills of an infinite number of individuals constituting links of the chain. To reconcile "liberty" with "necessity" has long been attempted, but with limited success, though both are true. A first step towards its settlement is taken when it is shown, as Hume clearly does in his *Essay on Liberty and Necessity,* that the dispute carried on for ages on these subjects is only one about words, for the advocate for liberty grants all that the necessitarian asks, and the necessitarian all that is claimed by the advocate for liberty. A standard work on the subject is Jonathan Edwards's *Inquiry into the Freedom of the Will* (1754).

2. *Theol.:* The same difficulty exists in re-

conciling the omnipotence of God and the freedom of man's will with its attendant responsibility (Rom. ix, 19, 20). Christians in general accept both doctrines, though two antagonistic views—the Calvinistic and the Arminian—are entertained on the subject. The doctrine of the Church of England may be seen in the Tenth Article. [ARMINIAN, CALVINISM, FIVE POINTS.]

"Others . . . reasoned high
Of providence, foreknowledge, will and fate;
Fix'd fate, *free-will*, fore-knowledge absolute,
And found no end." *Milton: P. L.*, bk. ii. 560.

B. *As adj.:* Given freely; with free-will.

"Accept, I beseech thee, the *free-will* offerings of my mouth, O Lord."—*Ps.* cxix. 108.

freē, *v.t.* [FREE, *a.*]

1. To set free or at liberty; to release from slavery, captivity or confinement; to manumit.

"Canst thou no other master understand,
Than him that *freed* thee by the prætor's wand?"
Dryden: Persius, sat. v.

2. To deliver from any despotic government or authority; to liberate; to deliver.

"He recovered the temple, *freed* the city, and upheld the laws which were going down."—2 *Maccabees* ii. 22.

3. To disentangle or clear from any encumbrance or obstruction; to disengage; to remove any encumbrance or obstacle from: as, To *free* the feet from fetters.

4. To clear or set free from anything ill; to rid.

"William, *freed* from an enemy which had given himself and his father so many alarms, renewed his ill-treatment of his brothers."—*Burke: Abridg. Eng. Hist.*, bk. iii., ch. iii.

5. To exempt as from any oppressive condition or duty.

* 6. To remove; to take or do away; to clear.

"We may again . . .
Free from our feasts and banquets bloody knives."
Shakesp.: Macbeth, iii. 6.

* 7. To acquit, to absolve; to clear from any stain or charge.

"I *free* you from it." *Shakesp.: Henry VIII*, ii. 4.

* 8. To frank; to cause to pass free of charge.

"Please to *free* this letter to Miss Lucy Porter in Lichfield."—*Johnson: To Mrs. Thrale* (June, 1775).

* 9. To open so as to allow free passage through.

"This master key
Frees every lock and leads us to his person."
Dryden: Don Sebastian, iv. 1.

¶ Crabb thus discriminates between to *free*, to *set free*, to *deliver*, and to *liberate*: "To *free* is properly to make *free*, in distinction from *set free*; the first is employed in what concerns ourselves, and the second in that which concerns another. . . . We are *delivered* or *liberated* from that which others have imposed upon us; the former from evils in general, the latter from the evil of confinement. . . . When applied in a spiritual sense *free* is applied to sin; *set free* is employed for obligation and responsibility; *deliver* is employed for external circumstances." (*Crabb: Eng. Synon.*)

freē'-bĕnch, *s.* [Eng. *free*, and *bench.*]

Law: The right which a widow has in her husband's copyhold lands, corresponding to dower in the case of freeholds.

* **freē'-bŏŏt,** * **free-boote,** *s.* [FREEBOOTER.] Robbery.

"Lived themselves upon *freeboote*."—*Stapylton: Juvenal*, sat. viii. 124. (Note.)

freē'-bŏŏt-ẽr, *s.* [Dut. *vrijbuiter;* Ger. *freibeuter.*] One who wanders about for the sake of plunder; a pillager, a plunderer, a robber.

"The *freebooter* was exalted into a hero of romance."—*Macaulay: Hist. Eng.*, ch. xiii.

* **freē'-bŏŏt-ẽr-ў,** *s.* [Eng. *free; -bootery.*] The act, practices, or occupation of a freebooter; plunder taken by a freebooter.

† **freē'-bŏŏt-ĭng,** *s.* & *a.* [Eng. *free; boot(y); -ing.*]

A. *As subst.:* The act of plundering or pillaging; freebootery.

"William spoke strongly to him about the *freebooting* which was the disgrace of the colonies."—*Macaulay: Hist. Eng.*, ch. xxv.

B. *As adj.:* Following the profession of a freebooter; plundering, pillaging.

* **freē'-bŏŏt-ў,** *s.* [Eng. *free*, and *booty.*] Plunder or pillage by freebooters; freebootery.

freē'-born, *a.* [Eng. *free*, and *born.*] Born in a state of freedom; inheriting liberty; not a slave by birth.

"She caught the last—
Last glorious drop his heart had shed,
Before its *freeborn* spirit fled!"
Moore: Paradise & the Peri.

* **freē'-çhăp-ęl,** *s.* [Eng. *free*, and *chapel.*] A chapel founded by the king, and by him exempted from the jurisdiction of the ordinary. The king may also license a subject to found such a chapel, and by his charter exempt it from the ordinary's visitation.

* **freē'-cost,** *s.* [Eng. *free*, and *cost.*] Freedom from cost, charge, or expenses.

"To hate and despise the absurdity of being kind upon *freecost*, as not so much as to tell a friend what it is o'clock for nothing."—*South.*

freed, *pa. par.* or *a.* [FREE, *v.*]

* **freē'-dĕn-ĭ-zen,** *s.* [Eng. *free*, and *denizen.*] A free citizen or denizen of a city or town. [*Freedom of a city.*]

* **freē'-dĕn-ĭ-zęn,** *v.t.* [FREEDENIZEN, *s.*] To make a denizen or citizen; to make free of a city.

"No worldly respects can *freedenizen* a Christian here, and of *peregrinus* make him *civis*."—*Bp. Hall.*

freēd'-măn, *s.* [Eng. *freed*, and *man.*] A man born a slave and manumitted.

"The *freedman* jostles, and will be preferred:
First come, first served, he cries."
Dryden: Juvenal, sat. 1.

freē'-dŏm, * **freo-dom,** * **fro-dom,** * **fre-dome,** * **free-dam,** *s.* [A.S. *fréodóm;* O. Fris. *frídóm;* Dut. *frijdom.*]

1. The state of being free; liberty; exemption from servitude, confinement, or restraint.

2. Exemption from subjection to any power; independence.

"The last of Lambro's patriots there
Anticipated *freedom* share."
Byron: Bride of Abydos, ii. 20.

3. Power or liberty of enjoying franchises or privileges.

"This prince first gave *freedom* to servants, so as to become citizens of equal privileges with the rest, which very much increased the power of the people."—*Swift.*

4. Exemption from restraint; license.

"I will that all the feasts and sabbaths shall be all days of immunity and *freedom* for the Jews in my realm."—1 *Maccabees* x. 34.

5. Exemption from necessity, fate, or any constraining power or influence.

"In this then consists *freedom*—viz. In our being able to act or not to act, according as we shall choose or will."—*Locke: On Human Understanding*, bk. ii., ch. xxi.

6. Privileges, franchises, immunities.

"Let the danger light
Upon your charter and your city's *freedom*."
Shakesp.: Merchant of Venice, iv. 1.

7. License; excess; violation of the rules of good-breeding; a liberty.

8. Ease or facility in doing anything: as, He draws with *freedom*.

* 9. A free unconditional grant.

¶ For the difference between *freedom* and *liberty*, see LIBERTY.

¶ *Freedom of a city:* Immunity from county jurisdiction, and the privilege of corporate taxation and self-government held under a charter from the Crown. This freedom is enjoyed of right, subject to the provisions of the charter, and is often conferred as an honour on princes and other distinguished individuals. The freedom of a city carries the parliamentary franchise.

freedom-fine, *s.* A payment made on being admitted to the *freedom* of a city, guild, or incorporation.

* **freē'-dŏm-lĕss,** *a.* [Eng. *freedom; -less.*] Having no freedom; enslaved. (*Byron: Irish Avatar.*)

* **freed-stool,** *s.* [FRENSTOLE.]

freē'-fĭsh-ẽr, freē-fĭsh'-ẽr-măn, *s.* [Eng. *free*, and *fisher, fisherman.*] One who has an exclusive right to fish in certain waters.

"Who are your lordship's *freefishermen*."—*C. Kingsley.* (*Webster.*)

* **freē'-fĭsh-ẽr-ў,** *s.* [Eng. *free*, and *fishery.*]

Law: The exclusive right of fishing in certain waters; a crown franchise, forbidden by Magna Charta and its confirmations.

* **freē'-foot-ĕd,** *a.* [Eng. *free*, and *footed.*] Not restrained in marching. (*Shakesp.: Hamlet*, iii. 3.)

freē'-hand, *a.* [Eng. *free*, and *hand.*] Executed with the hand alone, without instruments: as, *freehand* drawing.

"The study and practice of *freehand* drawing gives accuracy to the eye, and refines the perceptive faculties."—*Cassell's Technical Educator*, i. 48.

freē'-hand-ĕd, *a.* [Eng. *free; hand; -ed.*] Open-handed, free, generous, liberal.

"He was as *freehanded* a young fellow as any in the army."—*Thackeray.* (*Ogilvie.*)

freē'-heart-ĕd, *a.* [Eng. *free*, and *hearted.*]

1. Open, frank, unreserved.

"Love must *freehearted* be and voluntary;
And not enchanted, or by fate constrained."
Davies.

2. Free, liberal, generous, bounteous.

"In that mansion used to be
Free-hearted Hospitality."
Longfellow: Old Clock on the Stairs.

freē'-heart-ĕd-lў, *adv.* [Eng. *freehearted; -ly.*] In a freehearted, liberal, or open manner; frankly; liberally.

freē'-heart-ĕd-nĕss, *s.* [Eng. *freehearted; -ness.*] The quality of being freehearted; liberality; frankness.

freē'-hōld, *s.* & *a.* [Eng. *free*, and *hold.*]

A. *As substantive:*

Law: An estate or real property held in fee-simple or fee-tail; the tenure by which such an estate is held. Anciently it was one of the two chief tenures known as tenure in free socage, and was the only free method for laymen to hold property. During feudal times the freeholder had to render some small services of an honourable kind: now these are abolished. A freehold estate must possess immobility, in other words must consist either of land or of some interest arising out of land annexed to it. Secondly, it must be of indeterminate duration.

"No alienation of lands holden in chief should be available, touching the *freehold* or inheritance thereof, but only where it were made by matter of record."—*Bacon: Office of Alienation.*

B. *As adj.:* Held in fee-simple or fee-tail; of the nature of a freehold.

"He determined, therefore, to postpone for a short time the confiscation of the *freehold* property of refractory clergymen."—*Macaulay: Hist. Eng.*, ch. vi.

freē'-hōld-ẽr, *s.* [Eng. *freehold; -er.*]

1. *Eng. Law:* The possessor of a freehold.

"The main strength of the opposition lay among the small *freeholders* in the country, and among the merchants and shopkeepers of the towns."—*Macaulay: Hist. Eng.*, ch. i.

2. *Scots Law:* Formerly a person holding of the crown, but now applied to all who, before the passing of the Reform Bill of 1832, had a property qualification entitling them to vote for or be elected members of parliament.

* **free-lac,** * **freo-lac,** *s.* [A.S. *fréolác.*] Freeness, frankness.

"Edmodnesse and tholemodnesse and *freolac* of heorte."—*Ancren Riwle*, p. 40.

freē'-lĭv-ẽr, *s.* [Eng. *free*, and *liver.*] One who lives freely and highly; one who indulges his appetites.

freē'-lĭv-ĭng, *a.* & *s.* [Eng. *free*, and *living.*]

A. *As adj.:* Living freely or highly; given to indulgence of the appetites.

B. *As subst.:* Indulgence of the appetites.

* **freel-tee,** *s.* [FRAILTY.]

freē'-lў, *adv.* [A.S. *fréolice;* M. H. Ger. *vrilîche.*] [FREE, *a.*]

1. In a free manner for state; with full liberty, without dependence.

2. Without restraint or hindrance.

"Thou shalt live as *freely* as thy lord."
Shakesp.: Twelfth Night, i. 4.

3. Plentifully, copiously; to excess.

"You would drink *freely*."
Shakesp.: 2 Henry IV., iv. 2.

4. Without sample or reserve; openly, frankly.

"To tell men *freely* of their foulest faults."—*Dryden: Essay upon Satire.*

5. With full licence; at one's own will or discretion.

"To eat acorns with swine, when we may *freely* eat wheat-bread among men."—*Ascham: Schoolmaster.*

6. Voluntarily, willingly, readily; of one's own accord.

7. Honestly, sincerely, heartily, gladly.

"That noble lady
Or gentleman that is not *freely* merry,
Is not my friend." *Shakesp.: Henry VIII.*, i. 4.

8. Frankly, liberally; without cost or charge.
"*Freely* ye have received, *freely* give."—*Matt.* x. 8.

freē'-măn, * fre-man, * freo-man, *s.* [Eng. *free*, and *man*.]

I. One who is free; one who is not a slave, vassal, or dependant; one who enjoys liberty.

* 2. One who has been freed; a freedman.

3. One who has been admitted or is entitled to a franchise or particular privilege, immunity, or right.
"What this union was is expressed in the preceding verse, by their both having been made *freemen* on the same day."—*Addison.*

freemen's roll, *s.* A roll upon which the names of those who have been admitted to the freedom of a town or city are inscribed.

freē'-măr-tĭn, *s.* [Etym. doubtful.]
Physiol.: A cow-calf born as a twin with a bull-calf, which in this case has all the parts of a perfect animal; whilst the cow-calf is a hermaphrodite and barren. [COW-CALF.]

freē-mā'-sŏn, *s.* [Eng. *free*, and *mason*.] A member of a society for the promotion of freemasonry.

freē-mą sŏn'-ĭe, *a.* [Eng. *freemason*; *-ic*.] Of or pertaining to freemasonry; resembling freemasonry.

freē-mā'-sŏn-rў, *s.* [Eng. *free*, and *masonry*.] An association of "free and accepted masons," a secret society, the more extravagant friends of which claim for it an antiquity extending back to the building of Solomon's Temple, if not even to the time when the Tower of Babel was erected. It is said that it was introduced into England about A.D. 676, that the Grand Lodge at York was founded in 926, and freemasonry was introduced into Scotland in 1140. Some, regarding at least the earlier of these dates as imaginary, allege that it did not come into existence till about the time of the Crusades; and that when it arose, it was simply the masonic guild, or, as it would now be called, trades' union. As the masons moved from place to place seeking employment upon cathedrals, abbeys, or other ecclesiastical edifices then being erected, they had secret signs by which they recognised each other, and proved that they were real proficients in the art which they professed, and not mere pretenders.
At first the Church looked on the Society with favor, but ultimately became unfriendly. In 1424 it was prohibited by the Act 3 Henry VI., c. 1, which, however was never enforced. It is said that freemasonry did not take root in France till the sixteenth century. The Grand Lodge of England was founded in 1717, that of Ireland in 1730, and that of Scotland in 1736. It was introduced into the American colonies in 1730, and has grown greatly in the United States, there being here 48 Grand Lodges, exercising control over nearly 10,000 lodges, and Masonry is nowhere held in greater honor than in this country. It fell into disfavor during the anti-mason excitement of some sixty years ago, but is now highly popular. In 1738 the Pope published a bull of excommunication against freemasons, and freemasonry was included among the errors condemned by the Syllabus in 1864. [See list of American Societies in the Appendix.]

*** freē'-mĭnd-ĕd,** *a.* [Eng. *free*, and *minded*.] Having the mind free from care, trouble, or perplexity; without care or trouble.
"To be *freeminded*, and cheerfully disposed at hours of meat, sleep, and exercise, is one of the best precepts of long lasting."—*Bacon.*

freē'-nĕss, * fre-nesse, *s.* [Eng. *free*; *-ness*.]

I. The quality or condition of being free or at liberty; freedom, liberty.

2. Openness, candour, unreservedness, frankness.
"*Freenesse* of speech is when we speake boldly and without feare euen to the proudest of them."—*Wilson: Arte of Rhetorique*, p. 203.

3. Generosity, liberality, bounty.
"I hope it will never be said that the laity, who by the clergy are taught to be charitable, shall in their corporations exceed the clergy itself, and their sons, in *freeness* of giving."—*Sprat.*

frē'-ĕr, *s.* [Eng. *free*, v.; *-er*.] One who frees, sets free, or delivers; a liberator, a deliverer.
"Bacchus, thou art *freer*
Of cares and overseer."
Ben Jonson. Dedic. of King's Letter.

freē'-schoôl, *s.* [Eng. *free*, and *school*.]

I. A school endowed or supported by funds, in which pupils are taught without charge.
"If there were a possibility of having even our *free-schools* kept a little out of town."—*Goldsmith: The Bee*, No. 4.

2. A school to which pupils are admitted without restriction.

*** freē'-shĭp, * fre-shipe, * fre-scipe,** *s.* [A.S. *freóscipe*.] Freedom.

2. *Spec.*: A fine-grained sandstone with these characteristics.

freē'-thĭnk-ĕr, *s.* [Eng. *free*, and *thinker*.] A name often assumed by those who, disbelieving in revelation, feel themselves free to adopt any opinion in religious or other matters which may result from their own independent thinking. The name was specially claimed by those who in the seventeenth and eighteenth centuries took part on the antichristian side in the Deistic Controversy—viz., Lord Herbert of Cherbury, Toland, Lord Shaftesbury, Collins, Woolaston, Tindal, and Viscount Bolingbroke. The word Freethinker occurs in a letter about Toland, from Mr. Molyneux to Locke, on April 6, 1697; and a work published by Anthony Collins, in 1713, is called *A Discourse on Freethinking.*

freē'-thĭnk-ĭng, *s. & a.* [Eng. *free*, and *thinking*.]

A. *As subst.*: Unbelief, scepticism; the adoption of the principles of a freethinker (q.v.).

B. *As adj.*: Holding the principles of a freethinker; in any way relating to or connected with free thought.

† freē'-thought (ought as **ât),** *s. & a.* [Eng. *free*, and *thought*.]

B. *As adj.*: Of or pertaining to freethinking.

*** freē'-tŏngued,** *a.* [Eng. *free*, and *tongued*.] Speaking without reserve; freespoken, outspoken.

*** freē'-wăr-rĕn,** *s.* [Eng. *free*, and *warren*.]
Law: A royal franchise or exclusive right of killing beasts and fowls of warren within certain limits.

freē'-wŏm-ąn, *s.* [Eng. *free*, and *woman*.] A woman born free; a woman not a slave.
"All her ornaments are taken away of a *freewoman*; she is become a bond slave."—1 *Macabees* ii. 11.

freēze, * freese, * freos-en, * frese, *v.i. & t.* [A.S. *freósan*; cogn. with Icel. *frjósa*; Sw. *frysa*; Dan. *fryse*; Dut. *vriezen*; Ger. *frieren*; O. H. Ger. *freosan*; Lat. *prurio* = to itch.]

A. *Intransitive*:

I. *Literally*:

1. To become congealed with cold; to be changed from a liquid into a solid state by the abstraction or loss of heat.

2. To be at that degree of cold at which water becomes frozen; said of the weather: as, It *freezes* hard.

3. To become chilled, or exceedingly cold; to lose animation through cold.

* **II.** *Figuratively*:

1. To become numb; to lose activity or animation.
"Whereof art thou so sore afered
That thou thy tunge suffrest *freze*?"
Gower, ii. 22.

2. To grow cold; to cool.
"Thy love doth *freeze*."
Shakesp.: Taming of the Shrew, II. i.

B. *Transitive*:

I. *Literally*:

3. A load, or cargo.
"Yon sail . . . wafts the royal youth,
A *freight* of future glory to my shore."
Thomson; Britannia, 18.

¶ Crabb thus discriminates between *freight*, *cargo*, *burden*, and *lading*: "A captain speaks of the *freight* of his ship as that which is the object of his voyage, by which all who are interested in it are to make their profit; the value and nature of the *freight* are the first objects of consideration: he speaks of the

lading as the thing which is to fill the ship; the quantity and weight of the *lading* are to be taken into the consideration: he speaks of the *cargo* as the thing which goes with the ship, and belongs as it were to the ship; the amount of the *cargo* is that which is first thought of: he speaks of the *burden* as that which his vessel will bear; it is the property of the ship which is to be estimated. The ship-broker regulates the *freight:* the captain and the crew dispose the *lading:* the agent sees to the disposal of the *cargo:* the ship-builder determines the *burden:* the carrier looks to the *load* which he has to carry." (*Crabb: Eng. Synon.*)

French-sardine, *s.* A young pilchard.

French School, *s.*

Paint.: This school has been so different under different masters, that it is difficult to characterize it. Some of its artists have been formed on the Florentine and Lombard styles, others on the Roman, others on the Venetian, and a few of them have distinguished them-

selves by a style which may be called their own. Speaking in general terms of this school, it appears to have no peculiar character, and can only be distinguished by its aptitude to imitate easily any impressions; and it may be added, speaking still in general terms, that it unites in a moderate degree the different parts of the art, without excelling in any one of them. Modern French artists have especially excelled as painters of the nude figure.

Prior. Hans Carvel.
* 2. A cool, refreshing drink, or liquor.
3. A painting executed by the process described under II.
"His *frescos* not pleasing he returned to Rome."—*Walpole: Anecdotes of Painting,* vol. i., ch. viii.
II. *Art:* A kind of painting performed on fresh plaster, or on a wall covered with mortar not quite dry, and with water-colours. The plaster is only to be laid on as the painting proceeds, no more being done at once than the painter can despatch in a day. The colours, being prepared with water, and applied over plaster quite fresh, become incorporated with the plaster, and retain their beauty for a great length of time. The art, which is employed generally for large pictures on walls or ceilings, was understood by the ancients. The Romans cut out plaster paintings on brick walls at Sparta, packed them up in wooden cases, and transported them to Rome. Fresco painting was first made of real importance by the Italians, in the sixteenth century. It is a very common error in this century with antiquaries and writers in general to term the ancient paintings frequently found on church walls, &c., *frescoes;* but there is scarcely an instance of a genuine *fresco* among them. They are distemper paintings on plaster, and quite distinct in their style, durability, and mode of manipulation. (*Weale, Fairholt,* &c.)

frĕs'-cō, *v.t.* [FRESCO, *s.*] To paint or decorate in fresco, as walls.

4. (*Pl.*): The minglings of fresh and salt water in bays or rivers; the increased current of an ebb-tide caused by a flood of fresh water flowing into the sea.

¶ Crabb thus discriminates between *fresh*, *new*, and *recent*: "The *fresh* is properly opposed to the stale, as the *new* is to the old: the *fresh* has undergone no change: the *new* has not been long in being. Meat, beer, and provisions in general, are said to be *fresh*: but that which is substantial and durable, as houses, clothes, books, and the like, are said to be *new*. *Recent* is taken only in the improper application; the other two admit of both applications in this case: the *fresh* is said in relation to what has lately preceded; *new* is said in relation to what has not long subsisted; *recent* is used for what has just passed in distinction from that which has long gone by." (*Crabb: Eng. Synon.*)

¶ Obvious compounds: *Fresh-blowing*, *fresh-blown*, *fresh-coloured*, *fresh-washed*, *fresh-looking*, &c.

"The nobility, as *freshwater* soldiers which had never seen but some light skirmishes, made light account of the Turks."—*Knolles: Historie of the Turkes.*

freshwater formation, *s.*

Geol.: A stratum or a series of strata deposited in freshwater. If this is done by a river they are fluviatile; if by a lake they are lacustrine. Most freshwater strata belong to the latter category. In such a stratum, there are no echini, no corals and no foraminifera. There are probably shells few in species, but abundant in individuals, of forms like those of modern freshwater or land shells. All univalve shells of land and freshwater species, except *Melanopsis*, the aperture of which is distinctly notched, and *Achatina*, which has a slight indentation, have entire mouths. Of bivalves none but those with two muscular impressions are freshwater; if a shell with a single impression be found, the stratum is almost certainly marine. Freshwater strata are generally more limited in area than those deposited in the sea. (*Lyell.*)

freshwater-mussels, *s. pl.*

Zool.: A name for the mollusca of the family Umonidæ (q.v.).

freshwater-shrimp, *s.*

frĕş-ī'-şŏn, *s.* [A word of no etymology.]

Logic: An arbitrary name for a mode in the fourth figure of syllogisms, in which figure the Middle Term is the predicate of the Major and the subject of the Minor Premiss. Taking X to represent the Major Term, Y the Minor, and Z the Middle, a syllogism in Fresison would stand thus:

(frEs) No X is Z.
(I) Some Z is Y.
(sOn) ∴ Some Y is not X.

That is, from a Universal Negative and a Particular Affirmative, a Particular Negative is arrived at.

frĕt (1), *** frete**, *** fret-en**, *** freot-en**, *v.t.* & *i.* [A.S. *fretan* (pa. t. *fræt*), a contraction

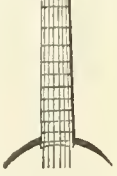
* **frĕt** (4), *s.* [Lat. *fretum* = a strait, a channel.] A channel.

"We first advertise, it [Euripus] generally signifieth any strait, *fret*, or channel of the sea, running between two shores."—*Browne: Vulgar Errours*, bk. vii., ch. xiii.

frĕt (5), *s.* [Etym. doubtful; perhaps a particular use of O. Fr. *frete* = a ferrule.] [FRET, (3), *s.*]

Music: A small piece of wood or ivory placed upon the finger-board of certain stringed instruments, to regulate the pitch of the notes produced. By pressing the string down to the finger-board behind a fret, only so much of the string can be set in vibration as lies between the fret and the bridge. Frets are, therefore, nothing more or less than little bridges. The Egyptian lutes had frets made of camel-gut, tied or glued round the finger-board. All the viols contained in a chest had frets, and some of the early forms of the violin were even furnished with them. But not only do they prevent the rapid fingering of difficult passages, but they also entirely deprive the violin of one of its most charming qualities, that of slurring or *portamento*, an attempt to produce which will, on a fretted instrument, result in a well-defined chromatic scale. Another reason for the abandonment of fretted violins was that, in extreme keys, the intervals could not be tempered.



FRET OF GUITAR.

"I did but tell her she mistooke her *frets*. . . .
Frets call you these? quoth she I'le fume with them:
And with that word she stroke me on the head."
Shakesp. Taming of the Shrew, ii. 1.

"Their *friarlike* general would the next day make one holyday in the Christian calendars, in remembrance of thirty thousand Hungarian martyrs slain of the Turks."—*Knolles: Hist. of the Turkes.*

* **frī'-ar-lĭng,** * **frī'-ĕr-lĭng,** *s.* [Eng. *friar*; dimin. suff. *-ling.*] A young friar.

"And I haue laboured with mine owne hands, and will labor, and will that all my *frierlings* shall labor, and liue of their labor, whereby they may support themselues."—*Fox: Martyrs*, p. 881.

* **frī'-ar-lў,** * **frī-ar-lie,** * **frī-er-ly,** *a.* [Eng. *friar*; *-ly.*] Like a friar; inexperienced in the affairs of the world.

"Seek not proud riches, but such as thou mayst get justly, use soberly, distribute cheerfully, and leave contentedly; yet have no abstract nor *friarly* contempt of them."—*Bacon: Essay: Of Riches.*

* **frī'-ar-ў,** * **frī'-ĕr-ў,** *s. & a.* [Eng. *friar*; *-y.*]

A. *As substantive:*

1. A monastery or community of friars.

"So the first year of his coming over I was in the *friery* at Armagh."—*State Trials* (1681), *Oliver Plunckett.*

2. The system of living in brotherhoods; monkery.

"When John Milverton began in favour of *friery*."—*Fuller: Church Hist.*, vi. 272.

B. *As adj.:* Like or characteristic of a friar.

"Francis Cornfield did scratch his elbow when he had sweetly invented to signify his name, St. Francis, with a *friary* cowl, in a corn field."—*Camden: Remains.*

* **frī-ā'-tion,** *s.* [Lat. *friatus*, pa. par. of *frio* = to rub, to crumble.] The act of crumbling or reducing to powder.

* **frĭb'-ble,** *a. & s.* [Fribble, *v.* Cf. Frivolous.]

A. *As adj.:* Trifling, frivolous, weak.

B. *As subst.:* A trifler; a frivolous, weak, contemptible fellow.

"While namby-pamby thus you scribble
Your manly genius, a mere *fribble*."
Lloyd: On Rhyme.

* **frĭb'-ble,** *v.i. & t.* [From Central Fr. *friboler* = to flutter, flit to and fro without fixed purpose like a butterfly. (*Wedgwood.*) For *fripple*, from O. Fr. *fripper* = to rub up and down (*Skeat.*).]

A. *Intransitive:*

1. To trifle; to act frivolously.

"Though cheats, yet more intelligible,
Than those that with the stars do *fribble*."
Butler: Hudibras, pt. ii., c. iii.

2. To totter.

"How the poor creature *fribbles* in his gait."—*Tatler*, No. 49.

B. *Transitive:*

1. To do or utter in a frivolous, trifling manner.

"And what is worse, they speek but
What they list of it, and *fribble* out the rest."
Middleton: Mayor of Quinborough, v. 1.

2. To frizzle.

"The mistress said to me, the minister had a block-head whereon he was wont to dress and *fribble* his wig."—*The Steam-boat*, p. 297.

frĭb'-blĕr, *s.* [Eng. *fribbl(e)*, v.; *-er.*] A trifler; a fribble.

"A *fribbler* is one who professes rapture and admiration for the woman to whom he addresses, and dreads nothing so much as her consent."—*Steele: Spectator*, No. 288.

* **frī'-bŏrg,** * **free-borg, frī-burgh,** *s.* [A.S. *frēoborh, friborh*, from *frēo, frī* = free, and *borh* = a pledge, security.]

Old Law: The same as Frankpledge (q.v.).

"As touching the king's peace, every hundred was divided into many *freeborgs* or tithings consisting of ten men, which stood all bound one for the other; and did amongst themselves punish small matters in their court for that purpose called the lete."—*Spelman: Ancient Government of England.*

* **frĭc'-āçe,** * **frĭc-a-sie,** * **frĭc-a-cy,** *s.* [Fricasee.]

1. The act of rubbing.

"You make them smooth and sound
With a bare *fricace* of your medicine."
Ben Jonson: Alchemist, iii. 2.

2. Meat sliced and dressed with strong sauce.

"Their stinking cheese, and *fricacy* of frogs."
King: Art of Cookery.

frī-can-dcau' (**dcau** as **dō**), * **frī-can-dcl,** * **frī-can-do,** *s.* [O. Fr. *fricandel*; Fr. *fricandeau.*]

Cook.: A dish prepared of veal, apices, &c.

frĭc-as-seē', *s.* [Fr. *fricassée*, pa. par. fem. sing. of *fricasser* = to fricassee, from Lat. *frico* = to rub; Sp. *fricasé*; Port. *fricassé*; Ital. *fricascu.*]

Cook.: A dish made by cutting chickens or other small animals into pieces, and dressing them in a frying-pan or similar vessel with strong sauce.

"Soups and olios, *fricassees* and ragouts."—*Swift: Tale of a Tub*, § 7.

frĭc-as-seē', *v.t.* [Fricassee, *s.*]

I. *Literally:*

Cook.: To dress in manner of a fricassee.

*2. *Fig.:* To mince finely and disguise under some strong cover.

"Common-sense and truth will not down with them unless they be hashed and *fricassed*."—*Echard: Observations* (1696), p. 63.

* **frī-cā'-tion,** *s.* [Lat. *fricatio*, from *fricatus*, pa. par. of *frico* = to rub; Sp. *fricacion.*] The act of rubbing one thing against another; friction.

"The like, saith Jorden, we observe in canes and woods, that are unctuous and full of oyle, which will yield fire by *frication* or collision."—*Browne: Vulgar Errours*, bk. iii., ch. xxi.

frĭc'-a-tĭve, *s. & a.* [Lat. *fricatus*, pa. par. of *frico* = to rub.]

A. *As substantive:*

Philol.: A term applied to certain letters, as *f, v, s, z*, &c., produced by the friction of the breath issuing through a narrow opening of the organs of articulation.

"Next to the mutes in regard to degree of closure are the class of so-called *fricatives*, defined as containing a rustling or friction of the breath through a narrowed aperture as their main element."—*Whitney: Life & Growth of Language*, p. 64.

B. *As adj.:* Produced by the friction of the breath issuing through a narrow opening.

"The cavity may be so narrowed, at one and another point, that the friction of the breath, as driven out through the aperture, forms the conspicuous element in the audible product; this, then, is a sound of very different character, a *fricative* consonant."—*Whitney: Life & Growth of Language*, p. 61.

* **frĭc'-a-trĭçe,** *s.* [Lat. *frictrix.*] A harlot.

frĭc'-klc, *s.* [Etym. doubtful.] A bushel-basket.

frĭc'-tion, *s. & a.* [Fr., from Lat. *frictio*, from *frictus* = a contract. pa. par. of *frico* = to rub.]

A. *As substantive:*

I. *Ordinary Language:*

1. *Literally:*

(1) The act of rubbing two bodies together; the act of rubbing one body with another.

"*Frictions* make the parts more fleshie, and full, as we see both in men, and in the currying of horses, &c."—*Bacon: Natural History*, § 877.

(2) In the same sense as II.

2. *Fig.:* A slight disagreement or diversity of opinions; an absence or loss of smoothness in the relations between two parties.

"The causes of complaints which have been so frequent of late, and which indicate a very undesirable amount of *friction* between English captains and shipping agents and the local staff."—*Daily Chronicle*, July 17, 1883.

II. *Physics:* The resistance which any body meets with in moving over another body. No body is quite smooth, all have elevations and depressions, and when one moves over another some of the projecting points of the one are sure to enter the cavities of the other, and render movement more difficult. Friction is greater when a body previously at rest first begins to move. A horse which finds a difficulty in getting a heavy cart well in motion, owing to inertia largely produced by friction, will draw it without symptoms of distress when it has been for some time started. The larger and heavier the body the greater the friction. Friction is a retarding force in nature. It gives stability to bodies which else would be easily moved. It generates heat, and is one of the chief means of developing electricity. [Frictional electricity.]

¶ *Coefficient of friction for two surfaces:*

Physics: The rates or proportions between the force required to move one of these surfaces over the other, and the pressure between the two surfaces.

B. *As adj.:* Pertaining to or implying friction; frictional.

friction-balls, *s. pl.* Properly, anti-friction balls. Balls placed beneath a traversing object to relieve friction. Some forms of swing-bridges are thus supported.

friction-block, *s.* A block of wood pressing tightly on to any revolving body, so as to cause friction.

friction-brake, *s.*

Mech.: A form of dynamometer invented by Prony, in which a pair of friction-blocks are screwed to a journal rotating at a given speed, and tightened to such an extent that the unweighted lever will remain horizontal between the studs.

friction-clutch, *s.*

Mach.: A device for connecting two shafts by bringing a piece on one shaft into contact with a piece of another shaft, which revolves with such force that the former partakes of the motion of the latter. It consists of a shell or box fixed on the end of a driving-shaft, fitted by a conical piece which slides on a feather or raised part of the end of another shaft, so that it can be engaged at pleasure by the cone being forced into the shell by a lever or screw. This apparatus is very useful for driving machines, the parts of which are subject to violent strains, as the pressure upon the clutch can be regulated so as to allow it to slip when the strain is abnormal.

friction-cones, *s. pl.*

Mach.: A form of friction-coupling in which the connecting portions have respectively a conical disc and a hollow cone, which become frictionally adherent by contact.

friction-coupling, *s.*

Mach.: [FRICTION-CLUTCH].

friction-gear, friction-gearing, *s.*

Mach.: Wheels for transmitting power by means of parallel ridges or teeth of the driver on the rims which gear into corresponding grooves on the follower. They are very convenient for use in machines that require to be put in or out of gear rapidly; compressed masses of paper are also used as frictional driving surfaces.

friction-hammer, *s.*

Mach.: A hammer deriving its name from its being lifted by means of the friction of revolving rollers, which nip the hammer-rod.

friction-powder, *s.* [FRICTION-PRIMER.]

friction-primer, *s.*

Ord.: A small brass tube filled with gunpowder, and having a smaller tube containing friction composition inserted at right angles near the top. The composition is ignited by means of a roughed wire inserted in the smaller tube, which is rapidly drawn out by a lanyard having a hook at the end. The composition consists of two parts sulphuret of antimony and one part chlorate of potassa, moistened with gum water and dried.

friction-pulley, *s.*

Mach.: [FRICTION-CLUTCH].

friction-rollers, *s. pl.*

Mach.: A bearing formed of two rollers, whose circumference supports a rotating axle instead of a bush or block, in order to substitute the friction of rolling for that of sliding, which is considerably less for similar pressure. Similarly, cylinders, or round logs, are commonly placed under heavy weights, which have to be moved any short distance along the ground, so as to diminish the friction.

friction-tube, *s.*

Ord.: A tube containing a composition which is ignited by friction, and which is placed in the vent of a gun to fire the charge when the lanyard is pulled. [FRICTION-PRIMER.]

friction-wheel, *s.*

Mach.: A wheel, the motion of which is caused by the friction of a moving body, or, conversely, which communicates motion to a body by frictional contact. In one variety, one wheel being driven becomes a motor to the other, their perimeters being in contact. The surface is usually clothed with leather, rubber, or some sufficiently elastic material which does not polish too readily, and thus induce slipping. By grooving the perimeters of the wheels, the contact may be made more intimate, as the surface engaged is increased, and the elastic material of the respective faces caused to bind. In another form a collar fastened to the central shaft has four pivoted arms. When the rim turns in one direction, the arms turn on their pivots, leaving the rim and failing to transfer the motion to the shaft. When the rim turns in the contrary direction, the arms catch against it and are rotated by the contact, turning the shaft also. Another form has an upper india-rubber wheel with a V-edge, clamped between two metallic plates. By screwing up the nut which holds the parts together, the disc is made to expand radially, and thus increase the tractive power on the lower driving-wheel. The term friction-wheel is often, but erroneously, applied to wheels which diminish friction, these are properly called anti-friction wheels.

frĭc'-tion-al, *a.* [Eng. *friction; -al.*] Of or pertaining to friction; produced by or resulting from friction.

frictional electricity, *s.*

Elect.: Electricity developed by rubbing bodies, as distinguished from dynamic electricity, that developed by means of a voltaic pile or battery. [ELECTRICITY.] (*Ganot.*)

frictional-gearing, *s.* [FRICTION-GEAR.]

Frictional-gearing-wheels:

Mach.: [FRICTION-WHEEL].

frĭc'-tion-al-lȳ, *adv.* [Eng. *frictional; -ly.*] As regards friction.

frĭc-tion-lĕss, *a.* [Eng. *friction; -less.*] Free from or without friction.

Frī'-daȳ, *s.* [A.S. *Frige dæg* = Friga's day, Friday; Icel. *Frjadagr;* Dan. & Sw. *Freitag;* Dut. *Vrijdag;* Ger. *freitag;* O. H. Ger. *Friatag.*]

Calendar: The sixth day of the week, dedicated by the Scandinavians, the Anglo-Saxons and others to the goddess Friga (q.v.). It is remarkable that in India the corresponding day is dedicated not to a god, but to a goddess, corresponding to Venus.

* **friday-faced,** *a.* Mortified, melancholy.

"What a *friday-faced* slave it is!"—*Wily Beguil'd.*

* **frĭdge** (1), *v.t.* [Etym. doubtful.] To rub, to fray.

"You might have *fridged* the outside of them all to pieces."—*Sterne: Tristram Shandy,* ii. 116.

* **frĭdge** (2), *v.i.* [Etym. doubtful; probably from A.S. *frician* = to dance, or connected with *freak* (q.v.).] To move hastily or rapidly; to dance about.

"The little motes or atoms that *fridge* and play in the beams of the sun."—*Hallhoell: Melamprovæa.*

* **frĭd-stōle,** *s.* [FREDSTOLE.]

frĭed, *pa. par.* or *a.* [FRY, *v.*]

fried-chickens, *s.* Chicken broth with eggs dropped in it, or beaten up and mixed with it.

frĭĕnd, * frend, * frende, * freond, *s.* [A.S. *freónd*, orig. the pr. par. of *freón, freógan* = to love; cogn. with Dut. *vriend;* Ger. *freund;* O. H. Ger. *fruint;* Goth. *frijonds* = a friend; Icel. *frændi;* Da. *fræende;* Sw. *frände* = a kinsman.]

1. An intimate acquaintance or associate; one who is attached to another by sentiments of affection, respect, and esteem.

"Want gives to know the flatterer from the *friend.*"
Dryden: Wife of Bath's Tale, 486.

2. A near relation, more particularly a parent.

"She is promised by her *friends* unto a gentleman."
Shakesp.: Two Gentlemen of Verona, iii. 1.

3. One not hostile; one of the same nation, party, or kin; a supporter or companion in arms.

"'Who comes so fast in silence of the night?'"
"'A *friend.*'" *Shakesp.: Merchant of Venice,* v. 1.

4. One who is reconciled with another. (Followed by *with.*)

"And *friends* with Cæsar."
Shakesp.: Antony & Cleopatra, ii. 5.

5. A companion; an associate; an attendant.

"It stood upon the choice of *friends,*"
Shakesp.: Midsummer Night's Dream, i. 1.

* 6. A lover, a paramour, a sweetheart.

7. One who is favourable, supports or promotes a cause, object, or institution; a favourer; a supporter; a promoter.

"Aurora riding upon Pegasus sheweth her swiftness, and how she is a *friend* to poetry and all ingenious inventions."—*Peacham.*

8. A term of familiar address or salutation.

"*Friend,* how camest thou in hither."—*Matt.* xxii. 12.

9. A Quaker; a member of the society of Friends. [¶ (4).]

¶ (1) *A friend in* or *at Court:* One who has influence in any quarter to help another in time of need.

"A *friend at the Court* is better than a penny in purse."—*Shakesp.: 2 Henry IV.,* v. 1.

(2) *Friends of God:*

Ecclesiol. & Ch. Hist.: A sect which flourished in Germany and Switzerland in the fourteenth century. It was a secret unorganized brotherhood for the cultivation of spiritual religion.

(3) *Friends of the People:*

Hist.: A society formed in London in 1792 to advocate reform.

(4) *Society of Friends:*

Ecclesiol. & Ch. Hist.: A religious sect, better known as Quakers, which, however, is a nickname. [QUAKER.] Their founder was George Fox, an illiterate man, but of considerable natural ability, born at Drayton in Leicestershire in July, 1624. He was apprenticed to a shoemaker, but could not settle steadily down to any secular occupation, the whole bent of his mind being towards religion. In 1647, at the age of twenty-three, he first began to preach independently of all other denominations, and by the following year had gained many adherents. When he went to the church of an ordinary clergyman, he had at first no scruple in rising to correct what he deemed erroneous in the doctrine of the preacher. Three instances of this are recorded, all of date 1649. In later years Fox did not disturb public worship. He professed to be commanded by the Lord not to use the ordinary forms of salutation, and to substitute "thee" and "thou" for the more courteous "you" in conversation. He deemed it sinful to take oaths (those of supremacy and allegiance, for instance), or to pay or sanction the payment by his followers of tithes, and thus naturally encountered vehement hostility from both the civil and ecclesiastical authorities. The rougher section of the common people were also his foes. But he unflinchingly propagated his opinions in England, on the continent of Europe, and in America till his death, on Jan. 13, 1691. The Friends, like their originator, had much to suffer, and nobly bore their trials. In the reign of Charles II., Robert Barclay, a Scotch knight, was a zealous follower of Fox. In that of James II., William Penn, the founder of the Quaker state of Pennsylvania, with its original capital city, Philadelphia, high in the favor of the king, procured them some toleration. After the Revolution of 1688 the sect was not molested, and by 7 & 8 William III., c. 34, were allowed to make a solemn affirmation instead of an oath. They have since rendered services to the cause of education, of liberty, and of humanity. They hold the Divinity of Christ, his atonement, and other doctrines generally called evangelical. They give the title of the Word of God to Christ alone, and not to the Scriptures. They hold that every man coming into the world is endued with a measure of light, grace, or good Spirit of Christ. They are opposed to all forms in worship, which divert the attention of the mind from the secret influence of the unction from the Holy One. They believe that the ministry should be unpaid, and decline to pay tithes. They believe the sacraments of baptism and the Lord's Supper to be shadows and unnecessary now that the substance has been attained. They are opposed to taking oaths and war. They disown the heathen names of the days of the week, the observance of times, vain amusements, and compliments. For many years the Friends, both male and female, affected a peculiar style of dress of extreme plainness of shape and colour, but this custom has been gradually discontinued. In the United States they have become divided into two bodies, an Orthodox and a Hicksite or Unitarian, the former having about 84,000, the latter 23,000 members. These dwell mainly in Philadelphia and the adjoining districts.

(5) *To be friends with any one:* To be in a relation of friendship with.

(6) *To make friends:* To become reconciled.

* **frĭĕnd, * frend,** *v.t.* [FRIEND, *s.*] To act as a friend towards; to befriend; to favour; to support.

"The people who favoured and *friended* still the name of Constantius."—*P. Holland: Ammianus Marcellinus,* p. 177.

* **frĭĕnd'-ĕd, * frend-ed,** *a.* [Eng. *friend; -ed.*]

1. Having friends; befriended, supported.

"O where have I been all this time? how *friended,*
That I should lose myself thus desperately?"
Beaum. & Flet.: Maid's Tragedy, iv.

2. Well disposed; inclined to love or act as a friend.

"Not *friended* by his wish to your high person."
Shakesp.: Henry VIII., i. 2.

***friĕnd'-ĕss,** ***frend-esse,** *s.* [Eng. *friend*; *-ess.*] A female friend or relation.

"Clepe thou prudence thi *frendesse.*"—*Wycliffe: Proverbs* viii. 4. (*Purvey.*)

*** friĕnd'-fŭl,** *** frend-ful,** *** frend-fulle,** *** frende-full,** *a.* [Eng. *friend*; *ful*(*l*).] Friendly; kindly disposed; loving.

"Y wolde that God schewe hym silf *frendful* to me bi signes and werkis, as a spouse to the spousesse."—*Wycliffe: Song of Solomon* i. 1. (Marglin.)

*** friĕnd'-ĭng,** *s.* [Eng. *friend*; *-ing.*] The state or quality of being a friend; friendliness, friendship, favour.

"To express his love and *friending* to you."
Shakesp.: Hamlet, i. 5.

friĕnd'-lĕss, *** frend-les,** *a.* [A.S. *frēondlēas*; Dut. *vriendloos*; Ger. *freundlos.*] Destitute of or without friends; forlorn; forsaken.

"*Friendless*, homeless, hopeless, they wandered from city to city." *Longfellow: Evangeline*, ii.

*** friendless-man,** *s.*

Old Law: An outlaw.

friĕnd'-lĕss-nĕss, *s.* [Eng. *friendless*; *-ness.*] The quality or state of being friendless.

*** friĕnd'-lĭ-hoŏd,** *** frende-ly-hede,** *s.* Eng. *friendly*; *-hood.*] Friendliness; friendship.

"As by way of *frendelyhede.*" *Gower*, ii. 286.

friĕnd'-like, *a.* [A.S. *frēondlic*; O. Fris. *friondlik*; O. H. Ger. *friuntlih*; M. H. Ger. *vriuntlich*; Ger. *freundlich.*] Like a friend; friendly.

"That true faith, wherever it is, worketh and frameth the heart to *friendlike* dispositions unto God, and brings forth *friendlike* carriage in the life towards God."—*Goodwin: Works*, vol. v., pt. ii., p. 48.

friĕnd'-lĭ-lў, *adv.* [Eng. *friendly*; *-ly.*] In a friendly manner; like a friend.

"Tell me if it is not better to be suppressed: freely and *friendlily.*"—*Pope: To Warburton*, Nov. 1742.

friĕnd'-lĭ-nĕss, *s.* [Eng. *friendly*; *-ness.*]

I. A disposition to friendship; a readiness to act as a friend; good-will, good-nature.

"Why, either, were you ignorant to see't?"
Or, seeing it, of such childish *friendliness*
To yield your voices." *Shakesp.: Coriolanus*, ii. 3.

2. An act or exertion of benevolence.

"Let all the intervals be employed in prayers, charity, *friendliness*, and neighbourhood."—*Taylor.*

friĕnd'-lў, *a.* & *adv.* [A.S. *frēondlic* (a.), *frēondlice* (adv.).] [FRIENDLIKE.]

A. *As adjective:*

1. Having the qualities, temper, and disposition of a friend; good-natured, kind; willing and ready to act as a friend.

"And they the wiser, *friendlier* few confessed
They deemed him better than his air expressed."
Byron: Lara, i. 7.

2. Characterized by friendliness; kind.

"Warmest and *friendliest* welcome
Gave they, with words of cheer, and she sat and feasted among them."
Longfellow: Evangeline, ii. 4.

3. Amicable; becoming friends: as, To live on *friendly* terms.

4. Not hostile; on good terms; disposed to peace: as, a *friendly* power or state.

5. Favourable, propitious, salutary.

"To life so *friendly*, or so cool to thirst."
Milton: Comus, 676.

6. Favouring, befriending, fortunate.

B. *As adv.:* In the manner of a friend; like friends.

"Let's drink together *friendly.*"
Shakesp.: 2 Henry IV., iv. 2.

¶ (1) *Friendly societies:* Societies formed with the view of assisting any one of their members who may be sick, infirm, or old, or who may have to meet the expense of a funeral in his family; or for providing a certain amount of support for his widow and family on his death. To obtain money for those objects, there is a fixed scale of contributions binding on all the members. Friendly societies existed among the Anglo-Saxons. It is doubtfully stated that one was founded in London in A.D. 1715. An Act for the encouragement of such institutions was passed in A.D. 1793. Many other Acts have since been passed to encourage friendly societies, and protect their members. Societies similar in purpose, but not known by this title, exist abundantly in the United States, many of them being secret societies. The membership is very large, branches existing in all parts of the United States. They do an enormous amount of good, as co-operative societies for mutual aid and assistance.

(2) *Friendly suit:*

Law: A suit instituted between two parties who are not really at variance, to obtain a judicial decision upon a certain point.

*** friĕnd'-măn,** *** frend-man,** *s.* [Eng. *friend*, and *man.*] One who is friendly or well-disposed; a friend.

"The *frendmen* him biwepeth."—*O. Eng. Homilies*, ii. 183.

*** friend-rede,** *** freond-rede,** *s.* [A.S. *freondræden.*] The state or relation of a friend; friendship.

"Four thousand mark ysende
For to beon of his *freondrede.*"
Alisaunder, 1,487.

friĕnd'-shĭp, *** frend-schip,** *** freud-shepe,** *** frend-shipe,** *** fren-ship,** *** freond-scipe,** *** freond schipe,** *s.* [A.S. *freóndscipe*: cogn. with O. Sax. *friundskepi*; O. Fris. *friondskip, friundschup*; O. H. Ger. *fruntscof*; M. H. Ger. *vriuntschaft*; Dut. *vriendschap*; Sw. *frandskap*; Dan. *frändscab*; Ger. *freundschaft.*]

1. The condition, disposition, or relation of a friend; an attachment to a person from feelings of esteem, regard, affection, or respect; mutual attachment; friendliness; close intimacy.

"No firmer *friendships* than the fair have shown."
Cowper: The Valediction.

2. Favour; personal kindness; an act or exercise of benevolence; a kind service.

"His *friendships*, still to few confined,
Were always of the middling kind." *Swift.*

3. Kind disposition; good-will.

"You have no cause to hold my *friendship* doubtful."
Shakesp.: Richard III., iv. 4.

*** 4.** Assistance, help, friendly aid.

"Gracious my lord, hard-by here is a hovel.
Some *friendship* will it lend you 'gainst the tempest."
Shakesp.: Lear, iii. 2.

5. Close acquaintance.

"With spiders I had *friendship* made"
Byron: Prisoner of Chillon, xiv.

*** 6.** Affinity, conformity, aptness to unite or combine.

"We know those colours which have a *friendship* for each other."—*Dryden: Dufresnoy.*

¶ For the difference between *friendship* and *love*, see LOVE.

*** friĕnd'-sŏme,** *** fren-some,** *a.* [Eng. *friend*; *-some.*] Friendly, kind, gracious.

"*Frendsome* es thi merci."
E. Eng. Psalter, Ps. lxviii. 17.

*** friend-stead,** *a.* [Eng. *friend*, and *stead.*] Possessing a friend; befriended.

"I am sure, while Christ lives, I am well enough *friendstead.*"—*Rutherford: Lett.*, pt. i., ep. 144.

frī'-ĕr (1), *s.* [Eng. *fry*, v.; *-er.*] One who or that which fries.

*** frī'-ĕr** (2), *s.* [FRIAR.]

Friēse, *s.* [Dut. *Friese* = a Friesländer.] The language of Friesland; Frisian.

Friēs'-land, *s.* & *a.* [Dut.]

A. *As substantive:*

Geog.: A province in the Netherlands, on the N.E. side of the Zuyder Zee.

B. *As adj.:* Of or belonging to the province described under A.

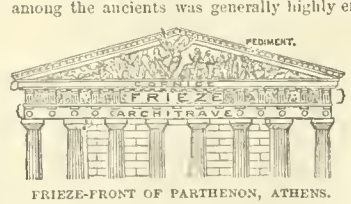
Friesland-oat, *s.*

Hort.: A large variety of the common oat (*Avena sativa*).

friēş'-ĭc, friēş'-ĭsh, *a.* [FRISIAN.]

friēze (I), *** frīze** (1), *** frēeze,** *s.* [O. Fr. *frize*, a word of doubtful origin.]

Arch.: The central portion of the entablature of a temple or other building, which among the ancients was generally highly enriched by sculpture. The Elgin Marbles which originally ornamented the frieze of the Parthenon at Athens, are among the finest works of sculpture the world has ever produced. (*Milton: P. L.*, i. 716.)



FRIEZE-FRONT OF PARTHENON, ATHENS.

frieze-panel, *s.* One of the upper panels of a six-panel door.

frieze-rail, *s.* The one next to the top rail.

*** friēz'-ĕr,** *s.* [Eng. *friez*(*e*) (2); *-er.*] One who or that which friezes.

friēz'-ĭng, *a.* [Eng. *friez*(*e*) (2); *-ing.*] Adapted, intended, or employed for making frieze: as, a *friezing* machine.

Frĭg'-a, Frĭg'-ga, Frey-a, *** Frie,** *s.* [O. Icel. *Frigg*; in A.S. *Frig*; cogn. with *frig, free* & *frige* = wooing, courtship.] [FREE, FRIEND.]

1. *Myth.:* The old Scandinavian goddess of love, corresponding to the Roman Venus, and the Greek Aphroditè. She was the wife of Odin. [FRIDAY.]

2. *Astron.* (*Of the form* Frigga): An asteroid, the 77th found. It was discovered by Peters on Nov. 12, 1862.

frĭg'-ate, *** frĭg'-at,** *** frig-ot,** *s.* [Fr. *frégate*, from Ital. *fregata* = a frigate; Sp. *fragata*; prob. for* *fargata*, a contracted form of Lat. *fabricata*, fem. sing. pa. par. of *fabrico* = to build.]

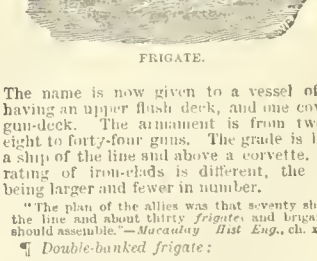
I. *Ordinary Language:*

1. In the same sense as II.

*** 2.** Any small vessel on the water.

"Behold the water work and play
About her little *frigat*, therein making way."
Spenser: F. Q., II. vi. 7.

II. *Naut.:* Originally a Mediterranean vessel propelled by sails and oars; afterwards a ship of war, between a sloop or brig and a ship of the line. Such vessels generally carried from thirty to fifty guns on the main deck and on a raised quarter-deck and forecastle. They were usually employed as cruisers or scouts.



FRIGATE.

The name is now given to a vessel of war having an upper flush deck, and one covered gun-deck. The armament is from twenty-eight to forty-four guns. The grade is below a ship of the line and above a corvette. The rating of iron-clads is different, the guns being larger and fewer in number.

"The plan of the allies was that seventy ships of the line and about thirty *frigates* and brigantines should assemble."—*Macaulay: Hist. Eng.*, ch. xx.

¶ *Double-banked frigate:*

Naut.: A frigate carrying guns on two decks and having a flush upper-deck.

frigate-bird, *s.*

Ornith.: Tachypetes, a genus of natatorial birds, family Pelecanidæ, and specially *Tachypetes Aquilus.* They have a long and forked tail, and an expansion of wings sometimes reaching ten or twelve feet. They abound on both the Atlantic and Pacific coasts of tropical America, building their nests in trees, and laying one or two eggs. They are called also Man-of-War birds. Both names are derived from their swiftness and raptorial habits.

frigate-built, *a.*

Naut.: Having a quarter-deck and forecastle raised above the main-deck.

frĭg-ą-toon', *s.* [Ital. *fregatone.*]

Naut.: A Venetian vessel with a square stern, no foremast, but only a mainmast and mizenmast.

* **frĭg-ĕ-făc'-tion,** *s.* [Lat. *frigefacio* = to make cold; *frigus* = cold, and *facio* = to make.] The act or process of making cold.

* **frĭg-ĕ-făc'-tĭve,** * **frig-i-fac-tive,** *a.* [Frigefaction.] Tending to make cold; cooling.

"Towards what part the *frigefactive* virtue of cold bodies does operate the furthest and most strongly. — *Boyle: Works,* vol. ii., p. 524.

* **frĭg'-ĕr-ăte,** *v.t.* [Lat. *frigeratus,* pa. par. of *frigero* = to make cold; *frigus* (genit. *frigoris*) = cold.] To cool.

Frĭg'-gą, *s.* [Friga.]

* **frĭg'-gle,** *v.i.* [A variant of wriggle (q.v.).] To wriggle.

"To cut off the *friggling* tail of that hydra."—*Ward: Sermons,* p. 173.

frĭght (*gh* silent), * **freyhte,** * **fryght,** *s.* [Prop. *fyrght,* from A.S. *fyrhto, fyrhtu* = fright; *fyrht* = timid; *áfyrhtan* = to affright; O. Sax. *foroht, foraht, forht* = fright; Dan. *frygt* = fright; *frygte* = to fear; Sw. *fruktan* = fright; *frukta* = to fear; Goth. *faurhtei* = fright; *faurhtjan* = to fear; Ger. *furcht* = fright; *fürchten* = to fear; O. H. Ger. *forhta, forohta, forahta* = fright; Dut. *vrucht* = fright. For the shifting of the *r,* cf. *bird* for *brid, brimstone* for *burnstone,* &c.]

I. A sudden and violent fear or alarm; a state of terror caused by a sudden appearance of danger.

"They start, they tremble in a deadly *fright,*
And round the room precipitate their flight."
Fawkes: Horace, sat. ii., *8.*

2. Anything which causes or is calculated to cause alarm or fright; colloquially applied to a person who presents a ridiculous or shocking appearance in person or dress.

"Wilson was thinking, 'I never saw such a mortal *fright* as the new governess.'"—*Mrs. H. Wood: East Lynne,* pt. iii., ch. ii.

* **frĭght** (*gh* silent), *v.t.* [A.S. *fyrhtan.*] [Frighten.] To frighten, to alarm, to affright, to scare.

"Tarquinius thinking it good to take the time, and follow hard upon them whiles they were *frighted,* marched on still forward."—*P. Holland: Livius,* p. 27.

frĭght'-ĕn (*gh* silent), *v.t.* [A.S. *fyrhtan, áfyrhtan* = to affright; O. S. *forhtian;* O. H. Ger. *forahtan, forhtan:* Goth. *faurhtjan;* O. Fris. *fruchta;* Low Ger. *fruchten;* Ger. *fürchten;* Sw. *frukta;* Dan. *frygte* = to fear.] To throw into a state of fright; to alarm, to scare, to terrify, to dismay.

"The lightning flies, the thunder roars,
And big waves lash the *frightened* shores."
Prior: The Lady's Looking-glass.

¶ Crabb thus discriminates between to *frighten* and to *intimidate:* "Between *frighten* and *intimidate* there is the same difference as between *fright* and *fear;* the danger that is near or before the eyes *frightens;* that which is seen at a distance *intimidates:* hence, women are oftener *frightened,* and men are oftener *intimidated:* noises will *frighten;* threats may *intimidate:* we may run away when we are *frightened;* we waver in our resolution when we are *intimidated:* we fear immediate bodily harm when we are *frightened;* we fear harm to our property as well as our persons when we are *intimidated: frighten,* therefore, is always applied to animals, but *intimidate* never." (*Crabb: Eng. Synon.*)

* **frĭght'-ęn-a-ble** (*gh* silent), *a.* [Eng. *frighten; -able.*] That may or can be easily frightened.

frĭght'-fŭl (*gh* silent), *a.* [Eng. *fright; -ful(l).*]

* I. Full of or feeling fear; afraid, timid, scared.

"See how the *frightful* herds run from the wood."
Browne: Britannia's Pastorals, bk. ii., s. 3.

2. Causing or inspiring fright or alarm; terrible, dreadful, fearful.

"Death was denounced; that *frightful* sound,
Which even the best can hardly bear."
Dryden: Threnodia Augustalis, 196, 197.

¶ A limitation in intensity like that which has taken place in the meaning of the adj. *frightful* has also arisen in the words *dreadful* and *fearful.*

¶ For the difference between *frightful* and *fearful,* see Fearful.

frĭght'-fŭl-lў (*gh* silent), *adv.* [Eng. *frightful; -ly.*]

"This will make a prodigious mass of water, and looks *frightfully* to the imagination; 'tis huge and great."—*Burnet: Theory of the Earth.*

2. In an extremely shocking or disagreeable degree or manner; shockingly.

"His features were *frightfully* harsh."—*Macaulay: Hist. Eng.,* ch. xix.

frĭght'-fŭl-nĕss, fright-ful-nesse (*gh* silent), *s.* [Eng. *frightful; -ness.*]

* 1. The state of feeling fright or fear; terror, alarm.

"Those few horses that remaine are sent forth for discovery, they find nothing but monuments of *fright-fulnesse,* pledges of security."—*Bp. Hall: Contempl.; Samariaes Famine Relieved.*

2. The quality or state of being frightful; the power or quality of impressing terror.

"All this serveth chiefly to cover the *frightfulness* of mortality."—*Nelson: Life of Dr. Bull.*

* **frĭght'-lĕss** (*gh* silent), *a.* [Eng. *fright; -less.*] Free from fright; fearless.

* **frĭght-ĭ-hood** (*gh* silent), * **frĭght-i-hed,** *s.* [Eng. *frighty; -hood.*] Fright, terror, alarm.

"Al he it llatnede in *frightihed.*"
Genesis & Exodus, 2,222.

* **frĭght'-ĭ-lў** (*gh* silent), * **frĭgt-i-like,** *adv.* [Eng. *frighty; -ly.*] In fear, in terror.

"Jacob abraid and sæide *frigtilike.*"
Genesis & Exodus, 1,617.

* **frĭght'-ў** (*gh* silent), * **frĭgti,** *a.* [Eng. *fright; -y.*]

1. Afraid, fearful.

"Tho wurthen he *frigti.*"
Genesis & Exodus, 667.

2. Frightful, terrible.

"Of him kumen fole *frigti.*"
Genesis & Exodus, 983.

* **frĭght'-mĕnt** (*gh* silent), *s.* [Eng. *fright; -ment.*] The state of being frightened or alarmed; fright, terror, alarm.

"All their *frightments* are but idle dreams."
J. Webster. (*Webster.*)

frĭg'-ĭd, *a.* [Lat. *frigidus* = cold, from *frigeo* = to be cold; *frigus* = cold; cogn. with Gr. ῥῖγος (*rhigos*) = cold; Ital. & Sp. *frigido.*]

I. *Lit.:* Cold, cool; wanting heat or warmth.

"There is also a great difference betwixt the degrees in coldness in the air of *frigid* regions and of England."—*Boyle: Works,* ii. 509.

II. *Figuratively:*

1. Cold; wanting in warmth of feeling or zeal; stiff, cool, forbidding; as, a *frigid* manner.

2. Dull, lifeless; without animation or spirit.

"Bleak level realm, where *frigid* styles abound."
Parnell: To Lord Viscount Bolingbroke.

* 3. Without natural heat or vigour; impotent.

¶ For the difference between *frigid* and *cool,* see Cool.

frigid zones, *s. pl.*

Math. & Geog.: The two cold zones or imaginary belts encircling the world. The former contains what mathematicians would call the small circle of the earthly sphere, having the North Pole for its centre and the Arctic circle (23° 28′ distant) for its circumference. Similarly the latter has the South Pole for its centre, and the Antarctic circle (23° 28′) for its circumference. Within these limits there is but one day and one night in the year, each nominally six months in duration, but the day is really considerably longer than the normal amount owing to the influence of refraction in keeping the sun above the horizon. The intense cold of winter covers every land within the limits with glaciers and congeals immense expanses of every sea. The heat of summer, on the contrary, is much above what might be expected, for, though the solar beams are very oblique, yet, continuing for half a year without intervals of night, they produce great effects. It is a geological problem how plants, now found fossil in the polar latitudes, managed to pass undestroyed through the long winter. The Frigid is called also the Frozen Zone.

* **frĭg-ĭ-dăr'-ĭ-ŭm,** *s.* [Lat.]

Anc. Arch.: An apartment not warmed artificially, in which the cold bath was placed. The term is now applied to the cooling room in a Turkish-bath.

frĭ-jĭd'-ĭ-tў, *s.* [Lat. *frigiditas,* from *frigidus* = cold; Fr. *frigidité;* Ital. *frigidità.*]

I. *Lit.:* Coldness; absence or want of heat or warmth.

"Ice is water congealed by the *frigidity* of the air."—*Browne: Vulgar Errours,* bk. ii., ch. i.

II. *Figuratively:*

1. Coldness, coolness; a want or absence of warmth of feeling or zeal.

2. Dullness; want or absence of animation, life, or spirit.

"He [Bishop Hall] falls down to that wretched poorness and *frigidity,* as to talk of Bridge street in heaven, and the hostler of heaven."—*Milton: Apology for Smectymnuus.*

* 3 Want of natural heat or vigour; impotence.

"The *frigidity* of decrepit age is as much its enemy, by reason of its dulling moisture."—*Glanvill: Scepsis Scientifica.*

frĭg'-ĭd-lў, *adv.* [Eng. *frigid; -ly.*] In a frigid, cold, dull or lifeless manner; without warmth, animation, or life.

"If in the Platonical philosophy there are some things directing to it [*sc.* a communion with God,] yet they are but *frigidly* expressed."—*Bates: Harmony of the Divine Attributes,* ch. xvii.

* **frĭg'-ĭd-nĕss,** *s.* [Eng. *frigid; -ness.*] Coldness, coolness, dullness, frigidity.

* **frĭg-ŏr-ĭf'-ĭc,** * **frĭg-ŏr-ĭf'-ĭck,** *a.* [Lat. *frigorificus;* from *frigus* (genit. *frigoris*) = cold, and *facio* = to make; Fr. *frigorifique.*] Causing or generating cold.

"And when the *frigorifick* power was arrived at the height, I several times found that water thinly placed on the outside, whilst the mixture within was nimbly stirred up and down, would freeze in a quarter of a minute by a minute watch."—*Boyle: Works,* vol. iii., p. 147.

* **frĭg-ŏr-ĭf'-ĭc-ąl,** *a.* [Eng. *frigorific; -al.*] The same as Frigorific (q.v.).

frĭll, *s.* [Frill, *v.*]

I. The ruffling of a hawk's feathers when frilling with cold.

2. A pleated or fluted edging; as of linen on the bosom of a shirt, &c., or of paper for table decoration.

"Though the ruffle had vanished,
A *frill* like a fan had by no means been banished."
Barham: Ingoldsby Legends; Aunt Fanny.

frill-lizard, *s.*

Zool.: The Australian reptile genus Chlamydosaurus. It has an erectile membranous plaited frill on its neck.

frĭll, *v.i.* & *t.* [Fr. *friller* = to shiver with cold; from *frilleux* = cold; from Lat. **frigidulosus,* from *frigidulus,* a dimin. from *frigidus* = cold.]

* **A.** *Intrans.:* To shake, to shiver with cold. (Said of hawks.)

B. *Trans.:* To furnish or decorate with a frill.

frĭlled, *a.* [Eng. *frill; -ed.*] Furnished or decorated with a frill or frills.

frĭll'-ĭng, *s.* [Eng. *frill; -ing.*] A species of plaited or fluted edging or trimming of fine linen. The gathered or plaited edge is sewn to a band, and the crimped or ruffled edge forms a collar, a cuff, or an ornament to a shirt-front.

frĭtt'-ĭng, *pr. par.* or *a.* [FRIT, *v.*]

fritting-furnace, *s.*

Glass-mak.: A reverberatory furnace in which the materials for making glass are calcined (fritted) as a process preliminary to melting. The object is to effect a partial union of the silicic acid and alkali, to avoid volatilization of the latter in the subsequent vitrification. The materials (sand, chalk, soda-ash, and cullet) being introduced into the furnace, the temperature is gradually raised for three hours. The pasty mixture is stirred, and the temperature increased to incipient fusion. The stuff is then raked out and transferred to the melting-pot, or is placed in cast iron trays, cut into blocks with a spade, and stored away as frit-bricks.

frĭtzsche-ĭte, *s.* [Named after Fritzche who analyzed it.]

Min.: A vitreous or pearly reddish-brown or hyacinth mineral, its hardness 2 to 2·5, its sp. gr. 3·50. It has in its composition oxide of uranium, protoxide of manganese, vanadic acid, phosphoric acid and water. Found in Bohemia and Saxony. (*Dana.*) The *Brit. Mus. Cat.* makes it a variety of Calcouranite.

frŏg (1), *** frogge, * frugge, * froge,** *s.* [A.S. *froga ;* Dan. & Sw. *fro ;* Ger. *frosch.*]

Zoology :

1. *Sing. :* The English name of the amphibious genus Rana, and particularly of the species *Rana temporaria,* or Common Frog. The genus Rana is distinguished from its congeners by having the tongue and tympanum distinct, the skin smooth, and the toes without claws ; they are, however, pointed, and the hind r feet are united almost to the tips by a membrane. The species are numerous ; they are widely distributed over the globe, many inhabiting tropical regions. The common frog is too well known to require description. It is found at the genial period of the year, burying itself at the approach of winter, in the mud at the bottom of ponds, and reappearing early in spring. In the month of March it lays its eggs, which are enveloped in a gelatinous material, in water, where they float. Each female deposits from six to twelve hundred eggs a year. By April they have greatly increased in size and are becoming hatched. The immature frogs which come forth are called tadpoles. They have tails, no legs, breathe by gills, and are aquatic. Six or eight weeks later the legs are fully developed, the tail is absorbed, and they quit the water, remaining, however, in its vicinity to the last. The common frog is found in most parts of Europe, in the northern parts of Asia, in the North of Africa, and in North America. *Rana esculenta* is the Eatable frog, rare in England, but common on the European continent. *R. pipiens* is the Bull-frog of North America, and *R. clamitans* the Grunting or Argus Frog.

2. *Pl.* Frogs : The family Ranidæ, of which Rana is the type. They have a thick body, destitute of a tail ; feet four, long, muscular, and adapted for leaping ; the larva elongate, fish-like, tailed, and without legs ; the gills four on each side. The family does not include the Tree Frogs, which are ranked as Hylidæ (q.v.).

"Yield me an hostry mongst the croking *frogs.*"
Spenser : F. Q., V. x. 23.

2. *Farr. :* A kind of tender horny substance growing in the middle of a horse's foot, dividing into two branches, which run like a fork towards the heel.

"The heel broad, the *frog* thin and small."—*Southey : The Doctor,* ch. cxliii.

¶ According to Prof. Skeat, the word in sense 2 is a corruption of *fork ;* if so, that sense should be referred to Frog (3) (q.v.).

frog-cheese, *s.*

Bot. : One of the larger puff-balls when young. (*Berkeley.*)

frog-crab, *s.*

Zool. : The crustaceous genus Ranina, one species of which can climb trees.

frog-current, *s.*

Elect. : The name given by Matteuci to animal electricity.

frog-eater, *s.* A term of contempt for a Frenchman.

frog-fly, *s.* The same as Froghopper (q.v.).

frog-orchis, *s.*

Bot. : Habenaria or *Gymnadenia viridis.* It has several leaves, and green flowers with a short spur. It is found in hilly meadows in the northern parts of Britain, also in Northern Europe and Asia, and in North America.

frog-plate, *s.*

1. An accessory to the compound microscope in which the web of a frog's foot is exposed on the stage, to exemplify the circulation of the blood.

2. The same as Froo (3) (q.v.).

frog-shell, *s.*

Zool. : The molluscous genus Ranella (q.v.). It belongs to the family Muricidæ.

frog-spit, frog-spittle, *s.*

Zool. : The spittle-like substance seen enveloping the larva of the Cuckoospit froghopper (*Aphrophora spumaria*).

frog's-foot, *s.*

Bot. : The genus Lemna.

frog's-march, *s.*

1. A crawling on hands and knees.

"He had had a *frog's-march*—that is to say, on hands, belly, and knees."—*Sir S. Lakeman : What I saw in Kaffir-Land,* p. 20.

2. The being carried by two or four men face downwards, a method often employed by policemen with violent drunken men. (*Slang.*)

"Treating a refractory toper to the *frog's-march,* by carrying him face downwards, to the station."—*Daily Telegraph,* Nov. 20, 1882.

frŏg (2), *s.* [Port. *froco* = a flock of wool or of silk ; Lat. *floccus.*]

1. *Ord. Lang. :* Lace wrought round a button-hole.

"With tabby lined, and *frogs* complete"
Anstey : Pleaders' Guide, lect. vii.

2. *Military :*

(1) A button or toggle of spindle-shape, and covered with silk or other material, which is passed through a loop on the opposite side of the breast of a military cloak or overcoat, serving to fasten the two breasts together.

(2) The loop of a bayonet or sword scabbard.

"In a kind of *frog* on either side of this [belt] hung a little saw and hatchet."—*Defoe : Robinson Crusoe* p. 158 (ed. 1858).

frŏg (3), *s.* [A corrupt. of *fork,* from the shape.]

Rail. Engin. : A section of rail at a point where rails diverge, or one track leads to two branches. A cross-frog is one placed at a rect angular intersection of railroad tracks.

frŏg (4), *s.* [Etym. doubtful.] A young horse more than one, but less than two years old.

frŏg (5), *s.* [Etym. doubtful.] A flying shower of sleet or snow. (*Scotch.*)

frŏg (1), *v.t.* [Froo (2), *s.*] To fasten or ornament with a frog.

"City clerks in *frogged* coats." *Lytton.*

frŏg (2), *v.i.* [Froo (5), *s.*] To snow or sleet at intervals. (*Scotch.*)

frŏg'-bĭt, *s.* [A translation of Lat. *Morsus ranæ* as the name of the best-known species (see def.). Why so called is uncertain.]

Bot. : The genus Hydrocharis (q.v.), and specially *H. morsus ranæ,* which is found in ponds and ditches in Britain. It has orbicular, reniform leaves, and flowers in July and August.

¶ *American frog bit :*

Bot. : The genus Limnobium.

***frŏg'-ĕr-ў,** *s.* [Eng. *frog ; -ery.*] A place where frogs abound.

frŏg'-fish, *s.* [Eng. *frog,* and *fish.*]

Ichthyology :

1. The genus Batrachus, which belongs to the family Lophiidæ. They have a horizontally-flattened head, broader than the body, a deeply-cleft mouth, which is often furnished with filaments, the operculum and suboperculum spinous, the anterior dorsal fin short, and supported by three spinous rays. They keep themselves hidden in the sand, like the fishing frog, *Lophius piscatorius,* and surprising their prey, inflict dangerous wounds with their spinous rays. *Batrachus grunniens* (the *Cottus grunniens* of Linnæus), so called from grunting when it is caught, is found in America.

2. The genus Chironectes (q.v.), also belonging to the Lophiidæ.

3. A name for the Fishing Frog (q.v.).

frŏgged, *pa. par.* or *a.* [Frog, *v.*]

frŏgg'-ĭng, *s.* [Frog, *v.*] A kind of braid on a coat.

frŏg'-grass, *s.* [Eng. *frog,* and *grass.*]

Bot. : (1) *Salicornia herbacea ;* (2) *Juncus bufonius.*

***frŏg'-gў,** *a.* [Eng. *frog ; -y.*] Abounding in frogs.

***frŏg'-hood,** *s.* [Eng. *frog ; -hood.*] The state or condition of a frog.

"To have his *froghood* called in question."
Smart : The Duellist.

frŏg'-hŏp-pĕrs, *s. pl.* [Eng. *frog,* and *hopper.*]

Entom. : The sub-section Cicadellina, or the family Cercopidæ, ranked under the Homopterous sub-order of Insects. The name froghopper refers partly to the form of their body, partly to their leaping powers, which are great ; this power arises from the length of their hind legs. The Common Froghopper is *Aphrophora spumaria ;* another species often met with in gardens is *A. bifasciata.* The larva of these insects, which resembles that of the parent in most respects except in the want of wings, envelops itself in a froth resembling human spittle. All must have often observed this on plants.

frŏg'-lĕt-tŭçe, frog's lettuce, *s.* [Eng *frog,* and *lettuce.*]

Bot. : Potamogeton densus.

***frŏg'-lĭng,** *s.* [Eng. *frog ;* dim. suff. *-ling.*] A little frog.

"The wormlings of the earth, nor the *froglings* of the water."—*Jarvis : Don Quixote,* pt. ii., bk. iii., ch. iv.

frŏg'-wŏrt, *s.* [Eng. *frog*, and *wort.*]

Botany:

1. A name sometimes given to the genus Ranunculus (q.v.). (*Paxton.*)

2. Several species of Orchis, specially *O. mascula* and *O. Morio.* (*Holdich; Britten & Holland.*)

*** frŏi̯se, * froyse,** *s.* [FRAISE.]

frŏl'-ĭc, * frŏl'-ĭck, * frol-icke, *a.* & *s.* [Dut. *vrolijk*; Ger. *fröhlich*, from *froh* = joyous, glad; O. Sax. *frâh*; O. H. Ger. *fro*; O. Fris. *fro.*]

*** A.** *As adjective:*

1. Gay, merry, frisky, frolicsome, full of pranks or mirth; dancing about.

¶ Crabb thus discriminates between *frolic*, *gambol*, and *prank*: "The *frolic* is a merry, joyous entertainment; the *gambol* is a dancing, light entertainment; the *prank* is a freakish, wild entertainment. Laughing, singing, noise, and feasting, constitute the *frolic* of the careless mind; it belongs to a company: conceit, levity, and trick, in movement, gesture, and contrivance, constitute the *gambol*; it belongs to the individual; adventure, eccentricity, and humour, constitute the *prank*; it belongs to one or many. One has a *frolic*; one plays a *gambol*, or a *prank*. *Frolic* is the diversion of human beings only; *gambol* and *prank* are likewise applicable to the brutes: a kitten plays its *gambols*; a horse, a monkey, and a squirrel, will play its *pranks*." (*Crabb: Eng. Synon.*)

frolic-gambol, *s.* A frolic, a gambol, a frisk.

"Even bearded knights, in arms grown old,

A. & **B.** *As pr. par. & particip. adj.*: (See the verb).

C. *As subst.*: The act of cooking in a frying-pan; the state of being fried.

fry-ing-pan, *s.* [Eng. *frying*, and *pan*.] A pan, with a long handle, in which food is fried.

¶ *Out of the frying-pan into the fire:* From one evil into another still greater.

"Some, though they shun the *fryingpan*,
Do leap into the fire."
Bunyan: Pilgrim's Progress, pt. ii.

fû', *a.* [Full.]

***fū'-age** (age as ĭj), *s.* [Fumage.]

fū'-ar, *s.* [Feuar.]

***fŭb**, ***fŭbs**, *s.* [Etym. doubtful. Perhaps connected with *fob* (q.v.)] A fat, chubby child.

"That same foule deformed *fubs*."
Rub and a Great Cast (1614), Ep. 44.

***fŭb**, *v.t.* [Fob, *v.*] To delude, to cheat; to put off with false excuses.

"I have borne, and borne, and borne, and have been *fubbed* off and *fubbed* off from this day to that day."—*Shakesp.*: 2 *Henry IV.*, ii. 1.

***fŭb'-bĕr-ў**, *s.* [Eng. *fub*, v.; *-ery*.] Cheating, awindling, deception.

"O no; but dream the most fantastical,
O heaven! O *fubbery*, *fubbery*."
Marston: Malcontent, I. 3.

fŭb'-bў, *a.* [Eng. *fub*, s.; *-y*.] Fat, plump, chubby.

"Say, for instance, of the boys of Fiammengo that they are *fubby*."—*Nicholls: Literary Anecdotes*, ix. 339.

fŭb'-şў, *a.* [Fubby.] Short and stuffy.

"Seated upon the widow's little *fubsy* sofa."—*Marryatt: Snarleyyow*, vol. i., ch. viii.

fū-cā'-çĕ-æ, *s. pl.* [Lat. *fuc(us)*; and fem. adj. pl. suff. *-aceæ*.]

Bot.: An order of Thallogens, alliance Algales. It consists of plants inhabiting salt, or more rarely fresh water. Frond of one or many cells, often divided into a trunk or leaf-like blade. Propagation by spores, contained in superficial cells, consisting of bladdery vesicles. The spores, which are simple, are external, which distinguishes them from those of Confervæ. The order has no geographical limits. Some species are eatable; these and others may also be burnt into kelp. Endlicher enumerated eighty-one genera, and estimated the known species at 452. The order is divided into the suborders Vaucheriæ, Halysereæ, and Fuceæ (q.v.).

***fū'-cāte**, ***fū-cāt-ĕd**, *a.* [Lat. *fucatus*, pa. par. of *fuco* = to stain.] [Fucus.]

1. *Lit.*: Painted, stained.

2. Disguised; having an appearance calculated to deceive.

"In vertue may be nothing *fucate* or counterfayte."
—*Sir T. Elyot: Governour*, bk. iii., ch. iii.

fū'-çĕ-æ, *s. pl.* [Lat. *fuc(us)*, and fem. pl. adj. suff. *-eæ*.]

Bot.: A sub-order of Fucaceæ (q.v.). The frond is polysiphonous, often with bladdery vesicles, seated in hollow conceptacles formed of a folding in of the frond, pierced by a pore, and surrounded by flocks; conceptacles scattered, or collected upon a receptacle. The suborder contains the tribes or families Lemamidæ, Fucidæ, and Cystoseiridæ.

fûch'-sĕ-æ, *s. pl.* [Mod. Lat. *fuchsia*, and Lat. fem. pl. adj. suff. *-eæ*.]

Bot.: A tribe of Onagraceæ, type Fuchsia (q.v.).

fûch'-sī-a (more generally as **fū'-shĭ-a**), *s.* [So named from the discoverer, Leonard Fuchs, a German botanist.]

Bot. & Hortic.: A genus of Onagraceæ, tribe Fuchseæ, of which it is the type. Calyx funnel-shaped, four-parted, with the four petals set in its mouth alternately; stamens exserted; style one long, stigma capitate. More than fifty species are known; most from the warmer parts of America, Mexico, Peru, Chili, &c., except two from New Zealand. These beautiful plants are now common in gardens, conservatories, and flower-pots in windows. *Fuchsia fulgens* was introduced in 1837. Since then about thirty-six other species have come under cultivation. The hybrids generated by intercrossing them now amount to some hundreds. Though they will grow in any light rich soil, yet they prefer a mixture of loam and peat. Young cuttings will root freely in sand or soil. If placed under a glass it must occasionally be removed for a time to give air and prevent undue damp.

¶ *Australian Fuchsia, Native Fuchsia:*

Bot.: The genus Correa.

fûch'-sīne, *s.* [Named after a mineralogist, Fuchs.]

Min.: A variety of Muscovite. It is sometimes called Chrome-mica, from containing nearly 4 per cent. of oxide of chrome. (*Dana.*)

fûch'-sīne, *s.* [Eng. *fuch(sia)*; suff. *-ine*.]

Chem. & Comm.: [Rosaniline].

fū'-çĭ-dæ, *s. pl.* [Lat. *fuc(us)*, and fem. pl adj. suff. *-idæ*.]

Bot.: A tribe or family of the suborder Fuceæ (q.v.). The conceptacles are not collected upon a receptacle. (*Lindley.*)

fū-çĭv'-ôr-ŏŭs, *a.* [Lat. *fucus* (genit. *fuci*) = seaweed; *voro* = to eat, to feed on, and Eng. adj. suff. *-ous*.] Living on seaweed, a term applied to the Sirenia. The Dugong (q.v.) feeds on seaweed growing on large flats exposed at low water.

fū'-cōid, *a.* & * [Lat. *fuc(us)* = seaweed, and Gr. εἶδος (*eidos*) = form, appearance.]

I. *As adjective:*

1. Resembling a fucus or one of the Fucaceæ.

2. Containing plants or plant-impressions like those made by the larger seaweeds. (See the compounds.)

II. *As substantive:*

Palæont., Geol., &c.: An obscure fossil plant, like a fucus, or the impression of one.

"There the lowest beds have only been found to contain *fucoids* and a rare graptolite."—*Murchison: Siluria*, ch. ii.

fucoid-bed, *s.*

Geol.: The name given by Sir Roderick Murchison to a bed in the cliffs at Ludlow. It consists of a greenish-grey argillaceous sandstone, made up of a multitude of small wavy, rounded, stem-like forms, which resemble entangled seaweeds. They are of Upper Ludlow age. (*Murchison: Siluria*, ch. vi.)

fucoid sandstones, *s. pl.*

Geol.: The rendering of the name given in Sweden to sandstones with impressions like those of seaweeds. They lie at the base of the Cambrian strata. (*Lyell: Student's Elements of Geol.*)

fu-cōid'-al, *a.* [Eng., &c. *fucoid*; *-al*.]

Bot.: The same as Fucoid, *a.* (q.v.).

"Bear also their *fucoidal* impressions blent with graptolites."—*H. Miller: Footprints of the Creator*, ch. xi.

fū'-cŭs, *s.* [Lat. = a seaweed, a rock lichen; Gr. φῦκος (*phukos*) = seaweed, seawrack, tangle.]

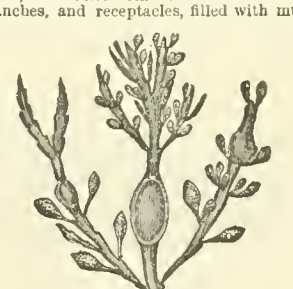
*I. *Ord. Lang.*: A paint, a dye; any false or deceptive show. (*Lit. & fig.*)

"How do I look to-day?
Excellent, clear, believe it. This same *fucus*
Was well laid on." *Ben Jonson: Sejanus*, ii. 1.

II. *Botany:*

*1. *Formerly:* A very comprehensive genus of Algæ established by Linnæus. He included under it most of the more solid seaweeds, and enumerated fifty-four species.

2. *Now:* A more restricted genus, type of the order Fucaceæ (q.v.). It includes those social algæ which have a flat and compressed frond, sometimes with air vessels on or in the branches, and receptacles, filled with mucus



FUCUS NODOSA.

traversed by a network of jointed filaments. It contains various common algæ, such as *Fucus nodosus*, *F. serratus*, *F. vesiculosus*, &c. These are used for the manufacture of kelp. In the Scottish islands, horses, cattle, and sheep are fed in the winter months on *F. vesiculosus*, as are pigs in Gothland. *F. serratus* is used for the same purpose in Norway. *F. vesiculosus* is sometimes ten feet long, *F. giganteus*, according to Capt. Cook, 360 feet. It is found near Terra del Fuego.

***fū'-cŭs**, *v.t.* [Fucus, *s.*] To paint.

fū'-cŭs-ăm-īde, *s.* [Eng., &c. *fucus*, and *amide*.]

Chem.: $C_{15}H_{12}N_2O_3$. Obtained by the action of ammonia on fucusol. It crystallizes from hot alcohol in groups of long needles.

fū'-cŭs-īne, *s.* [Eng., &c. *fucus*; *-ine* (*Chem.*).]

Chem.: $C_{15}H_{12}F_2O_3$. An organic base prepared by boiling fucusamide with aqueous potash for twenty minutes. It forms a

yellowish resin which melts into a brown oil; this is digested with nitric acid, the resin separates out, and the nitrate of fucusine crystallizes out: this is decomposed by a slight excess of ammonia, then the fucusine crystallizes out in small laminæ united in stellate groups.

fū'-ĕŭs-ŏl, *s.* [Eng., &c. *fucus;* Lat. *ol(eum)* = oil.]

Chem.: Fucusaldehydes, $C_5H_4O_2$, or $C_4H_3O{\cdot}CO{\cdot}H$. Obtained by distilling seaweed, *Fucus nodosus*, &c., with dilute sulphuric acid, and washing the distillate with water. Fucusol is a colourless oily fluid which boils at 172°, and rapidly turns dark coloured on keeping. Fucusol is converted by ammonia into fucusamide.

fŭd, *s.* [Welsh *ffwtog* = a short tail, a scut.]

1. *Ord. Lang.:* The scut, or tail of a hare, rabbit, &c.

2. *Cloth.:* Woollen waste; the refuse of the new wool taken out in the scribbling process, which is mixed with the mungo for use. [MUNGO, SHODDY.]

fŭd'-dĕr, *s.* [FOTHER.]

fŭd'-dle, *v.t. & i.* [Prob. a form of *fuzzle* or *muddle* (q.v.).]

A. *Transitive:*

1. To make stupid with drink; to muddle.

"The table floating round,
And pavement faithless to the *fuddled* foot."
Thomson: Autumn, 537.

2. To spend in drink; to lay out on drink.

B. *Intrans.:* To drink till one gets stupid; to drink to excess.

"Rhyme all the day and *fuddle* all the night."
Pitt: Horace, bk. ii., ep. 19.

*** fŭd-dle,** *s.* [FUDDLE, *v.*] Drink.

"They have had their dose of *fuddle*."—*Bailey: Erasmus*, p. 125.

*** fuddle-cap,** *s.* A drunkard or boon companion.

"True protestant *fuddle-caps*."—*T. Browne: Works*, iii. 93.

fŭd'-dlĕr, *s.* [Eng. *fuddl(e); -er.*] One who drinks to excess; a drunkard; a sot.

fŭdge, *interj. & s.* [Prov. Fr. *fuche, feuche*, an interjection of contempt, from Low Ger. *futsch* = begone.]

A. *As interj.:* An exclamation of contempt: nonsense! stuff! humbug!

"At the conclusion of every sentence (Mr. Burchell) would cry out, *Fudge!*"—*Goldsmith: Vicar of Wakefield*, ch. xi.

B. *As substantive:*

1. Nonsense, humbug, stuff: as, That is all *fudge*.

"Her ladyship's proposition was what was called bosh . . . or *fudge* in plain Saxon."—*Thackeray: Rebecca & Rowena*, ch. i.

2. A wilful exaggeration; a falsehood.

"Very well; very genteel young man—prepossessing appearance—(that's a *fudge!*)—highly educated; usher in a school—eh?—*Lytton: Godolphin*, bk. ii., ch. vii.

fŭdge, *s.* [A word occuring only in the compound.]

fudge-wheel, *s.*

Shoe-making: A tool to ornament the edge of a sole.

*** fŭdge,** *v.t.* [FUDGE, *interj.*]

1. To make up, to fabricate as a false story.

2. To interpolate; to foist in.

"That last 'suppose' is *fudged* in."—*Foote: The Bankrupt*, iii. 2.

*** fueille-morte,** *s.* [FEUILLEMORT.]

fū'-ĕl, *** few-el,** *** few-ell,** *** fu-elle,** *** fwaill,** *s.* [O. F. **fouaille*, from Low Lat. *foallia* = fuel, from *focale* = fuel, the right of cutting fuel; Lat. *focus* = a hearth, a fireplace; Norm. Fr. *foualle, fouoyle, fuayl.*]

1. *Lit.:* The materials with which a fire is fed; the combustible matter, such as wood, coal, peat, &c., supplied to fires.

"Hard-faring race,
They pick their *fuel* out of every hedge."
Cowper: Task, i. 565.

2. *Fig.:* Anything which serves to feed or increase flame, heat, passion or excitement.

"He yields, not he to man nor Fate!
Thou add'st but *fuel* to my hate."
Scott: Lady of the Lake, v. 14.

¶ *Artificial fuel:* Agglomerated peat, sawdust, coal-dust, and slack, one or more of them in various combinations, bound together by heavy pressure, with cements, clay, coal-tar, or the residuum of starch-manufacture.

fuel-dryer, *s.* A kiln for drying blocks of artificial fuel. The trays supporting the blocks of fuel run upon rollers upon the angle-iron bars secured in the walls. The trays have perforations to allow the escape of the vapours resulting from the drying of the blocks.

fuel-feeder, *s.* A device for feeding fuel in graduated quantities to a furnace, either for metallurgical purposes or for steam-boilers. [MECHANICAL STOKER.]

fuel-press, *s.* A machine for compressing coal-dust and a cementing material into a block.

*** fū'-ĕl,** *v.t.* [FUEL, *s.*]

I. *Literally:*

1. To feed with fuel or combustible matter.

"But first the *fuelled* chimney blazes wide!"
Thomson: Autumn, 502.

2. To store or supply with fuel or firing.

"Some are plainly œconomical, as that the seat be well watered and well *fuelled*."—*Wotton: Architecture.*

II. *Fig.:* To feed; to nourish.

"For more corruption needful is,
To *fuel* such a fever long." *Donne.*

*** fū'-ĕl-lĕr,** *s.* [Eng. *fuel; -er.*] One who or that which supplies fuel.

"To retain fire unconsumed, Sir H. Plats hath obliged the *fueller*."—*Boyle: Works*, iv. 420.

fū'-ĕl-lĭng, *pr. par., a., & s.* [FUEL, *v.*]

A. & **B.** *As pr. par. & particip. adj.:* (See the verb).

C. *As subst.:* The act of feeding with fuel; fuel, firing.

fū-ĕr'-ō, *s.* [Sp.]

Spanish Law:

1. A code, a charter, a grant of privileges.
2. A custom having the force of law.

5. To answer as a purpose or design.

"All we find possessing earth, sea, air, . . . *Fulfil* the purpose, and appear designed."
Cowper: Tirocinium, 98.

¶ (1) Crabb thus discriminates between to *fulfil*, to *accomplish*, and to *realize*: "To *fulfil* is literally to fill quite full, that is, to bring about *full* to the wishes of a person; to *accomplish* is to bring to perfection, but without reference to the wishes of any one; to *realize* is to make *real*, namely, whatever has been aimed at. The application of these terms is evident from their explications: the wishes, the expectations, the intentions, and promises, of an individual, are appropriately said to be *fulfilled*; national projects, or undertakings, prophecies, and whatever is of general interest, are said to be *accomplished*; the fortune, or prospects of an individual, or whatever results successfully from specific efforts, is said to be *realized*." (*Crabb: Eng. Synon.*)

Denham: Destruction of Troy, 293.

***full-fleshed,** *a.* Fat, corpulent.

***full-flowing,** *a.* Freely venting its passion.

"I am not well, else I should answer
From a *full-flowing* stomach."
Shakesp.: Lear, v. 3.

***full-formed,** *a.* Having full or plump forms.

"His brother Niger too, and all the floods
In which the *full-formed* maids of Afric lave."
Thomson: Summer, 823.

***full-fortuned,** *a.* At the height of prosperity.

***full-fraught,** *a.* Fully laden or stored with accomplishments.

"And thus thy fall hath left a kind of blot,
To mark the *full-fraught* man, and best endued,
With some suspicion." *Shakesp.: Henry V.,* ii. 2.

full-grown, *a.* Having attained full size or age.

"So beauty lures the *full-grown* child,
With hue as bright, and wing as wild."
Byron: Giaour.

***full-hearted,** *a.* Full of courage and confidence.

"The enemy, *full-hearted,*
Lolling the tongue with slaughtering."
Shakesp.: Cymbeline, v. 3.

***full-hot,** *a.* Heated to the utmost; very fiery.

"Anger is like
A *full-hot* horse who being allowed his way
Self-mettle tires him."
Shakesp.: Henry VIII., i. 1.

***full-laden,** *a.* Fully loaded; weighted to the full.

"It were unfit that so excellent a reward as the Gospel promises should stoop down, like fruit upon a *full-laden* bough, to be plucked by every idle and wanton hand."—*Tillotson.*

full-length, *a. & s.*

A. *As adj.:* Embracing or extending the whole length: as, a *full-length* portrait.

B. *As subst.:* A full-length portrait.

***full-manned,** *a.* Fully manned or furnished with men, as a ship with sailors.

***full-mouth,** *s.* A chatterer.

"Some propheticall *full-mouth.*"—*Greene: Menaphon,* p. 54.

***full-mouth,** *adv.* In full cry.

"She was coming *full-mouth* upon me."—*Farquhar: The Inconstant,* ii.

***full-mouthed,** *a.*

1. Pertaining to or issuing from a full mouth.

"Had Boreas blown
His *full-mouthed* blast, and cast thy houses down."

full-pitch, *s.*

Cricket: A ball delivered by the bowler so far up the wicket that it falls inside the popping-crease.

***full-replete,** *a.* Completely full or filled.

"*Full-replete* with choice of all delights"
Shakesp.: 1 Henry VI., v. 5.

***full-sailed,** *a.* Absolute, unlimited: as, *full-sailed* confidence. (*Massinger.*)

full-score, *s.*

Music: A score in which all the parts for voices and instruments are displayed. [SCORE.]

full-service, *s.*

Music:

1. A setting of the Canticles for voices in chorus, with or without organ accompaniment.

2. An office in which music is used to the fullest extent allowed by the rubrics.

***full-souled,** *a.* Magnanimous, noble-hearted; of a noble disposition.

***full-speak,** *v.t.* To declare plainly and fully; to show openly.

"His eye *full-speaks*
His ardent soul, and from his couch at once he breaks."
Thomson: Castle of Indolence, ii. 31.

full-split, *adv.* With the greatest violence or impetuosity. (*American.*)

full-spread, *a.*

1. Spread to the utmost extent.

"How easy 'tis, when destiny proves kind,
With *full-spread* sails to run before the wind."
Dryden: Astræa Redux, 64.

*2. Fat, corpulent.

"Waked by the crowd, slow from his bench arose
A comely *full-spread* porter, swoln with sleep."
Thomson: Castle of Indolence, i. 24.

full-stop, *s.*

I. *Ordinary Language:*

1. *Lit. & Gram.:* A period; a symbol used to denote the longest pause in reading.

2. *Fig.:* A finish, an end, a complete stop.

II. *Music:*

1. In lute playing, a full chord followed by a pause.

2. A chord in which all available fingers are occupied in stopping the strings.

***full-summed,** *a.* Complete in all its parts.

"The king of birds nestal within its leaves, thick feathered, and with *full-summed* wings fastening his talons east and west."—*Howell: Vocal Forest.*

***full-winged,** *a.*

1. Having perfect or powerful wings.

2. Ready for flight; eager.

***fŭll** (1), *v.t. & i.* [FULL, *a.*] [FILL, *v.*]

A. *Transitive:*

1. To fill.

"Fiftene eclpen gode *fulled* mid vtlaghen."
Layamon, ii. 79.

2. To fulfil.

"That the saidis persons sall mak na payment of the said soume quhill the poyntis of the said decreet be *fulfit* efter the forme of the samyn, and of the indenturis maid tharapone."—*Act. Dom. Conc.* (1492), p. 247.

B. *Intrans.:* To become full; to come or arrive at the full: as, The moon *fulls.*

"Whaune hir guttes *fullen.*" *P. Plowman,* 5,715.

fŭll (2), *v.t. & i.* [A.S. *fullian* = to whiten, to purify, to baptize, from Lat. *fullo* = to cleanse clothes, to full cloth; O. Fr. *foullir* = to full cloth; *fouler* = to trample on, to press; Ital. *follare.*]

A. *Transitive:*

*1. To cleanse cloth from its oil or grease.

2. To thicken in a mill, as cloth; to make thick and compact by pressure.

"Clooth that cometh fro the wevyng is noght comly to w re,
Til it be *fulled* under foot or in fullyng stobbes."
P. Plowman, 10,527.

†**B.** *Intrans.:* To become fulled or felted.

fŭll'-age (age as ĭj), *s.* [Eng. *full* (2), v.; *-age.*] Money paid for the fulling or cleansing of cloth.

***fŭl'-lam, *fŭl'-ham,** *s.* [From *Fulham,* a suburb of London, which was a notorious resort of blacklegs in the reign of Queen Elizabeth.]

1. False dice: of these there were two sorts, the one, called high, intended to throw the high numbers from five to twelve; the other, called low, to throw from one to four.

"For gourd and *fullam* holds
And high and low beguile the rich and poor."
Shakesp.: Merry Wives of Windsor, i. 3.

2. Any sham, fraud, or makebelieve.

fŭl'-ĕr (1), *s.* [Eng. *full*; *-er.*]

Forging:

1. A tool, sometimes known as a creaser, struck by the hammer or placed in the hardy hole of the anvil, and employed to swage down or spread the iron by a series of parallel indentations. The tools are known respectively as the top and bottom fuller.

2. A tool having grooves, and forming a die or swage into which iron is driven by the hammer to confer a shape. Used in forming the fullering of horseshoes.

fuller-hammer, *s.*

Forg.: The hammer used in striking the fuller.

fŭl'-ĕr (2), ***ful-lare, *ful-lere,** *s.* [Eng. *full* (2), v.; *-er*; O. Fr. *fouleur*; Dut. *voller.*] One whose occupation is to full cloth.

"The clothiers have put off
The spinsters, carders, *fullers,* weavers."
Shakesp.: Henry VIII., i. 1.

fuller's-earth, *s.*

1. *Min.:* (1) Smectite (q.v.); it is an argillaceous earth, used by fullers to absorb the oil or grease with which woollen cloth has been treated during previous manufacture. (2) Kaolinite (q.v.).

2. *Geol.:* A stratum belonging to the Lower Oolite of Bath, lying in that locality just below the Great Oolite, while in the North of England it is wholly absent. Its characteristic fossil is an oyster (*Ostrea acuminata*). In all about sixty mollusca are found in the Fuller's Earth, fifty being Lamellibranchiate Bivalves, ten Brachiopoda, three Gasteropods, and seven or eight Cephalopoda. (*Lyell.*)

fuller's-herb, *s.*

Bot.: The genus Saponaria (q.v.). It is called also Soapwort.

fuller's-teazel, *s.*

Bot.: Dipsacus Fullonum, probably only a variety of *D. sylvestris.* The flower heads are used for raising the nap on cloth which is being fulled. [FULLING, TEASEL.]

fuller's-thistle, fuller's-weed, *s.*

Bot.: Dipsacus Fullonum.

fŭl'-ĕr, *v.t.* [FULLER (1), *s.*] To form a groove or channel in as by a fuller hammer

fŭl'-ĕr-y, *s.* [Eng. *full* (2), v.; *-ery.*] A place where the process of fulling is carried on.

***fŭl'-ĭ-lў, *ful-la-lie, *ful-le-ly,** *a.* [Eng. *fully*; *-ly.*] Fully.

"Bot quhow ony historicall narratioun culd haue correspondit to aue inuisibill kirk, I can nocht *fulalie* perceaue."—*Tyrie: Refutation,* fo. 39, a.

fŭl'-ĭng, *pr. par., a., & s.* [FULL (2), *v.*]

A. & **B.** *As pr. par. & particip. adj.:* (See the verb).

C. *As subst.:* A process by which cloth made of a felting fibre is condensed, strengthened, and thickened, with a loss of width and length. [FELT.] In felting, the fibres—wool, for instance—slip past each other, and their toothed edges interlock, so that a continuation of the process causes them to be more and more intimately associated. The cloth is folded or rolled, and treated with soapy water. It is then beaten with wooden mallets, by which the serrated edges are forced past each other and the fibres closely commingled. Precautions are taken in some cases to prevent adherence of the folds of cloth by felting together. For this purpose cotton cloth is sometimes put between the folds of woollen cloth. Fulling and felting are dependent upon the same principle. Felted cloth is made by associating the fibres, and is not woven. Woven cloth exposed to the fulling or felting action is said to be milled. Repetition of the process constitutes it double-milled or treble-milled, as the case may be. Each milling thickens and solidifies the cloth while diminishing its quantity.

fulling-mill, *s.* A mill for fulling cloth. The modern fulling-mill consists of an iron framework supporting the shanks of heavy wooden mallets, which are raised by projecting cams on a tappet wheel. The mallets being raised to their full height are released, and drop by gravity on the cloth, which is contained in an iron trough beneath. Soap is added as a detergent, grease in any form tending to mar the felting action of the fibres. The end of the trough is curved, so that the cloth is turned round and round by the action of the mallets.

"By the large hammers, like those used for paper and *fulling-mills,* they beat their hemp."—*Mortimer: Husbandry.*

fŭll'-mart, ful-mar (2), *s.* [Foumart.]

fŭl-lŏn-īte, *s.* [Named after Mr. Fullon, a brother-in-law of its discoverer, Mr. Armstrong.]

Min.: The same as Onegite (q.v.).

fŭl lў, * **ful-liche,** * **ful like,** *adv.* [A.S. *fullice*; O. Sax. *fullitho*; O. H. Ger. *follicho*; M. H. Ger. *volliche*; Ger. *völlig.*]

1. In a full manner; so as to leave no vacuity.

2. Completely; without deficiency or diminution; entirely; without lack or defect; perfectly.

"Behold Achilles' promise *fully* paid."
Pope: Homer; Iliad xxiii. 222.

fŭl'-mar (1), *s.* [Etym. doubtful; cf. *fulmar* (2).] [Foumart.]

Ornith.: Fulmarus glacialis, a sea-bird which breeds in the Island of St. Kilda and elsewhere. It is abundant in the Arctic seas, attending whaleships for the sake of the blubber to be obtained when whales are being cut up.

fŭl'-mar (2), *s.* [Foumart.]

fŭl'-mar-ŭs, *s.* [Latinized from Eng., &c. *fulmar* (1) (q.v.).]

Ornith.: Fulmar, a genus of natatorial (swimming) birds, family Procellaridæ, subfamily Procellarinæ. [Fulmar (1).]

* **fŭl'-mĕn,** *s.* [Lat.] A thunderbolt, lightning.

* **fŭl-mĭn-ant,** *a.* [Lat. *fulminans*, pr. par. of *fulmino* = to lighten.] [Fulminate *v.*] Thundering; making a noise like thunder; fulminating.

"The dread clergy, *fulminant* in ire."
Colman: Vagaries Vindicated, p. 194.

fŭl'-mĭn-āte, *v.i. & t.* [Lat. *fulminatus*, pa. par. of *fulmino* = to thunder, to lighten; *fulmen* (genit. *fulminis*) = thunder, lightning, a contr. for *fulgimen*, from *fulgeo* = to shine; Fr. *fulminer*; Sp. & Port. *fulminar*; Ital. *fulminare.*]

A. *Intransitive:*

I. *Literally:*

* **1.** To thunder; to make a noise like thunder.

"I cannot *fulminate* nor tonitruate words
To puzzle intellects." *T. Randolph.*

2. To make a loud, sudden noise or crack; to explode with a loud noise or report; to detonate.

"Water and wind-guns afford no *fulminating* report."—*Browne: Vulgar Errours*, bk. iii., ch. v.

* **II.** *Fig.:* To thunder out censure, threats, or denunciations; especially applied to ecclesiastical censures sent out by the Pope.

"If the Pope had not run into the proposition he would have *fulminated* upon this occasion."—*Burnet: Hist. Reformation* (an. 1531).

B. *Transitive:*

* **I.** *Lit.:* To cause to explode.

II. *Figuratively:*

1. To utter or send out with threats, denunciations, or censure; to thunder out.

"An excommunication is not greatly regarded here in England, as now *fulminated*; so this constitution is out of use among us in a great measure."—*Ayliffe: Parergon.*

* 2. To denounce violently.

"Those branches of baleful prerogative, which they had so often *fulminated*."—*Warburton: Works*, vol. x., ser 19.

fŭl'-mĭn-āte, *s.* [Fulminate, *v.*]

Chem.: A salt of Fulminic acid (q.v.).

Fulminate of mercury: Mercuric fulminate, fulminating mercury. It is prepared by dissolving one part of mercury in 12 parts of nitric acid; the solution is mixed with an equal volume of alcohol when cold. The mixture is then gently heated on a water-bath. Red vapours are given off of nitrogen oxides and CO_2, and a large quantity of nitrous ether, aldehyde, and other products. When the liquid becomes turbid it is allowed to cool, and the salt separates out; it is purified by recrystallization from boiling water. It forms white needles, which, when heated to 186°, explode, also by friction or percussion when dry. It is used for charging percussion caps; one kilogram of mercury will make fulminate sufficient for 40,000 caps. Fulminoates have been regarded as methyl cyanide in which one atom of hydrogen has been replaced by NO_2, and two atoms of hydrogen by mercury or silver. The action of chlorine on mercuric fulminate under water forms chloropicrin, $CCl_3(NO_2)$, mercuric chloride $HgCl_2$, and cyanogen chloride CuCl; the formula of methyl cyanide is $N{\equiv}C{-}CH_3$, of silver fulminate $N{\equiv}C{-}C(NO_2)Ag_2$, and of mercuric fulminate is $N{\equiv}C{-}C.(NO_2)Hg$, if this view of the constitution of these bodies is correct. Hot nitric acid decomposes mercuric fulminate, yielding carbonic acid, acetic acid, and mercuric nitrate. Hydrochloric acid converts it into mercuric chloride and mercurous oxalate. When boiled with an aqueous solution of potassium chloride, it is converted into potassium fulminurate.

Fulminate of silver is obtained by heating nitrate of silver with strong nitric acid and alcohol till the liquid boils up. It is very dangerous to prepare. It crystallizes in small, white, opaque needles; it is very poisonous, and explodes by friction or percussion, or when heated. It is soluble in aqueous ammonia, and deposits the fulminate unaltered. When silver fulminate is digested with water and metallic copper or zinc, the silver is replaced and copper fulminate or zinc fulminate is obtained. When fulminate of copper is mixed with ammonia, and a stream of H_2S gas is passed through the solution, the copper is completely precipitated, and the filtered solution contains hydrosulphocyanic acid, HCNS, and urea, $CO{<}^{NH_2}_{NH_2}$.

Fulminate of gold was discovered by a monk in the fifteenth century. This substance, which explodes more rapidly and with greater local force than gunpowder, is made by precipitating a solution of chloride of gold by an excess of ammonia.

fŭl'-mĭn-āt-ĭng, *pr. par., a., & s.* [Fulminate, *v.*]

A. *As pr. par.:* (See the verb).

B. *As adjective:*

1. *Lit.:* Thundering; explosive.

2. *Fig.:* Thundering out censures, threats, or denunciations.

C. *As substantive:*

1. *Lit.:* The act of exploding; explosion.

2. *Fig.:* The thundering or hurling out censures, threats, or denunciations.

fulminating-pane, *s.*

Elect.: A simple form of condenser, consisting of a glass plate fixed in a wooden frame with a piece of tinfoil on each side of the glass, with which, however, they are not quite in contact. This portion of the glass is generally covered with an insulating layer of shellac varnish. One of the sheets of tinfoil is connected with a ring on the frame by a strip of tinfoil, whilst a chain from it unites it with the ground. To charge it, its insulated side is connected with an electrical machine. If then the knob of the discharger is pressed against the lower surface of the frame whilst the other knob is brought near the upper coating, an electric spark will be emitted.

* **fŭl-mĭn-ā'-tion,** *s.* [Lat. *fulminatio*, from *fulminatus*, pa. par. of *fulmino*; Fr. *fulmination*; Sp. *fulminacion*; Ital. *fulminazione.*]

I. *Lit.:* The act of thundering, fulminating, or detonating; explosion.

II. *Figuratively:*

1. The act of thundering or hurling out censures, threats, or denunciations.

2. A violent censure, threat, or denunciation.

"By force of arms and with Papall curses and *fulminations*."—*Camden: Elizabeth* (an. 1590).

* **fŭl'-mĭn-ą-tŏr-ў,** *a.* [Fr. *fulminatoire*; from Lat. *fulminatus*, pa. par. of *fulmino.*] Sending forth thunders or fulminations; thundering.

* **fŭl'-mine,** *v.t. & i.* [Fr. *fulminer*; from Lat. *fulmino.*]

A. *Transitive:*

1. To shoot or dart as lightning.

"As it had been a flake
Of lightning through bright heaven *fulmined*."
Spenser: F. Q., III., ii. 5.

2. To fulminate; to utter threateningly or violently. (Followed by *out.*)

"Warming with her theme
She *fulmined out* her scorn of laws Salique."
Tennyson: Princess, ii. 117.

B. *Intrans.:* To thunder, to fulminate; to speak with resistless power or energy.

"Shook the arsenal and *fulmined* over Greece."
Milton: P. R., iv. 267.

fŭl-mĭn'-ĕ-ŏŭs, *a.* [Lat. *fulmineus*; from *fulmen* (genit. *fulminis*) = thunder, lightning.] Of or pertaining to thunder; of the nature of thunder.

fŭl-mĭn'-ĭc, *a.* [Fr. *fulminique.*]

Chem.: Of or pertaining to, or capable of detonation.

fulminic-acid, *s.*

Chem.: $C(NO_2)H_2{\cdot}CN$. Fulminic acid has not been obtained in a free state. Its salts, of which the chief are those of silver and mercury, are called fulminates.

fŭl-mĭn-ūr'-ątes, *s.pl.* [Eng. *fulminur(ic)*, *-ate* (*Chem.*).]

Chem.: Salts of fulminuric acid. They are obtained by boiling fulminate of mercury with alkaline chlorides. The other fulminates are obtained by double decomposition. When a solution of fulminuric acid is boiled with a solution of a cupric salt in excess of ammonium, the liquid, on cooling, deposits purple crystals of cupranimonium fulminurate, which are nearly insoluble in water.

fŭl mĭn-ūr'-ĭc, *a.* [Eng. *fulmin(ic)*; *-uric* (*Chem.*).]

fulminuric-acid, *s.*

Chem.: $C_3H_3N_3O_3$ Isocyanuric acid. It is obtained by decomposing the lead salt with H_2S gas or the silver salt with hydrochloric acid. It forms a crystalline mass soluble in hot water and in alcohol. When boiled with strong mineral acids it is decomposed, ammonia being formed and CO_2 liberated. Fulminuric acid, heated to 145°, explodes. It is monobasic, and forms salts called fulminurates. By the action of a mixture of strong nitric and sulphuric acids, fulminuric acid is converted into trinitro-acetonitril $C(NO_2)_3{\cdot}CN$.

fŭl-nĕss, * **ful-nesse,** *s.* [Eng. *full*; *-ness.*]

1. The quality or state of being full or filled.

2. The quality or state of abounding in any quality, whether good or bad.

3. Repletion, satiety.

"He felt the *fulness* of satiety."
Byron: Childe Harold, i. 4.

4. Completeness; such a state as leaves nothing to be desired.

"In thy presence is *fulness* of joy."—*Psalm* xvi. 11.

5. Completion; full extent, space, or duration.

"When the *fulness* of time was come, God sent forth his son."—*Galatians* iv. 4.

* **6.** Plenty, affluence, wealth.

"To lapse in *fulness*
Is sorer than to lie for need."
Shakesp.: Cymbeline, III. 6.

7. Copiousness, amplitude, extent.

"There wanted the *fulness* of a plot, and variety of characters to form it as it ought."—*Dryden.*

8. Strength, volume, body, or force.

"Thence the wort is strained, purified, and filtered, and passed into a copper with 20 per cent. of malt-flour, to impart *fulness* and flavour."—*Standard*, Oct. 18, 1881.

9. A struggling perturbation or swelling.

"A principal fruit of friendship is the ease and discharge of the *fulness* of the heart."—*Bacon: Essays: Of Friendship.*

¶ Crabb thus discriminates between *fulness* and *plenitude*: "Although *plenitude* is no more than a derivative from the Latin for *fulness*, yet the latter is used either in the proper sense to express the state of objects that are *full*, or in the improper sense to express great quantity, which is the accompaniment of *fulness*; the former only in the higher style and in the improper sense: hence we say in the *fulness* of one's heart, in the *fulness* of one's joy, or the *fulness* of the Godhead bodily; but the *plenitude* of glory, the *plenitude* of power." (*Crabb: Eng. Synon.*)

fŭl'-sŏme (1), * **ful-som,** * **ful-sum,** *a.* [Eng. *full*; suff. *-some.*]

* **1.** Rich, fertile, productive.

"The seven *fulsum* yeres faren."
Genesis & Exodus, 2,153.

* **2.** Filled out; not lank and lean, or shrivelled.

"His lean, pale, hoar, and withered corpse
Grew *fulsome*, fair, and fresh."
Golding: Ovid; Metamorphoses vii.

* **3.** Causing a surfeit; cloying.

"Honey [that of sound doctrine] which never *fulsome* is, yet fills
The widest souls."
Beaumont, in *Trench's Select Glossary*, p. 55.

* **4.** Lustful, wanton.

"He stuck them up before the *fulsome* ewes."
Shakesp.: Merchant of Venice, i. 3.

5. Offensive from excess of praise.

"She accordingly magnified in *fulsome* phrase that prerogative which was constantly employed to defend and to aggrandise her."—*Macaulay: Hist. Eng.*, ch. ii.

6. Disgusting, nauseous, offensive.

"Now this is *fulsome*, and offends me."
Cowper: Tusk, ii. 455.

* **7.** Rank; offensive to the smell.

"Of rank and *fulsome* smell."—*Bacon.*

* **8.** Tending to obscenity.

"A certain epigram, which is ascribed to the emperor, is more *fulsome* than any passage I have met with in our poet."—*Dryden: Juvenal.* (Dedic.)

* **fŭl-sŏme** (2), *a.* [A. S. *fúl* = foul; auff. *-some*.] Disgusting, foul, gross.

"The *fulsomeste* freke that fourmede was evere"
Morte Arthure, 1,059.

* **fŭl'-sŏme-hoŏd,** * **ful-sum-hed,** *s.* [Eng. *fulsome* (1); *-hood*.] The quality of being fulsome; fertility, richness.

"Of win and olie *fulsumhed*."
Genesis & Exodus, 1,547.

fŭl'-sŏme-lў, * **ful-sum-li,** *adv.* [Eng. *fulsome* (1); *-ly*.]

1. Plentifully, freely; in plenty.

"Thann were spaell spices spended al abonte,
Fulsumli at the ful to eche freke ther wine."
William of Paterne, 4,824.

2. Rankly, offensively.

"*Fulsomely* and loathsomely smelling."—*Newton: Herball to the Bible* (1587).

3. So as to disgust or nauseate; nauseously, rankly.

"*Fulsomely* described in the very words of the most modest among all poets."—*Dryden: Juvenal.* (Dedic.)

fŭl'-sŏme-nĕss, * **ful-som-ncs,** * **ful-som-nesse,** *s.* [Eng. *fulsome* (1); *-ness*.]

* **1.** Richness, plenty.

"Boebous schewed ther his *fulsomnes*
Off holsome wynes to every maner wighte."
Lydgate: Minor Poems, p. 14.

2. Nauseousness; a feeling of disgust.

"Putting a surfeit and *fulsomeness* into all which she enjoys."—*Rogers: Naaman the Syrian*, p. 82.

* **3.** Rankness of smell.

"As the *fulthe* of tim was comen."
Metrical Homilies, p. 7.

* **fult-hede,** *a.* [Filthed.]

* **ful-tum,** *s.* [A.S.] Help, aid, support.

"Of me sal *fultum* ben the nogbt."
Genesis & Exodus, 2,824.

* **fŭl'-vĭd,** *a.* [Lat. *fulvidus* = yellow.] Yellow, tawny, fulvous.

"And in right colours to the life depaint
The *fulvid* rage with her sun-bright eye."
More: Psychogoia, bk. i., s. 3.

fŭl'-vŭs, *a.* [Lat. *fulvus* = yellow.]

Bot., &c.: Tawny-yellow, dull yellow, with a mixture of grey and brown; fox-coloured.

fŭl'-wa, *s.* [Nepaulese, *phulwara* = the name of the tree (see def.).] A solid buttery oil obtained from *Bassia butyracea*. (*Treas. of Bot.*)

* **fŭm,** *v.i.* [Onomatopoetic.] To thrum or play on a fiddle.

"Follow me, and *fum* as you go."—*Ben Jonson.*

fŭm, fŭng, *s.* [Chinese.]

Mythol.: The Chinese Phœnix.

"One day, the Chinese bird of royalty, *Fum*,
Thus accosted our own bird of royalty, Hum."
Moore: Fum & Hum.

* **fu-mā'-cious,** *a.* [Lat. *fumus* = a smoke.] Smoky; addicted to tobacco or smoking.

* **fu-mā'-dō,** *s.* [Sp., pa. par. of *fumar* = to smoke; Lat. *fumo*.] A smoked fish.

"Fish that serve for the hotter countries, they used at first to fume, by hanging them upon long sticks one by one, drying them with the smoke of a soft and continual fire, from which they purchased the name of *fumadoes*."—*Carew: Survey of Cornwall.*

* **fūm'-age** (**age** as **ĭj**), *s.* [Lat. *fumus* = smoke.] A tax on every fire-place; hearth-money. (*Blackstone: Comment.*, bk. i., ch. 7.)

fūm'-ar-ātcs, *s.* [Eng. *fumar(ic)*; *-ate*.]

Chem.: Salts of fumaric acid. Most of the fumarates are soluble in water; the silver salt is insoluble; they are insoluble in alcohols. Fumarate of ammonium or sodium gives a pale brown-red precipitate with ferric chloride, insoluble in excess of ammonium fumarate.

fu-mär'-ĭ-a, *s.* [Sp. & Port. *fumaria*. Sir Joseph Hooker believes the etymology doubtful. Generally said to be from Lat. *fumus* = smoke, referring to the smell of the plant. More probably because it was believed to be the "smoke of the earth."] [Fumitory.]

Bot.: The typical genus of the Fumariaceæ (q.v.). The fruit is roundish, one-seeded, the seed not crested. The Common Fumitory (*Fumaria officinalis*) is a very common annual weed in gardens, rank in growth, but delicate and attractive in appearance. It was formerly used in medicine and in dyeing. [Fumitory.]

fu-mär-ĭ-ā'-çe-æ, *s. pl.* [Mod. Lat. *fumaria* (q.v.); Lat. fem. pl. adj. suff. *-aceæ*.]

Bot.: Fumeworts. An order of Hypogynous Exogens; alliance Berberales. It consists of herbs with brittle stems and a watery juice; leaves usually alternate, multifid, often with tendrils; sepals two, deciduous; petals four, cruciate, very irregular; stamens four, distinct, hypogynous, or six, in two parcels; ovary free, one-celled, style filiform; fruit either an indehiscent one or two-seeded nut or a succulent indehiscent polyspermous pod. They are a little bitter, and act as diaphoretics and aperients. The order is divided into two tribes, Hypecoeæ and Fumarieæ (q.v.). About 100 species are known. They are from the temperate and warmer parts of the Northern hemisphere, and from South Africa.

fu-mär'-ĭc, *a.* [Mod. Lat. *fumar(ia)*; *-ic*]. Pertaining to or derived from Fumitory (q.v.).

fumaric acid, *s.*

Chem.: $C_4H_4O_4$, or $\begin{matrix}C-CO\cdot OH\\ \|\\ C-CO\cdot OH\end{matrix}$ A dibasic diatomic acid, which occurs in Fumitory (*Fumaria officinalis*), in Iceland Moss, and in species of Boletus. It can be obtained by the dry distillation of malic acid, when maleic acid distils over, leaving fumaric acid in the retort, and the crystalline mass is washed with cold water to remove unaltered malic acid; also obtained by heating malic acid for a long time at 150°. It is formed when dibromsuccinic acid is heated with potassium iodide solution; also by heating with baryta the product obtained by the action of ClO_2 on benzene C_6H_6. Fumaric acid crystallizes in colourless prisms, which are only slightly soluble in cold water, soluble in hot water, alcohol, and in ether. It sublimes at 200°, but a great part is converted into water and maleic anhydride. Fumaric acid is converted by sodium amalgam into succinic acid, $HO\cdot OC\cdot CH_2\cdot CH_2\cdot CO\cdot OH$. It forms acid and neutral salts, the silver salt, $C_4H_2O_4Ag_2$, is insoluble in water. It forms ethers; methyl fumaric ether, $C_2H_2(CO\cdot O\cdot CH_3)_2$, forms white crystals, which melt at 102°, and boil at 192°; the ethyl ether is a liquid boiling at 218°. Fumaric acid, dissolved in water, unites with metallic zinc, forming succinate of zinc.

fumaric aldehyde, *s.*

Chem.: $C_4H_4O_3$, or $\begin{matrix}CH-CO\cdot OH.\\ \|\\ CH-CO\cdot H.\end{matrix}$ It is formed by the action of chromic acid on pyromucic acid, with liberation of CO_2; also by the action of two molecules of bromine and water on pyromucic acid, $C_5H_4O_3 + 2H_2O + 2Br_2 = C_4H_4O_3 + CO_2 + 4HBr$. It is a syrup, which crystallizes with difficulty. (*Watts: Dict. Chem.*)

fu-mär-ĭ-ĕ'-æ, *s. pl.* [Mod. Lat. *fumari(a)*; Lat. fem. pl. adj. suff. *-eæ*.]

Bot.: A tribe of Fumariaceæ, containing the genera with the stamens distinct in place of diadelphous.

fu-mär'-ĭ-mīdc, *s.* [Eng. *fumari(c)*, and *(a)mide*.]

Chem.: $C_4H_3O_2\cdot NH$. Obtained when acid malate of ammonium is heated to 200°. The red powder is exhausted with boiling water, and the liquid deposits a white powder of anhydrous fumarimide. When boiled for a long time with hydrochloric acid, it yields inactive aspartic acid, $C_2H_3(NH_2)\begin{matrix}CO\cdot OH\\ CO\cdot OH\end{matrix}$.

fūm'-ar-ĭnc, *s.* [Eng., &c. *fumari(a)*, and auff. *-ine* (*Chem.*) (q.v.).]

Chem.: A base obtained from *Fumaria officinalis*. It crystallizes in irregular six-sided prisms, soluble in alcohol, chloroform, and benzene, insoluble in ether, and sparingly soluble in water. The solution is bitter, and gives an alkaline reaction; with strong sulphuric acid it gives a dark violet liquid. Its salts are crystalline.

fūm'-a-rōle, * **fo-mer-ill,** * **fo-mer-al,** *s.* [Low Lat. *fumerale*; Lat. *fumariolum*; Ital. *fumarolo*, from *fumo* = Lat. *fumus* = smoke.]

1. *Ord. Lang.:* A louvre or ventilator in a roof to let out smoke, &c.

"Lovir or *fomerill*. *Fumarium*."—*Withals.*

2. *Geol.:* A hole in a volcanic or other region whence smoke issues.

* **fū'-mart,** *s.* [Fulmart.]

fūm'-a-rўl, *s.* [Eng. *fumar(ic)*; *-yl* = Gr. ὕλη (*hulē*) = matter.]

fumaryl-chloride, *s.*

Chem.: $C_4H_2O_2"Cl_2$. A compound, boiling at 160°. Formed by the action of phosphorus pentachloride on fumaric acid.

* **fūm'-a-tŏr-ў,** *s.* [Fumitory.]

fŭm'-ble, *v.i.* & *t.* [Dut. *fommelen*; eogn. with Sw. *fumle* = to grope; Dan. *famle*; Icel. *fálma*.]

A. *Intransitive:*

I. To grope about awkwardly.

"They asked him for his certificate, that they might go in, and show it to the King; so he *fumbled* in his bosom for one, and found none."—*Bunyan: Pilgrim's Progress*, pt. i.

2. To act awkwardly or in an ungainly fashion; to move about like one confused.

"Alas! how he *fumbles* about the domains
Which this comfortless oven environ."
Wordsworth: Written in Germany.

* **3.** To bungle in any business.

"Eche of them calleth other false *fumblinge* heretikes."—*Sir T. More: Works*, fo. 279.

* **4.** To stammer, to stutter, to be confused.

"But being taken up in a trip and found *fumbling* in their answere, they were commaunded to void out of the counsel-chamber."—*P. Holland: Livius*, p. 1,130.

* **5.** To wander.

"My hand trembles to that degree that I can hardly hold my pen, my understanding flutters, and my memory *fumbles*."—*Chesterfield: Miscell. Works*, vol. iv., let. 71.

* **B.** *Trans.:* To handle or manage awkwardly; to confuse. (Followed by *over* or *up*.)

"His greasy bald-pate choir
Cume *fumbling o'er* the beads, in such an agony,
They told 'em false for fear."
Dryden: Spanish Friar, i. 1.

fŭm'-blĕr, *s.* [Eng. *fumbl(e)*; *-er*.] One who acts awkwardly.

"Playing at passage with a pair
Of drunken *fumblers* for his fare."
Cotton: Epistle to the Earl of ——.

fŭm'-blĭng, *pr. par., a., & s.* [Fumble.]

A. & **B.** *As pr. par. & particip. adj.:* (See the verb).

C. *As subst.:* Awkward handling or management.

fŭm'-blĭng-lў, *adv.* [Eng. *fumbling*; *-ly*.] In a fumbling, awkward manner; awkwardly.

"For that is the reason, why many good schollars speake but *fumblingly*."—*Ben Jonson: Discoveries.*

fūme, *s.* [O. Fr. *fum*, from Lat. *fumus* = smoke; Fr. *fumée*; Sp., Port., & Ital. *fumo*.]

A. *Intransitive:*

I. *Literally.*

* **1.** Smoke.

"As from the fyre depertith *fume*,
So body and sowle asoundre gooth."
MS. in *Halliwell*, p. 385.

2. A vaporous or smoky exhalation; volatile matter arising from anything; generally in the plural.

"Grosser sleep,
Bred of unkindly *fumes*, with conscious dreams
Encumbered."
Milton: P. L., ix. 1,050.

3. An exhalation; a smell.

"The fish whose liver gave forth such a *fume* as sent the devil flying from Ecbatana to Egypt."—*Macaulay: Hist. Eng.*, ch. xiv.

II. *Figuratively:*

* **1.** Anything empty, fleeting, or unsubstantial: as, a vapour, an idle conceit.

"Memory, the warder of the brain,
Shall be a *fume*, and the receipt of reason
A limbeck only." *Shakesp.: Macbeth*, i. 7.

* 2. Vanity, emptiness.

"They should go out in *fume*, and be forgot."
Cowper: Task, iii. 172.

3. Agitation of the mind; an angry mood; a passion.

"She, out of love, desires me not to go to
My father, because something hath put him
In a *fume* against me."
Shirley: Merchant's Wife, iv. 5.

* 4. Praise, flattery.

"To send perfection with imperfect *fume*."
Davies: To Worthy Persons, p. 52.

* 5. A passionate person.

"The notary's wife was a little *fume*."—*Sterne: Sentimental Journey; The Fragment.*

¶ *Fume of the Earth:* [Fumitory].

* **fume-gallant,** *s.* A smoker.

"Let these *fume-gallants* enjoy their vanity."—*Venner: Treatise of Tobacco*, p. 412.

fūme, *v.i.* & *t.* [Fr. *fumer*, from Lat. *fumo* = to smoke; *fumus* = smoke; Sp. & Port. *fumar*; Ital. *fumare.*]

A. *Intransitive:*

I. *Literally:*

* 1. To smoke; to throw off or emit smoke.

* 2. To dry or cure by smoking.

"So corrosive is this smoke about the city, that if one would hang up gammons of bacon, beefe, or other fleshe to *fume*, and prepare it in the chimnies, it will so consumme, drie up, waste and burne it, that it suddenly crumbles away, consumes and comes to nothing."—*Evelyn: Fumifugium*, pt. i.

3. To pass off in smoke or vapour.

"Even such is all their vaunted vanitie,
Naught else but smoke that *fumeth* soone away."
Spenser: Colin Clout's come out againe.

* 4. To smoke tobacco.

II. *Figuratively:*

* 1. To rise up, as a vapour.

"The one of them, when the wine had a little *fumed* up into the head, began both to speak and do foolishly."—*P. Holland: Plutarch*, p. 335.

2. To be in a rage or fury; to be hot with anger.

"He frets, he *fumes*, he stares, he stamps the ground."
Dryden: Palamon & Arcite, i. 446.

* 3. To be as in a mist or fog; to be stupefied or confused.

"Keep his brain *fuming*."
Shakesp.: Antony & Cleopatra, ii. 1.

* 4. To pass away as a vapour; to be dissipated.

"Our heat is spent and *fumed* away in vapour."
Ben Jonson: Catiline, iii. 3.

* **B.** *Transitive:*

1. To smoke; to dry or cure with smoke.

"Those that serve for hot countries they used at first to *fume*, by hanging them upon long sticks one by one, and drying them with the smoke of a soft fire."—*Carew: Survey of Cornwall.*

2. To fumigate; to perfume.

"*Fumed* with frankincense on every side."
Cowper: Truth, 314.

3. To dissipate in vapour. (Generally followed by *away.*)

"The heat will *fume away* most of the scent."—*Mortimer: Husbandry.*

4. To smoke, as tobacco.

5. To flatter.

"They deml-deify and *fume* him so."
Cowper: Task, v. 266.

* **fūme'-lĕss,** *a.* [Eng. *fume*; *-less.*] Without fumes; free from fumes.

* **fūm'-ĕr,** *s.* [Eng. *fum(e)*; *-er.*] One who scents or perfumes.

* **fūm'-ĕt,** * **few-met,** *s.* [Fr. *fumées*; Lat. *fimus* = dung.] The dung of the deer.

"For by his slot, his entries, and his port,
His frayings, *feumets*, he doth promise sport."
Ben Jonson: Sad Shepherd, i.

* **fu-met-ere,** *s.* [Fumitory.]

* **fu-mĕt'te,** *s.* [Fr. *fumet*, from Lat. *fumus* = smoke.] The scent or smell of game or meat when high.

"A haunch of venison made her sweat
Unless it had the right *fumette*."
Swift.

fūme'-wŏrts, *s. pl.* [Eng. *fume*, and *wort.*]

Bot.: The English name given by Lindley to the order Fumariaceæ (q.v.).

* **fūm'-id,** *a.* [Lat. *fumidus*, from *fumus* = smoke.] Smoky, vaporous.

"Thus iron in aquafortis will fall into ebullition, with noise and emication, as also a crass and *fumid* exhalation."—*Browne: Vulgar Errours*, bk. ii.

* **fu-mĭd'-ĭ-tў,** *s.* [Eng. *fumid*; *-ity.*] The quality or state as being fumid or smoky; smokiness.

* **fūm'-ĭd-nĕss,** *s.* [Eng. *fumid*; *-ness.*] Smokiness, fumidity.

* **fu-mĭf'-ĕr-oŭs,** *a.* [Lat. *fumifer*, from *fumus* = smoke; *fero* = to bear, produce, and Eng. adj. suff. *-ous.*] Producing smoke.

* **fūm-ĭf'-u-gist,** *s.* [Lat. *fumus* = smoke; *fugo* = to drive away; Fr. *fumifuge.*] One who or that which drives away or dissipates fumes.

* **fūm'-ĭ-fў,** *v.t.* [Eng. *fum(e)*; *i* connective; suff. *-fy.*] To impregnate with smoke.

"In order to *fumify* our immortalities."—*T. Browne: Works*, ii. 190.

* **fūm'-ĭ-gant,** *a.* [Lat. *fumigans*, pr. par. of *fumigo* = to smoke.] Fuming.

fūm'-ĭ-gāte, *v.t.* [Lat. *fumigatus*, pa. par. of *fumigo* = to smoke; *fumus* = smoke; Fr. *fumiger*; Sp. *fumigar.*]

I. To smoke; to apply smoke to; to expose to smoke or vapour; to free from infection by the use of vapours.

"But if a pinching winter thou foresee,
And wouldst preserve thy famished family,
With fragrant thyme the city *fumigate*."
Dryden: Virgil; Georgic iv. 350.

2. To scent.

* 3. To eradicate or heal by vapours.

fūm-ĭ-gā'-tion, * **fum-i-ga-cion,** *s.* [Fr., from Lat. *fumigatio*, from *fumigatus*, pa. par. of *fumigo*; Sp. *fumigacion*; Ital. *fumigazione.*]

1. The act or process of fumigating, or applying smoke or vapour to, as for the purpose of disinfecting houses, clothes, &c.

"The said house whiche Solomon builte in Hierusalem, was a busie thing with slaughter of beastes, with *fumigacions*, wyth washynges, and veral troubleous with perfumes."—*Udal: Luke* ch. xxiv.

¶ The principal substances used for fumigation to destroy infection, are chlorine and sulphurous acid, obtained by burning sulphur. If a brick is made hot in the fire and a wineglass of nitric acid poured on it, the nitrous fumes will destroy any infection, but metallic objects must first be removed, or they will rust, and of course no animal must be in the room during the fumigation.

2. A scent or vapour raised by heat.

"They [devotion and knowledge] savour together farre more sweetly than any *fumigation* either of juniper, incense, or whatsoeuer else."—*Foxe: Martyrs*, p. 1,017.

fūm'-ĭ-gāt-ŏr, *s.* [Eng. *fumigat(e)*; *-or.*] One who or that which fumigates. Specif., an apparatus for applying smoke, gas, or perfume: (1) To destroy insects or vermin; (2) to destroy infection or miasma; (3) to diffuse a perfume through an apartment or ward; (4) To suffuse the lungs with a soothing or healing vapour. [Inhalation.]

* **fūm'-ĭ-ga-tŏr-ў,** *a* [Fr. *fumigatoire*, from Lat. *fumigatus*, pa. par. of *fumigo*; Sp. *fumigatorio.*] Having the quality or power of cleansing by fumigation.

* **fūm'-ĭ-lў,** *adv.* [Eng. *fumy*; *-ly.*] With smoke; smokily.

fūm'-ĭng, *pr. par., a., & s.* [Fume, *v.*]

A. & **B.** *As pr. par. & particip. adj.:* (See the verb).

* **C.** *As substantive:*

1. The act of fumigating; a fumigation.

2. A vapour; an idle fancy.

"O Lucio fond, thy *fumings* hath me fed."
Mirrour for Magistrates, p. 250.

fuming-box, *s.*

Photog.: In printing photographically, the sensitive paper, having chloride and nitrate of silver upon its surface, is exposed to the fumes of ammonia immediately before its exposure to light under the negative, the object being to secure greater depth and brilliancy in the resulting print. The apparatus for this purpose is simply a tight box, in which the sensitive sheets can hang, leaving a space below them for a flat basin containing ammonia. Boxes of this kind are variously constructed, the object in all cases being to admit of the ready introduction and removal of the sheets, as well as of the vessel containing ammonia, without subjecting the operator to unnecessary annoyance from the fumes.

fuming-liquor, *s.*

Chem.: That of Boyle is a mixture of sulphides of ammonium, obtained by distilling sulphur with chloride of ammonium and quicklime; that of Cadet a mixture of cacodyl and oxide of cacodyl, obtained by distilling acetate of potassium with arsenious anhydride; and that of Libavius of tetrachloride of tin, stannic chloride, $SnCl_4$.

* **fūm'-ĭng-lў,** *adv.* [Eng. *fuming*; *-ly.*] In a fuming manner; angrily; with passion.

"They answer *fumingly*, that they are ashamed to defile their pennes with making answers to such idle questions."—*Hooker: Ecclesiastical Polity*, bk. v., § 22.

* **fūm'-ĭsh,** * **fum-ishe,** * **fum-isshe,** *a.* [Eng. *fum(e)*; *-ish.*] Hot, choleric, passionate.

"An other is perhaps melancholike,
Another *fumish* is and cholerike."
Mirrour for Magistrates, p. 153.

* **fūm'-ĭsh-lў,** * **fum-ish-lie,** *adv.* [Eng. *fumish*; *-ly.*] In a hot, choleric, or passionate manner; angrily.

"Is it not agreeable that such soules lying so long in purgatory should so soone forget their charity, and fall a railing in their supplication so *fumishly*?"—*Foxe: Book of Martyrs*, p. v.7.

* **fūm'-ĭsh-nĕss,** *s.* [Eng. *fumish*; *-ness.*] The quality or state of being fumish; heat of temper; passion.

"Drive thou out of us all *fumishness*, indignation and self-will."—*Coverdale: Fruitful Lessons*, p. 284.

fūm'-ĭ-tōr-ў, * **fu-me-ter,** * **fu-me-tere,** * **fu-mit-er,** * **fu-my-tere,** *s.* [Fr. *fumeterre*; Prov. *fumiterra*; Ital. *fumosterno*, from Lat. *fumus terræ* = smoke of the ground, either from its smell or from the unscientific belief once entertained that the plant did not spring from seed, but was generated by vapours arising from the ground. The myth arose apparently from the delicate appearance of the plant.]

1. *Bot.:* The genus Fumaria (q.v.). The Rampant Fumitory is *Fumaria capreolata*, and the Common Fumitory, *F. officinalis.*

* 2. A smoking-room.

"You sot away your time in Mungo's *fumitory*."—*J. Brown: Wales*, ii. 179.

¶ *Climbing fumitory: Corydalis claviculata.* (*Britten & Holland.*)

fūm'-mĕl, *s.* [A French rural word for *femelle* = female (?).] The offspring of a stallion and a she-ass; a mule, a hinny.

fū'-mōse, *s.* [Fumous.]

* **fu-mŏs'-ĭ-tў,** * **fu-mos-i-tee,** *s.* [Lat. *fumosus* = smoky; *fumus* = smoke.] A tendency to emit fumes; fumes arising from excessive drinking.

"Eaten after meate when a man is drunken indeed, it riddeth away the *fumosities* in the braine."—*P. Holland: Plinie*, bk. xx., ch. ix.

fūm'-oŭs, fū'-mōse, *a.* [Fr. *fumeux*, from Lat. *fumosus*, from *fumus* = smoke.]

* **I.** *Ord. Lang.* (*Of the form* fumous):

1. Smoky; full of smoke.

"Through the great dearth and scarcity of coales, those *fumous* works many of them were either left off or spent but few coales."—*Evelyn: Fumifugium*, pt. i.

2. Full of fumes or vapours; producing fumes.

"He must abstaine from garlicke . . . and such like *fumous* things."—*Burrough: Method of Physick.* (1625.)

3. Angry, hot, passionate.

II. *Bot.* (*Of both forms*): Smoke-coloured; grey, changing to brown.

* **fūm'-oŭs-lў,** *adv.* [Eng. *fumous*; *-ly.*] Angrily, hotly, passionately.

"[He] therefore saied *fumously* vnto him, Dost thou beare me?"—*Wilson: Arte of Rhetorique*, p. 151.

fū'-mŭs-tĕrre, *s.* [Lat. *fumus*; and *terræ*, gen. sing. of *terra* = land.] [Fumitory.] (*Grete Herball.*) (*Britten & Holland.*)

* **fūm'-ў,** *a.* [Eng. *fum(e)*; *-y.*] Full of fumes; causing fumes.

"Oppressed with sleep, and drowned in *fumy* wine,
The prostrate guards their royal charge resign."
Brookes: Constantia.

fumy-ball, *s.* A puff-ball. (*Hall: Satires.*) (*Halliwell & Wright.*)

fŭn, *s.* [Of uncertain origin: perhaps connected with Ir. *foun* = delight, pleasure; Gael. *foun* = pleasure.] Sport, amusement, frolicsome delight, merriment.

"For ever foremost in the ranks of *fun*,
The laughing herald of the harmless pun."
Byron: Childish Recollections.

¶ *To make fun of:* To hold up to or turn into ridicule.

*** fun,** *pret. & pa. par.* [FOUND.]

*** fu-năm'-bu-lant,** *s.* [Lat. *funis* = a rope, and *ambulans*, pr. par. of *ambulo* = to walk.] A rope-dancer.

*** fu-năm'-bu-lāte,** *v.i.* [Lat. *funis* = a rope, and *ambulatum*, sup. of *ambulo* = to walk.] To walk on a rope.

fu-năm-bu-lā'-tion, *s.* [FUNAMBULATE.] The act or art of walking on a rope; rope-dancing.

*** fu-năm'-bu-lā-tŏr-ў,** *a.* [Eng. *funambulat(e)*; *-ory.*]

1. Performing like a rope-dancer.

2. Narrow; like the walk of a rope-dancer.

"Tread softly and circumspectly in this *funambulatory* track and narrow path of goodness."—*Browne: Christian Morals*, I. i.

*** fu-năm'-bu-list,** *s.* [Lat. *funambulus.*] A rope-walker or rope-dancer.

*** fu-năm'-bu-lō,** *s.* [Sp., from Lat. *funambulus.*] A rope-dancer; a funambulist.

"We see the industry and practice of tumblers and *funambulos*."—*Bacon: Letters; To Sir Henry Saville.*

*** fu-năm'-bu-loŭs,** *a.* [Lat. *funambulus* = a rope-dancer.] Narrow as a rope.

"Tread softly and circumspectly in this *funambulous* tract."—*Browne: Letter to a Friend*, § 30, p. 147.

*** fu-năm'-bu-lŭs,** *s.* [Lat.] A rope-dancer.

"You have so represented —— unto me as methinks I see him walking not like *a funambulus* upon a cord, but upon the edge of a razor."—*Reliquiæ Wottonianæ*, p. 367.

fu-nār'-ĭ-a, *s.* [Fem. sing. of Lat. *funarius* = pertaining to a rope, from *funis* = a rope, line, or cord, in allusion to the twisted foot-stalks.]

Bot.: A genus of apocarpous mosses, the typical one of the tribe Funarieæ. The capsule is pear-shaped, the calyptra much inflated and vesicular below, subulate above. Minute mosses, growing in the winter and the spring in tufts on rocks and cottage roofs. *Funaria hygrometrica* is very common in England, especially on burnt soil. It is found also in many other parts of the world.

fu-nār-ĭ-ā'-çē-æ, *s. pl.* [Lat. *funari(a)* (q.v.), and fem. pl. adj. suff. *-aceæ.*]

Bot.: A family of Funaroideæ (Acrocarpous Mosses). It consists of loosely-tufted or gregarious mosses, with monœcious inflorescence; type, Funaria (q.v.).

fu-na-rŏī'-dē-æ, *s. pl.* [Lat. *funaria* (q.v.), and Gr. εἶδος = form.]

Bot.: A sub-order of operculated Acrocarpous (terminal fruited) mosses, with broadly oval, spathulate leaves, pyriform apophysate capsules, the neck mostly bearing stomates on its epidermis. It is divided into two families—Funariaceæ and Splachnaceæ (q.v.).

fŭnc'-tion, *s.* [O. Fr., from Lat. *functio*, from *functus*, pa. par. of *fungor* = to enjoy, to perform; Fr. *fonction*; Sp. *funcion*; Ital. *funzione.* Puttenham, in 1589, ranked this with words of recent introduction into English.]

I. *Ordinary Language:*

1. The discharge, performance, or executing of any act, office, or duty.

"There is hardly a greater difference between two things than there is between a representing commoner in the *function* of his publick calling, and the same person in common life."—*Swift.*

2. An employment, office, duty, or occupation, belonging to or connected with any position, station, or character in life; the duties of any office.

"The agent of France in that kingdom must be equal to much more than the ordinary *functions* of an envoy."—*Macaulay: Hist. Eng.*, ch. xii.

3. A calling, office, or position.

"His sacred *function* was at length renounced."
Wordsworth: Excursion, bk. ii.

4. The specific office or action of any organ or system of organs in the animal or vegetable economy.

"All human bodies, for example, though each of them consists of almost an infinite number of parts, are perfectly uniform in their structure and *functions*."—*Beattie: Moral Science*, pt. ii., ch. i.

5. Any power or faculty.

"Nature within me seems
In all her *functions* weary of herself."
Milton: Samson Agonistes, 596.

II. *Technically:*

1. *Eccles.:* An office or service of the church.

2. *Math.:* Any algebraic expression or quantity dependent for its value on another one. Thus the circumference of a circle is a function of its diameter. A compound algebraic quantity may be a function of two others, or even of more than two. Thus, in the equation $y = Ax + Bx^2$, A and B being known quantities, y is a function of x, and in $y = Ax + Bz$, y is a function of x and z. The expression function of x is usually expressed by the symbols $f(x)$, $\phi(x)$, $\psi(x)$, or similar abbreviations, and the foregoing formulas would be thus expressed—

$$y = f(x),$$
$$y = f(x.z).$$

¶ *Calculus of functions:*

Math.: That branch of the differential calculus which investigates the form of functions rather than the value of any particular one.

*** fŭnc'-tion,** *v.i.* [FUNCTION, *s.*] To perform a function or duty.

"The momentous days when he was *functioning* at Culpeper Court."—*Pall Mall Gazette*, August 31, 1882.

fŭnc'-tion-al, *a.* [Eng. *function*; *-al.*]

1. *Ord. Lang.:* Pertaining to some office or duty.

2. *Math.:* Pertaining to functions.

*** fŭnc'-tion-al-īze,** *v.t.* [Eng. *functional*; *-ize.*] To place in some function or office; to assign a certain function to.

*** fŭnc'-tion-al-lў,** *adv.* [Eng. *functional*; *-ly.*] In a functional manner; by means of functions.

"It is likewise most interesting to find that those species with a comparatively defective dentition, as the horned Ruminants for example, manifest transitorily in the embryo state the germs of upper incisors and canines, which disappear before birth, but which were retained and *functionally* developed in the cleven-footed Anoplothere."—*Owen: Brit. Foss. Mam.* (1846), 433.

fŭnc'-tion-ar-ў, *s.* [Eng. *function*; *-ary.*] One who holds any office or trust; one who has certain functions to perform; an official.

"We ought to . . . do business of course with the *functionaries* who act under the new power."—*Burke: Thoughts on French Affairs.*

fŭnd, *s.* [Fr. *fond* = a bottom, a floor . . . merchant's stock (*Cotgrave*), from Lat. *fundus* = bottom, depth, foundation; Sp. *fundo, fondo*; Port. *fundo*; Ital. *fondo.*]

1. Stock, capital; a sum of money contributed to a common stock for the purpose of meeting the expenses of any commercial operation.

2. (*Pl.*): Money lent to a government and constituting a national debt; the stock of a national debt.

3. Money set apart for the carrying out of any object permanent or temporary; in general the interest only is applied to meet the annual expenses of the object, the capital being invested; the word is also applied to money systematically collected to meet the expenses of some permanent object: as, a sustenation *fund*, the patriotic *fund*, &c.

4. Any stock or store from which one may draw at pleasure; abundance, plenty.

"In preaching, no men succeed better than those who trust entirely to the stock or *fund* of their own reason, advanced, indeed, but not overlaid, by commerce with books."—*Swift.*

5. Money, finances: as, My *funds* are very low. (*Colloquial.*)

¶ (1) *Sinking fund:* A fund or stock of money set apart periodically for the reduction or extinction of a public debt. [SINKING.]

(2) *Consolidated fund:* [CONSOLIDATED].

fund-holder, *s.* One who has property in the public funds.

"Would you tax the property of the *fundholder*?"—*Fox: Speech on Assessed Tax Bill*, Dec. 14, 1797.

fŭnd, *v.t.* [FUND, *s.*]

1. To place in a fund, as money.

2. To provide or appropriate a fund or permanent revenue for the payment of the interest of; to make permanent provision of resources for discharging the annual interest of. [FUNDED-DEBT.]

*** fund,** *pret. & pa. par. of v.* [FIND.]

fŭnd'-a-mĕnt, * fonde-ment, * foundement, * fundc-ment, * fund-ment, *s.* [Fr. *fondement*, from Lat. *fundamentum*, from *fundo* = to found (q.v.); Sp. & Port. *fundamento*; Ital. *fondamento.*]

* 1. A foundation of a building.

"This were a feble *fundament*
To bilden on a place hye."
Chaucer: House of Fame, iii. 42.

* 2. A foundation, ground or basis on which anything rests.

"Hit is the heued of hali writte, *fundement* of our clergie." *Legends of Holy Rood*, p. 119.

3. The lower part of the body; the seat; the anus.

"The angry beast did straight resent
The wrong done to his *fundament*."
Butler: Hudibras, pt. i., c. ii.

fŭnd-a-mĕn'-tal, *a. & s.* [Fr. *fondamental*, from Lat. *fundamentum* = a foundation; Sp. *fundamental*; Ital. *fondamentale.*]

A. *As adjective:*

1. *Ord. Lang.:* Pertaining to the foundation or base; serving as a foundation or base; essential, original, elementary.

"*Fundamental* principles are such as are presupposed to the duties of religion (one or more), and such as are absolutely necessary to the doing of them."—*Glanvill: Essay 5.*

2. *Bot.:* Constituting the essential part of anything.

B. *As subst.:* A primary or essential principle, rule, law or article; the essential part or point; the basis or groundwork.

"As this examinant further saith, that the *fundamentals* . . . were only rough drawn up by the said Mr. Wade's own hand."—*State Trials* (1683), *Introd. to the Rye-House Plot.*

fundamental-bass, *s.*

Music: The lowest note or root of a chord; a bass consisting of a succession of fundamental notes. [HARMONY.]

fundamental-tissue, *s.*

Bot.: A tissue often consisting of thin-walled succulent parenchyma containing starch, though sometimes having other forms of cells.

fundamental-tones, *s. pl.*

Music: The tones from which harmonies are generated.

fundamental-units, *s. pl.*

Physics: Units which constitute the foundation of calculations with regard to other quantities; units used for measuring others. Fundamental units are three, namely—*a definite length, a definite mass*, and *a definite interval of time.* (*Everett: The C. G. S. System of Units*, ch. ii., p. 7.)

*** fŭnd-a-mĕn-tăl'-ĭ-tў,** *s.* [Eng. *fundamental*; *-ity.*] The quality of being fundamental or essential; essentiality.

fŭnd-a-mĕn'-tal-lў, *adv.* [Eng. *fundamental*; *-ly.*] In a fundamental manner; primarily; essentially; originally; in fundamental or essential matters or points.

"*Fundamentally* erring from the truth and nature of things."—*Clarke*, vol. i., ser. 32.

*** fŭnd-a-mĕn'-tal-nĕss,** *s.* [Eng. *fundamental*; *-ness.*] Fundamentality; essentiality.

fŭnd'-ĕd, *pa. par.* or *a.* [FUND, *v.*]

A. *As pa. par.:* (See the verb).

B. *As adjective:*

1. Invested in public funds: as, *funded* money.

2. Forming part of the national debt of a country, existing in the form of bonds bearing regular interest. The funded debt in England is that vast total of annuities paid by the Government to its creditors under the name of Consols, Reduced Three per Cents, New Three per Cents., Savings Bank Annuities, &c. The debt of the United States has not been funded in annuities, as in England.

"When the world was again at rest the *funded* debt of England amounted to eight hundred millions."—*Macaulay: Hist. Eng.*, ch. xix.

fŭn'-dĭ, fŭn-dŭn'-gĭ, *s.* [A West African word.]

Bot.: A kind of grain (*Paspalum exile*) cultivated in the West of Africa. It is allied to millet, and, being light and nutritious, is recommended for invalids.

fŭnd'-ĭng, *pr. par., a., & s.* [FUND, *v.*]

A. & **B.** *As pr. par. & particip. adj.:* (See the verb).

C. *As subst.:* The act or process of providing a fund for the payment of interest upon a debt; the conversion of money lent to a government into funds bearing a fixed rate of interest.

funding-system, *s.* The process by which a floating debt is converted into stock.

fŭn'-dŭs, *s.* [Lat.]

1. *Anat.*: The base of any cone-shaped organ, as the uterus.

2. *Bot.*: [*Fundus plantæ.*]

¶ *Fundus plantæ:*

Bot.: The place where the stem and root join.

* **fu-nē'-bral,** *a.* [Lat. *funebris.*] The same as FUNEBRIAL (q.v.).

fu-nē'-brĭ-al, *a.* [Lat. *funebri(s)*; Eng. adj. suff. *-al.*] Of or pertaining to funerals; funereal.

"With which plants the *funebrial* garlands of the ancients were composed."—*Browne: Miscellaneous Tracts*, p. 29.

* **fu-nē'-brĭ-oŭs,** *a.* [Lat. *funebri(s)*; Eng. adj. suff. *-ous.*] Funebrial, funereal.

fūn'-ĕr-al, * **fun-er-all,** *a.* & *s.* [Low Lat. *funeralis* = pertaining to a funeral: Lat. *funus* genit. *funeris*) = a funeral; Sp. *funeral* (a. & s.); Ital. *funerale* (a. & s.); Fr. *funérailles* = a funeral.]

A. *As adj.*: Pertaining to or connected with the burial of the dead; as, *funeral* rites, *funeral* games, *funeral* service, &c.

"The eloquence of Antony, who made the *funeral* oration."—*Middleton: Life of Cicero*, vol. iii., § 9.

B. *As substantive:*

1. The solemnization of a burial; the ceremony of burying a human corpse; burial, interment, obsequies. (Formerly used in the plural.)

"This said, our tears to-day may fall
As at an innocent *funeral*."
Wordsworth: White Doe of Rylstone, ii.

2. A procession of persons attending the burial of any person.

"You are sometimes desirous to see a *funeral* pass by in the street."—*Swift.*

* 3. Burial, interment, grave.

"[May he] find his *funeral*
I' th' sands, when he before his day shall fall.'
Denham: Passion of Dido, 199.

* 4. Death.

"Fled fast away to tell his *funerall*."
Spenser: F. Q., II. v. 25.

* 5. A funeral sermon or oration. (Frequently in the plural.)

"I could learn little from the minister which preached his *funeral*."—*Fuller: Worthies; Hereford*, i. 454.

¶ Crabb thus discriminates between *funeral* and *obsequies*: "We speak of the *funeral* as the last sad office which we perform for a friend; it is accompanied by nothing but by mourning and sorrow; we speak of the *obsequies* as the tribute of respect which can be paid to the person of one who was high in station or public esteem: the *funeral*, by its frequency, becomes so familiar an object that it passes by unheeded; the *obsequies* which are performed over the remains of the great, attract our notice from the pomp and grandeur with which they are conducted." (*Crabb: Eng. Synon.*)

* **funeral-ale,** *s.* A drinking-feast at a funeral.

funeral-cypress, *s.*

Bot.: *Cupressus funebris*, a weeping tree. *i.e.*, with pendulous branchea, introduced from China to be planted in cemeteries.

funeral-director, *s.* An undertaker.

funeral-sacrifice, *s.*

Anthrop.: The slaying of men or animals to accompany the soul of an eminent person to the world of spirits—the former to give him what assistance he needs, the latter to supply him with food. It was an early and a wide-spread custom.

* **fūn'-ĕr-al-lў,** *adv.* [Eng. *funeral*; *-ly.*] After the manner of a funeral.

"Even crows were *funerally* burnt."—*Browne: Urn Burial*, ch. i.

* **fūn'-ĕr-āte,** *v.t.* [Lat. *funeratus*, pa. par. of *funero* = to bury; *funus* (genit. *funeris*) = funeral rites.] To bury, to inter. (*Cockeram.*)

* **fu-nĕr-ā'-tion,** *s.* [Lat. *funeratio*, from *funeratus*, pa. par. of *funero* = to bury.] The act of burying; the solemnization of a funeral.

fu-nĕr'-ĕ-al, *a.* [Lat. *funereus*, from *funus* (genit. *funeris*) = a funeral.] Pertaining to or suitable for a funeral; dismal, sad, mournful.

"You timely will return a welcome guest,
With him to share the sad *funereal* feast."
Pope: Homer; Odyssey iv. 740.

* **fu-nĕr'-ĕ-al-lў,** *adv.* [Eng. *funereal*; *-ly.*] In a funereal manner; mournfully; dismally.

* **fu-nĕst',** *a.* [Lat. *funestus* = calamitous, sad; *funus* = a funeral; Fr. *funeste*; Sp. & Ital. *funesto.*] Sad, lamentable, mournful.

"Thus we see them walk and converse in London, pursued and haunted by that infernal smoake, and the *funest* accidents which accompany it wheresoever they retire."—*Evelyn: Fumifugium.* (To the Reader.)

fŭng (1), *s.* [Onomatopœtic.]

1. A sharp, whizzing sound, as when a cork is drawn.

2. A stroke, a blow.

fŭng (2), *s.* [FUM, *s.*]

fŭng, *v.i.* [FUNG, *s.*] To emit a sharp, whizzing sound.

† **fŭn-gā'-çē-æ,** *s. pl.* [Lat. *fung(us)*; fem. pl. adj. suff. *-aceæ.*]

Bot.: An order of plants, the same as Fungi (q.v.). It is now elevated into an alliance—Fungalea (q.v.).

fŭn'-gal, *a.* & *s.* [From Mod. Lat. *fungales* (q.v.).]

A. *As adjective:*

Bot.: Pertaining to fungi.

B. *As substantive:*

Bot.: A plant belonging to the alliance Fungales (q.v.).

¶ *The Fungal Alliance:*

Bot.: The Alliance Fungales. (*Lindley.*)

fŭn-gā'-lēs, *s. pl.* [Mod. Lat., from Lat. *fungus* (q.v.), and fem. pl. adj. suff. *-ales.*]

1. *Bot.*: An alliance of Thallogens, corresponding to the old order Fungi. It consists of cellular, flowerless plants, nourished through their thallus, that is, through their spawn or mycelium; living in air; propagated by spores which are colourless or brown; sometimes enclosed in asci; and destitute of green gonidia. They are closely akin to Algæ, but grow in different situations—mushrooms, toadstools, &c., on green pastures, many other species on decaying trees, some on cereal grasses, potatoes, &c., which they destroy; others on books in damp situations, and some on man or animals labouring under certain diseases. In 1853 Lindley enumerated 598 genera, and conjectured that 4,000 species might have been described, which is probably but a small proportion of those actually existing. They abound in cold damp climates more than in the hotter parts of the world. The alliance is divided into six orders, with the following characters:—

(1) Hymenomycetes or Agaricaceæ. Spores generally quaternate, on distinct sporophores, hymenium naked.

(2) Gasteromycetes or Lycoperdaceæ. Spores generally quaternate, on distinct sporophores, hymenium enclosed in a peridium.

(3) Concomycetes or Uredinaceæ. Spores single, often septate, on more or less distinct sporophores, flocci of the fruit obsolete or mere peduncles.

(4) Hyphomycetes or Botrytaceæ. Spores naked, often septate; thallus floccose.

(5) Ascomycetes or Helvellaceæ. Sporidia contained (generally eight together) in asci.

(6) Physomycetes or Mucoraceæ. Spores surrounded by a vesicular veil or sporangium; thallus floccose.

2. *Palæobot.*: Fungi have been found as early as the Carboniferous period.

fung-ar, fung-er, *s.* [A Scotch pronunciation of *whinger* or *hanger* (q.v.).] A whinger or hanger.

"For persewyng & stryking him with ane drawin *fungar*."—*Aberd. Reg.* (1538), v. 16.

* **fŭng'e,** *s.* [Lat. *fungus* = a mushroom.]

1. A mushroom. (*Wright.*)

2. A soft-headed fellow; a fool; one who has no more sense than a toadstool has substance.

"When, as indeed, in all wise men's judgments . . . they are mad, empty vessels, *funges*."—*Burton: Anat. of Melancholy*, p. 113.

fŭn'-gī, *s. pl.* [Pl. of Lat. *fungus* (q.v.).]

Bot. & Ord. Lang.: A large order of flowerless plants founded by Linnæus, a part both of his artificial and of his natural classifications. It was adopted by Jussieu in 1789, is still often used by scientific men, and has crept into ordinary English. The old order Fungi has now been elevated into the alliance Fungales (q.v.). [FUNGUS.]

fŭn'-gĭ-a, *s.* [From Lat. *fungus* = a mushroom, from a certain superficial resemblance which the polypidom has to the pileus (head) of an Agaricus or a similar fungus.]

Zool.: A genus of corals, the typical one of the family Fungidæ (q.v.). When young there are generally only about six calcareous lamellæ, when old there are many.

fŭn'-gĭ-ble, *s.* [Lat. (*res*) *fungibilis*; from *fungor* = to perform.] [FUNCTION.]

1. *Civil Law*: A thing of such a nature as that it may be replaced by another of equal quantity and quality.

"Grain and coin are *fungibles*, because one guinea, or one bushel or boll of sufficient merchantable wheat, precisely supplies the place of another."—*Erskine: Inst.*, bk. iii., tr. i., § 18.

2. *Scots Law*: A term used to denote movable goods which may be valued by weight or measure, as grain or money; in contradistinction to those which may be judged of individually.

fŭn'-gĭc, *a.* [Eng., &c. *fung(us)*; *-ic* (*Chem.*).] Contained in or obtained from fungi.

fungic acid, *s.*

Chem.: An acid contained in the juice of most fungi. It is said to be a mixture of citric, malic, and phosphoric acid.

fŭn'-gĭ-dæ, *s. pl.* [Lat. *fung(ia)* (q.v.), and fem. pl. adj. suff. *-idæ.*]

1. *Zool.*: A family of corals, sub-tribe Aporosa. The corolluin is simple or compound, usually discoidal or laminar, the interseptal loculi are crossed by many trellis-like bars; the wall, which is often basal, is generally perforated.

2. *Palæont.*: Except a doubtful genus from the Silurian rocks, no fungidæ have been found earlier than the Oolite; they are found also in the Chalk and in the Tertiary rocks.

fŭn'-gĭ-form, *a.* [Lat. *fungus* (genit. *fungi*) = a mushroom, and *forma* = appearance.]

Min., Bot., &c.: Having a termination resembling the head of a fungus.

fŭn-gĭl'-lĭ-form, *a.* [Low Lat. *fungillus* (genit *fungilli*) = a little mushroom, and Lat. *forma* = appearance.]

Min., Bot., &c.: The same as FUNGIFORM (q.v.).

fŭn'-gĭn, *s.* [Eng. &c. *fung(us)*; *-in* (*Chem.*).]

Chem.: Metacellulose. A variety of cellulose found in fungi and lichens. It is insoluble in ammonio-cupric reagent, even after the action of acids. (*Watts: Dict. Chem.*, supp. iii.) [VEGETABLE TISSUES.]

fŭn'-gĭn-oŭs, *a.* [Lat. *funginous* = a mushroom.]

Bot.: Of or belonging to a fungus.

† **fŭn'-gīte,** *s.* [Lat. *fung(us)* = a mushroom; *-ite* (*Palæont.*).]

Palæont.: A fossil coral resembling fungia

fŭn-gĭv'-ŏr-oŭs, *a.* [Lat. *fungus* (genit *fungi*) = a mushroom, *voro* = to eat, to feed on, and *-ous.*] Feeding on mushrooms or fungi.

"This *fungivorous* mania is noteworthy."—*Daily Telegraph*, Nov. 13, 1883.

fŭn-goĭd, *a.* [Lat. *fungus* = a mushroom, and Gr. εἶδος (*eidos*) = form, appearance.] Resembling a fungus, pertaining to or consisting of a fungus or fungi.

"Some twelve or fifteen years ago the Indian Government inaugurated an investigation of the question as to the causal connection of *fungoid* organisms with cholera."—*Pall Mall Gazette*, Nov. 2, 1883.

fungoid-flowers, *s. pl.*

Bot.: Rhizogens (q.v.).

fŭn-gŏl'-ŏ-gĭst, *s.* [Lat. *fungus* = a mushroom, ; Gr. λόγος (*logos*) = a discourse; Eng suff. *-ist.*] One who is skilled in fungology.

"Two or three of the best known *fungologists* in London being among them."—*Daily Telegraph*, Oct. 16, 1883.

fŭn-gŏl'-ō-ğy, *s.* [Lat. *fungus* = a mushroom, and Gr. λόγος (*logos*) = a discourse.] A treatise on fungi; the science of fungi; mycology.

* **fŭn-gŏs'-ĭ-tў,** *s.* [Lat. *fungosus* = full of holes, spongy, fungous.] The quality of being fungous, or consisting of fungous excrescences.

"Eggs cast into the matrix of the earth, or certain little pustules or *fungosities* on its surface."—*Bibloth. Bibl.* (1720), I. 292.

fŭn'-gŭs, *a.* [Lat. *fung(us)*, and Eng. &c. suff. *-ous.*] Of or belonging to a fungus, of the consistence of a fungus.

"There the turf
Smells fresh, and, rich in odoriferous herbs
And *fungous* fruits of earth, regales the sense."
Cowper: Task, I. 532.

fŭn'-gŭs, *s.* [Lat. = a mushroom; cogn. with Gr. σφόγγος (*sphonggos*), σπόγγος (*sponggos*) = a sponge.]

1. *Bot.:* The singular of Fungi (q.v.). A term of comprehensive meaning, used for any plant belonging to the Fungal alliance, and in the same sense by the ordinary modern public. Some botanists now use the term Fungal (q.v.) instead of fungus. [FUNGI.]

2. *Med.:* A morbid growth suggestive of a fungus, and generally dependent on the presence of vegetable parasites.

"This eminence is composed of little points called *fungus* or proud flesh."—*Sharp.*

fungus-bed, *s.*

Bot.: A "bed" for the growth of microscopic fungi. It consists of a small wooden box half filled with damp bog earth, and covered with a plate of glass. In winter it should be kept in a warm room. (*Griffith & Henfrey.*)

fungus-cellulose, *s.*

Bot.: The cellulose of which the cell-wall of fungi is composed. It is very rarely colored blue by iodine and sulphuric acid. (*Thomé.*)

fungus-hæmatodes, *s.*

Pathol. & Surg.: A disease akin to and yet not quite identical with cancer, first described by Mr. John Burns in 1800 under the name Spongoid Inflammation, and then by Mr. Hey, of Leeds, in 1809, under the designation hæmatodes. The first word suggests that its growth is like that of a fungus; the second that it is bloody. It may appear in any part of the body, and may be encysted, irregularly compacted with cysts, or infiltrated in the tissue of an organ. From the resemblance which the tumour has to the brain it has been called cerebriform and cephaloid. It affects children more frequently than adults, and is generally fatal within two years, if not at an earlier period. The extirpation of the fungus in many cases fails to save the life.

fungus-melltensis, *s.*

Bot. & Pharm.: A plant (*Cynomorium coccineum*), sometimes used as a styptic.

fungus-pit, *s.* A pit in which fungi are grown.

fŭn'-ĭ-cle, *s.* [Lat. *funiculus* = a small cord; *funis* = a cord, a string.]

Bot.: The same as FUNICULUS, II. (q.v.).

fu-nĭc'-u-lăr, *a.* [Lat. *funicul(us)* = a small cord; *-ar.*]

I. *Ord. Lang.:* Consisting of a small cord or rope; formed by an aggregation of cords.

II. *Technically:*

1. *Mech.:* Dependent upon the tension of a cord.

2. *Archæol.:* Rope-shaped, twisted like a rope.

"Simple indeed as is the usual style of ornament and workmanship of the *funicular* torc, it appears to have been retained in use for a very long period."—*Wilson: Prehistoric Scotland*, i. 465.

funicular curve, *s.*

Statics: The curve in which a perfectly flexible string hangs when supported at the two extremities.

funicular-machine, *s.* A machine actuated by means of a cord whose ends are attached to two objects, and which bears a weight suspended from the bight. Some double-toggle presses come within the terms of this description. The name is principally applied to instruments illustrative of mechanical principles, and having a rope, pulley, and suspended weights.

funicular-polygon, *s.*

Statics: The figure assumed by a string supported at its extremities, and acted on by several forces.

fu-nĭc'-u-lātc, *a.* [Mod. Lat. *funiculatus*, from Class. Lat. *funiculus* (q.v.).]

Zool.: Having a narrow ridge like a string.

fu-nĭc'-u-lŭs (pl. **fu-nĭc'-u-li**), *s.* [Lat. = a little cord.]

I. *Anatomy:*

1. The umbilical cord whereby the fœtus is connected with the placenta, or after-birth.

2. A number of nerve-fibres, inclosed in a tubular sheath, and forming a slender round cord of no determinate dimensions. (*Quain.*)

II. *Bot.:* A cord connecting a seed with the placenta. [FUNICLE.]

III. *Zool.:* A curious cylindrical appendage passing from the testis to the fundus of the stomach in the polyzoa.

fu-nĭl'-ĭ-form, *a.* [Lat. *funis* = a rope, and *forma* = form, shape.]

Bot.: Formed of cord-like fibres.

fŭn'-ĭs, *s.* [Lat. = a rope.]

Anat.: The umbilical cord; the navel string.

fŭnk, *s.* [Etym. doubtful; cf. Ger. *funke*; Dut. *vonk* = a spark; Walloon *funki*, *funker* = to smoke.]

1. A stink; an offensive or overpowering smell or smoke.

2. A state of fear or fright; a panic.

"If they find no brandy to get drunk,
Their souls are in a miserable *funk*."
Wolcot: P. Pindar, p. 59.

3. Touchwood. [PUNK.]

4. Anger; a huff.

fŭnk, *v.i.* & *t.* [FUNK, *s.*]

A. *Intransitive:*

* 1. To stink through fear. (*Vulgar.*)

2. To be in a state of funk; to shrink through fear.

3. To kick behind like a horse.

"Luke now, the beast's *funking* like mad, and then up again wi' his fore-legs like a perfect unicorn."—*M. Lyndsay*, p. 294.

4. To take offence; to be or become angry.

B. *Transitive:*

* 1. To envelop in offensive or overpowering smell or smoke.

"She *funks* Bashebia and her son to death."—*King: The Furmetary*, ch. iii.

2. To cause to shrink or quail through fear.

¶ *To funk off:* To throw off, by kicking and plunging.

"The horse *funkit* him *off* into the dub, as a doggie was rinnin' across."—*Blackwood's Magazine*, Nov., 1821, p. 893.

fŭnk'-īte, *s.* [Named after Baron Von Funck.]

Min.: A dark olive-green coccolite, classed by Dana under Sahlite. A variety of Pyroxene. It is from Gothland.

fŭnk'-ў, *a.* [Eng. *funk*; *-y.*]

1. Easily frightened; in a funk; timid.

"I do feel somewhat *funky*."—*Naylor: Reynard the Fox*, 46.

2. Inclined to kick out behind like a horse.

fŭn'-nĕl, * **fun-nell,** * **fon-el,** * **fun-ell,** *s.* [Etym. doubtful; cf. Bret. *founil* = a funnel; Wel. *ffynel* = an air-hole; Lat. *infundibulum*, from *in* = in, and *fundo* = to pour.]

I. *Ordinary Language:*

1. A conical vessel which terminates below in a spout, and used for conducting a liquid into a vessel which has a small opening.

"The gullet [the passage for food] opens into the mouth like the cone or upper part of a *funnell*, the capacity of which forms indeed the bottom of the mouth."—*Paley: Natural Theology*, ch. x.

2. The chimney of a steamship. It is of sheet-iron, and is carried to a sufficient height to assist the draught of the furnace. It is made telescopic in war-vessels, so as to be lowered beyond the reach of shot.

"The boilers [are placed] under the two *funnels*."—*D. Stevenson: Civil Engineering in N. America*, ch. iv

3. The pouring-hole of a mould; a gate, a tedge.

* 4. A pipe or passage of communication.

"Towards the middle are two large *funnels*, bored through the roof of the grotto, to let in light or fresh air."—*Addison.*

* 5. The throat.

"Some the long *funnel's* curious mouth extend,
Through which ingested meats with ease descend."
Blackmore: Creation, bk. vi.

II. *Zoology:*

1. A short wide cavity, into which the sac or stomach of the Pleurobrachiæ opens below.

2. A muscular tube formed by the uniting of the lateral margins of the epipodium or foot in the cuttle-fishes.

funnel-like, *a.* Like a funnel in shape; tapering.

funnel-net, *s.* A net shaped like a funnel; a tapering net.

funnel-shaped, *a.*

Bot. (*Of a calyx, corolla, &c.*): Having the tube obconical, gradually enlarging upwards with the limbs so as to constitute a funnel.

fŭn'-nĕl-form, *s.* & *a.* [Eng. *funnel*; *-form.*]

A. *As subst.:* The shape of a funnel.

B. *As adjective:*

Bot.: The same as FUNNEL-SHAPED (q.v.).

fŭn'-nĕlled, *a.* [Eng. *funnel*; *-ed.*] Having a funnel or funnels; funnel-shaped.

fŭn'-nĭ-lў, *adv.* [Eng. *funny*; *-ly.*] In a funny, droll, comical, or laughable manner.

fŭn'-nĭng, *a.* & *s.* [Eng. *fun*; *-ing.*]

A. *As adj.:* Jesting, droll, comical; causing fun or merriment.

B. *As subst.:* Jesting, joking.

fŭn'-nў, * **fun-nie,** *a.* [Eng. *fun*; *-y.*]

1. Droll, comical, laughable; causing mirth or laughter; full of merriment.

"Unco tales and *funnie* jokes."
Burns: Halloween, xxviii

2. Causing surprise; strange, curious.

funny-bone, *s.* A popular name for that part of the elbow over which the ulnar nerve passes.

"He had merely received a blow on that part which anatomists call the *funny-bone*."—*Thackeray: Shabby-genteel Story*, ch. ix.

fŭn'-nў, *s.* [Etym. doubtful.]

Naut.: A narrow, clinker-built pleasure-boat, to be rowed by a pair of sculls.

"The only attainable craft besides *funnies*, pair-oars, and randans, were a couple of six-oars."—*Field*, Jan. 28, 1882.

* **fŭnt'-stōne,** *s.* [FONTSTONE.]

fū-or, *s.* [Etym. doubtful.]

Carp.: A piece nailed upon a rafter to strengthen it when decayed.

fŭr, fŭrr, *s.* [A.S. *furh.*] A furrow.

"The bauld Pitcur fell in a *furr*,
And Clavers got a clankie, O!"
Burns: Where Hae Ye Been?

fŭr (1), * **forre,** * **furre,** *s.* & *a.* [O. Fr. *forre, fuerre* = a sheath, a case; from an Old Low Ger. source: cf. Goth. *fodr* = a scabbard; Icel. *fóðr* = lining; Fr. *fourrure* = fur, *fourreau* = a scabbard.]

A. *As substantive:*

I. *Ordinary Language:*

1. The soft fine hair growing thick upon certain animals, and distinguished from ordinary hair in being shorter and finer. Fur, in its usual trade acceptation, is the short, fine hair of certain animals, growing thick on the skin, and deprived of the long, coarse, protecting hairs.

"Cold would the winter be, for thick was the *fur* of the foxes." *Longfellow: Evangeline*, i. 1.

2. The dressed skins of certain animals with soft, fine hair, with which garments are lined for warmth, or trimmed for ornament.

"Their arrow-heads are sharpened stones, or fish-bones, their thread being the sinews of certain small beasts, wherewith they sew their *furs* which clothe them."—*Milton: A Brief History of Muscovia.*

3. Any coating more or less resembling fur, as—

(1) A coat of morbid matter collected on the tongue.

"My pulse unequal, and my breath is strong;
Besides a filthy *fur* upon my tongue."
Dryden: Perseus, sat. iv.

(2) A coat or crust formed on the interior of vessels by matter deposited from a liquid.

(3) The soft, downy covering on the skin of a peach.

II. *Her.:* Furs in heraldry are borne on the

abield and charges. They are either of one or more colours. Furs of two colours are ermine, ermines, ermoia, peau, vair, vaire, varry, cuppa, and erminites. (See these terms.)

B. *As adj.:* Made of or pertaining to fur.

"December must be expressed with a horrid and fearful countenance; as also at his back a bundle of holly, holding in *fur* mittens the sign of Capricorn."—*Peacham: On Drawing.*

¶ Obvious compound, *fur-clad.* (*Cowper.*)

fur-cutter, *s.*

1. A machine for cutting the fur from the skin.

2. A mechanical contrivance for shaving the backs of peltry skins, to loosen the long hairs, leaving the fine fur undisturbed.

fur-dressing, *s.* The process of cleaning, cutting, and dyeing furs. The long hair that covers the fur is removed. The skins are placed on frames, and the inner surface pared off, until the roots of the hair are completely severed, while the roots of the fur remain untouched, on account of their nearness to the outside surface. The hair is then very easily removed, and the light yellow fur made ready for dyeing. Furs are dressed by greasing and tramping, or by beating in a fulling-mill, the skin being softened by the absorption of grease and the mechanical treatment. They are then wetted, fleshed, curried, tramped in vats with sawdust, and again with whitening to remove the grease. They are then beaten with a stick and combed.

fur-puller, *s.* A machine for removing from peltry skins long, straight hairs, before the fine hair is sheared off to furnish the material for felt. The skin is passed round the projecting edge of a bed, the tension of the skin being maintained by weights. As the skin is drawn forwards over the projecting edge of the bed, the long hairs stand out nearly at right angles, and are seized and extracted by ribs on a pair of revolving cylinders which are placed in front of the bed.

*** fur-wrought,** *a.* Made of fur.

"Silent along the mazy marsh stray,
And with the *fur-wrought* fly delude the prey."
Gay: Pastorals, c. i.

fŭr, *v.t.* [Fur, *s.*]

I. *Ordinary Language:*

1. To cover, line, or trim with fur.

"The original painted by himself [Cleeve] with a black cap and *furred* gown, upon a greenish ground."—*Walpole: Anecdotes of Painting,* vol. i., ch. vi.

2. To cover or coat with morbid matter, as the tongue, or the interior of vessels.

"To make lampblack, take a torch and hold it under the bottom of a latten bason and, as it groweth to be *furred* and black within, strike it with a feather into some shell."—*Peacham: On Drawing.*

II. *Carp.:* To nail pieces of timber to, as joists or rafters, in order to bring them into a level, and range them into a straight surface.

*** fŭr,** *a.* & *adv.* [Far.]

*** fu-rā'-cious,** *a.* [Lat. *furax* (gen. *furacis*), from *fur* = a thief.] Given to thieving; inclined to steal; thievish.

fu-răc'-ĭ-tў, *s.* [Lat. *furacitas,* from *furax* (gen. *furacis*) = thievish.] A disposition to steal; thievishness.

*** fur-age,** *s.* [Etym. doubtful.] Apparently, wadding.

"George Fleman fired a pistol in at the north side of the coach beneath his left arm, and saw his daughter dight of the *furage.*"—*Kirkton: History,* p. 416.

fŭr'-bĕ-lōw, *s.* [Fr. *farbala* = a flounce; Sp., Ital. & Port. *falbala,* a word of unknown origin.]

1. *Ord. Lang.:* A piece of stuff plaited and puckered together, either below or above, on petticoats and gowns; a flounce; the plaited border of a petticoat or gown.

"A *furbelow* of precious stones, a hat buttoned with a diamond."—*Addison: Spectator,* No. 15.

2. *Bot.:* A sea-weed, *Laminaria bulbosa;* or, according to Mrs. Gatty, *L. saccharina.* (*Britten & Holland.*)

*** fŭr'-bĕ-lōw,** *v.t.* [Furbelow, *s.*]

1. *Lit.:* To attach a furbelow to; to furnish or ornament with furbelows.

"She was flounced and *furbelowed;* every ribbon was crinkled, and every part of her garments in curl."—*Addison.*

2. *Fig.:* To deck out; to ornament.

"[You] *furbelow* the plain discourse."
Prior: Alma, ii.

*** fur-ber-y,** *s.* [Fourmery.]

fŭr'-bĭsh, * for-bysch-yn, * fro-bish, * frub-bish, *v.t.* [Fr. *fourbissant,* pr. par. of *fourbir* = to furbish, to polish; O. H. Ger. *furpjan;* M. H. Ger. *vürben.*]

1. *Lit.:* To rub to brightness; to polish up; to burnish.

"He commanded them to scour and *furbish* their harnesse and weapons before their tents."—*P. Holland: Livius,* p. 624.

2. *Fig.:* To prepare for fresh use something which has long lain disused. (Often followed by *up.*)

"Again they *furbish up* their holy trumpery."
Rowe: Lady Jane Grey, iii.

*** fŭr'-bĭsh-a-ble,** *a.* [Eng. *furbish; -able.*] That may or can be furbished up.

fŭr'-bĭsh-ĕr, * foor-bysch-owre, * for-bush-erc, * fro-bych-er, *s.* [Fr. *fourbisseur.*] One who furbishes, polishes, or brightens up by rubbing.

"*Foorbyschowre. Eruginator.*"—*Prompt. Parv.*

fŭr'-cāte, fŭr'-cāt-ĕd, *a.* [Lat. *furc(a)* = a fork; Eng. suff. *-ate, -ated.*]

Ord. Lang. & Bot.: Forked, dividing into two branches, like a two-pronged fork. (*Balfour.*)

fŭr-cāte'-lў, *adv.* [Eng. *furcate; -ly.*] In a forked manner.

furcately-divided, *a.*

Bot.: Divided in a furcate manner. (*Paxton.*)

fŭr-cā'-tion, *s.* [Lat. *furc(a)* = a fork; Eng., &c. suff. *-ation.*] A forking, a branching out like the prongs of a fork.

"When stags grow old they grow less branched, and first lose their brow-antlers, or lowest *furcations* next the head."—*Browne: Vulgar Errours,* bk. iii., ch. ix.

*** fŭr-çĭf'-ĕr-oŭs,** *a.* [Lat. *furcifer* = one bearing the furca or gallows, a gaol-bird; *furca* = (1) a fork, (2) an instrument of punishment placed on the neck of criminals, and *fero* = to bear.] Scoundrelly, rascally.

fŭr'-cu-la, fŭr-cu'-lŭm, *s.* [Lat. *furcula* = a forked prop to support a wall when undermined.]

Ornith.: The bone popularly called the merry-thought. It is composed of the two clavicles anchylosed together so as to form one bone, shaped like the letter V. Its outward extremities articulate with the scapula and coracoid.

fŭr'-cu-lar, *a.* [Eng., &c. *furcul(a); -ar.*]

Ord. Lang., Anat., &c.: Shaped like a fork, branching into two divisions; furcate.

fŭr'-cu-lŭm, *s.* [Furcula.]

*** fŭr'-dle,** *v.t.* [Fardel.] To make or draw up into a bundle; to pack up.

"The rose of Jerico, being a dry and ligneous plant, is preserved many years, and though crumpled and *furdled* up, yet, if infused in water, will swell and display its parts."—*Browne: Miscellanies,* p. 34.

*** fŭrd'-lĭng,** *s.* [Eng. *furdl(e); -ing.*] The act or process of drawing or gathering into a bundle.

"Nor to urge the thwart enclosure and *furdling* of flowers, and blossomes, before explication."—*Browne: Cyrus' Garden,* ch. iii.

*** fure,** *v.t.* [Flem. *voeren* = to carry.]

1. To carry, especially by sea.

"That the act of fraughting and lading of schippis, mycht be put till execution efter the tenour of the samin, and at na gudis be *furit* be the maister vpon his ouerloft."—*Acts Jas. III.,* 1487, c. cxxx. (ed. 1566).

2. To conduct, to lead.

"For thocht a man wald set his bissy curis,
Sae fur as labour used his wisdom *furis.*"
Bellenden: Everyreen, l. 33.

*** fur-fell,** *s.* [Eng. *fur,* and *fell* (2).] A skin with the fur on it.

fŭr'-fŭr, *s.* [Lat. = bran.] Scurf or dandriff, resembling bran, growing upon the head.

"Leprosy, ulcers, itches, *furfures,* scabs."—*Burton: Anat. of Melancholy,* p. 231.

fŭr-fŭr-ā'-çē-oŭs (or **ceous** as **shŭs**), *a.* [Lat. *furfuraceus,* from *furfur* = bran.]

I. *Ord. Lang.:* Made of or resembling bran; of the nature of bran.

II. *Technically:*

1. *Pathology:*

(1) Resembling bran. A name given to eruptions in which the epidermis is detached in small scales resembling bran.

(2) A bran-like sediment observed at times in the urine.

2. *Bot.:* Scurfy; covered with soft scales, which are easily displaced.

fŭr-fŭr-a-crўl'-ĭc, *a.* [Lat. *furfur* = bran, and Eng., &c. *acrylic.*] For def. see compound.

furfuracrylic-acid, *s.*

Chem.: $C_4H_3O{\cdot}CH = CH{\cdot}CO{\cdot}OH$. Metameric with salicylic acid. It is obtained by boiling one part of furfural with four parts of acetic anhydride and two parts of sodium acetate for eight hours. The solution on cooling deposits a crystalline mass which dissolves in sodium carbonate, and on the addition of acid gives a precipitate of furfuracrylic acid which is obtained in white needles by recrystallization with animal charcoal. It melts at 135°. Strong sulphuric and hydrochloric acids turn it green.

fŭr'-fu-răl, *s.* [Lat. *furfur* = bran, and Eng., &c. *al(dehyde).*]

Chem.: $C_5H_4O_2$, or $\begin{matrix} HO-C=C-CO{\cdot}H. \\ \quad\quad | \quad\quad | \\ \quad\quad HC=CH. \end{matrix}$

Furfurol, the aldehyde of pyromucic acid. It is formed in the dry distillation of sugar, or by distilling bran with dilute sulphuric acid. One part of bran is distilled with one part of sulphuric acid diluted with three parts of water. The distillate is neutralized with soda, chloride of sodium is added, and then half of it is distilled over. It is then saturated with NaCl, which causes the furfural to separate as an oil. Furfural is a colourless liquid with an agreeable smell, resembling that of bitter almonds; it turns dark on exposure to the air; it boils at 162°; is very soluble in alcohol, and dissolves in eleven parts of water at 13°. It forms a crystalline compound with acid sodium sulphite, and is converted by sodium amalgam into furfuryl alcohol, $C_5H_6O_2$. By oxidation with silver oxide it yields pyromucic acid, and by nitric acid it is oxidized into oxalic acid.

fŭr'-fŭr-a-mīde, *s.* [Lat. *furfur* = bran and Eng., &c. *amide.*]

Chem.: $C_{15}H_{12}N_2O_3$, or $(C_5H_4O)'3N_2$. An amide produced by the action of an aqueous solution of ammonia on furfural. It crystallizes from hot alcohol in colourless needles, which melt at 117°. It is soluble in alcohol and in ether, but insoluble in cold water. When boiled with water, or with acids, it is decomposed, yielding furfural and NH_3.

fŭr-fŭr-ā'-tion, *s.* [Eng. *furfur* (q.v.); *-ation.*]

Ord. Lang. & Path.: The falling of scurf or dandriff from the head.

fŭr'-fŭr-ĭne, *s.* [Lat. *furfur* = bran; *-ine* (*Chem.*).]

Chem.: An organic base isomeric with furfuramide, from which it is obtained by boiling with dilute aqueous potash, or by heating it to 120°. It forms crystals, which melt at 116°. It is sparingly soluble in cold water, easily soluble in alcohol and in ether. Its solution is strongly alkaline, and forms salts with acids, which have a bitter taste.

fŭr-fu-rō-bĕn'-zĭ-dĭn, *s.* [Eng. *furfuro(l),* and *benzidin.*]

Chem.: $C_{12}H_8\,(N{\cdot}C_5H_4O)_2$. Obtained by allowing a solution of one part of furfurol and one part of benzidin in fifty parts of alcohol stand for twelve hours. It forms small light yellow crystals which are insoluble in water, slightly soluble in cold alcohol, soluble in benzene. Unites with acids to form salts which, in solution, are of a carmine-red colour

fŭr'-fu-rŏl, *s.* [Furfural.]

fŭr-fŭr-ō-prō-pĭ-ŏn'-ĭc, *s.* [Eng. *furfuro(l),* and *propionic.*] For def. see etym. and compound.

furfuropropionic-acid, *s.*

Chem.: $C_3H_3O{\cdot}CH_2{\cdot}CH_2{\cdot}CO{\cdot}OH$, formed by the action of nascent hydrogen from sodium amalgam and water on furfuracrylic acid, than which it is more soluble in water. It is extracted by ether from its aqueous solution, and is a colourless crystalline mass, melting at 51°. Hydrochloric acid turns it yellow.

*** fŭr'-fŭr-oŭs,** *a.* [Lat. *furfurosus.*] Made of or resembling bran; furfuraceous: as, *furfurous* bread.

fŭr'-fŭr-yl, *s.* [Lat. *furfur* = bran; *-yl* = Gr. ὕλη (*hulē*) = matter.]

Chem.: For def. ace etym. and the compound.

furfuryl-alcohol, *s.*

Chem.: $C_5H_6O_2$. A thick colourless syrup, which is coloured green by hydrochloric acid. It is decomposed when distilled. Obtained by the action of sodium amalgam or furfural.

fŭr-fŭr-yl'-a-mīne, *s.* [Eng. *Furfuryl*, and *-amine.*]

Chem.: A base obtained by the action of zinc and sulphuric acid on the nitril of pyromucic acid. It is a liquid smelling like Coniine, boiling at 145°, and soluble in water.

*** fŭr'-i-al, * fur-y-alle,** *a.* [Lat. *furialis.*] [Furv.] Furious, raging.

"Ye hen in the *furyalle* peyn of helle."
Chaucer: C. T., 10,761.

*** fŭr'-i-bŭnd,** *a.* [Lat. *furibundus*, from *furio* = to rage.] Raging; furious.

"The brawny, not yet *furibund* figure."—*Carlyle: French Revolution*, pt. i., bk. iv. ch. iv.

*** fŭr'-i-bŭnd-al,** *a.* [Lat. *furibundus.*] Raging, furious, mad.

"The *furibundal* champion of fame."—*G. Harvey* (1,593).

Furies, *s. pl.* [Fury.]

fŭr'-il, *s.* [*Fur(furol)*; suff. *-il.*]

Chem.: $C_{10}H_6O_4$, or $C_4H_3O{\cdot}CO{\cdot}CO{\cdot}C_4H_3O$. Obtained by dissolving Furoin caustic soda solution and passing air through it. It crystallizes out of chloroform in golden yellow needles, which are nearly insoluble in water, and slightly soluble in cold alcohol and ether. By the action of sodium amalgam it is reduced to Furoin.

fūr-i-ōs'-ant, *a.* [Ital. *furioso* = furious.]

Her.: An epithet applied to a bull or other animal when represented as in a rage or fury; also called Rangant (q.v.).

*** fūr-i-ōs'-i-ty, * fur-i-os-i-te,** *s.* [Eng. *furious*; *-ity.*] The quality or state of being furious; fury; madness.

"That in tyme to cum the said breife be reformit, and a clauss put tharin to inquere of the foly and *furiosite*, &c."—*Acts Jas. III.*, 1475 (ed. 1814), p. 112.

fūr-i-ō'-sō, *adv. & s.* [Ital.]

A. *As adverb:*

Music: With fury, energy or vehemence.

*** B.** *As subst.:* A furious or impetuous man.

"A violent man and a *furioso* was deaf to all this."—*Bucket: Life of Williams*, ii. 218.

fūr'-i-oŭs, * fur-y-ous, *a.* [Fr. *furieux*, from Lat. *furiosus*, from *furia* = madness; Sp. Port. & Ital. *furioso.*]

1. Mad, frenzied; deprived of one's senses.

"No man did ever think the hurtful actions of *furious* men and innocents to be punishable."—*Hooker: Eccles. Polity.*

2. Raging; violent; transported with fury or passion; frantic.

"Whet not on these *furious* peers."
Shakesp.: 2 *Henry VI.*, ii. 1.

3. Rushing with vehemence or impetuosity; boisterous: as, a *furious* torrent.

¶ For the difference between *furious* and *violent*, see Violent.

fūr'-i-oŭs-ly, * fur-i-ous-lie, *adv.* [Eng. *furious*; *-ly.*] In a furious manner; with fury; madly, frantically; impetuously, violently, vehemently.

"So staies the streme when *furiously* it flouth."
Gascoigne: Dan Bartholomewe of Bath

fūr'-i-oŭs-nĕss, * fur-i-ous-nesse, * fur-y-ous-nes, *s.* [Eng. *furious*; *-ness.*] The quality or state of being furious; fury; frenzy; madness, impetuosity; transport of passion.

"Thou shalt stretche forth thyne hande upon the *furyousnes* of thine enemyes."—*Bible* (1551), *Ps.* cxxxviii.

fŭrl, * farle, * furle, *v.t. & i.* [A contract. of *furdle* (q.v.).]

A. *Transitive:*

1. *Naut.:* To roll a sail and confine it to the yard. The sail being gathered by the men on the yard, the leech is passed along the yard to the hunt, where the body of the sail, the foot and clews, are collected.

"The order those attend
To *furl* the mainsail, or on deck descend."
Falconer: Shipwreck, ii.

2. To roll or gather up anything. (*Dryden: Absalom & Achitophel*, ii. 837.)

B. *Intrans.:* To roll or gather together; to become furled.

"The banners drooped along their staves
And as they fell around them *furling.*"
Byron: Siege of Corinth, ii.

¶ *To furl a top-sail in a body:*

Naut.: To gather all the loose parts of the top-sail into the bunt above the top-mast.

fŭr'-lŏng, * four-long, * fur-lange, *s.* [A.S. *furlang*, lit., a furrow-long, or the length of a furrow; *furh* = a furrow, and *lang* = long.]

*** I.** Originally of vague meaning: the length of a furrow, whatever that might happen to be.

"A *furlong* comes next to be considered, so called *quasi* furrow-long, being so much as a team plougheth going forward, before they return back again."—*Fuller: A Pisgah Sight of Palestine*, p. 41.

2. A measure of length; the eighth part of a mile, equal to forty rods, poles, or perches, or two hundred and twenty yards.

"A *furlong* is the eyghte part of a myle and contayneth a hundreth and xxv. passes, which is in length vi. hundreth and xxv. fote."—*Bale: Image*, pt. iii.

fŭr'-lōugh (*gh* silent), *** fur-loe,** *s.* [Dut. *verlof* = leave, furlough; Dan. *forlov*; Sw. *förlof*; Ger. *verlaub.*] Leave of absence; specif., a license given to a soldier to be absent from duty for a certain time.

"He has got a *furlough* from his father for a year."
—*Chesterfield: Miscell. Works*, vol. iv., let. 42.

fŭr'-lōugh (*gh* silent), *v.t.* [Furlough, *s.*] To grant a furlough to; to grant leave of absence to.

furm, *s.* [Form, *s.*]

fŭr'-mĕn-tў, fŭr'-mĭ-tў, *s.* [Frumenty.]

fŭr'-mĕr, *s.* [O. Fr. *fremoir.*] The name given by carpenters in Scotland to the tool called in England a flat chisel.

fŭr'-nace (ace as ĕs), * for-nayse, * for-neys, * for-nes, *s.* [O. Fr. *fornaise*; Fr. *fournaise*, from Lat. *fornax* (genit. *fornacis*) = an oven, from the same root as *formus* = hot; Ital. *fornace.*]

I. *Lit.:* A chamber in which fuel is burned for the production of heat. The two great ends to be attained in the construction of furnaces are, first, to produce as perfect a combustion of the fuel as possible; and secondly, to apply as much as possible of the heat so developed effectively. These two requirements for a good furnace are, however, not so easily satisfied. Much remains to be acquired as to the conditions under which the whole of the calorie may be perfectly developed from the fuel, although the best manner of applying the heat is well understood. [Blast-furnace, Reverberatory-furnace.]

"As iron fusile from the *furnace* flows."
Erome: Battle of the Gods & Titans.

2. *Fig.:* Any time, place, or occasion of severe trial or torture; as, the *furnace* of affliction.

furnace-bar, *s.* A fire-bar (q.v.).

furnace-bridge, *s.* A barrier of fire-bricks, or of iron plates containing water, thrown across the furnace at the extreme end of the fire-bars, to prevent the fuel being carried into the flues, and to quicken the draft by contracting the area.

*** furnace-burning,** *a.* Hot, like a furnace.

"My *furnace-burning* heart."
Shakesp.: 3 *Henry VI.*, ii. 1.

furnace cadmia, furnace calamine, *s.*

Metall.: An incrustation of oxide of zinc, with impurities, which forms round the throat of an iron furnace.

furnace-grate, *s.* The bars supporting the fuel in a furnace. [Grate.]

furnace-hoist, *s.* An elevator for raising the ore, lime, and coal to the mouth of a blast-furnace.

furnace-pumice, *s.*

Metall.: A slag often produced in smelting pisolitic iron ores, having the cellular appearance of pumice-stone.

*** fŭr'-nace (ace as ĕs),** *v.t.* [Furnace, *s.*]

I. To cast into a furnace.

"It has been proposed instead of *furnacing* the sulphate of soda, to decompose it by caustic baryta."—*Graham: Chemistry* (2nd ed.), i. 561.

2. To exhale like a furnace.

"He *furnaces*
The thick sighs from him."
Shakesp.: Cymbeline, i. 6.

fŭr-na-rī'-næ, *s. pl.* [Mod. Lat. *furnarius* (q.v.), and Lat. fem. pl. adj. suff. *-inæ.*]

Ornith.: A sub-family of Certhidæ (Creepers) The outer toe is not much longer than the inner one, and but slightly united at the base, the inner one is entirely free. The sub-family consists of small birds occurring in South America and the West Indies.

fŭr-nār'-i-ŭs, *s.* [Lat. = a baker.]

Ornith.: The typical genus of the sub-family Furnarinæ (q.v.). *Furnarius fuliginosus* is noted for its tameness.

*** fur-neye,** *v.t.* [O. Fr. *furnir, fornir*; Fr. *fournir* = to furnish (q.v.).] To furnish, to prepare, to provide.

"*Furneye* a tree, stiff and strong."
Richard Cœur de Lion, 5,517.

*** fŭr'-ni-mĕnt, * fŭr'-na-mĕnt,** *s.* [Fr. *fournument* = a stand of arms; *fournir* = to furnish.] Furnishing, furniture, equipment.

"Lo! where they stryde with speedie whirling pace,
One in a charet of straunge *furniment.*"
Spenser: F. Q., IV. iii. 38.

fŭr'-nĭsh, *v.t. & i.* [Fr. *fournissant*, pr. par. of *fournir* = to furnish, from O. H. Ger. *frumjan* = to perform, to furnish, *fruma* = utility, profit, gain; Sp. & Port. *fornir*; Ital. *fornire.*]

A. *Transitive:*

1. To supply with what is necessary or useful; to equip; to fit out.

"'Tis now but four o'clock; we have two hours
To *furnish* us."
Shakesp.: Merchant of Venice, ii. 4.

3. *Music:* The name of one of the mixture stops in an organ. [MIXTURE.]

4. *Naut.:* The masts and rigging of a ship.

5. *Print.:* The sticks and quoins which surround the matter in the chase. The pieces are about half an inch high, of various lengths, and are called head, foot, or side sticks, according to their position in the chase. Strips between the pages are gutters. The sticks are slightly tapering, so as to allow the wedge-shaped quoins to jam the matter firmly together in the chase.

furniture-car, furniture-van, *s.* A large covered vehicle specially designed for transporting household goods.

furniture-spring, *s.* A coil spring beneath the hair filling which forms the seat, back or side of a cushioned chair. A spring of a bed-bottom beneath a mattress, or forming the lower portion of one beneath the elastic material which constitutes the top.

fūr-ō-ĭn, *s.* [Eng. *Fur(furol);* *o* connective, and suff. *(Chem.)* *-in.*]

Chem.: $C_{10}H_8O_4$, or $C_4H_3O{\cdot}CO{\cdot}CH(OH)$, C_4H_3O. Obtained by boiling for half an hour a mixture of forty parts furfurol with thirty parts of alcohol, eighty parts of water, and four parts of KCN. It crystallizes in fine prisms, which melt at 135°. Slightly soluble in ether and alcohol, soluble in hot water and in hot toluene. It dissolves in H_2SO_4 with an intense blue-green colour. It is soluble in caustic soda solution, forming blue-green liquid, which is dark red by reflected light; it becomes colourless when exposed to the air, furil being formed.

fu-rō'le, *s.* [Fr.] A kind of meteoric light seen on the sail-yards of ships at night; a corposant (q.v.).

fu-rŏn'-ĭc, *a.* [Lat. *fur(fur)* = bran, and Eng. *(propi)onic.*] For def. see etym. and compound.

furonic-acid, *s.*

Chem.: $HO{\cdot}OC{-}CH = CH{\cdot}CO{\cdot}CH_2{\cdot}CH_2{\cdot}CO{\cdot}OH$ or $C_7H_8O_5$. Obtained by decomposing the silver salt with hydrochloric acid, extracting with ether, and recrystallizing from hot water. Furonic acid forms colourless needles which melt at 180°, and are slightly soluble in cold water and in ether.

furonic-aldehyde, *s.*

Chem.: $C_7H_8O_4$. Obtained by the action of bromine and furfurpropionic acid. By boiling the mixture with Ag(OH) moist silver oxide, it is converted into the silver salt of furonic acid.

***fū'-rŏr,** *s.* [Lat.] Rage, fury, madness.

"He doubted much some inundation by their *furor* over all Italy."—*Sir T. Wyatt: To the King,* March 9, 1540.

"*Fuse* we alle to somne." *Layamon*, III. 101.

B. *Trans.:* To hasten, to get ready.

"Brutus . . . hem to scipe *fusede*." *Layamon*, I. 64.

fūşe (1), *s.* [A shortened form of *fusee* (2) (q.v.).] A tube or casing filled with combustible material, and used for igniting a charge in a mine or a hollow projectile. The invention was undoubtedly contemporaneous with that of hollow projectiles. The following are the principal varieties of fuses in use:—

(1) The *Bickford-fuse:* Used for mining and submarine purposes. It consists of a small linen tube filled with gunpowder, the whole being covered with pitch. It burns at the rate of one yard in seventy seconds.

(2) The *Blasting-fuse*, used in mining and quarrying. It is filled with a slow-burning composition, allowing time for the operatives to reach a place of safety before it burns down to the charge. It is also used for submarine blasting.

(3) The *Combination-fuse*, for hollow projectiles, comprises a time-fuse and a percussion or concussion-fuse united in the same case. The former is designed to explode the charge in case the latter fails to act on striking. Another form is that in which the time fuse explodes the percussion-fuse. This variety is used with such explosives as dynamite and gun-cotton.

(4) The *Concussion-fuse*, for hollow projectiles; designed to explode the charge when the shell strikes an object.

(5) The *Delayed-action-fuse*, for use with common shell against earthworks. It causes the projectile to explode four seconds after impact.

(6) The *Electric-fuse* is one adapted to be ignited by the passage of an electric spark through it.

(7) The *Percussion-fuse* embraces a capsule charged with fulminate, which is exploded by a plunger or its equivalent, when the projectile strikes. The plunger is held by a pin sufficiently strong to keep it in place in case of a fall, yet weak enough to be severed by the shock of striking.

(8) The *Safety-fuse* is a cord or ribbon-shaped fuse filled with a fulminating or quick-burning composition, and sufficiently long to be ignited at a safe distance from the chamber where the charge is placed.

(9) The *Tape-fuse* is a safety-fuse, so called from its shape.

(10) The *Time-fuse* is one which is adapted either by cutting off a portion of its length or by the character of its composition to burn a certain definite time.

fuse-cutter, *s.* An instrument for gauging time-fuses to the desired seconds and fractions.

fuse-extractor, *s.* An implement designed for extracting wooden fuses from shells. It has jaws which grasp the fuse while the lower part of the extractor rests upon the shell. The jaws are attached to a screw which works in a screw-socket in the body of the extractor, and has an iron lever passing through its head. The jaws being clasped around the projecting part of the fuse, it is drawn by turning the lever.

fuse-lock, *s.*

Min.: A spur on the spring attaches the lock to the fuse when the hammer is set. The dog is pulled by a long cord from a distant position of safety, releasing the hammer, which explodes the cap and lights the fuse.

fuse-saw, *s.* A tenon-saw used by artillery-men.

fuse-setter, *s.* An implement for driving home wooden fuses. It consists merely of a cylinder of wood or brass, with a recess at the end fitting the end of the fuse, which is driven into place by a mallet.

fuse-tape, *s.* A flat form of fuse, coated externally with pitch or tar, and served to prevent the coating from cracking, or covered with two warps and an interposed lap of cotton. Other forms might be noticed.

* **fūse** (2), **fu-şeō'** (1), *s.* [Etym. doubtful.] The track of a deer in the grass; any track.

"To trace those old Bishops in their *fuse*."—*Hacket: Life of Williams*, i. 14.

fu-şeē' (2), *s.* [A corruption of *fusel* or *fusil* (q.v.).]

* 1. A firelock; a small, neat musket.

* 2. A fuse (q.v.).

3. A kind of match for lighting a pipe, a cigar, &c.

fu-seē' (3), * **fu-zy,** *s.* [Fr. *fusée* = a spindle full of thread, from Low Lat. *fusata*, from *fusus* = a spindle.]

Hor.: A conical pulley used in connection with a spring, and designed to equalize the power of the latter. The spring is coiled within the barrel, and when fully wound up and at its greatest tension, the chain is wound upon the fusee and draws upon its smaller portion. As the fusee unwinds, by the motion of the train of gearing in the watch, the spring also uncoils and loses a part of its tension; as this proceeds, the chain draws upon a larger portion of the fusee, and attains an increased leverage on the latter to counterbalance the decreased power of the spring. The object is to obtain an equal power at all times, so that the watch may run regularly. The first wheel of a watch is attached to the fusee.

fusee-engine, *s.*

Hor.: A fusee-machine (q.v.).

fusee-machine, *s.*

Hor.: A machine for cutting the snail-shaped or spirally grooved wheel on which the chains of certain descriptions of watches are wound. It was invented by Dr. Hooke about 1655. It is interesting as being the first machine in which change-wheels were used, and is the germ of the screw-cutting lathe.

fusee-windlass, *s.* A pump-windlass with a conical barrel.

fū'-şel, *s.* [Ger. *fusel* = spirits of inferior quality.] (See the compound.)

fusel-oil, fuselol, *s.*

Chem. & Comm.: An oily product formed during the fermentation of potatoes, corn, and the juice of grapes. This is separated in the rectification of the spirit, occurring in the last part of the distillate as an acrid, oily liquid, having a peculiar odour and burning taste; it is poisonous, producing headache and nervous depression. The fusel-oil contained in potato spirit consists chiefly of ethylic and amylic alcohols. But that derived from other sources consists of a mixture of amylic alcohol with other alcohols and fatty acids. Thus propyl alcobol occurs in the fusel-oil obtained in the distillation of brandy from wine; isobutyl alcohol is the fusel-oil obtained by fermenting the molasses of beet-root sugar. Fusel-oil is removed by wood charcoal from spirits. It can be detected by rubbing some brandy, whisky, &c., on the hands and allowing the ethyl alcohol to evaporate, when the smell of fusel-oil can be recognised.

"Spirit so distilled from corn contains *fusel-oil*."—*Times*, Feb. 1, 1876.

fūş-ĭ-bĭl'-ĭ-tў, *s.* [Eng. *fusibl(e); -ity.*] The quality of being fusible; capability of being fused.

"The alloys of bismuth are remarkable for their *fusibility*. The amalgam of this metal is liquid."—*Graham: Chemistry*, ii. 249.

fūş'-ĭ-ble, *a.* [Fr., from Low Lat. *fusibilis*, from *fusus*, pa. par. of *fundo* = to pour, to melt.] Capable of being fused or melted; that may or can be melted or liquefied.

"The consistent phosphorus is *fusible* enough."—*Boyle: Works*, iv. 475.

fusible-alloy, *s.* An alloy, usually of lead, tin, and bismuth, compounded in such definite proportions as to melt at a given temperature.

fusible-calculus, *s.*

Pathol., Chem., &c.: A kind of urinary calculus easily fused by the blow-pipe.

fusible-metal, *s.* [Fusible-alloy.]

fusible-plug, *s.* A plug placed in the skin of a steam-boiler, so as to be melted and allow the discharge of the contents when a dangerous heat is reached.

fusible-porcelain, *s.* A silicate of alumina and soda obtained from cryolite and sand, fused and worked as glass. One part of cryolite is mixed with two to four parts of quartz or pure sand, thus being a silicate of alumina and soda, containing some fluorine that has not been dissipated during the melting process. The material is easily wrought into any form, and may be readily ground and polished. It is stronger than common glass, and is said to withstand the fire better.

* **fus-ie,** *s.* [A corrupt. of Fr. *fosse.*] A ditch.

"And sall call before thame all suche persones as sall straite these passages, or vther wayes, by casting of ditches and *fusies* throche the same, sall mak thai hie wayis noyesum and trublesum vnto passangeris."—*Acts Jas. VI.*, 1617 (ed. 1814), p. 536.

fūş'-ĭ-form, *a.* [Lat. *fusus* (genit. *fusi*) = a spindle, and *forma* = shape, appearance.]

Bot.: Shaped like a spindle.

* **fūş'-il** (1), * **fūş'-ọl,** *s.* [Fr.; Ital. *focile, fucile*, from Lat. *focillus*, dimin. of *focus* = a hearth.]

Mil.: A firearm or musket, fitted with flint

FUSIL,
With Bayonet of the Seventeenth Century.

and steel. The fusil or firelock superseded the old matchlock musket. It seems to have been of the same length and calibre as, but lighter than the musket.

"A small anonymous Military Treatise, printed in the year 1680, says the *fusil* or firelock was then in use in our army."—*Grose: Military Antiquities*, i. 159.

fūş'-il (2), *s.* [Lat. *fusus* = a spindle.]

Her.: A bearing resembling a lozenge, but differing in being longer in proportion to its breadth. It is named from its somewhat resembling a spindle.

FUSIL.

"*Fusils* must be made long, and small in the middle; in the antient coat of Montague, argent three *fusils* in fesse gules."—*Peacham.*

fūş'-il-ăde, *s.* [Fusillade.]

***fūş'-ile,** * **fūş'-il,** *a.* [Lat. *fusilis*, from *fusus*, pa. par. of *fundo* = to pour, to melt; Fr. & Ital. *fusile.*]

1. Capable of being fused or melted; fusible.

"Some, less skilful, fancy these scapi that occur in most of the larger Gothick buildings of England are artificial: and will have it that they are a kind of *fusil* marble."—*Woodward.*

2. Formed by melting or casting.

"First his own tools; then, what might else be wrought
Fusile, or graven in metal." *Milton: P. L.*, xi. 573.

3. Running or flowing, as melted metals; liquid.

"As iron *fusile* from the furnace flows."
Brome: Battle of the Gods & Titans.

fūş-il-eēr', fūş-il-ĭēr', *s.* [Eng. *fusil* (1); *-ier, -eer.*]

Mil.: A soldier armed with a fusil, as distinguished from a pikeman or archer. The name is still given to several English regiments—the 7th regiment (raised 1685) being known as the Royal *Fusiliers*, the 20th (raised 1679) as the Lancashire *Fusiliers*, the 23rd (raised 1688) as the Royal Welsh *Fusiliers*, &c.

"There he was soon joined by a detachment of two hundred *fusileers*, whom Mackay had sent forward to secure the pass."—*Macaulay: Hist. Eng.*, ch. xiii.

fūş'-il-lāde, * **fūş-il-ād,** *s.* [Fr., from *fusil* = a musket.] A simultaneous discharge, as of firearms; a volley.

"O'er fields and orchards and o'er woodland creste
The ceaseless *fusilade* of terror ran."
Longfellow: The Poet's Tale.

* **fūş'-il lādc,** *v.t.* [Fusillade.] To shoot down by a fusillade.

"That done, *fusillade* them all."—*Carlyle: Life of Sterling*, pt. i., ch. xiii.

fūş-ĭ'-næ, *s.* [Lat. *fusus* (q.v.), and fem. pl. adj. suff. *-inæ.*]

Zool.: A sub-family of Turbinellidæ, now generally merged in Muricidæ.

fūş'-ĭng, *pr. par., a. & s.* [Fuse, *v.*]

A. & B. *As pr. par. & particip. adj.:* (See the verb).

C. *As subst.:* The act of melting, liquefying, or blending.

fusing-point, *s.* The degree of heat at which any substance begins to melt or liquefy.

fū'-şion, *s.* [Fr., from Lat. *fusio* = a melting, from *fusus*, pa. par. of *fundo* = to pour, to melt; Sp. *fusion*; Ital. *fusione.*]

A. *Ordinary Language:*

I. *Literally:*

1. The act of fusing, melting, or rendering liquid by means of heat.

"Common *fusion* in metals is also made by a violent heat."—*Browne: Vulgar Errours*, bk. ii., ch. i.

2. The state of being melted or liquefied by means of heat.

"Masses of matter struck off in a state of *fusion*."—*Paley: Nat. Theology*, ch. xxii.

II. *Fig.:* The act of blending or uniting intimately as melted metals combine; union.

"The saving resulting from the *fusion*, originally estimated by the advocates of that measure."—*Daily Telegraph*, Oct. 26, 1883.

III. *Chem.:* In the same sense as I. 1 (q.v.). Every substance begins to fuse at a certain temperature, which is invariable for each of them if the pressure be constant. Whatever be the intensity of the source of heat, from the moment fusion commences the temperature of the body ceases to rise, and remains constant until the fusion is complete. Some bodies have a definite fusing or melting point, as mercury at — 38.8°; ice, + 0; butter, + 33; phosphorus, + 44; sulphur, + 114; tin, + 228; lead, + 335; zinc, + 422; antimony, + 450; silver, + 1,000; gold, + 1,250; and iron, + 1,500. Some have no definite point of fusion, melting gradually. This is called vitreous fusion. (*Ganot.*)

fū'-şion-lĕss, *a.* [Fibsenless.]

1. Weak, feeble.

2. Insipid, pithless, without substance.

"The wine! there was hardly half a mutchkin, and pnir, thin, *fusionless* skink it was."—*Scott: St. Ronan's Well*, ch. xxxii.

fū-şĭ-spōr'-ĭ-ŭm, *s.* [Lat. *fusus* = spread out, extended, broad, large; and σπόρος (*sporos*) = . . . seed.]

Bot.: A genus of Hyphomycetous Fungi, forming first a mildew and next an extensive gelatinous stratum, with spindle-shaped spores. There are numerous species. *Fusisporium atrovirens* is a destructive mildew on onions; *F. fœni* occurs in orange-red patches many feet wide; and *F. griseum* is common on dead leaves. (*Griffith & Henfrey.*)

* **fū'-sŏme,** *a.* [A.S. *fús* = ready; Eng. suff. *-some.*] Handsome, neat, notable.

fŭss, *v.i. & t.* [Fuss, *s.*]

A. *Intrans.:* To bustle about; to make much ado about nothing.

B. *Trans.:* To disturb with trifling matters.

fŭss, *s.* [A.S. *fús* = ready, quick; Icel. *fuss*; O. H. Ger. *fuus.*] A bustle, a tumult, unnecessary labour; much ado.

"That's the reason of this fawning *fuss*."
Byron: Verses Intended to be Spoken.

fuss-ball, fuzz-ball, *s.* [Fuzzball.]

fŭs'-sĭ-lў, *adv.* [Eng. *fussy; -ly.*] In a fussy bustling, or fidgety manner.

fŭs'-sĭ-nĕss, *s.* [Eng. *fussy; -ness.*] The quality or state of being fussy.

"The homely expression—absence of *fussiness*."—*Miall: Bases of Belief*, pt. iii., § 17.

fŭs'-sle, *v.t.* [Fuzzle.]

fŭs'-sŏck, *s.* [Etym. doubtful.] A large, fat woman.

fŭs'-sў, *a.* [Eng. *fuss; -y.*] Bustling, making a fuss about trifles; attended with fuss or needless bustle.

*** fŭst** (1), *s.* [Fist.]

fŭst (2), *s.* [O. Fr. *fust*, *fût* = a staff, a stave . . . fustiness; Ital. *fusto*, from Lat. *fustis* = a club, a staff.]

1. *Ord. Lang.:* A strong, musty smell, as of a cask; mustiness.

2. *Arch.:* The shaft of a column from the astragal to the capital.

*** fŭst** (3), *s.* [Foist (2), *s.*] A light, fast-sailing vessel.

"The Admirall of Arracan, Marucha, was with his *fust*, taken and slaine."—*Purchas: Pilgrimage*, bk. v., ch. vi.

*** fŭst,** *v.i.* [Fust (2), *s.*] To grow or be fusty or mouldy; to smell ill.

"Gave us not
That capability and godlike reason
To *fust* in us unused." *Shakesp.: Hamlet*, iv. 4.

*** fŭst'-ĕd,** *a.* [Eng. *fust* (2), *s.*] Fusty, mouldy, ill-smelling.

"With a base bargain of his blowen ware
Of *fusted* hops, now lost for loss of sale."
Bp. Hall: Satires, bk. iv., sat. 5.

fŭs'-tĕr-īc, *s.* The yellow colouring matter derived from fustet.

fŭs'-tĕt, *s.* [Fr., Sp., & Port. *fustete*, from Lat. *fustis* = a club, a staff.] The wood of Fustic, 2.

fŭs'-tī-an, * fus-tane, * fus-tī-en, * fus-teyn, * fus-ty-an, *s.* & *a.* [O. Fr. *fustaine*, from Ital. *fustagno*, from Low Lat. *fustaneum*, *fustanium*, from *Fustât*, a name of Cairo in Egypt, whence the stuff first came (*Skeat*); Sp. *fustan*; Fr. *futaine*; Port. *fustão*.]

A. *As substantive:*

1. *Lit. & Fabric:* A kind of coarse twilled cloth, made of cotton, or cotton and linen mixed, and with a pile like velvet, but shorter. Velveteen or velveret are commonly included among fustians, as their manner of manufacture justifies. Corduroy and thickset are also coarser varieties of fustian.

"Of *fustyan* he wered a gepoun."
Chaucer: C. T., Prol. 75.

2. *Fig.:* A high swelling kind of writing; bombast; an inflated or pompous style.

"But if she frown, why farewell she
With all her medley trumpery,
With all her *fustian*, forced conceit,
And limping rhimes, and would-be wit."
H. Berkley: Verses to Cambridge.

B. *As adjective:*

I. *Lit.:* Made of fustian. [A. I.]

II. *Figuratively:*

1. Bombastic; high-swelling; pompous; tumid.

"Virgil, if he could have seen the first verses of the Sylvæ, would have thought Statius mad in his *fustian* description of the statue on the brazen horse."—*Dryden: Dufresnoy.*

2. Using bombastic or pompous language.

"Let *fustian* poets with their stuff be gone."
Dryden: Persius, sat. v.

*** fŭs'-tī-an-īst,** *s.* [Eng. *fustian*; *-ist.*] One who makes use of pompous or bombastic language.

"Amobius or any modern *fustianist*."—*Milton: Apology for Smectymnuus.*

fŭs'-tĭc, *s.* [Fr. & Sp. *fustoc*, from Sp. *fuste* = wood, timber; Lat. *fustis* = a staff, a club.] A name given to certain yellow woods employed in dyeing.

1. *Maclura tinctoria*, a large tree of the Mulberry family (*Moraceæ*), native of the West Indies and tropical America.

2. *Rhus cotinus*, a bushy shrub of the Cashew Nut family (*Anacardiaceæ*), native of Southern Europe, having simple, shining, roundish leaves. Its flowers are in globose heads, which become white and feathery, giving the idea of a head of white hair, hence the name Wig-tree, by which it is sometimes known. It is used in dyeing, and is called in trade Young Fustic, to distinguish it from *Maclura*. The yellow wood of several species of the genus Xanthoxylon is also known by the name of Fustic.

fustic-wood, *s.*

Bot.: The same as Fustic, 1.

*** fŭs'-tĭ-gāte,** *v.t.* [Late Lat. *fustigatus*, pr. par. of *fustigo* = to cudgel; *fustis* = a staff, a club.] To cudgel, to beat with a stick or cudgel; to cane.

"*Fustigating* him for his faults."
Fuller: Worthies; Westmoreland.

*** fŭs-tĭ-gā'-tion,** *s.* [Late Lat. *fustigatus*, pr. par. of *fustigo* = to cudgel; Fr. *fustigation*.] The act of cudgelling; punishment by cudgelling or caning.

"Six *fustigations* or displings about the parish church of Aldborough."—*Fox: Martyrs*, p. 609.

fŭs'-tĭn, *s.* [Eng. *fust(ic)*; *-in* (*Chem.*).]

Chem.: A name given to the yellow colouring matter of *Rhus Cotinus.*

*** fŭs-tĭ-lăr'-ĭ-an,** *s.* [Fusty.] A low fellow; a scoundrel.

"Away, you scullion, you rampallian, you *fustilarian*, I'll tickle your catastrophe."—*Shakesp.: 2 Henry IV.*, ii. 1.

*** fŭs'-tĭ-lŭg, * fŭs'-tĭ-lŭgs,** *s.* [Fusty.] A gross, fat, unwieldy person.

"You may daily see such *fustilugs* walking in the streets, like so many tuns."—*Junius* (1639).

fŭs'-tĭ-nĕss, *s.* [Eng. *fusty*; *-ness*] The quality or state of being fusty; mouldiness; mustiness.

fŭs'-tȳ, *a.* [Eng. *fust*; *-y*; O. Fr. *fusté* = fusty, from *fuste* = a cask.] Mouldy, musty, rank, ill-smelling.

"The *fusty* plebeians hate thine honours."
Shakesp.: Coriolanus, i. 9.

fŭs-ụ-lī'-na, *s.* [From Lat. *fusus* = a spindle.]

Palæont.: A genus of Foraminifera, family Nummulinida. It constitutes almost entire beds of the carboniferous formation in Russia, Armenia, and North America. It is found also in the British carboniferous rocks, and more sparingly in the Permian.

*** fū'-şūre** (ş as **zh**), *s.* [Lat. *fusura*, from *fusus*, pa. par. of *fundo* = to pour out, to melt.] The act of fusing or melting; smelting.

fŭs'-ŭs, *s.* [Lat. = a spindle.]

Zool.: A genus of Gasteropoda, family Muricidæ. Shell, fusiform; canal, long, straight; operculum, ovate curved; nucleus, apical. Known recent species, 184: fossil, 320; these latter, perhaps, from the Bath Oolite, or at least the Gault, to the Eocene. *Fusus* or *Chrysodomus antiquus*, is the Buckie and Roaring Buckie of Scotland. [Buckie.] *Fusus colosseus* and *F. proboscidalis* are of large size.

*** fut, * fute,** *s.* [Foot.]

fut-band, *s.* A guard of foot soldiers.

"Among other demands, they require the abolition of the *fut band*, or guard of infantry, which attended on James."—*Pinkerton: Hist. Scot.*, ii. 260, N.

fute-ale, *s.* A sort of entertainment given to those present, when a woman, who has borne a child, for the first time gets out of bed.

fŭtch'-ĕll, *s.* [Etym. doubtful.]

Carriage: The jaws between which the hinder end of a tongue is inserted; the similar parts in a waggon are called tongue-hounds.

futhork, *s.* [For etym. see def.]

Ethnol.: The Runic alphabet. The name Futhork is applied to all the systems of phonetic signs of the Teutonic stock, for the same reason as those of classical derivation are called "alphabet" or "abecedarium." They occur in the same order in Old German, Gothic, Anglo-Saxon, and Northern Runes, with a nomenclature in all of them borrowed from trees and other familiar natural objects, suggestive of the derivation of the series of phonetic symbols from a primitive system of pictorial writing. The Maeshowe inscriptions, discovered in 1861, render the first six runes, FUPORK.

"The Norse *Futhork* includes only sixteen runes, and these are for the most part simpler than the corresponding signs in the Anglo-Saxon *Futhork*."—*Wilson: Prehistoric Scotland*, ii. 285.

fū'-tile, *a.* [Fr., from Lat. *futilis* = easily poured out; *fundo* = to pour out; Ital. *futile*; Sp. *futil.*]

* 1. Talkative, loquacious, talking over-much.

"As for talkers and *futile* persons, they are commonly vain and credulous withal."—*Bacon: Essays; Of Simulation & Dissimulation.*

2. Trifling, worthless, empty, of no weight or importance.

3. Vain, useless, of no effect.

¶ For the difference between *futile* and trifling, see Trifling.

fū'-tīle-lȳ, *adv.* [Eng. *futile*; *-ly.*] In a futile, trifling, or useless manner.

fu-tĭl-ĭ-tār'-ĭ-an, *s.* [From *futilis*, as *utilitarian* from *utilis.*] One who pursues what is worthless.

"The whole race of Political Economists . . . Utilitarians and *Futilitarians*."—*Southey: The Doctor*, ch. xxxv.

fu-tĭl'-ĭ-tȳ, *s.* [Fr. *futilité*, from *futile* = futile (q.v.); Sp. *futilidad*; Ital. *futilità.*]

* 1. Talkativeness, loquacity, loquaciousness.

"This fable does not strike so much at the *futility* of women, as to the incontinent levity of a prying humour."—*L'Estrange: Fables.*

2. The quality of being futile, trifling, or worthless; worthlessness, emptiness, want of substance or weight.

"He was prepared to show the madness of their declaration of the pretended rights of man, the childish *futility* of some of their maxims."—*Burke: Appeal from the New to the Old Whigs.*

3. Uselessness.

*** fū'-tĭl-īze,** *v.t.* [Eng. *futil(e)*; *-ize.*] To make or render futile; to fritter away.

"The whole soul and essence is *futilized*."—*H. Brooke; Fool of Quality*, i. 213.

*** fū'-tĭl-ous,** *a.* [Futile.] Futile, worthless, trifling.

"Mankind hath an appetite of posthumous memory, which would be senseless, and to no purpose if there be no life but this: now God implants no instincts in his creatures that are *futilous* and in vain; and therefore hence also we may conclude, that there is a future being."—*Glanvill*, ser. 6.

fŭt'-tŏck, *s.* [A corrupt. of *foot*, *hook.*]

Shipwright.: One of the timbers in the compound rib of a vessel. A timber of the dimensions and form for the rib of a vessel cannot be procured in one piece: the rib is built up of pieces scarfed together. The number is according to the length of the sections of the requisite height. They are known as the first, second, and third futtock, terminated by the top-timber. [Frame.]

"Every *futtock* lifts up its dismal creaking and wailing voice."—*Daily Telegraph*, Oct. 9, 1882.

futtock-hoop, *s.*

Naut.: A hoop encircling the mast at a point below the head, and serving for the attachment of the shackles of the futtock-shrouds.

futtock-plank, *s.*

Ship-build.: The first plank of the ceiling next to the keelson; the limber-strake. The first plank of the skin next to the keel is the garboard-strake.

futtock-plate, *s.*

Naut.: An iron plate on the edge of the top, to which the futtock-shrouds and the dead-eyes of the topmast shrouds are secured.

futtock-shrouds, *s. pl.*

Naut.: The short shrouds attached to the chain-necklaces on the mast, and to the sides of the top, by which ascent is had from the principal shrouds to the top.

futtock-stave, *s.*

Naut.: A short piece of rope served over with spun yarn, to which the shrouds are confined at the catharpings.

*** fū'-tūr-a-blc,** *a.* [Eng. *futur(e)*; *-able.*] Possible or likely to occur at some future time.

"Extends not only to things future but *futurable*."
Fuller: Ch. Hist., XI. iii. 51.

fū'-tūre, *a.* & *s.* [Fr. *futur* (m.), *future* (f.), from Lat. *futurus* = about to be, fut. part. of *sum* (pa. t. *fui*) = to be; Sp., Port., & Ital. *futuro.*]

A. *As adjective:*

1. *Ord. Lang.:* That is to be, to come, or happen hereafter; to come.

"Past, present, *future* he beholds."
Milton: P. L., iii.

2. *Gram.:* Expressing or denoting an action or state to happen or come hereafter: as, a *future* tense.

B. *As substantive:*

1. *Ord. Lang.:* Time or times to come: events to happen hereafter; futurity.

"Thy letters have transported me beyond
This ignorant present time; and I feel now
The *future* in the instant."
Shakesp.: Macbeth, i. 5.

2. *Comm.:* A cargo of cotton not yet arrived in port, which often changes hands several times before it is unloaded.

¶ *To deal in futures:* (See extract).

"He *deals in futures*—i.e., speculates in cotton of Stock Exchange folks, or speculates in securities."—*Globe*, Dec. 1, 1882.

future-life, *s.*

I. *Ord. Lang.:* In the same sense as II.

II. *Composition:*

1. *Relig.:* A life to succeed this one; a life beyond the tomb.

(1) *Ethnic faiths:* The belief in a future life is very widely spread, many observers who have denied that it is entertained among certain tribes, indirectly confuting themselves by the facts which they put on record. In its early form no distinction is drawn between the souls of men and brutes; for both another state of existence is reserved. In the lowest form of Animism, a figure of a deceased friend appearing to a survivor in a dream, is supposed to be the actual soul of the person dead, whence faith in another state of existence becomes natural and easy. Two distinct forms of belief now diverge, the one leading in the direction of the transmigration of souls (q.v.), the other maintaining the independent existence of the personal soul after the death of the body. Among the lower races, the moral element in the doctrine of a future life is almost wholly wanting. (*Tylor.*)

(2) *Judaism:* There are but few allusions to a future life in the Old Testament. The most notable one is Dan. xii. 2, 3, in which the doctrine seems to be not simply the immortality of the soul, but the resurrection of the body. [(3).]

(3) *Christianity:* "Jesus Christ," says St. Paul, "hath abolished death, and hath brought life and immortality to light through the gospel" (2 Tim. i.). The doctrine in this case is not merely that of the immortality of the soul, not transmigrated, but retaining its separate individuality [IMMORTALITY]; there is superadded to this the resurrection and transformation of the body. [RESURRECTION.] The moral element in the doctrine of a future life is here all in all.

* **fū'-tūre-lў,** *adv.* [Eng. *future*; *-ly.*] In the future; in time to come; hereafter.

"As for Duncombe's argument of building ships *futurely*, money may be had; the East India Company had it at four per cent. for the prizes."—*Park. Hist. Charles II.* (1673).

fū-tūr-ist, *s.* & *a.* [Eng. *futur(e)*; *-ist.*]

A. *As substantive:*

1. *Ord. Lang.:* One who has regard to the future; an expectant.

2. *Theol.:* One who holds that the greater part of the New Testament prophecy, and even no inconsiderable portion of that in the Old Testament, is still unfulfilled.

"The second of these schools—the *Futurists*—has always been numerically small."—*Farrar: Early Days of Christianity*, ch. xxvii., § 2.

B. *As adj.:* Belonging to, or in any way connected with the school of interpretation described under A. 2.

* **fu-tūr-ĭ'-tial (tial as shal),** *a.* [Eng. *futurity*; *-al.*] Pertaining or relating to futurity; future.

* **fu-tūr-ĭ'-tion,** *s.* [Fr.] The state of being future, as to come, happen, or exist hereafter.

"Is it imaginable that the great means of the world's redemption should rest only in the number of possibilities, and hang so loose in respect of its *futuition*."—*South.*

fu-tūr'-ĭ-tў, *s.* [Eng. *futur(e)*; *-ity.*]

1. The quality or state of being future or to be; futurition.

"The bare possibilities, which never commence into a *futurity*."—*Glanvill: Scepsis Scientifica.*

2. Times to come; the future; future time.

"O sacred maid! inspired to see
The events of things in dark *futurity*."
Dryden: Virgil; Æneid vi. 10.

3. Future events; things to come.

"All *futurities* are naked before that All-seeing Eye, the sight of which is no more hindered by distance of time than the sight of an angel can be determined by distance of place."—*South.*

fūze, *s.* [FUSE, *s.*]

fu-zee' (1), *s.* [FUSEE.]

fu-zee' (2), *s.* [Etym. doubtful.]

Farr.: A kind of splint applied to the legs of horses.

fŭzz, *v.i.* [Onomatopoetic; cf. *fizz.*] To fly off in minute particles.

fŭzz, *s.* [FUZZ, *v.*]

1. Minute, light particles.

2. The same as FUZZBALL (q.v.).

"As touching all the sorts of mushromes, toadstooles, puffes, fusbals, or *fuzzes*, these particulars following are observed."—*P. Holland: Plinie*, bk. xix., ch. iii.

fŭzz'-bâll, * **fus-bal, fuss-ball,** *s.* [Eng. *fuzz*, and *ball.*]

I. *Bot.:* Lycoperdon, a genus of fungals, especially *L. Bovista.*

* 2. *Fig.:* An empty-headed fellow.

"Why, you empty *fuzzballs*, your heads are full of nothing else but proclamations."—*Dryden: Troilus & Cressida*, ii. 3.

* **fŭz'-zle,** * **fusle,** *v.t.* [A frequent. from *fuzz* (q.v.); cf. *fuddle.*] To fuddle, to intoxicate.

"My fine scholler was so *fusled*, that he no sooner was laid in bed, but he fell fast asleep."—*Burton: Anatomy of Melancholy*, p. 600.

fŭz'-zў, *a.* [Eng. *fuzz*; *-y.*] Light and spongy; consisting of light and loose particles.

"The thin membrane, or the inward and something soft and *fuzzy* pulpe it contains."—*Dr. H. More: Appendix to the Antidote*, ch. x.

-fў, *suff.* A verbal suffix, representing the Fr. *-fier* and Lat. *fio*, passive of *facio* = to make. It expresses the act of causing some thing to assume the form or state denoted by the word to which it is added.

fў, *interj.* [FIE.] An exclamation of disgust, disapprobation, contempt, or dislike.

fўke (1), *s.* [Etym. doubtful.] A bag-net, open at one end, so as to allow fish to enter, but opposing their exit.

fўke (2), *s.* [FIKE.]

fўke, *v.i.* [FYKE (2), *s.*] To bustle about; to be fussy or fidgetty.

"Should ever daur to crook a hough to *fyke* and fling."—*Scott: Heart of Midlothian*, ch. x.

fўle, *v.t.* [A.S. *fýlan.*] [FILE, *v.*] To soil, to dirty, to foul.

"And curses feet that *fyled* his shins,
Anither sighs and prays."
Burns: Holy Fair.

fўl'-fŏt, *s.* [Etym. doubtful. A correspondent of *Notes & Queries* (V. x. 437) suggests that *fylfot* may be a corruption of O. Eng. *fuel*, or A.S. *fugel* = fowl and A.S. *fot* = foot, and so = bird-foot; and that the symbol represented in the Northern nations the beneficent footprints of Swan-maidens (q.v.). Cf. Grimm's *Deutsches Wörterbuch*, s.v. *Drudenfusz.*]

Comparative Religions:

1. *Ethnic:* This symbol, like the cross of which it is in all probability a modification, is confined to no one religion, but is common to the great majority. In India the well-known sign of the fylfot is the Swastika of the Buddists; in Greece we find it as stamped on coins and painted on urns; on the breast of an Etrusean sphinx it assumes a shape like the arms of Man, with a fourth leg added; four different forms of it are found on as many cinerary urns discovered under a bed of volcanic tufa on the Alban Mount; again we meet with it as the cruciform hammer of Thor, and sculptured on Runic monuments. In some of its forms it resembles the *crux ansata* of the Egyptians, and it was in use among the early inhabitants of South America. When the fylfot occurs in Asia Minor, Greece, Etruria, or Latium, it is probably connected with some system of phallic worship; but it has not, in all cases, a religious significance. Greenwell, speaking of pottery ornamented with crosses found in British barrows, considers this pattern to be the natural result of dividing a given space into four equal parts, though in one case, he says, the marking "almost assumes the form of the fylfot." Dawkins (*Early Man in Britain*) figures pottery marked with this emblem, and says of the pottery of the late Bronze Age in France, that "sometimes it is ornamented . . . with the mystic fylfot" (p. 389).

2. *Christian:* [GAMMADION].

* **fўne,** *v.* [FINE, *a.*]

* **fўt,** * **fytt,** * **fytte,** *s.* [FIT, *s.*]

* **fyyre,** *s.* [Mid. Eng. *fyyre* = fire.] The Star-thistle. (*Prompt. Parv.*) (*Britten & Holland.*)

G.

G, the seventh letter and fifth consonant of the English alphabet, is formed by arching the tongue against the hinder part of the roof of the mouth, then lowering the tongue and giving utterance to voice. *G* has two sounds in English, one *hard* before *a*, *o*, *u*, as in *gate*, *go'l*, *gun* (except in *gaol*), and when initial, always before *e* and *i* in all words of English origin, as in *get*, *give*, and when final, as in *bag*; as also before the consonants *l* and *r*, as in *glove*, *grove*; the second sound of *g* is *soft*, and is a palatal sound like *j*. This second sound of *g* was unknown in Anglo-Saxon. It is the voiced sound corresponding to the breathed sound of *ch* as in *church*. It is the sound which *g* has commonly before *e*, *i*, and *y*, as in *gem*, *gin*, *gymnastics*. *G* is silent before *n*, as in *gnat*, when at the beginning of a word, and at the end of a word it generally serves to lengthen the vowel, as in *benign*. In form *G* is a modification of *C*, which in the Roman alphabet had the same power. The A.S. *g* is in many words now represented by *y*, as in *may* (verb), *way* (A.S. *wega*), or *w*, as in *law* (A.S. *lagu*), *dawn* (A.S. *dagian*). Sometimes it has been softened down to *a*, *e*, or *i*, as in *alike* (A.S. *gelic*), *enough* (A.S. *genoh*), *handiwork* (A.S. *handgeweorc*). Sometimes it is lost in the root, and makes its appearance in the derivative, as in *dry* and *drought*, *slay* and *slaughter*, &c. From some words it has disappeared altogether, as in *if* (A.S. *gif*), *icicle* (A.S. *isgicel*), &c. It has been softened to *ge* (= *j*), as in *cringe* (A.S. *cringan*), and to *ch* in *orchard* (A.S. *ortgeard*). In Romance words *g* often disappears, as in *master* (Lat. *magister*). It has crept into some words (generally from false analogy), as in *sovereign*, *foreign* (O. Fr. *soverain*, *forain*). *Ec*, *Eg* has often become *ge* (= *j*), as in *edge* (A.S. *ecg*, *egg*). *Gh* has a guttural sound, as in *lough*, the sound of *f*, as in *tough*, and in many words is not sounded, as in *bright*, *plough*.

G, as a symbol, is used—

1. *In numerals:* For 400, and with a dash over it, $\bar{G}$, for 40,000.
